5. Comments are also solicited concerning the adequacy of the data currently required for the co-ordination and notification of terrestrial and space frequency assignments as set forth in Appendices 1, 1A and 1B of the international Radio Regulations. It should be realized that when frequency assignments are registered internationally pursuant to the procedures of Articles 9 and 9A, this data is the basis for determining the international status of those assignments and is published by the International Telecommunication Union (ITU) in the form of a list (International Frequency List) for use by administrations in their frequency management activities.

6. The ITU publishes a number of lists, as shown in Appendix 4 to this Notice, which are derived from much of the data obtained through the procedures of Articles 9 and 9A. List I is the International Frequency List (already mentioned) and is of primary interest to administrations. List II through VIIIA relate to specific services and contain information of interet to those operating stations in these services. The Commission therefore solicits comments from those receiving these publications with regard to their usefulness in their present form; should they be improved or are they not needed? If improvements are desired, what are they and how would they best be incorporated into these publications? The Commission believes that Lists IIIA and IIIB relating to HF Broadcasting no longer serve a useful purpose and is therefore proposing that they be discontinued for the reasons set forth in the Fifth Notice in this proceeding.

7. In addition to the procedural provisions of the Radio Regulations, there are several related technical matters which impact Article 9A. For example, the maximum interference level in a telephone channel of the Fixed-Satellite Service would be raised to 1500 pWOp (pw, psophometrically weighted) or 2000 pWOp if revised CCIR Recommendation 466 (attached Appendix 2) is adopted by the CCIR XIV Plenary Assembly. This relaxation of the maximum total interference level would permit the placement of more satellites in orbit. Individual satellite capacity would be slightly reduced; however, overall orbit efficiency would increase. Comments on the advisability of incorporating into the International Radio Regulations a CCIR draft recommendation (attached Appendix 3), which specifies the maximum interference level in a telephone channel of the Fixed-Satellite Service using digital emission, and Recommendation 466 are requested.

8. In response to the Fourth Notice of Inquiry of this proceeding, several parties have commented on the permissible level of interference into a satellite from another satellite. The single entry level could be independent of the orbital separation or could be a function at the orbital separation subject to a 400 pWOp maximum. Another possibility would have satellites of like characteristics clustered together with interference into another satellite specified as some equitable function of orbital separation; satellites which are grouped irrespective of characteristics could have an interference level into unlike satellites limited to 400 pWOp regardless of orbital separation. Further comments are invited on this subject, particularly concerning the interference from one satellite into another and its variation with orbital separation and satellite characteristics. New ideas and thoughts, rather than a repetition of material already submitted in this docket are invited.

9. Appendix 28 of the International Radio Regulations prescribed the procedures for determining of the co-ordination area around an earth station sharing frequency bands with terrestrial services. This procedure is fairly complex and time consuming. There are cases where this procedure may be overly complex and where more simplified procedures might be applied. For example, for reception of video signals, reception of a satisfactory signal can be based on a desired carrier to interference (C/I) ratio. This simplifies calculations and results in a smaller co-ordination area. Rainfall can disperse signals, and there are procedures which determine the co-ordination distance for rain-scatter. In ares where there is sufficiently small precipitation and for emissions which can tolerate interference for more than .01 percent of the time, the rain-scatter co-ordination might be omitted. Also, there are situations when it may be necessary to move an earth station from place to place and to operate it at fixed locations only. Although the locations cannot be precisely identified in advance, the operational area of the earth station could be specified in advance. In such cases, an earth station may be co-ordinated, in advance, with all terrestrial stations located within the area under consideration. This could be called an "area co-ordination". Comments are thus solicited on simplified procedures which might be less burdensome, particularly for such systems as low capacity earth stations, and would still result in reasonable protection of both earth and terrestrial station frequency assignments.

10. Comments are solicited regarding possible changes to Appendix 29 of the International Radio Regulations, "Method of Calculation to Evaluate the Degree of Interference between Geostationary Satellite Networks Sharing the Same Frequency Bands." Some confusion concerning the purpose of this Appendix has resulted and may be attributed, in part, to its title which is perhaps misleading. Since the purpose of the calculation is only to serve as a "trigger" for determining when the co-ordination procedures of Article 9A should be initiated, it may be more accurate if the title were modified to read "Method for Determining When Co-ordination is Required Between Geostationary Satellite Networks Sharing the Same Frequency Bands." Some have expressed the view that the 2 percent increase in noise temperature criterion set forth in this Appendix is too stringent and results in the initiation of co-ordination in an unnecessarily large number of cases. Others feel that this calculation does not adequately protect some of the sensitive low capacity systems and have suggested that a satellite orbital separation angle of about 15 degrees should determine when detailed co-ordination sould be initiated for these systems. Further thoughts and ideas on establishing a new criterion or set of criteria for the purpose of determining when the international co-odination procedures should be initiated for the variety of satellite systems to be employed over the next twenty years are desired.

11. Pursuant to applicable procedures set forth in § 1.415 of the Commission's Rules, interested persons may file comments on or before June 9, 1978, and reply comments on or before June 23, 1978. All relevant and timely comments and reply comments, along with any pertinent information which we may have available, will be considered. When commenting, it sould be borne in mind that this effort is directed toward international and not domestic issues.

12. Although § 1.419 of the Commission's Rules requires that an original and five copies of all statements, briefs or comments be filed in response to a Notice, our conference preparatory organization necessitates the filing of an original and nineteen copies. All responses received will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C.

13. This Notice is issued pursuant to the authority set forth in section 4(I) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i).

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

APPENDIX 1—DRAFT PROPOSALS FOR ARTICLES 9 AND 9A OF THE INTERNATIONAL RADIO REGULATIONS

ARTICLE 9

NOC

Notification and Recording in the Master International Frequency Register of Frequency Assignments[1] to Terrestrial Radiocommunication Stations[2]

NOC

Section I. Notification of Frequency Assignments and Co-ordination Procedure to be Applied in appropriate Cases

NOC

Footnote 1 and Footnote 2.

Reason: These provisions are time-proven and meet foreseeable needs.

NOC 486, 486.1, 486.2

NOC 487 through 492A, 492A.1

Reason: These provisions are time-proven and meet foreseeable needs.

MOD 492B

An administration with which co-ordination is sought under No. 492A shall acknowledge receipt of the coordination data immediately by telegram. If no acknowledgement is received within fifteen days of dispatch, the administration seeking co-ordination may dispatch a telegram requesting acknowledgement of receipt of the co-ordination data, to which the receiving administration shall reply. Upon receipt of the co-ordination data an administration shall promptly examine the matter with regard to interference[1] which would be caused to the services rendered by its earth stations operating in accordance with the Convention and these Regulations (*especially the Table of Frequency Allocations*) or to be so operated within the next three years, with the proviso that in this latter case coordination specified in No. 639AN has been effected or that the coordination procedure has already been initiated; and shall, within an overall period of sixty days from dispatch of the co-ordination data, either notify the administration requesting coordination of its agreement to the proposals or, if this is not possible, indicate the reasons therefor and make such suggestions as it may be able to offer with a view to a satisfactory solution of the problem.

Reason: To align with the provisions of Nos. 501 and 639BM.

492B.1

[1]The criteria to be employed in evaluating interference levels shall be based upon relevant C.C.I.R. Recommendations or, in the absence of such Recommendations, shall be agreed between the administrations concerned.

NOC 492C through 492FC

Reason: These provisions are time-proven and meet foreseeable needs.

ADD *492FCA*

The time limits set forth in Nos. MOD 492B, 492D and 492FC may be extended only where the concurrence of the administration seeking coordination has been secured.

Reasons: To provide for an extension where a genuine need may exist without running the risk of contravening the letter of the Radio Regulations, and to preclude an extension should the administration seeking coordination not agree thereto.

NOC 492G through 492GB

Reason: These provisions are time-proven and meet foreseen needs.

NOC 493 through 496

Reason: These provisions are time-proven and meet foreseeable needs.

MOD 497

Upon receipt of a complete notice, the Board shall include the particulars thereof, with the date of receipt, in a weekly circular sent by airmail to Administrations. Members [and Associate Members] of the Union; this circular shall contain the particulars of all such notices received since the publication of the previous circular.

Reason: Editorial.

NOC 498 through 539

Reason: These provisions are time-proven and meet foreseeable needs.

MOD 540

The provisions of Nos. 537 to 539 do not apply to frequency assignments which are in conformity with the Allotment Plans appearing in Appendices 25 Mar. 2, 26, [and] 27 *and 27 Revised* to these Regulations; such frequency assignments shall be entered in the Master Register on receipt of the notice by the Board.

Reason: To take cognizance of the Final Acts of the 1978 World Administrative Radio Conference for the Aeronautical Mobile (R) Service.

NOC 541

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

SUP 541.1

Reason: Consequential to suppression of Resolution Mar 2-12.

NOC 542 through 546

Reason: These provisions are time-provisions are time-proven and meet foreseeable needs.

NOC 547

NOTE.—SEE No. 541.

SUP 547.1

Reason: Consequential to suppression of Resolution Mar 2-12.

NOC 548 through 551

Reason: These provisions are time-proven and meet foreseeable needs.

NOC 552

NOTE.—See No. 541.

NOC 553 through 560

Reason: These provisions are time-proven and meet foreseeable needs.

NOC 561

NOTE.—See No. 541.

NOC 562 through 570AC

Reason: These time-proven provisions meet foreseeable needs.

MOD 570AD

(c) where appropriate, with respect to the probability of harmful interference to the service rendered by an earth receiving station for which a frequency assignment already recorded in the Master Register *either*

(i) *bears a favorable finding*, or

(ii) *lacks a favorable finding although it* is in conformity with the provisions of No. 639BM, and [if] the corresponding frequency assignment to the space transmitting station has not, in fact, caused harmful interference to any frequency assignment in conformity with No. 501 or 570AB, as appropriate, previously recorded in the Master Register.

V 4 3 — 8 5 M Y 2 7 8 UMI

Reason: See reason for MOD 639BQ.

NOC 570AE through 570AL

NOC 570AN through 570BH

NOC 571, 572

NOC 573

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

NOC 574, 575

NOC 576, 577

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

Reason: These provisions are time proven and meet foreseeable needs.

SUP 577.1

Reason: We are proposing suppression of Resolution No. Mar 2-12.

NOC 578 through 581

NOC 582

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

Reason: These provisions are time proven and meet foreseeable need.

SUP 582.1

Reason: We are proposing suppression of Resolution No. Mar 2-12.

NOC 583 through 586

NOC 587

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

NOC 588 through 599

NOC 600

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

NOC 601, 602

NOC 603

NOTE.—This and other provisions may require editorial adjustment if Article 5 is changed.

NOC 604 through 625

Reason: These provisions are time proven and meet foreseeable needs.

MOD 626

(c) In cases where, due to harmful interference, two or more frequencies of the same [megacycle] *megahertz* order are being used alternately to maintain communication on a circuit requiring only one frequency of that order; and

Reason: Editorial.

NOC 627 through 638

Reason: These provisions are time proven and meet foreseeable needs.

MOD 639

§ 51. In case a Member [or Associate Member] of the Union avails itself of the provisions of Article 50 of the Convention, the Board shall, upon request, make its records available for such proceedings as are prescribed in the Convention for the settlement of international disputes.

Reason: Editorial.

ARTICLE 9A

Co-ordination, Notification and Recording in the Master International Frequency Register of Frequency Assignments[1] to Radio Astronomy and Space Radiocommunication Stations except Stations in the Broadcasting-Satellite Service.

NOC

Footnote 1.

NOC

Section I. Procedure for the Advance Publication of Information on Planned Satellite Systems.

NOC 639AA through 639AH

Reason: These provisions are time-proven and meet foreseeable needs as drafted.

MOD 639AI

An administration on behalf of which details of planned satellite networks in its system have been published, in accordance with the provisions of Nos. 639AA to 639AC, shall periodically inform the Board whether or not comments, *envisioned by the provisions of No. 639AD,* have been received and of the progress made, with other administrations, in resolving any difficulties. The Board shall publish this information in a special section of its weekly circular and shall also, when the weekly circular contains such information, so inform all administrations by circular telegram.

Reason: To remove any ambiguity as to what comments are to be made known to the Board. For example, there would appear to be no useful purpose served by an administration's informing the Board that another administration had advised that it had no comment.

NOC

Section II. Co-ordination Procedures to be applied in appropriate Cases.

MOD 639AJ

Before an administration notifies to the Board or brings into use any frequency assignment to a space station on a geostationary satellite or to an earth station that is to communicate with a space station on a geostationary satellite, it shall effect coordination of the assignment with any other administration whose assignment in the same band for a space station on a geostationary satellite or for an earth station that communicates with a space station on a geostationary satellite is recorded in the Master Register *with a finding favorable with respect to No. 639BM as a minimum,* or has been coordinated or is being coordinated under the provisions of this paragraph. For this purpose, the administration requesting coordination shall send to any other such administration the information listed in Appendix 1A.[1]

Reason: To preclude the possibility that any assignment to a geostationary system which is proposed to be in accordance with ther Convention, the Table of Frequency Allocations and the other provisions of the Radio Regulations except those relating to the probability of harmful interference need be coordinated with an administration having an assignment to a geostationary space system which is *not* in accord with the Convention, the Table of Frequency Allocations and/or the other provisions of the Radio Regulations.

ADD 639AJ.1

[1] *Where coordination is requested for a space station assignment, the administration shall supply the information listed in Sections B and C of Appendix 1A for a typical earth station if coordination is not being simultaneously requested for the earth stations to communicate with the space station.*

Reason: Interference calculations with respect to inter-satellite interference needed to effect coordination of a space station frequency assignment can not be done without the earth station parameters listed in Sections B and C of Appendix 1A.

MOD 639AK

(2) No co-ordination under No. 639AJ is required:

(a) when the use of a new frequency assignment will cause, to any service of another administration, an increase in the noise temperature of any space station receiver or earth station receiver, or an increase in the equivalent satellite link noise temperature, as appropriate, not exceeding the predetermined increase of noise temperature calculated in accordance with the method given in Appendix 29; [or]

(b) when an administration proposes to change the characteristics of an existing assignment in such a way as will, in respect of any service of another administration, meet the requirements of sub-paragraph (a) above, or, where this assignment has previously been coordinated, will cause an increase in [noise temperature] *the level of interference* not exceeding the value agreed during coordination; or

(c) *when an administration proposes to add a new earth station to an existing satellite network for which coordination has already been successfully effected pursuant to No. 639AJ and the assignment will not cause an increase in the level of interference which exceeds the value agreed during coordination.*

Reason: (1) As a practical matter, coordination agreements are not based on increases in noise temperature, which is a trigger to determine when coordination is required between space systems, but on interference levels or other operating parameters such as which frequencies are used by particular types of carriers.

(2) As a satellite network grows with the addition of new earth stations, it should not be necessary to coordinate each station under No. 639AJ if the technical parameters or potential interference levels are within the limits agreed to during the initial coordination of the network.

NOC 639AL through 639AM

Reason: These provisions are time-proven and meet foreseeable needs as drafted.

NOC 639AN.1, 639AN.2

Reason: The basis for updating these provisions and/or expanding them does not exist as yet. (See narrative paragraph 9.)

NOC 639AO, 639AO.1

NOC 639AP, 639AP.1

Reason: The basic provisions are time-proven and appear to meet foreseeable needs adequately. No basis now exists to amend the footnotes to the basic provisions.

NOC 639AQ through 639BH, 639BF.1

Reason: These provisions are time-proven and appear to meet foreseeable needs.

MOD 639BI

Upon receipt of a complete notice, the Board shall include the full particulars thereof, with the date of receipt, in the weekly circular referred to in No. 497, which shall contain the particulars of all such notices received since the publication of the previous circular.

Reason: To ensure that all ancillary details forwarded to the Board as part of a complete notice are included in the weekly circular referred to in No. 497.

NOC 639BJ through 639BL, 639BF.1

Reason: These provisions are time-proven and meet foreseeable needs.

NOC 639BM through 639BO

Reason: These provisions are in many respects analogous to Article 9 procedures which are entirely satisfactory, and in and of themselves time-proven, and will continue to meet future needs.

MOD 639BP

(d) where appropriate, with respect to the probability of harmful interference to the service rendered by a space radiocommunication station for which a frequency assignment already recorded in the Master Register *either bears a favorable finding or* is in conformity with the provisions of No. 639BM if this frequency assignment has not in fact caused harmful interference to any frequency assignment in conformity with No. 639BM previously recorded in the Master Register;

Reason: Same as for No. 639BQ.

MOD 639BQ

(e) where appropriate, with respect to the probability of harmful interference to the service rendered by a terrestrial radiocommunication station for which a frequency assignment already recorded in the Master Register *either bears a favorable finding or* is in conformity with the provisions of No. 501 or 570AB, as appropriate, if this frequency assignment has not, in fact, caused harmful interference to any frequency assignment in conformity with No. 639BM previously recorded in the Master Register;

Reason: As presently drawn, these provisions would preclude an existing space (639BP) or terrestrial (639BQ) operation which has received an entirely favorable finding and has been recorded in the MIFR from consideration by the Board as a possible recipient of harmful interference from the station or system(s) subject of the notices in hand if the recorded operation had at any time caused harmful interference. This irrational circumstance does not parallel those analogous Article 9 provisions which date from not later than 1959. Later, the modified provisions above are thought to have been the intent of the WARC-ST, 1971. (Note: No. 570AD, also written by the WARC-ST, is similarly defective, does not date from 1959 or earlier, and must be similarly amended.)

NOC 639BR

Reason: This provision is time-proven and appears to meet foreseeable needs.

NOTE.—With reference to the two immediately preceding proposals, 639BR does not require that the existing terrestrial radiocommunication station never have been the source of harmful interference for protection to accrue. This circumstance would tend to lend support to the immediately preceding Reason.

NOC 639BS through 639CD

Reason: These provisions are time-proven and appear to meet foreseeable needs.

Where the Board finds that either of the co-ordination procedures mentioned in Nos. 639BN and 639BO has not been applied, and the notifying administration requests the Board to effect the required co-ordination, the Board shall take appropriate action and shall inform the administrations concerned of the results obtained. If the Board's efforts *toward securing agreement* are successful, the notice shall be treated in accordance with No. 639CD. If the Board's efforts *toward securing agreement* are unsuccessful, the notice shall be examined by the Board with respect to the provisions of Nos. MOD 639BP, MOD 639BQ and 639BR, as appropriate.

Reason: To preclude the possibility that an administration might interpret the Board's having received a response, as opposed to the Board's having received a favorable response, as the satisfactory culmination of the co-ordination process, thereby perhaps leading to a protracted situation in respect to determining the status of the entry once it reaches the Master Register.

NOC 639CF through 639CX

Reason: These provisions are time-proven and appear to meet foreseeable needs.

MOD 639CY

If, within thirty days after the projected date of bringing into use, the Board receives confirmation from the notifying administration of the date of putting into use, the special symbol shall be deleted from the Remarks column. [In the case where the Board,] [i] *In* the light of a request from the notifying administration received before the end of the thirty-day period, *the Board shall grant an extension of this period not to exceed 120 days. In the case where an administration requests an extension longer than 120 days and the Board* finds that exceptional circumstances warrant *such* an extension of this period, the extension shall in no case exceed *a total of 500 days from the original projected date of bringing into use* [one hundred and fifty days].

Reason: Unforeseen circumstances involving booster failures, launch windows, weather conditions, labor strikes, and the like may result in delays of many months before a successful launch takes place.

NOC 639CZ through 639DN

Reason: These provisions are time-proven and meet foreseeable needs.

MOD 639DO

Whenever it appears to the Board from the information available that a recorded assignment has not been brought into regular operation in accordance with the notified basic characteristics, [or] is not being used in accordance with those basic characteristics or *has been in use for a period or not less than five years without the Board having received reconfirmation from the notifying administration that the assignment is in regular use with the basic characteristics unchanged,* the Board shall consult the notifying administration and, subject to its agreements, shall [either] cancel, [or] suitably modify or *confirm the basic characteristics of* the entry.

Reason: To provide for automatic review of space radiocommunication entries in the Master International Frequency Register. This will tend to eliminate entries which might not otherwise appear to the Board to be inactive and will tend to keep entries accurate.

NOC 639DP through 639DW

Reason: These provisions are time-proven and meet foreseen needs.

MOD 639DX

In case a Member [or Associate Member] of the Union avails itself of the provisions of Article 50 of the Convention, the Board shall, upon request, make its records available for such proceedings as are prescribed in the Convention for the settlement of international disputes.

Reason: Editorial.

APPENDIX 2

WORKING GROUP 4-C

DRAFT REVISION OF RECOMMENDATION 466-1 (REV. 76)

MAXIMUM LEVEL OF INTERFERENCE IN A TELEPHONE CHANNEL OF A GEOSTATIONARY SATELLITE NETWORK IN THE FIXED-SATELLITE SERVICE EMPLOYING FREQUENCY MODULATION WITH FREQUENCY-DIVISION MULTIPLEX, CAUSE BY OTHER NETWORKS OF THIS SERVICE

(Draft Study Programme 2J-1/4 (Rev. 76))

The CCIR,

CONSIDERING

(a) That geostationary-satellite networks in the fixed satellite service operate in the same frequency bands;

(b) That interference between networks in the fixed satellite service contributes to the noise in the network;

(c) That it is desirable that the interference noise in the telephone channels of networks in the fixed satellite service caused by transmitters of different networks in that service should be such as to give a reasonable orbit utilization efficiency;

(d) That the overall performance of a network should essentially be under the control of the system designer;

(e) That it is necessary to protect a network in the fixed satellite service from interference by other such networks;

(f) That it is necessary to specify the maximum permissible interference power in a telephone channel, to determine space-station and earth-station characteristics;

(g) That the value selected for the maximum permissible single entry of interference noise should not result in too wide a minimum orbital spacing;

(h) That for coordination between two satellite networks, it is necessary to know the maximum permissible level of interference in a telephone channel of the wanted network caused by transmitters of the other network;

(j) That networks in the Fixed-Satellite Service may receive interference both into the space-station receiver and into the earth-station receiver;

(k) that the mean interference noise power should be an appropriate fraction of the total noise power permitted in the hypothetical reference circuit;

(l) That in many cases the largest interference contributions to a geostationary-satellite network will be from the networks using geostationary satellites nearby in orbit and serving an overlapping coverage area and the value of interference from any other network will generally be less;

(m) that the accumulation of interference from many entries from other satellite net-

V 4 3 — 8 5

works and from terrestrial stations is not likely to be equal to the arithmetic sum of the individual interference entries at their maximum value across the band, and the total interference noise level in any single channel may be significantly less;

(n) That the levels of interference between geostationary-satellite networks in the fixed satellite service operating in frequency bands below 10 GHz are not expected to exhibit a large variation with time;

RECOMMENDS

1. That different geostationary-satellite networks in the fixed satellite service operating in the same frequency bands, below 10 GHz, be designed in such a manner that the interference noise power at a point of zero relative level in any telephone channel of a hypothetical reference circuit of a network in the fixed satellite service, employing frequency modulation, caused by the aggregate of the earth-station and space-station transmitters of other networks, should not exceed:

1.1 In frequency bands in which the network does not practice frequency re-use; 2,000 pW, psophometrically weighted one minute mean power for 20% of any month;

1.2 In frequency bands in which the network practices frequency re-use; 1,500 pW, psophometrically weighted one minute mean power for 20% of any month;

2. That the maximum level of the interference noise power at a point of zero relative level in any telephone channel of the hypothetical reference circuit of a geostationary satellite network in the Fixed-Satellite Service employing frequency modulation, caused by the transmitters of another network, should not exceed 400 pW, psophometrically weighted one minute mean power, for more than 20% of any month;

3. That the maximum level of interference noise power caused to that network should be calculated on the basis of the following values for the receiving earth station antenna gain in a direction at an angle θ (in degrees) referred to the main beam direction:

$$G = 32 - 25 \log \theta \text{ (dB) } 10 < 48$$

$$G = -10 \text{ (dB) } 48 \theta 0 180$$

except when the actual gain is known and is less than the above value, in which case the actual value should be used.

4. That the following Notes should be regarded as part of this Recommedation:

NOTE 1.—The values quoted in §§ 1.1 and 1.2 do not apply to networks for which an advance publication has been submitted to the IFRB by the time of the XIVth Plenary Assembly; for such networks the aggregate interference power in any telephone channel should not exceed 1,000 pW psophometrically weighted one minute mean power for 20% of any month.

NOTE 2.—Only a small fraction of the channels of a network will experience the maximum value of interference from any single network and therefore the aggregate level for many channels will be less than the totals contained in § 1. System designers may provide for a lower value in their noise budgets for a large portion of the spectrum. The way in which the aggregate values are to be taken into account in the general noise objectives for networks in the Fixed-Satellite Service is defined in Note 8 of draft Recommendation 353-2 (Rev. 76).

NOTE 3.—In some cases it may be necessary to limit the single entry value to less than the value quoted in § 2 above in order that the total value recommended in § 1 may not be exceeded. In other cases, particularly in congested arcs of the geostationary satellite orbit, administrations may agree bilaterally to use higher single entry interference value than those quoted in § 2 above, subject to evidence being available that the aggregate value recommended in § 1 is not exceeded.

NOTE 4.—There is a need for urgent study to be given to means of increasing the single entry interference level quoted in § 2 above without causing the total interference noise level to exceed the values quoted in § 1; this study should include, for example, the feasibility of reconciling the inhomogeneity of satellite signals which interfere with one another.

NOTE 5.—There is an urgent need for study of the acceptability of an increase in the maximum total interference noise values recommended in § 1 and more particularly that given § 1.2 for satellite networks in which frequency re-use is practised.

NOTE 6.—In segments of the geostationary satellite orbit not likely to be crowded, interference allowances less than those recommended in § 1 above, may be utilized, allowing a corresponding increase in other noise contributions within total acceptable noise limits.

WORKING GROUP 4-C

DRAFT REVISION OF RECOMMENDATION 466-1 (REV. 76)

MAXIMUM LEVEL OF INTERFERENCE IN A TELEPHONE CHANNEL OF A GEOSTATIONARY SATELLITE NETWORK IN THE FIXED-SATELLITE SERVICE EMPLOYING FREQUENCY MODULATION WITH FREQUENCY-DIVISION MULTIPLEX, CAUSED BY OTHER NETWORKS OF THIS SERVICE

(Draft Study Programme 2J-1/4 (Rev. 76))

(a) In §(n), the text should begin "that the levels of interference* * *".

(b) In § 1, the sixth line of the English text (and as appropriate in the French and Spanish texts) should be amended to read "* * * earth-station and space-station transmitters of other *fixed-satellite* networks, * * *".

(c) In § 2, the fourth line of the English text (and as appropriate in the French and Spanish texts) should be amended to read "* * * caused by the transmitters of another *fixed-satellite* network, * * *".

(d) In Note 1, the beginning of the text should be amended to read "The values quoted in §§ 1.1 and 1.2 do not apply to networks for which *a complete* advance publication * * *".

(e) In Note 3, the last two lines should be amended to read "* * * higher single entry interference values than those quoted in § 2 above, but any interference noise power in excess of the value recommended in § 2 should be disregarded in calculating whether the total value recommended in § 1 is exceeded".

(f) In Note 4, the second half of the sentence should be amended to read "this study should include, for example, the feasibility of *overcoming problems of interference which result from inhomogeneous network parameters.*"

(g) In Note 5, the second line of the English text (and as appropriate in the French and Spanish texts) should be amended to read "* * * interference noise values recommended* * *".

APPENDIX 1

WORKING GROUP 4-C

DRAFT NEW RECOMMENDATION

MAXIMUM PERMISSIBLE LEVELS OF INTERFERENCE IN A GEOSTATIONARY-SATELLITE NETWORK IN THE FIXED-SATELLITE SERVICE USING 8-BIT PCM ENCODED TELEPHONY CAUSED BY OTHER NETWORKS OF THIS SERVICE

(Study Programme 2J-1/4)

The CCIR,

CONSIDERING

(a) That geostationary-satellite networks in the Fixed-Satellite Service operate in the same frequency bands;

(b) That interference between networks in the Fixed-Satellite Service degrades the bit error-rate performance relative to its value in the absence of frequency sharing;

(c) That it is desirable that the bit-error-rate in networks in the Fixed-Satellite Service caused by transmitters of different networks in that service should be such as to give a reasonable orbit utilization efficiency;

(d) That the overall performance of a network should essentially be under the control of the system designer;

(e) That it is necessary to protect a network in the Fixed-Satellite Service from interference by other such networks;

(f) That it is necessary to determine the maximum permissible interfering radio frequency power in a satellite system to establish space-station and earth-station characteristics such as required protection ratios and minimum orbital spacing;

(g) That networks in the Fixed-Satellite Service may receive interference both into the space-station receiver and into the earth-station receiver;

(h) That it is desirable that the increase in bit error-rate due to interference from other satellite networks should be a controlled fraction of the total bit error-rate as set out in draft Recommendation AA/4;

(j) That where adjacent satellites serve networks with similar characteristics the largest interference contributions to a geostationary-satellite network will be from the networks using those adjacent satellites; but this may not be true where network characteristics are inhomogeneous;

(k) That the levels of interference between geostationary-satellite networks in the Fixed-Satellite Service below 10 GHz are not expected to exhibit a large variation with time and under these conditions it is preferable to define the permissible interference limit as a fraction of the pre-demodulator noise power, as this allows multiple interference entries to be superimposed on each other on the basis of RF power addition:

RECOMMENDS

1. That networks in the Fixed-Satellite Service operating in the same frequency bands below 10 GHz, and using geostationary satellites be designed and operated in such a manner that the total interference to an 8-bit PCM telephony system in the Fixed-Satellite Service caused by the earth-station and space-station transmitters of all other networks should conform provisionally to the following limits;

1.1 In frequency bands in which the network does not practise frequency re-use the interference power level, averaged over any ten minutes, should not exceed, for more than 20% of any month, 20% of the total noise power level at the input to the demodulator that would give rise to a bit error rate of 1 in 10^6.

1.2 In frequency bands in which the network practises frequency re-use the interference power level, averaged over any ten minutes, should not exceed, for more than 20% of any month, 15% of the total noise power level at the input to the demodulator that would give rise to a bit error rate of 1 in 10^6;

2. That the maximum level of interference power in any such 8-bit PCM telephony system caused by the transmitters of another fixed-satellite network, averaged over any ten minutes, should not exceed, for more than 20% of any month, 4% of the total noise power level at the input to the demodulator that would give rise to a bit error rate of 1 in 10^6;

3. That the maximum level of interference noise power caused to that network should be calculated on the basis of the following values for the receiving earth station antenna gain in a direction at an angle θ (in degrees) referred to the main beam direction:

$$G = 32 - 25 \log \theta \text{ (dB) } 1 0 \theta < 48$$

$$G = -10 \text{ (dB) } 48 0 \theta 0 180$$

except when the actual gain is known and is less than the above value, in which case the actual value should be used;

4. That the following notes should be regarded as part of this Recommendation:

NOTE 1.—It is assumed in this Recommendation that the interference from other satellite networks is of a continuous nature; further study is required in respect of cases where interference is not of a continuous nature.

NOTE 2.—The values quoted in §§ 1.1 and 1.2 do not apply to networks for which a complete advance publication has been submitted to the IFRB by the time of the XIVth Plenary Assembly; for such networks the aggregate interference power level, averaged over any ten minutes, should not exceed, for more than 20% of any month, 10% of the total noise power level at the input to the demodulator that would give rise to a bit error rate of 1 in 10^6.

NOTE 3.—In some cases it may be necessary to limit the single entry value to less than the value quoted in § 2 above in order that the total value recommended in § 1 may not be exceeded. In other cases, particularly in congested arcs of the geostationary satellite orbit, administrations may agree bilaterally to use higher single entry interference values than those quoted in § 2 above, but any interference noise power in excess of the value recommended in § 2 should be disregarded in calculating whether the total value recommended in § 1 is exceeded.

NOTE 4.—There is a need for urgent study to be given to means of increasing the single entry interference level quoted in § 2 above without causing the total interference noise level to exceed the values quoted in § 1; this study should include, for example, the feasibility of overcoming problems of interference which result from inhomogeneous network parameters.

NOTE 5.—There is an urgent need for study of the acceptability of an increase in the maximum total interference noise values recommended in § 1 and more particularly that given in § 1.2 for satellite networks in which frequency re-use is practised.

NOTE 6.—In segments of the geostationary satellite orbit not likely to be crowded, interference allowances less than those recommended in § 1 above, may be utilized, allowing a corresponding increase in other noise contributions within total acceptable noise limits.

NATIONAL INDUSTRY ADVISORY COMMITTEE

Citizens Band Radio Communications Subcommittee; Meeting

APRIL 27, 1978.

Pursuant to the provisions of Pub. L. 92-463, announcement is made of a public meeting of the Citizens Band Radio Communications Subcommittee of the National Industry Advisory Committee to be held Thursday, May 25, 1978, beginning at 10 a.m. The Subcommittee will meet at the Federal Communications Commission annex building, 1229 20th Street NW., Washington, D.C. in room A-110.

Purpose: To consider emergency communications matters.

Agenda: As follows:

Items:

1. Chairman's opening remarks.
2. Review and approve minutes of the March 28, 1978 meeting.
3. Members' reports on cooperating organizations.
4. Discussion of existing resources.
5. Draft outline for national plan.
6. Recommendations and assignments for additional study.
7. Other business.
8. Establish date for next meeting.
9. Closing comments and adjournment.

Any member of the general public may attend or file a written statement with the committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the Emergency Communications Division, FCC, 202-632-7232.

FEDERAL COMMUNICATIONS COMMISSION
WILLIAM J. TRICARICO,
Secretary.

[FR Doc. 78-11859 Filed 5-1-78; 8:45 am]

[6210-01]

FEDERAL RESERVE SYSTEM

FIRST STATE BANCSHARES, INC.

Formation of Bank Holding Company

First State Bancshares, Inc., Raytown, MO., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80.18 percent of the voting shares of First State Bank of Raytown, Raytown, Mo. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

First State Bancshares, Inc., Raytown, Mo., has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c) (8)) and § 225.4(b) (2) of the Board's Regulation Y (12 CFR 225.4(b) (2)), for permission to acquire an insurance agency business offering the sale of life, accident, and health insurance directly related to extensions of credit by First State Bank of Raytown, Raytown, Mo. Notice of the application was published on April 7, 1978, in The Kansas City Star, a newspaper circulated in Kansas City, Mo.

Applicant states that the proposed subsidiary would engage in the activities described above. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be excepted to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence

M Y 2 — 7 8 UMI

V 43 | 85 MY 2 78 UMI

the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than May 26, 1978.

Board of Governors of the Federal Reserve System, April 26, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc. 78-11841 Filed 5-1-78; 8:45 am]

[6210-01]

HAWKEYE BANCORP., DES MOINES, IOWA

Acquisition of Bank

Hawkeye Bancorp., Des Moines, Iowa, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a) (3)) to acquire 100 per cent of the voting shares of First State Bank, Chariton, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than May 26, 1978.

Board of Governors of the Federal Reserve System, April 26, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc. 78-11842 Filed 5-1-78; 8:45 am]

[6210-01]

NORTHEAST UNITED BANCORP, INC. OF TEX.

Acquisition of Bank

Northeast United Bancorp., Inc. of Texas, Forth Worth, Tex., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent of the voting shares (less director's qualifying shares) of American National Bank of Dallas, Dallas, Tex., a *de novo* bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than May 25, 1978.

Board of Governors of the Federal Reserve System, April 26, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc. 78-11843 Filed 5-1-78; 8:45 am]

[6210-01]

FEDERAL OPEN MARKET COMMITTEE

Longer Run Ranges for Monetary Aggregates

On April 18, 1978, the Federal Open Market Committee adopted the following ranges for rates of growth in monetary aggregates for the period from the first quarter of 1978 to the first quarter of 1979: M-1, 4 to 6½ percent; M-2, 6½ to 9 percent; and M-3, 7½ to 10 percent. The associated range for bank credit is 7½ to 10½ percent.

By order of the Federal Open Market Committee, April 25, 1978.

ARTHUR L. BROIDA,
Secretary.

[FR Doc. 78-11844 Filed 5-1-78; 8:45 am]

GENERAL SERVICES ADMINISTRATION

[FCC Docket No. CC-78-72; Intervention Notice 61]

FEDERAL COMMUNICATIONS COMMISSION

PROPOSED INTERVENTION IN COMMUNICATIONS RULEMAKING PROCEEDING; INQUIRY INTO MTS AND WATS MARKET STRUCTURE

The General Services Administration (GSA) seeks to intervene in a proceeding before the Federal Communication Commission (FCC) concerning the Notice of Proposed Rulemaking concerning MTS and WATS Market Structure announced by the FCC on February 23, 1978, 43 FR 9505. The GSA represents the interests of the executive agencies of the United States Government as users of utility services.

Persons desiring to make inquiries of GSA concerning this case should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, telephone 202-566-0726.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any person parties of record in the proceeding.

(Section 201(a)(4), Federal Property and Administrative Services Act, 40 U.S.C. 481(a)(4).)

Dated: April 19, 1978.

JAY SOLOMON,
Administrator of General Services.

[FR Doc. 78-11854 Filed 5-1-78; 8:45 am]

[6820-24]

[Docket No. 1776; Intervention Notice 62]

PUBLIC UTILITY COMMISSION OF TEXAS

Proposed Intervention in Alternative Rate Designs

The Adminstrator of General Services seeks to intervene in a proceeding before the Public Utility Commission of Texas involving alternative rate designs in light of their economic impact, conservation impact, and other consequences. The Administrator of General Services represents the interests of the executive agencies of the United States Government as users of utility services.

Persons desiring to make inquiries of GSA concerning this case should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, telephone 202-566-0726, within thirty (30) days of the publication of this notice in the FEDERAL REGISTER, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Section 201(a)(4), Federal Property and Administrative Services Act, 40 U.S.C. 481(a)(4).)

Dated: April 19, 1978.

JAY SOLOMON,
Administrator.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of June 1978:

PSYCHIATRY EDUCATION REVIEW COMMITTEE

Date, time, and place: June 12-13, 10 a.m., Conference Room F, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Type of meeting: Open.
Contact: Ms. Connie Verney, Room 8C-12, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2120.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to psychiatry education and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 10 a.m., June 12, through early afternoon, June 13, the meeting will be open for discussion of administrative announcements, program developments and review criteria in the light of new initiatives and priorities of the Institute.

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish, upon request, summaries of the meeting and rosters of the committee members is Dr. Jacquelyn Hall, Acting Chief, Public Information Branch, Division of Scientific and Public Information, National Institute of Mental Health, Room 15C-17 Parklawn Building, 5600 Fishers Lane, Rockville, Md. 301-443-3473.

Dated: April 25, 1978.

CAROLYN T. EVANS,
Committee Management Officer Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 11701 Filed 5-1-78; 8:45 am]

[4110-88]

ADVISORY COMMITTEES

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of June 1978:

EPIDEMIOLOGIC STUDIES REVIEW COMMITTEE

June 12-13, 9 a.m., University of Iowa, 500 Newton Road, Iowa City, Iowa. Open: June 12, 9 to 10 a.m. Closed: Otherwise. Contact: Lavinia Walsh, Room 10C-09, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3774.

Purpose. The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to research and training activities in the field of epidemiology and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda. From 9 to 10 a.m., June 12, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552b(c)(6), title 5 U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Dr. Jacquelyn Hall, Acting Chief, Public Information Branch, Division of Scientific and Public Information, NIMH, Room 15C-17, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4573.

Dated: April 26, 1978.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 78-11803 Filed 5-1-78; 8:45 am]

[4110-03]

Food and Drug Administration

ARTHRITIS ADVISORY COMMITTEE

Renewal

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 1770-776 (5 U.S.C. App. I)), the Food and Drug Administration announces the renewal of the Arthritis Advisory Committee by the Secretary, Department of Health, Education, and Welfare.

DATE: Authority for this committee will expire on April 5, 1980, unless the Secretary formally determines that continuance is in the public interest.

FOR FURTHER INFORMATION CONTACT:

Richard L. Schmidt, Committee Management Officer (HFS-20), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2765.

Dated: April 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc. 78-11704 Filed 5-1-78; 8:45 am]

[4110-03]

TRANSFER OF ADMINISTRATIVE RESPONSIBILITY FOR DENTAL DEVICES PREVIOUSLY CONSIDERED OVER-THE-COUNTER DRUGS

Implementation

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces that the Food and Drug Administration (FDA) has transferred administrative responsibility for over-the-counter (OTC) dental devices from the Bureau of Drugs to the Bureau of Medical Devices (BMD). In addition, data and information developed by, and all submissions to, the Advisory Review Panel on OTC Dentifrices and Dental Care Agents on dental devices have been transferred to BMD. This action was taken to implement the medical device amendments of 1976, under which several products previously regarded as drugs now come within the definition of a medical device intended for human use.

FOR FURTHER INFORMATION CONTACT:

Joseph L. Hackett, Bureau of Medical Devices (HFK-403), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7443, or
William E. Gilbertson, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of January 30, 1973 (38 FR 2781), the Commissioner of Food and Drugs requested the submission of data and information on all OTC dental care drug products. The data and information received in response to the notice have been reviewed by the FDA Advisory Review Panel on OTC Dentifrices and Dental Care Agents under the procedures in § 330.10 (21 CFR 330.10) for classifying OTC drugs as generally recognized as safe and effective and not misbranded and for establishing on OTC drug monograph for the products. On May 28, 1976, the medical device Amendments of 1976 (Pub. L. 94-295) were enacted and several products previously regarded as drugs and under review by the Panel were placed within the definition of a device under section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h)). The Commissioner has reviewed the articles previously regarded as drugs and has concluded that the following fall within the definition of a device: Denture cushions, dental adhesives, dental reliners and repair kits, denture cleansers, and plaque-disclosing kits.

In a notice published in the FEDERAL REGISTER of December 16, 1977 (42 FR 63472), the Commissioner issued a notice of implementation of the transitional provisions of the medical device amendments for articles previously considered new drugs or antibiotic drugs. The notice explained the transitional provisions of the amendments, listed generic types of medical devices previously regarded as drugs, explained which of these types are to be

V 4 3 — 8 5 M Y 2 7 8 UMI

subject to premarket approval requirements, indicated which Bureau in FDA regulates the products, and explained how manufacturers and importers can petition for changes in the regulatory classification of medical devices intended for human use.

This present notice announces that FDA has transferred the administrative responsibility for OTC dental care devices from the Bureau of Drugs to the Bureau of Medical Devices. In addition, the Advisory Review Panel on OTC dentifrices and dental care agents has recommended that the Commissioner transfer that portion of its report concerning articles now regarded as medical devices intended for human use, together with the data and information submitted in response to the January 30, 1973, notice to BMD. The Panel has prepared a summary representing its conclusions concerning the safety, effectiveness, and labeling, as OTC drugs, of denture cushions, dental adhesives, dental relliners and repair kits, denture cleansers (all of which were reviewed by the Panel as "denture aids"), and plaque-disclosing kits. After it is approved by the Panel, the summary will be available as an appendix to the minutes of the appropriate Panel meeting. The summary has been prepared independently of FDA and does not necessarily represent the agency's position on these articles.

The data and information received by FDA in response to the January 30, 1973, notice which were classified by the Panel as applying to denture aids and dental plaque-disclosing agents have been transferred to BMD with the related data and information developed by the Panel. Persons will be notified by letter of the transfer to BMD of the data or information which they submitted on these products.

Dated: April 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc. 78-11703 Filed 5-1-78; 8:45 am]

[4110-03]

[Docket No. 75N-0139; DESI No. 9955]

CERTAIN ORAL PROTEOLYTIC ENZYMES

Denial of Hearing; Withdrawal of Approval of New Drug Applications

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs (1) denies a hearing and withdraws approval of two proteolytic enzyme products whose sponsor had requested a hearing but did not submit any data to support those requests and (2) withdraws approval of one proteolytic enzyme product whose sponsor did not request a hearing. The products have been used to control edema and inflammation associated with various disorders.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific drug product should be directed to the Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, 5600 Fishers Lane, Rockville, Md. 20857.

EFFECTIVE DATE: May 12, 1978.

FOR FURTHER INFORMATION CONTACT:

Nathan J. Treinish, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 9955) published in the FEDERAL REGISTER of June 25, 1970 (35 FR 10393), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council (NAS-NRC), Drug Efficacy Study Group concerning oral proteolytic enzymes. The drugs were classified as possibly effective and lacking substantial evidence of effectiveness. The notice also stated that additional evidence was required to fully establish their effectiveness.

Data and clinical studies that were subsequently submitted by the sponsors were found not to support the effectiveness of the drugs, and in a notice of opportunity for hearing published in the FEDERAL REGISTER of July 24, 1975 (40 FR 30995) (DESI 9955) (Docket No. 75N-0139, formerly FDC-D-588), the Director of the Bureau of Drugs reclassified the drugs to lacking substantial evidence of effectiveness for all indications and proposed to withdraw approval of the new drug applications for the products. The holders of the new drug applications named below requested hearings and submitted supporting material concerning their drug products. The hearing requests are under review and will be the subject of a future FEDERAL REGISTER notice. Marketing of these drug products may continue pending a ruling on the hearing requests.

NDA 11-783; Orenzyme Enteric-coated Tablets containing 50,000 or 100,000 units of trypsin and 4,000 or 8,000 units of chymotrypsin; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 100 East Amity Rd., Cincinnati, Ohio 45215.

NDA 12-178; Chymoral enteric-coated Tablets containing trypsin and chymotrypsin equivalent to 50,000 or 100,000 units enzyme activity; Armour Pharmaceutical Co.

NDA 12-293; Papase Tablets containing enzymes extracted from carica papaya equivalent to 10,000 units enzyme activity; Warner-Chilcott Laboratories, Division of Warner-Lambert Pharmaceutical Co., 201 Tabor Rd., Morris Plains, N.J. 07950.

NDA 12-527; Ananase Enteric-coated Tablets containing bromelains equivalent to 50,000 or 100,000 units enzyme activity; William H. Rorer, Inc., 500 Virginia Dr., Fort Washington, Pa. 19034.

NDA 12-626; Avazyme Enteric-coated Tablets containing 20 mg chymotrypsin; Wampole Laboratories, Division of Denver Chemical Manufacturing Co., 35 Commerce Rd., Stamford, Conn. 06904.

NDA 12-724; that part of NDA 12-724 pertaining to Wilzyme Enteric-coated Tablets contalning 50,000 units of proteolytic activity (approximately 3 to 1 ratio of trypsin activity to chymotrypsin activity); Wilson Laboratories, Division of Wilson Pharmaceutical and Chemical Corp., 2600 Bond St., Park Forest South, Chicago, Ill. 60466.

NDA 12-724; that part of NDA 12-724 pertaining to Chymolase Enteric-coated Tablets containing 50,000 units of protoeolytic activity (approximately 3 to 1 ratio of trypsin to chymotrypsin activity); distributed by the Warren-Teed Products Co., subsidiary of Rohm & Haas Co., 582 W. Goodale St., Columbus, Ohio 43215.

The current notice pertains only to the following drugs which were also included in the notice of July 24, 1975.

I. THE DRUGS

NDA 9-955; Cytolav Capsules containing 7,000 Armour units chymotrypsin; formerly marketed by Armour Pharmaceutical Co., Division of Armour & Co., Greyhound Tower, Phoenix, Ariz 85077. Armour requested a hearing but did not submit any supporting data or argument.

NDA 11-908; Chymar Buccal Tablets containing 10,000 Armour units chymotrypsin; formerly marketed by Armour Pharmaceutical Co. Armour requested a hearing but did not submit any supporting data or arguments.

NDA 12-724; that part of NDA 12-724 pertaining to Haugase Enteric-coated Tablets, containing 50,000 units of proteolytic activity (approximately 3-to-1 ration of trypsin activity to chymotrypsin activity) distributed by Madland Laboratories, Inc., 125 W. Wisconsin Ave., Milwaukee, Wis 53203. Madland did not request a hearing.

No other person filed a written appearance of election as provided for by said notice. The failure to file such an appearance constitutes election by such persons not to avail themselves of the opportunity for a hearing.

All drug products that are identical, related, or similar to the drugs named above and are not the subject of an approved new drug application are covered by the new drug applications reviewed and are subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Divison of Drug Labeling Compliance (address given above).

II. FINDINGS

On the basis of the foregoing, the Commissioner finds that (1) there is a lack of substantial evidence that Armour's Cytolav Capsules, and Chymar Buccal Tablets and Madland's Haugase Enteric-coated Tablets have the effects they are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling, and (2) there is a lack of substantial evidence that each component of Haugase Enteric-coated Tablets, a combination product, contributes to the total effects claimed. In addition, Armour has failed to offer any data or legal reason to demonstrate the existence of a genuine and substantial issue of fact requiring a hearing concerning Cytolav or Chymar.

Therefore under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under the authority delegated to the Commissioner (21 CFR 5.1), the request for a hearing for Cytolav Capsules (NDA 9-955) and Chymar Buccal Tablets (NDA 11-908) is denied, and approval of the new drug applications for these drugs and that part of NDA 12-724 pertaining to Haugase Enteric-coated Tablets is withdrawn, effective May 12, 1978.

Dated: April 24, 1978.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

[Docket No. 78N-0081]

DRUGS FOR HUMAN USE

Drug Efficacy Study Implementation; Revocation of Exemption

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice revokes the temporary exemption for continued marketing of two poorly absorbed sulfonamides for oral use. Under the exemption, the drugs have been allowed to remain on the market beyond the time limit scheduled for implementation of the drug efficacy study.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary E. Catchings, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Food and Drug Administration is reclassifying the possibly effective indications for the two poorly absorbed sulfonamides (succinylsulfathiazole and phthalylsulfacetamide) described below (DESI 5803) to lacking substantial evidence of effectiveness. These products have been allowed to remain on the market beyond the time limit established for implementation of the drug efficacy study (DESI) on the condition that manufacturers undertake additional clinical studies to determine the products' effectiveness. The temporary exemption to permit continued marketing was announced in a notice published in the FEDERAL REGISTER of August 8, 1973 (38 FR 21442). Because no person has submitted additional data or expressed an intent to perform additional studies for the drugs described below, the temporary exemption granted by the August 8, 1973 notice, as it pertains to these two drugs, is hereby revoked.

1. NDA 4-687; that portion of the NDA pertaining to Sulfasuxidine Tablets, containing succinylsulfathiazole; Merck, Sharp & Dohme, Division of Merck & Co., Inc., West Point, Pa. 19486.

2. NDA 6-593; Thalmyd Tablets, containing phthalylsulfacetamide; Schering Corp., Galloping Hill Road, Kenilworth, N.J. 07003.

The phthalylsulfathiazole products (Cremothalidine Suspension and Sulfathalidine Tablets) named in the August 8, 1973 notice remain exempt for the present because a study to determine the effectiveness is being conducted by Merck, Sharp & Dohme.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sections 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1).

Dated: April 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[4110-03]

[Docket No. 78N-0081; DESI 5803]

CERTAIN POORLY ABSORBED SULFONAMIDES FOR ORAL USE

Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice reclassifies certain poorly absorbed sulfonamides for oral use to lacking substantial evidence of effectiveness, proposes to withdraw approval of the new drug applications, and offers an opportunity for a hearing on the proposal.

DATE: Hearing requests due on or before June 1, 1978.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 5803 and the docket number appearing in the heading of this notice, and addressed to the Food and Drug Administration, 5700 Fishers Lane, Rockville, Md. 20857. Request for Hearing: Hearing Clerk, Food and Drug Administration (HFC-20), Room 4-65. Request for opinion of the applicability of this notice to a specific product: division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration.

FOR FURTHER INFORMATION CONTACT:

Mary E. Catchings, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 5803; Docket No. FDC-D-379 (now Docket No. 78N-0081)) published in the FEDERAL REGISTER of September 19, 1970 (35 FR 14666), the Food and Drug Administration classified poorly absorbed sulfonamides for oral or rectal use as possibly effective or lacking substantial evidence of effectiveness for their various indications for gastrointestinal use, such as adjunctive therapy in the management of ulcerative colitis.

Subsequently, in a notice published in the FEDERAL REGISTER of August 8, 1973 (38 FR 21441), poorly absorbed oral sulfonamides were temporarily exempted from the time limit established for completing certain phases of the Drug Efficacy Study (DESI) program. The exemption was granted because there is believed to be a definable population who have an intolerance to salicylazosulfapyridine, the drug that is effective for use as adjunctive therapy in the management of ulcerative colitis. The purpose of the exemption was to allow time for studies to be conducted to determine the effectiveness of the poorly absorbed sulfonamides.

No person has submitted data or portocols or has expressed an intention to perform additional clinical studies on the drug products described below, and the drugs are now reclassified to lacking substantial evidence of effectiveness. The temporary exemption granted by the August 8, 1973

V 4 3 — 8 5

notice, as it pertains to these drugs, is revoked in a notice appearing elsewhere in this issue of the FEDERAL REGISTER.

1. NDA 4-687; that portion of the NDA pertaining to Sulfasuxidine Tablets, containing succinylsulfathiazole; Merck Sharp & Dohme, Division of Merck & Co., Inc., West Point, Pa. 19486.

2. NDA 6-593; Thalamyd Tablets, containing phthalylsulfacetamide; Schering Corp., Galloping Hill Road, Kenilworth, N.J. 07003.

Other drugs included in the September 19, 1970 notice are not affected by this notice.

On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), demonstrating the effectiveness of the drug(s).

Therefore, notice is given to the holder(s) of the new drug application(s) and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application(s) (or if indicated above, those parts of the application(s) providing for the drug product(s) listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug product(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug product(s) will have the affect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product that is identical, related, or similar to the drug product(s) named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product that the person manufactures or distributes. Such person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above).

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962, or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug products named above and of all identical, related, or similar products.

An applicant or any other person subject to this notice pursuant to 21 CFR 310.6 who decides to seek a hearing shall file (1) in or before June 1, 1978, a written notice of appearance and request for hearing, and (2) on or before July 3, 1978, the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by the person not to make use of the opportunity for a hearing concerning the action proposed with respect to the product and constitutes a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

All submissions pursuant to this notice, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: April 6, 1978.

J. RICHARD CROUT,
Director, Bureau of Drugs.

Office of the Secretary

NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

Directive on the Application of Title IX to Intercollegiate Athletics

AGENCY: Office for Civil Rights, HEW.

ACTION: Notice of Directive on the implementation of the Title IX requirements and an opinion from the General Counsel.

SUMMARY: The Department has received requests from colleges and university officials and interested groups on the implementation of the Title IX athletic requirements. On April 25, 1978, the Secretary issued a directive to the General Counsel and the Director and Deputy Director of the Office for Civil Rights asking them to arrange for a review of the implementation of Title IX with respect to revenue-producing sports to assure that practical guidance and technical assistance are available. Persons wishing to relate any experiences with respect to Title IX should send their comments to the address below.

Attached to the directive is an opinion from the General Counsel, dated April 18, 1978, which concludes that institutions of higher education receiving Federal financial assistance must comply with Title IX in the administration of their revenue-producing athletic activities.

FOR FURTHER INFORMATION CONTACT:

Director, Office for Civil Rights, HEW, 330 Independence Avenue SW., Washington, D.C. 20201.

Dated: April 27, 1978.

DAVID TATEL,
Director, Office for Civil Rights.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C. April 25, 1978.

MEMORANDUM

To: Peter Libassi, General Counsel; David Tatel, Director, Office for Civil Rights; Cynthia Brown, Deputy Director, Office for Civil Rights.

Subject: Application of Title IX to Intercollegiate Athletics.

The three-year transition period for achieving compliance with Title IX in the area of athletics will end on July 25, 1978. I have received and am attaching an opinion from the General Counsel which concludes that institutions of higher education receiving Federal financial assistance must comply with Title IX in the administration of their revenue-producing athletic activities. The opinion also concludes that the current Title IX regulations and Department policies allow flexibility in their application to those activities.

Colleges and university officials and interested groups have requested additional clarification on the implementation of the athletic requirements. You, therefore, should arrange for a review of the implementation of Title IX with respect to intercollegiate athletics with particular attention to revenue-producing sports. The purposes of this review are to assure that practical guidance and technical assistance on the application of the Title IX regulations and Department policies are available to college and university officials, and to determine if the development of further policies is necessary.

As part of this effort the review should include the experiences of colleges and universities over the last three years in achieving compliance with Title IX. We need to learn of the achievements of these institutions in expanding athletic opportunities for women, as well as any difficulties they have encountered.

You should conduct this review by relying, to the greatest extent possible, on the people who are involved in these issues. In particular, I would like you to explore with representatives of the university community, women's groups and other interested parties the active roles they might play in providing guidance and technical assistance in connection with the implementation of Title IX.

A central concern of your review should be to preserve what flexibility now exists under the regulations and to avoid the issuance of the kind of detailed regulations and guidelines that are counterproductive to the objectives of non-discrimination we all share. This Department has issued far too many and detailed regulations in the past and we must avoid doing so in the future.

In light of the widespread interest in the issue of implementing Title IX with respect to intercollegiate athletics, I am asking that you have this directive and the opinion of the General Counsel published in the FEDERAL REGISTER.

Please keep me informed of developments.

JOSEPH A. CALIFANO, JR.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, THE OFFICE OF THE SECRETARY,
Washington, D.C. 20201.
April 18, 1978.

MEMORANDUM

To: The Secretary.
From: F. Peter Libassi.
Subject: Applicability of Title IX of the Education Amendments of 1972 to Revenue Producing Intercollegiate Athletics.

ISSUE

You have asked our opinion as to whether an institution of higher education which is receiving Federal financial assistance must comply with the prohibition against sex discrimination imposed by Title IX of the Education Amendments of 1972 and the regulations promulgated thereunder (45 CFR Part 86) in the administration of its revenue producing intercollegiate athletic activities.

CONCLUSION

Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 et seq.) prohibits sex discrimination in any "education program or activity" receiving Federal financial assistance. In our opinion, a revenue producing intercollegiate athletic program is (a) an education program or activity within the meaning of Title IX, and (b) an integral part of the general undergraduate education program of an institution of higher education. Accordingly, in our opinion, an institution of higher education must comply with the prohibition against sex discrimination imposed by that title and its implementing regulations in the administration of any revenue producing intercollegiate athletic activity if either the athletic activity or the general education program of which the athletic activity is a part is receiving Federal financial assistance.

DISCUSSION

Section 901(a) of Title IX of the Education Amendments of 1972 provides as follows:

"No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. . . ."

There is no reference anywhere in Title IX to revenue producing athletics, and the term "education program or activity" is not defined. There is, however, some indication that Congress intended that term to have an expansive meaning. Section 901(a) of Title IX provides a series of exemptions from the general prohibition. Among them are exemptions for the Boy Scouts, the Girl Scouts, and social fraternities and sororities. we assume that absent the exemptions, each of these groups of organizations would be subject to the prohibition against sex discrimination as an education program or activity. In our view as definition of "education program or activity" that encompasses social fraternities and sororities also encompasses intercollegiate athletics, including revenue producing athletics as well.

The limited legislative history for Title IX tends to support a broad view of what is an education program or activity, but is less clear with respect to whether athletics, and particularly revenue producing intercollegiate athletics, are included in the term. In the only comments of any length on the subject, Senator Bayh, the Senate sponsor of Title IX, stated:

"What we are trying to do is provide equal access for women and men students to the educational process and the extracurricular activities in a school, where there is not a unique facet such as football involved. We are not requiring that intercollegiate football be desegregated, nor that the men's locker room be desegregated." Cong. Rec. S. 13554 (daily ed. August 6, 1971).[1]

However, any ambiguity as to whether revenue producting intercollegiate athletics are an education program or activity under Title IX was eliminated in 1974 by the enactment of section 844 of the Education Amendments of 1974. The language of that section and its history make it clear that it is Congress' intent that revenue producing intercollegiate athletics be included in the term.

On May 20, 1974 Senator John Tower of Texas introduced an amendment to Titl IX exempting revenue producing athletics. It stated:

"(T)his section [§ 901 of Title IX] shall not apply to an intercollegiate athletic activity to the extent such activity does or may provide gross receipts or donations to the institution necessary to support that activity."Cong. Rec. S. 8488 (daily ed. May 20, 1974).

The amendment was adopted on the floor of the Senate by voice vote. The Conference Committee on the Education Amendments of 1974 deleted Senator Tower's amendment. Instead the Conference adopted what was to become section 844 of the 1974 Amendments, commonly referred to as the "Javits Amendments." It provides as follows: "The Secretary [of HEW] shall prepare and publish . . . proposed regulations implementing the provisions of Title IX of the Education Amendments of 1972 relating to the prohibition of sex discrimination in Federally assisted education programs *which shall include with respect to intercollegiate athletic activities reasonable provisions considering the nature of the particular sports.*" (Emphasis added.)

In our judgment, Congress has made it clear, by rejecting an exemption from Title IX for revenue producing athletics and adopting section 844, which requires the promulgation of Title IX regulations that include reasonable provisions concerning intercollegiate athletic activities, that revenue producing intercollegiate athletics are an "education program or activity" within the

[1]Other comments in the debates refer, in passing, to the possible need to maintain separate physical education facilities, S. 1769 (daily ed., Feb. 15, 1972), 92d Cong., 2d Sess., comments of Sen. Bayh; and S. 2747 (daily ed., Feb. 28, 1972), 92d Cong., 2d Sess., comments of Sen. Bayh.

M Y 2 — 7 8
UMI

V 4 3 — 8 5

meaning of Title IX.[2] An institution of higher education must, therefore, comply with the prohibition against sex discrimination imposed by Title IX in the administration of any revenue producing intercollegiate athletic activity if the activity is receiving Federal financial assistance, directly or indirectly.

There are some revenue producing intercollegiate athletic activities that clearly receive direct Federal financial assistance. Funds provided under Title VII of the Higher Education Act, for example, may be used to build facilities that are used, in part, for revenue producing athletics. While it is clear that assistance of this kind which directly supports an intercollegiate athletic program would subject the program to the requirements of Title IX and the implementing regulations, such direct assistance is not common. Other kinds of assistance that bear a less direct relationship to revenue producing intercollegiate athletics, particularly student financial assistance, are more common.

It is well established that general student financial assistance, such as guaranteed student loans and grants, provided by the Federal Government to assist a student in paying the cost of attending an institution of higher education is Federal financial assistance to the institution. *Bob Jones University* v. *Johnson*, 396 F. Supp. 597 (D.S.C. 1974), *aff'd sub nom., Bob Jones University* v. *Roudebush*, 529 F. 2d 514 (4th Cir. 1975). Historically, intercollegiate athletics have been described as an integral part of general undergraduate education. For example, the 1976-77 Manual of the National Collegiate Athletic Association, the private association that regulates much of the nation's intercollegiate athletics, contains the following statement of fundamental policy:

"The competitive athletic programs of the colleges are designed to be a vital part of the educational system. A basic purpose of this Association is to maintain intercollegiate athletics as an integral part of the educational program and the athlete as an integral part of the student body, and, by so doing, retain a clear line of demarcation between college athletics and professional sports." *Manual*, at 5.

In our view, therefore, student financial assistance is Federal financial assistance to the revenue producing athletic programs of the student's institution of higher education.

The inclusion of revenue-producing intercollegiate athletics within the education programs and activities receiving Federal financial assistance is not the only basis on which an institution of higher education is required to comply with Title IX in the administration of such programs. It is well settled, with respect to the prohibition against discrimination on the basis of race, religion, color, or national origin imposed by title VI of the Civil Rights Act of 1964, that Federal financial assistance may not be provided to any program or activity which is either administered in a discriminatory manner or "infected by a discriminatory environment." *Board of Public Institution of Taylor County, Florida* v. *Finch*, 414 F. 2d 1068, 1078 (5th Cir. 1968).

Under this infection doctrine, a Federal grantee is required to comply with Title VI in the administration of an activity that does not receive Federal financial assistance if that activity is so closely related to, and such an integral part of, a program or activity that does receive Federal financial assistance that discrimination in the administration of the former would infect the latter.

The infection doctrine is as applicable to Title IX of the Education Amendments of 1972 as it is to Title VI of the Civil Rights Act of 1964. As indicated previously, historically intercollegiate athletics have been described as an integral part of general undergraduate education. In our view, revenue producing intercollegiate athletics are so integral to the general undergraduate education program of an institution of higher education that sex discrimination in the administration of a revenue producing athletic activity would necessarily infect the general undergraduate education program of the institution.

Therefore, in our opinion, an institution of higher education which is receiving Federal financial assistance for its general undergraduate education program must comply with the prohibitions against sex discrimination imposed by Title IX in the administration of its revenue producing intercollegiate athletic activities regardless of whether those athletic activities are themselves receiving Federal financial assistance.

The Secretary, in fulfilling his obligation to assure that institutions of higher education receiving Federal financial assistance comply with Title IX, is authorized to promulgate regulations and policies defining what constitutes discrimination prohibited by that title. In our opinion, the provisions of the current Title IX regulations and the Department's policies that deal specifically with athletics, including revenue producing intercollegiate athletics, are consistent with the statute and are a proper exercise of the Secretary's discretion. The text of the regulations. 45 CFR 86.41, is attached at Tab B.

It should also be noted that in our view the current Title IX regulations and policies allow flexibility in their application to revenue producing intercollegiate athletics.

Congressional Attempts To Exempt Revenue-Producing Sports From Title IX

The following is a brief description of attempts by Congress, all of which were unsuccessful, to exempt revenue-producing sports from coverage of Title IX.

A. *Amendments or Proposed Amendments of Statute.*

May 20, 1974, Senator Tower introduced an amendment to the Education Amendments of 1974 to exempt revenue-producing sports from Title IX. [Adopted by the Senate but deleted by the Conference Committee.]*

June 1975, Representative O'Hara introduced H.R. 8394 to allow revenue-producing sports to use their profits to maintain their own teams before diverting any profits to other men's or women's teams. [Bill was referred to the House Subcommittee on Postsecondary Education, considered, and reported to the full Committee, which voted 30-8 to recommit it to the Subcommittee where no further action was taken.]

July 15, 1975, Senator Tower, Bartlett and Hruska co-sponsored S2106, a bill to exclude coverage of revenue-producing sports from Title IX. [Referred to the Senate Subcommittee on Education, was considered in hearings on September 18 and 18, 1975, but was never reported out of committee.

B. *Proposed Concurrent Resolutions Disapproving the HEW Title IX Regulation.* Under Section 431 (d) and (f) of the General Education Provisions Act, HEW was required to submit any Title IX regulation to Congress for review 45 days before its effective date. During the 45-day period, the law allows Congress, by concurrent resolution, to disapprove the regulation in whole or in part. On June 4, 1975, the present Title IX regulation was transmitted to Congress. Several concurrent resolutions were proposed, some of which concerned revenue-producing sports.

June 5, 1975, Senator Helms introduced S. Con. Res. 46 disapproving the entire Title IX regulation. [No action was taken.]

June 17, 1975, Representative Martin introduced H. Con. Res. 310, disapproving the entire Title IX regulation, and H. Con. Res. 311, disapproving the regulation's provisions on intercollegiate athletics. [Both resolutions were considered and rejected by the House Postsecondary Education Subcommittee.]

July 16, 1975, Senators Laxalt, Curtis, and Fannin co-sponsored S. Con. Res. 52, disapproving the application of Title IX to intercollegiate athletics. [Resolution was referred to the Subcommittee on Education of the Senate Committee on Labor and Public Welfare where no action was taken on it.]

C. *Independent Bills on the Subject of Athletics.* In addition to the foregoing proposed amendments to Title IX, two independent bills have been introduced that would have, or would have had, the effect of exempting intercollegiate athletics from Title IX.

July 21, 1975, Senator Helms introduced S2146, a bill that prohibited federal agencies from enforcing regulations pertaining to athletics where participation in those athletic activities was not a required part of the curriculum of an educational institution. [No action taken on this bill during the 94th Congress.]

January 31, 1977, Senator Helms reintroduced what had been S2146 (see previous item) as S535. [No action has yet been taken on this bill.]

Tab B

45 Code of Federal Regulations 86.41 and 86.37(c)

§ 86.41 *Athletics.*

(a) *General.* No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any interscholastic, intercollegiate, club or intramural athletics offered by a recipient, and no recipient shall provide any such athletics separately on such basis.

(b) *Separate teams.* Notwithstanding the requirements of paragraph (a) of this section, a recipient may operate or sponsor separate teams for members of each sex where selection for such teams is based upon competitive skill or the activity involved is a contact sport. However, where a recipient operates or sponsors a team in a particular sport for members of one sex but operates or sponsors no such team for members of the other sex, and athletic opportunities for members of that sex have previously been limited, members of the excluded sex must be allowed to try-out for the team offered unless the sport involved is a contact sport. For the purposes of this part, contact sports include boxing, wrestling, rugby, ice hockey, football, basketball and other sports the purpose of major activity fo which involves bodily contact.

(c) *Equal opportunity.* A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics shall provide equal athletic opportunity for members of both sexes. In determining whether equal opportunities are available the Director will consider, among other factors:

(1) Whether the selection of sports and levels of competition effectively accommodate the interests and abilities of members of both sexes;

(2) The provision of equipment and supplies;

(3) Scheduling of games and practice time;

(4) Travel and per diem allowance;

(5) Opportunity to receive coaching and academic tutoring;

(6) Assignment and compensation of coaches and tutors;

(7) Provision of locker rooms, practice and competitive facilities;

(8) Provision of medical training facilities and services;

(9) Provision of housing and dining facilities and services;

(10) Publicity.

Unequal aggregate expenditures for members of each sex or unequal expenditures for male and female teams if a recipient operates or sponsors separate teams will not constitute noncompliance with this section, but the Director may consider the failure to provide necessary funds for teams for one sex in assessing equality of opportunity for members of each sex.

(d) *Adjustment period.* A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics at the elementary school level shall comply fully with this section as expeditiously as possible but in no event later than one year from the effective date of this regulation. A recipient which operates or sponsors interscholastic, intercollegiate, club or intramural athletics at the secondary or post-secondary school level shall comply fully with this section as expeditiously as possible but in no event later than three years from the effective date of this regulation.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682; and Sec. 844, Education Amendments of 1974, Pub. L. 93-380, 88 Stat. 484.)

[40 FR 21428, June 4, 1975; 40 Fr 39506, Aug. 23, 1975]

§ 86.37 *Financial assistance.*

(c) *Athletic scholarships* (1) To the extent that a recipient awards athletic scholarships or grants-in-aid, it must provide reasonable opportunities for such awards for members of each sex in proportion to the number of students of each sex participating in interscholastic or intercollegiate athletics.

(2) Separate athletic scholarships or grants-in-aid for members of each sex may be provided as part of separate athletic teams for members of each sex to the extent consistent with this paragraph and § 86.41 of this part.

(Secs. 901, 902. Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682, and Sec. 844, Education Amendments of 1974, Pub. L. 93-380, 88 Stat. 484.)

[FR Doc. 78-11959 Filed 5-1-78; 8:45 am]

[2] The history of Congressional action on other proposals for amending Title IX with respect to intercollegiate athletics and on proposals for Congressional disapproval of the Department's regulations implementing that Title tend to further support this conclusion. A brief summary of that history is attached at Tab A.

*In lieu of the proposed Tower Amendment, in July 1974 Senator Javits proposed to the Conference Committee an amendment to require HEW to include in its Title IX regulation with respect to intercollegiate athletics, "reasonable provisions considering the nature of particular sports." This amendment was included in the Education Amendments of 1974 enacted in August 1974.

Bureau of Land Management

[INT DES 78-9]

WYOMING

Correction

Notice of availability of draft Regional Environmental Statement and holding of Public Hearings for proposed development of coal resources in Southwest Wyoming.

This Notice corrects the notice of availability which appeared on page 14747 of the FEDERAL REGISTER dated April 7, 1978. The last paragraph of the Notice is corrected to read as follows:

Written requests to testify orally at the public hearings should be submitted to the Team Leader, Coal ES Team, Bureau of Land Management, P.O. Box 1869, 205 Broadway, Lea Building, Rock Springs, Wyo. 82901 prior to close of business May 15, 1978. Persons wishing to give oral comments are requested to limit their testimony to ten (10) minutes. Copies of complete oral statements or other written comments are encouraged and will be accepted at the hearings and made part of the official record.

Dated: April 27, 1978.

GEORGE L. TURCOTT,
Director,
Bureau of Land Management.

Bureau of Land Management

ALASKA

Application for Pipeline Right-of-Way, AA-13573

APRIL 24, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by Pub. L. 93-153 approved November 16, 1973 (87 Stat. 575), the Alaska Pipeline Company, P.O. Box 6288, Anchorage, Alaska 99502, has applied for a thirty (30) foot wide permanent pipeline right-of-way across the following public lands:

T. 6 N., R. 11 W., Seward Meridian
Sec. 3.
T. 7 N., R. 11 W., Seward Meridian
Secs. 33 and 34.

The proposed pipeline is located for the most part within an existing electric transmission line right-of-way to Homer Electric Company (A-057316), and is located northeast of Kenai, Alaska.

The 8-inch buried pipeline will convey natural gas across approximately 3 miles of public land.

The purpose of this notice is to inform the public that the United States Department of the Interior, Bureau of Land Management will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send them to the State Director, Alaska State Office, Bureau of Land Management, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510.

ROBERT E. SORENSON,
Chief, Branch of Lands, and Minerals Operations.

NATIONAL REGISTER OF HISTORIC PLACES

Additions, Deletions, and Corrections

By notice in the FEDERAL REGISTER of February 7, 1978, Part II, there was published a list of the properties included in the National Register of Historic Places. Further notice is hereby given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in accordance with section 106 of the National Historic Preservation Act of 1966, 80 Stat. 16 U.S.C. 470 et seq. (1970 ed.), and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800.

WILLIAM J. MURTAGH,
Keeper of the National Register.

The following list of properties have been added to the National Register of Historic Places since notice was last given in the February 7, 1978, FEDERAL REGISTER. National Historic Landmarks are designated by NHL; properties recorded by the Historic American Buildings Survey are designated by HABS; properties recorded by the Historic American Engineering Record are designated by HAER; properties receiving grants-in-aid for historic preservation are designated by G.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-3]

DOXYCYCLINE

Order Dismissing a Respondent, Adding a Respondent, and Accepting a Revised Amended Complaint

This matter comes before the Commission as a result of the recommendation of the presiding officer to dismiss USV Pharmaceutical Corp., add Danbury Pharmacal, Inc., and to replace complainant's April 13, 1973, complaint with its revised amended complaint of March 10, 1978, as modified by parts 4 and 5 of the presiding officer's Recommendation and Order of March 31, 1978.

After considering the presiding officer's recommendations hereinabove stated, his Recommendation and Order of March 31, 1978, the Preliminary Conference Report of March 31, 1978, Complainant's motions 3-2 and 3-3 with its accompanying support papers, as well as other relevant evi-

MY 2 78 UMI

V 4 3 1 8 5

dence in the record, the Commission has decided to adopt the above three recommendations by approving motions 3-2 and 3-3 as modified by parts 4 and 5 of the pending officer's Recommendation and Order of March 31, 1978.

It is, therefore, hereby *Ordered*, That: 1. The motion of Pfizer, Inc. (M3-2) to replace its April 13, 1973, complaint with its revised amended complaint of March 10, 1978, as modified by parts 4 and 5 of the presiding officer's Recommendation and Order of March 31, 1978, is Granted.

(a) As part of this motion, Danbury Pharmacal is added as a respondent; and

(b) only claim 10 of U.S. Letters Patent 3,200,149 will be in issue.

2. The motion of Pfizer, Inc. (M3-3) to dismiss USV Pharmaceutical Corp. as a respondent, is Granted.

Issued: April 21, 1978.

By order of the Commission:

KENNETH R. MASON,
Secretary.

DEPARTMENT OF LABOR

Office of the Secretary

[TA-W-2949]

ALABAMA BY-PRODUCTS CORP., TARRANT, ALA.

Negative Determination Regarding Eligibility To Apply for Worker Admustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2949: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 25, 1978 in response to a worker petition received on January 10, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing coke at the Tarrant, Ala. plant of the Alabama By-Products Corp.

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7068). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Alabama By-Products Corp., the United Steelworkers of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

The investigation revealed that layoffs did occur at the Tarrant, Ala. plant from January 6, 1977, one year prior to the date of this petition to the present. Pollution control problems and some mechanical repair work resulted in the temporary shutdown of plant operations in October and November 1977 and January 1978. The layoffs at the Tarrant plant from January 6, 1977 to the present were due to environmental control shutdowns and maintenance shutdowns.

CONCLUSION

After careful review, I conclude that all workers at the Tarrant, Ala. plant of Alabama By-Products Corp. are denied eligibility to apply for adjustment assistance under title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[FR Doc. 78-11908 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-3023]

ANDAVE SPORTSWEAR, INC., PENNS GROVE, N.J.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 2, 1978 in response to a worker petition received on January 30, 1978 which was filed by the International Ladies Garment Workers Union on January 19, 1978 on behalf of workers and former workers producing women's dresses at Andave Sportswear, Inc. (formerly Pennsgrove Dress Co.) Penns Grove, N.J. The investigation revealed that the name of the company was Andave Sportswear, Inc.

Notice of investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7064). No public hearing was requested and none was held.

The petitioner, International Ladies Garment Workers Union, requested withdrawal of this petition. In a letter the Business Agent of the ILGWU cited no adverse impact of imports on workers at Andave Sportswear as the reason for the withdrawal. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 14th day of April 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[FR Doc. 78-11909 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2757]

THE ARROW CO., ALBERTVILLE, ALA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2757: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977 in response to a worker petition received on December 6, 1977 which was filed by The Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's dress shirts at the Albertville, Ala. plant of The Arrow Co.

The notice of investigation was published in FEDERAL REGISTER on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of The Arrow Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of men's and boys' woven dress and business shirts increased from 30,800,000 units in 1975 to 64,283,000 units in 1976, representing an increase of 108.7 percent. During the first half of 1977, imports were recorded at 32,443,000 units and represented an increase of 20.6 percent compared to 26,906,000 units in the first half of 1976.

The ratio of imports to domestic production increased from 36.2 percent in 1975 to 67.1 percent during 1976.

Company imports of men's dress shirts increased in quantity in 1975 compared to 1974 and decreased in 1976 compared to 1975. During the first three quarters of 1977, company imports of men's dress shirts increased 150.7 percent compared to the first three quarters of 1976. The ratio of company imports to company sales increased from 5.2 percent in the first three quarters of 1976 to 12.3 percent in the same period of 1977.

A survey of customers of The Arrow Co. indicated that some decreased purchases of men's dress shirts from Arrow while increasing purchases of imported shirts in 1976 and the first nine months of 1977. Price was the main factor influencing the decision to purchase imported shirts.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress shirts produced at the Albertville, Ala. plant of the Arrow Co. contributed importantly to the decrease in production and to the total or partial separations of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Albertville, Ala. plant of the Arrow Co. who became totally or partially separated from employment on or after June 18, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-3004]

ARMOR-SAN FRANCISCO GALVANIZING, INC., SAN FRANCISCO, CALIF.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3004: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on February 2, 1978 in response to a worker petition received on January 19, 1978 which was filed by the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers (AFL-CIO), on behalf of workers and former workers engaged in hot dip galvanizing at Armor-San Francisco Galvanizing, Inc., San Francisco, Calif.

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7066). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Armor-San Francisco Galvanizing, Inc., the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm."

The Department's investigation revealed that Armor-San Francisco Galvanizing, Inc., San Francisco, Calif., which closed February 1, 1977, provided a galvanizing service to iron fabricators and jobbers. Workers at the firm did not produce an article within the meaning of section 222 of the Act.

Armor-San Francisco Galvanizing, Inc. is not financially or corporately involved in the business of any of its customers. The workers on whose behalf this petition was filed were hired and paid by and subject to the control of Armor-San Francisco Galvanizing, Inc. personnel only. All employment benefits enjoyed by the workers were provided and maintained by Armor. Thus, Armor-San Francisco Galvanizing, Inc. must be considered the workers' firm.

CONCLUSION

After careful review, I conclude that all workers at Armor-San Francisco Galvanizing, Inc., San Francisco, Calif. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3069]

ARTHUR WINER AND CO., GARY, IND.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 7, 1978 in response to a worker petition received on that date which was filed by the Amalgamated Clothing and Textile Workers' Union on January 10, 1978 on behalf of workers and former workers producing men's trousers.

Notice of investigation was published in the FEDERAL REGISTER on February 26, 1978 (43 FR 7744). No public hearing was requested and none was held.

During the course of investigation, it was established that all workers of Arthur Winer & Co. were previously certified eligible to apply for adjustment assistance on June 15, 1976 (See TA-W-735).

The existing certification remains in effect until two years from its date of issuance, unless terminated by the Secretary of Labor, Workers newly separated totally or partially are covered by the existing certification provided such separation occurred on or after the impacted date (March 9, 1975) and before the certification expiration date (June 15, 1978).

Thus, a new investigation would serve no purpose; consedquently, the investigation has been terminated.

Signed at Washington, D.C. this 14th day of April, 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[4510-28]

[TA-W-2873]

THE BALTIMORE & OHIO RAILROAD CO., SUBDIVISION 6, BENWOOD, W.VA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2873: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 9, 1978 in response to a worker petition received on December 19, 1977 which was filed on behalf of workers and former workers engaged in transport operations at Subdivision 6 of Baltimore & Ohio Railroad, Benwood, W. Va.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3778). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Baltimore & Ohio Railroad Co. and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The Department has de-

MY 2 7 8 UMI

V 43 | 85 MY 2 78 UMI

termined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm".

The Department's investigation revealed that The Baltimore & Ohio Railroad Co. is a rail transport firm founded in 1827 and incorporated in Maryland. The B & O Railroad Co. including all regions, divisions, and subdivisions thereof, is licensed and regulated by the Interstate Commerce Commission as a rail common carrier. Workers at the company are engaged in transport operations and perform no production operations.

Workers at The Baltimore & Ohio Railroad Co. do not produce an article within the meaning of section 222(3) of the Act. This Department has already determined that the performance of services is not covered by the adjustment assistance program. See Notice of Determination in *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether any of The Baltimore & Ohio Railroad's customers, i.e., firms which produce an article and for whom the service is provided, can be considered the "workers' firm." See Notice of Determination in *Nu-Car Driveaway, Incorporated* (TA-W-393, 41 FR 12749).

The Baltimore & Ohio Railroad Co., including all regions, divisions, and subdivisions thereof, is not financially, corporately, or otherwise involved in the business of any of its customers. The Baltimore & Ohio Railroad Co. is solely and directly controlled by the Chesapeake & Ohio Railway Co.

The workers on whose behalf this petition was filed were hired by and are paid by the subject to the control of B & O Railroad Co. personnel only. All employment benefits enjoyed by the workers are provided and maintained by The B & O Railroad Co. Thus, The B & O Railroad Co. must be considered the workers' firm.

Conclusion

After careful review, I conclude that all workers at the Baltimore & Ohio Railroad Co., Subdivision 6, Benwood, W. Va. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2647]

BETHLEHEM MINES CORP., DIVISION OF BETHLEHEM STEEL CORP., HANOVER QUARRY, HANOVER, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2647: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 23, 1977 in response to a worker petition received on November 14, 1977, which was filed on behalf of workers and former workers producing processed limestone and metallurgical stone for the direct production of steelmaking at the Hanover Quarry, Hanover, Pa. of Bethlehem Mines Corp., division of Bethlehem Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on December 6, 1977 (42 FR 61695). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bethlehem Steel Corp., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation has revealed that all of the requirements have been met.

The Hanover Quarry operates within the Bethlehem Mines Corporation Division of Bethlehem Steel Corp. The metallurgical stone produced is used principally by the Sparrows Point, Md. and Johnstown, Pa. plants of the Bethlehem Steel Corp. in steelmaking, and accounts for approximately 61 percent of shipments from the Hanover Quarry. Production and shipments of metallurgical stone from Hanover are directly related to the steel operating rate at Sparrows Point and Johnstown.

In a determination issued on December 20, 1977, workers at the Sparrows Point plant producing carbon steel plate, continuous weld pipe, electric weld pipe, carbon steel rods, tin plate, hot and cold rolled sheet, galvanized sheets, and wire strand were certified as eligible to apply for adjustment assistance.

In a determination issued on February 13, 1978, all workers at the Johnstown plant were certified as eligible to apply for adjustment assistance.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the steel products produced at the Johnstown, Pa. and Sparrows Point, Md. plants of Bethlehem Steel Corp. contributed importantly to the decline in sales and production and to the total or partial separations of workers producing processed limestone and metallurgical stone at the Hanover Quarry, Hanover, Pa., of Bethlehem Mines Corp. In accordance with the provisions of the Act, I make the following certifications:

All workers at the Hanover Quarry, Hanover, Pa., of the Bethlehem Mines Corp. who became totally or partially separated from employment on or after January 1, 1977 are certified as eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2750]

C & P SPORTSWEAR, PATERSON, N.J.

Certifcation Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2750: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 8, 1977, in response to a worker petition received on November 29, 1977, filed on behalf of workers and former workers producing women's coats at C & P Sportswear in Paterson, N.J.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65307). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of C & P Sportswear and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council of America, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. It is concluded that all of the requirements have been met.

Imports of the category including women's, misses', and children's coats and jackets increased from 1,478 thousand dozen in 1974 to 1,517 thousand dozen in 1975, then increased 48.5 percent to 2,252 thousand dozen in 1976. Imports increased 23.9 percent from 1,680 thousand dozen in the first three-quarters of 1976 to 2,081 thousand dozen in the first three-quarters of 1977. The ratio of imports to domestic production increased from 38.9 percent in 1975 to 57.5 percent in 1976.

C & P Sportswear produces women's coats under contract for a number of manufacturers of women's apparel. These manufacturers had either increased their contracts placed for the production of women's coats with foreign contractors or had increased their purchases of imported finished women's coats while at the same time reducing contracts placed with the subject firm in 1977 compared with 1976.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with women's coats produced by C & P Sportswear of Paterson, N.J. contributed importantly to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at C & P Sportswear of Paterson, N.J. who became totally or partially separated from employment on or after November 25, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 21st day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2666]

CF & I STEEL CORP., MAXWELL MINE, WESTON, COLO.

Revised Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor issued a certification of eligibility to apply for adjustment assistance on January 27, 1978, applicable to workers and former workers producing coal at the Maxwell Mine of the CF & I Steel Corp., Weston, Colo. The Notice of Certification was published in the FEDERAL REGISTER on February 7, 1978 (43 FR 5085).

At the request of the petitioner, a further investigation was instituted by the Director of the Office of Trade Adjustment Assistance. A review of the case revealed that a significant number of the workers were placed on partial weeks near the end of October 1977. These workers were not covered by the original impact date of October 30, 1977.

The intent of the certification is to cover those workers at the Maxwell Mine, CF & I Steel Corp., Weston, Colo., who were affected by the decline in the production of coal related to import competition. The certification, therefore, is revised providing a new impact date of October 21, 1977.

The revised certification applicable to TA-W-2666 is hereby issued as follows:

All workers at the Maxwell Mine of CF & I Steel Corp., Weston, Colo., who became totally or partially separated from employment on or after October 21, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 24th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3169]

COHEN CLOTHES, BROOKLYN, N.Y.

Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on February 21, 1978, in response to a worker petition received on February 6, 1978, which was filed by the Amalgamated Clothing & Textile Workers Union on January 31, 1978, on behalf of workers and former workers producing men's and boys' tailored clothing at Cohen Clothes, Brooklyn, N.Y.

Notice of investigation was published in the FEDERAL REGISTER on March 3, 1978 (43 FR 8864). No public hearing was requested and none was held.

The petitioner, Amalgamated Clothing & Textile Workers Union, requested withdrawal of this petition. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 13th day of April 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-2435]

COLONIAL WOOD HEEL CO., LYNN, MASS.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Departmentof Labor herein presents the results of TA-W-2435: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 11, 1977 in response to a worker petition received on October 4, 1977, which was filed on behalf of workers and former workers producing finished heels for ladies' shoes at the Colonial Wood Heel Co., Inc., Lynn, Mass.

The Notice of Investigation was published in the FEDERAL REGISTER on October 25, 1977 (42 FR 56375). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Colonial Wood Heel Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

A survey of shoe manufacturers which contracted orders for covered heels from Colonial Wood Heel Co., Inc., revealed that none of these manufacturers purchased imported covered heels for use in the production of women's shoes.

Some manufacturers reported decreased orders for covered heels because of increaed imports of women's shoes.

Imports of shoes which incorporate heels are not "like or directly competitive" with heels within the meaning of section 222(3) of the Trade Act of 1974.

Conclusion

After careful review, I conclude that all workers at Colonial Wood Heel Co., Inc., Lynn, Mass., are denied eligibility to apply for adjustment assistance under title II, Chapter 2 of the Trade Act of 1974.

[TA-W-2941]

CONSOLIDATED RAIL CORP., MARTINSFERRY, OHIO

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2941: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 23, 1978, in response to a worker petition received on January 3, 1978, which was filed on behalf of workers and former workers engaged in employment related to transporting freight at the Martinsferry, Ohio, subdivision of the Consolidated Rail Corp., Pittsburgh, Pa.

The notice of investigation was published in the FEDERAL REGISTER on February 3, 1978 (43 FR 4696). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Consolidated Rail Corp. and the Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm".

The Department's investigation revealed that the Consolidated Rail Corp. (Conrail), a Pennsylvania corporation based in Pittsburgh, is a railroad company operating throughout 17 Eastern states. Conrail is licensed and regulated by the Interstate Commerce Commission as a common carrier. The company offers its transportation services to a wide variety of customers in the market area through which its railroad network extends. Conrail is not engaged in any production operations. The Martinsferry, Ohio, subidivison of Conrail provided transportation services for customers in southeastern Ohio and in West Virginia. Workers in this subdivision are engaged in transportation operations.

Workers at the Martinsferry, Ohio, subdivision of Conrail do not produce an article within the meaning of section 222(3) of the Act. This Department has already determined that the performance of services is not covered by the adjustment assistance program. See Notice of Determination in *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether any of Conrail's customers i.e., firms which produce articles, and for whom the service is provided, can be considered the "workers firm." See Notice of Determination in *Nu-Car Driveaway, Incorporated* (TA-W-393, 41 FR 12749).

The Martinsferry, Ohio, subidivison of Conrail is not financially, corporately, or otherwise involved in the business of any of its customers. The workers on whose behalf this petiton was filed were hired and are paid by and subject to the control of Conrail personnel only. All employment benefits are provided and maintained by Conrail. Thus, Conrail must be considered the workers' firm.

CONCLUSION

After careful review, I conclude that all workers at the Martinsferry, Ohio, subdivision of the Consolidated Rail Corp., Pittsburgh, Pa. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-2842]

CONSOLIDATED RAIL CORP., LOGANSPORT SUBDIVISION OF FORT WAYNE DIVISION, LOGANSPORT, IND.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2842: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 4, 1978, in response to a worker petition received on December 15, 1977, which was filed on behalf of workers and former workers engaged in transport operations at Consolidated Rail Corp., Logansport Subdivision of the Fort Wayne Division, Logansport, Ind.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3777). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Consolidated Rail Corp. and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm."

The Department's investigation revealed that Consolidated Rail Corporation is a rail transport firm based in Philadelphia, Pa. The Corporation is a consolidation of several Northeastern railroads which was established April 1, 1976, pursuant to Title II of Pub. L. 93-236, the Regional Rail Reorganization Act of 1973.

Consolidated Rail Corp., including all regions, divisions, and subdivisions thereof, is licensed and regulated by the Interstate Commerce Commission as a rail common carrier. Workers at the firm are engaged in transport operations and perform no production operations.

Workers at Consolidated Rail Corp. do not produce an article within the meaning of section 222(3) of the Act and this Department has already determined that the performance of services is not covered by the adjustment assistance program. See Notice of Determination *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether any of the Consolidated Rail Corp.'s customers, i.e., firms which produce an article and for whom the service is provided, can be considered the "workers' firm." See Notice of Determination in *Nu-Car Driveaway, Incorporated* (TA-W-393, 41 FR 12749).

Consolidated Rail Corp. is not financially, corporately, or otherwise involved in the business of any of its customers. The workers on whose behalf this petition was filed were hired by and are paid by and subject to the control of Consolidated Rail Corp personnel only. All employment benefits enjoyed by the workers are provided and maintained by Consolidated Rail Corp. Thus, Consolidated Rail Corp. must be considered the workers' firm.

CONCLUSION

After careful review, I conclude that all workers at Consolidated Rail Corp., Logansport Subdivision of the Fort Wayne Division, Logansport, Ind., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of April 1978.

[TA-W-2815]

CONSOLIDATED RAIL CORP., EASTERN REGION, READING DIVISION, READING, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2815: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 27, 1977, in response to a worker petition received on December 9, 1977, which was filed on behalf of workers and former workers engaged in transportation of freight by rail at the Eastern Region, Reading Division of Consolidated Rail Corp., Reading, Pa.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1555). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Consolidated Rail Corp. and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The Department has determined that services are not "articles" within the meaning of section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm."

The Department's investigation revealed that Consolidated Rail Corp. is a rail transport firm based in Phildelphia, Pa. The Corporation is a consolidation of several Northeastern railroads which was established April 1, 1976, pursuant to Title II of Pub. L. 93-236, the Regional Rail Reorganization Act of 1973.

Consolidated Rail Corp., including all regions, divisions, and subdivisions thereof, is licensed and regulated by the Interstate Commerce Commission as a rail common carrier. Workers at the firm are engaged in transport operations and perform no production operations.

Workers at Consolidated Rail Corp. do not produce an article within the meaning of section 222(3) of the Act and this Department has already determined that the performance of services is not covered by the adjustment assistance program. See Notice of Determination in *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether any of Consolidated Rail Corp.'s customers, i.e., firms which produce an article and for whom the service is provided, can be considered the "workers' firm." See Notice of Determination in *Nu-Car Driveaway, Incorporated* (TA-W-393, 41 FR 12749).

Consolidated Rail Corp. is not financially, corporately, or otherwise involved in the business of any of its customers. The workers on whose behalf this petition was filed were hired by and are paid by and subject to the control of Consolidated Rail Corp. personnel only. All employment benefits enjoyed by the workers are provided and maintained by Consolidated Rail Corp. Thus, Consolidated Rail Corp. must be considered the worker's firm.

CONCLUSION

After careful review, I conclude that all workers at the Eastern Region, Reading Division of Consolidated Rail Corp., Reading, Pa. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of April 1978.

[4510-28]

[TA-W-2602]

FLORSHEIM SHOE CO., PADUCAH, KY.

Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2602: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 14, 1977 in response to a worker petition received on November 3, 1977, which was filed by the Boot & Shoe Workers Union on behalf of workers and former workers producing men's shoes at the Paducah, Ky., plant of the Florsheim Shoe Co.

The notice of investigation was published in the FEDERAL REGISTER on December 16, 1977 (42 FR 63484). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Florsheim Shoe Co., the Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of men's dress and casual footwear increased, in absolute terms, from 1972 to 1973, declined from 1973 to 1974, and increased from 1974 to 1975. Imports increased 23.6 percent from 1975 to 1976, and declined 1.6 percent in the first nine months of 1977 compared to the same period of 1976. The ratios of imports to domestic production and consumption increased from 58.7 percent and 37.0 percent, respectively, in 1975 to 70.4 percent and 41.3 percent, respectively, in 1976. The same ratios increased from 69.1 percent and 40.9 percent, respectively, in the first nine months of 1976, to 75.0 percent and 42.8 percent, respectively, in the same period of 1977.

The U.S. International Trade Commission recently found that certain footwear articles, including men's dress and casual shoes, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing such articles. In the case of men's dress and casual footwear, the ratio of imports to domestic production has been greater than 50 percent in each of the past five years, reaching a peak level of 75.0 percent in the first nine months of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's dress and casual shoes produced at the Paducah, Ky., plant of the Florsheim Shoe Co. contributed importantly to the decline in production and to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Paducah, Ky., plant of the Florsheim Shoe Co. who became totally or partially separated from employment on or after October 6, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-2798]

FLORSHEIM SHOE CO., MOUNT VERNON, ILL.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2798: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 21, 1977 in response to a worker petition received on December 8, 1977, which was filed by the United Shoe Workers of America on behalf of workers and former workers producing women's shoes at the Mount Vernon, Ill., plant of the Florsheim Shoe Co.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1556). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Florsheim Shoe Co., the Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of women's nonrubber footwear, except athletic, increased in absolute terms from 1972 to 1973, declined from 1973 to 1974, and increased from 1974 to 1975. Imports increased 0.2 percent from 1975 to 1976 and declined 8.9 percent in the first nine months of 1977 compared to the same period of 1976. The ratios of imports to domestic production and consumption declined from 119.1 percent and 54.4 percent, respectively, in 1975 to 117.9 percent and 54.1 percent, respectively, in 1976. The same ratios increased from 119.9 percent and 54.5 percent, respectively, in the first nine months of 1976 to 124.9 percent and 55.5 percent, respectively, in the first nine months of 1977.

The U.S. International Trade Commission recently found that certain footwear articles, including women's shoes, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing such articles. The Commission had considered factors other than imports that have been alleged as more important causes of injury, but concluded that, although such factors may have contributed in part, imports have been the most important cause of injury.

In the case of women's nonrubber footwear, the ratio of imports to domestic production has been greater than 99 percent in each of the past five years, reaching a peak level of 124.9 percent in the first nine months of 1977.

Florsheim Shoe Co. began importing women's shoes in November 1975. The company increased its imports from 1976 to 1977.

CONCLUSION

After careful review of the facts obtained in the investigaton, I conclude that increases of imports like or directly competitive with women's shoes produced at the Mount Vernon, Ill., plant of the Florsheim Shoe Co. contributed important to the total or partial separation of workers at the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Mount Vernon, Ill., plant of the Florsheim Shoe Co. who became totally or partially separated from employment on or after December 3, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-2471]

FLORSHEIM SHOE CO., DAVIE DRIVE, ANNA, ILL.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2471: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 17, 1977 in response to a worker petition received in October 4, 1977 which was filed by the Retail Clerk's International Union on behalf of workers and former workers producing fitted shoe uppers for men's shoes at the Davie Drive, Anna, Ill. plant of the Florsheim Shoe Co. The Notice of Investigation incorrectly stated that the petition had been filed by the United Shoe Workers of America.

The Notice of Investigation was published in the FEDERAL REGISTER on November 8, 1977 (42 FR 58210). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Florsheim Shoe Co., the Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

The footwear "uppers" produced at the Davie Drive plant are used by other Florsheim plants in producing men's shoes. The plant, therefore, is part of an integrated production process by Florsheim resulting in men's dress and casual shoes.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of men's dress and casual footwear increased 23.6 percent from 1975 to 1976, and declined 1.6 percent in the first nine months of 1977 compared to the same period of 1976. The ratios of imports to domestic production and consumption increased from 58.7 percent and 37.0 percent, respectively, in 1975 to 70.4 percent and 41.3 percent, respectively, in 1976. The same ratios increased from 69.1 percent and 40.9 percent, respectively, in the first nine months of 1976, to 75.0 percent and 42.8 percent, respectively in the same period of 1977.

The U.S. International Trade Commission recently found that certain footwear articles, including men's dress and casual shoes, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industry producing such articles. In the case of men's dress and casual footwear, the ratio of imports to domestic production has been greater that 50 percent in each of the past five years, reaching a peak level of 75.0 percent in the first nine months of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's dress and casual shoes produced by the Florsheim Shoe Co. contributed importantly to the decline in production of men's shoe uppers and to the total or partial separation of workers at the Davie Drive, Anna, Ill. plant. In accordance with the provisions of the Act, I make the following certification.

All workers at the Davie Drive, Anna, Ill. plant of the Floresheim Shoe Co. who became totally or partially separated from employment on or after September 22, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2009]

GENERAL MOTORS CORP., CHEVROLET TRANSMISSION PLANT MUNCIE, IND.

Revised Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 222 of the Trade Act of 1974 and in accordance with section 223(a) of such Act, the Department of Labor issued on September 19, 1977 a notice of determinations regarding eligibility to apply for adjustment assistance that applied to workers and former workers who produce component parts for subcompact cars at twenty-one (21) plants of the General Motors Corp., Detroit, Mich. (TA-W-2002-2022).

Pursuant to that notice, workers at the Muncie, Ind. Chevrolet transmission plant (TA-W-2009) were denied eligibility to apply for trade adjustment assistance.

The notice of determinations was published in the FEDERAL REGISTER on September 30, 1977 (42 FR 52509).

Subsequent to the publication of the determinations, the Office of Trade Adjustment Assistance received an inquiry from the International Union, United Automobile, Aerospace and Agriculture Implement Workers of America (U.A.W.) on behalf of workers and former workers who produce 70 MM transmissions for use in subcompact cars at the Muncie, Ind. Chevrolet transmission plant of the General Motors Corp.

Workers at the Muncie Ind. Chevrolet transmission plant were denied eligibility to apply for trade adjustment assistance because the Department's investigation revealed that: (1) Only subcompact car production at General Motors was adversely affected by increased imports; (2) workers at the Muncie plant produce parts for use in various automotive vehicles in addition to subcompact cars; (3) workers at the Muncie plant cannot be identified by product line; and (4) parts for use in subcompact cars did not constitute a significant proportion of total plant output.

A further investigation revealed that the 70 MM transmission produced at the Muncie, Ind. plant is used solely for the Chevette and Acadian car lines (both subcompact car lines) and that workers can be identified by product line. Employees in Departments 20, 21, 22, 23, 24, 25, 26, and 28 of the Muncie, Ind. plant work exclusively on the 70 MM transmission and contribute more than half of the total labor content of this transmission.

Workers in other departments which account for the remaining labor content of the 70 MM transmission are involved in the production of all component lines at the Muncie plant. An insignificant proportion of these components is used in the production of subcompact cars.

CONCLUSION

Based on additional evidence, a review of the entire record, and in accordance with the provisions of the Act, I make the following revised determination

All workers exclusively engaged in employment related to the production of 70 MM transmissions, in departments 20,21, 22, 23, 24, 25, 26 and 28, at the Muncie, Ind. Chevrolet transmission plant of the General Motors Corp. who became totally or partially separated from employment on or after March 28, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that all remaining employees at the Muncie, Ind. Chevrolet transmission plant of the General Motors Corp. are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2844]

INGERSOLL STEEL CO., NEW CASTLE, IND.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2844: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 4, 1978 in response to a worker petition received on December 13, 1977 which was filed by the United Auto Workers on behalf of workers and former workers producing stainless plate steel. Subsequent investigation revealed that the New Castle plant also produced plow steel and saw steel.

The Notice of Investigation was published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3777). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Ingersoll Steel Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

A survey was conducted of customers representing a majority of the Ingersoll Co.'s sales in 1977. Most customers reported no import purchases at all. Those customers that did purchase imports also increased purchases from Ingersoll.

Company officials attributed declines in sales of plow steel to the lack of demand for such products by agricultural users. They attributed their decline in sales of stainless steel plate to a shift in preference by purchasers of this product to a wider size plate.

CONCLUSION

After careful review I conclude that all workers at the New Castle, Ind. plant of Ingersoll Steel Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision

V 43 | 85 MY 2 78 UMI

thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meetings these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 15, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 15, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 18th day of April 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 15, 1978.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 15, 1978.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 11th day of April 1978.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

[TA-W-3000]

KENTUCKY ELECTRIC STEEL CO., COALTON, KY.

Negative determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3000: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 31, 1978, in response to a worker petition received on January 10, 1978, which was filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at Kentucky Electric Steel Co. in Coalton, Ky. The investigation revealed that only hot and cold rolled carbon bars and bar-size light shapes are produced at Kentucky Electric Steel.

V 4 3 — 8 5

The Notice of Investigation was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 7067). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Kentucky Electric Steel, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

The Coalton, Ky. plant of Kentucky Electric Steel Co. produces only two products: hot and cold rolled carbon bars and bar-size light shapes.

Sales of hot and cold rolled carbon bars and bar-size light shapes increased in value in 1977 compared to 1976. Production increased in quantity in 1977 compared to 1976.

CONCLUSION

After careful review I conclude that all workers at the Kentucky Electric Steel Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 24th day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc. 78-11927 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2393]

MEDFORD KNITWEAR MILLS, INC., MEDFORD, N.J., WRIGHTSTOWN, N.J., LEBANON, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2393: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 28, 1977 in response to a worker petition received on September 23, 1977 which was filed on behalf of workers and former workers producing girls' sportswear and women's tops at Medford Knitwear Mills, Inc., Medford, N.J. The investigation was expanded to include branch facilities at Wrightstown, N.J. and Lebanon, Pa.

The Notice of Investigation was published in the FEDERAL REGISTER on October 14, 1977 (42 FR 55316). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Medford Knitwear Mills, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. The investigation has revealed that all of the requirements have been met.

Imports of women's, misses' and children's slacks and shorts increased 10 percent from 1975 to 1976 and increased 6 percent from January–September 1976 to January–September 1977. The ratio of imports to domestic production increased from 35.2 percent in 1975 to 36.4 percent in 1976.

Imports of women's, misses' and children's skirts increased 53 percent from 1975 to 1976. Imports declined 36 percent January–September 1976 to January–September 1977. The ratio of imports to domestic production increased from 10.8 percent in 1975 to 11.2 percent in 1976.

Imports of women's, misses' and children's blouses and shirts increased 16 percent from 1975 to 1976. Imports increased 1 percent from January–September 1976 to January–September 1977. The ratio of imports to domestic production increased from 70.4 percent in 1975 to 74.8 percent in 1976.

A survey of customers revealed that most respondants decreased purchases from Medford Knitwear Mills, Inc. in 1976 and 1977 and increased purchases of imported women's tops and girls' sportswear during the same period.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's tops and girls' sportswear produced at Medford Knitwear Mills, Inc., Medford, N.J. and its branch facilities at Wrightstown, N.J. and Lebanon, Pa. contributed importantly to declines in sales or production and to total or partial separations of workers at that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Medford Knitwear Mills, Inc., Medford N.J. and its branch facilities at Wrightstown, N.J. and Lebanon, Pa. (also known as Demford Manufacturing Co., Inc.) who became totally or partially separated from employment on or after September 16, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc. 78-11928 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2638]

PITTSBURGH ANNEALING BOX CO., PITTSBURGH, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2638: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 21, 1977 in response to worker petition received on November 10, 1977, which was filed by the United Steelworkers of America on behalf of worker and former workers producing annealing covers and general metals fabrication at Pittsburgh Annealing Box Co., Pittsburgh, Pa.

The notice of investigation was published in the FEDERAL REGISTER on December 6, 1977 (42 FR 61696). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Pittsburgh Annealing Box Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or division have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Evidence developed during the course of the investigation revealed that imports of fabricated platework in general and annealing covers in particular are negligible when compared to domestic production. Imports of fabricated platework represented less than one percent of domestic production from 1972 through the third quarter of 1977. A survey by this Office of the major domestic steel companies accounting for more than 75 percent of raw steel production in 1976, revealed that there are no significant imports of annealing covers into the United States.

CONCLUSION

After careful review, I conclude that all workers at Pittsburgh Annealing Box Co., Pittsburgh, Pa. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 19th day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc. 78-11929 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2737]

PITTSBURGH METALS PURIFYING CO., SAXONBURG, PA.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2737: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 8, 1977, in response to a worker petition received on November 28, 1977, which was filed by International Molders' & Allied Workers' Union on behalf of workers and former workers producing hot tops, Soffelex insulator board and exothermic compounds at the Saxonburg, Pa., plant of the Pittsburgh Metals Purifying Co.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65308). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Pittsburgh Metals Purifying Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the decline in sales or production.

The petition contends that the importation of steel products has adversely affected production and production-related employment at the Saxonburg plant of the Pittsburgh Metals Purifying Co.

However, imported steel cannot be considered to be like or directly competitive with hot tops, Soffelex insulator board or exothermic compounds. Hot tops, insulator board and exothermic compounds must be considered in determining import injury to workers producing hot tops, Soffelex insulator board or exothermic compound at the Saxonburg plant.

There is no separately identifiable import data on hot tops, insulator board and exothermic compound in the TSUSA. A Department survey of the major domestic steel companies, accounting for approximately 75 percent of raw steel produciton in 1976, revealed that there are no significant imports of hot tops, insulator board or exothermic compounds into the United States. Transportation costs are a major component of the total costs of production and, as such, limit the geographical market area available to producers, effectively excluding all significant import competition.

Additionally, the Department surveyed customers of Pittsburgh Metals who purchased hot tops, insulator board or exothermic compounds. Respondents to the survey do not purchase imported hot tops, insulator board or exothermic compounds and do not know of any imports of these products.

Production of hot tops, Soffelex insulator board and exothermic compounds increased respectively from 1976 to 1977. A decrease in the produciton of hot tops occuring in the first quarter of 1977 was offset by an increase in the production of Soffelex insulator board, a competitive substitute for hot tops, during that same period of time.

CONCLUSION

After careful review, I conclude that all workers at the Saxonburg, Pa. plant of the Pittsburgh Metals Purifying Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of April 1978.

JAMES F. TAYLOR
Director, Office of Management, Administration, and Planning.

[TA-W-2584]

RCA CORP., MEADOW LANDS, PA.

Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2584: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 9, 1977, in response to a worker petition received on November 1, 1977, which was filed by three workers on behalf of workers and former workers producing handheld transmitter/receiver units, language laboratory units, and citizens band transceiver units at the Meadow Lands, Pa., plant of RCA Corp. The investigation revealed that citizens band units and language laboratory units are not produced at the Meadow Lands plant.

The notice of investigation was published in the FEDERAL REGISTER on November 18, 1977 (42 FR 59565). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of RCA Corp., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

The Department's investigation revealed that imports of articles like or directly competitive with the TACTEC portable transmitter/receiver produced by RCA Corp. of Meadow Lands, Pa., have been negligible since 1972. The principal factor that affected sales of TACTEC units in 1977 was strong domestic competition.

M Y 2 — 7 8
UMI

CONCLUSION

After careful review I conclude that all workers at the RCA Corp., Meadow Lands, Pa., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-3299]

RTE CORP., WAUKESHA, WIS.

Notice of Negative determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-3299: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on March 2, 1978, in response to a worker petition received on February 1, 1978, which was filed by three individuals on behalf of workers and former workers producing computer programs, drawings, specifications, methods, and assembled transformers at the RTE Corp., Waukesha, Wis.

Notice of Investigation was published in the FEDERAL REGISTER on March 17, 1978 (43 FR 11276). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the RTE Corp., Waukesha, Wis., and the petitioners. In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, it must be found that a significant number of the workers have been or are threatened to become totally or partially separated from employment.

In the present instance, it was determined that two of the workers petitioning for assistance had been separated from employment more than one year from the date of the petition, and the third worker was employed at a different company facility. Also, monthly employment levels at the firm had increased substantially since February 1976. Employment in February 1978 was more than 60 percent greater than the same month in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers of the firm have not been and are not threatened to become totally or partially separated from the firm as required in section 222 of the Trade Act of 1974. The petition is, therefore, denied.

Signed at Washington, D.C., this 24th day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc. 78-11934 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2464]

RICHARD TANNING COMPANY, INC., SALEM, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2464: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on October 13, 1977, in response to a worker petition received on October 6, 1977, which was filed on behalf of workers and former workers producing tanned sheepskin suede garmet leather at Richard Tanning Co., Salem, Mass.

The notice of investigation was published in the FEDERAL REGISTER on October 25, 1977 (43 FR 205). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Richard Tanning Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following cirterion has not been met:

That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

The Department's investigation revealed that the average number of production workers and the average weekly hours worked at the subject firm increased in 1976 compared to 1975, increased in 1977 compared to 1976, and increased in the first two months of 1978 compared to the same period in 1977. The layoffs that do occur at the subject firm are seasonal in nature.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that all workers at Richard Tanning Co., Inc., Salem, Mass., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2770]

ROCHESTER SHOE CORP., ROCHESTER, N.H.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2770: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977, in response to a worker petition received on December 5, 1977, which was filed on behalf of workers and former workers producing women's dress and casual shoes at Rochester Shoe Corp., Rochester, N.H.

The Notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Rochester Shoe Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 22 of the Trade Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in the sales or production.

A survey of one of Rochester Shoe's customers which accounted for over 90 percent of Rochester's sales revealed that the customer's purchases from Rochester in 1977 were the same as in 1976 while its purchases of other domestic footwear increased in 1977 and of imported footwear decreased in 1977.

Further, average employment at Rochester Shoe Corp. declined by less than one percent in 1977 compared to 1976. The average hours worked per worker increased in 1977 over the previous year. There is no threat of separations of a significant number or proportion of workers.

CONCLUSION

After careful review, I conclude that all workers at Rochester Shoe Corp. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 18th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-2771]

SAN FRANCISCO SHIRT WORKS, INC., SAN FRANCISCO, CALIF.

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2771: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 12, 1977, in response to a worker petition received on December 1, 1977, which was filed on behalf of workers and former workers cutting material for women's, misses', and children's blouses and T-shirts in the Cutting Division of the San Francisco Shirt Works, San Francisco, Calif.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65306). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the San Francisco Shirt Works, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. With respect to workers performing warehousing, shipping, administrative, executive, and designing duties without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Since 1976, over 80 percent of total sales of the San Francisco Shirt Works are of imported apparel items. Employees in the Warehousing, Shipping, Administrative, Executive, and Designing Divisions are engaged in employment related to the importation of shirts.

With respect to workers cutting material for women's, misses', and girl's blouses and T-shirts in the Cutting Division all of the group eligibility requirements of section 222 of the Act have been met.

Imports of women's, misses', and children's blouses and shirts increased annually from 20,549 thousand dozen in 1974 to 30,273 thousand dozen in 1976. Imports increased from 24,016 thousand pairs in the first 9 months of 1976 to 24,036 thousand pairs in the first 9 months of 1977. Imports as a percentage of production increased annually from 54.6 percent in 974 to 74.8 percent in 1976.

In November 1977 the Cutting Division was phased out of operation by the San Francisco Shirt Works. This termination of production is attributable to the company's decision to import all of its products. With the closing of the Cutting Division, 100 percent of the blouses and shirts sold by San Francisco Shirt Works are imported.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's, misses' and children's blouses and T-shirts cut by the Cutting Division, San Francisco Shirt Works, San Francisco, Calif., contributed importantly to the decline in production and to the separation of workers in the division. In accordance with the provisions of the Act, I make the following certification:

All workers at the Cutting Division, San Francisco Shirt Works, San Francisco, Calif. who became totally or partially separated from employment on or after October 18, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that workers engaged in employment related to the processing of imported shirts in the Warehousing, Shipping, Administrative, Executive, and Designing Divisions of San Francisco Shirt Works are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C., this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2822]

SERVOMATION CORP., WARREN-YOUNGSTOWN DICTRICT, WARREN, OHIO

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2822: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 27, 1977, in response to a worker petition received on December 9, 1977, which was filed by the International Brotherhood of Teamsters, Chauffers, Warehousemen, and Helpers of America (Ind.) on behalf of workers and former workers of Servomation, Warren, Ohio providing food canteens and vending machine operation. During the course of the investigation it was determined that the firm is Servomation Corp., Warren-Youngstown District, Warren, Ohio.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1555). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Servomation Corp., Warren-Youngstown District and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The Department has determined that services are not "articles" within the meaning of Section 222 of the Act, and that independent firms for which the subject firm provides services cannot be considered to be the "workers' firm."

The Department's investigation revealed that Servomation Corp., Warren-Youngstown District, Warren, Ohio is a vending and food service company which is part of Servomation Corp., a New York, N.Y. based firm also engaged invending and food service.

V43 M2 85 78 UMI

V 4 3 — 8 5 M Y 2 7 8 UMI

Workers at Servomation Corp., Warren-Youngstown District do not produce an article within the meaning of section 222(3) of the Act. This Department has already determined tha the performance of services is not covered by the admustment assistance program. See Notice of Determination in *Pan American World Airways, Incorporated* (TA-W-153, 40 FR 54639). The only question in this case is whether Youngstown Sheet & Tube Co., i.e., a firm which produces an article, namely steel, and for whom the service is provided, can be considered the "workers' firm." See Notice of Determination in *Nu-Car Diveaway, Incorporated* (TA-W-393, 41 FR 12749).

Servomation Corp. is not financially, corporately or otherwise involved in the business of Youngstown Sheet & Tube Co. The workers on whose behalf this petition was filed were hired and are paid by and subject to the control of Servomation Corp., Warren-Youngstown District personnel only. All employment benefits enjoyed by the workers are provided and maintained by Servomation Corp., Warren-Youngstown District. Thus, Servomation Corp., Warren-Youngstown District must be considered the workers' firm.

CONCLUSION

After careful review, I conclude that all workers at Servomation Corp., Warren-Youngstown District, Warren, Ohio are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[FR Doc. 78-11936 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2251]

SHELDAHL, INC., EAST PROVIDENCE, R.I.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2251: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act

The investigation was initiated on August 10, 1977 in response to a worker petition received on August 5, 1977, which was filed on behalf of workers and former workers producing Polyethelene Bag Making Machines, Ritesize Box Machines and Laminators at the East Providence, R. I. plant of Sheldahl, Inc., Packaging Machinery Division.

The notice of investigation was published in the FEDERAL REGISTER on August 27, 1977 (42 FR 27330). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Sheldahl, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of plastic bag making machines increased in value from $3,360,000 in 1975 to $4,033,000 in 1976 and to $4,435,000 in 1977.

The imports to domestic production ratio for plastic bag making machines increased from 21.0 percent in 1975 to 22.1 percent in 1976 and then declined to 20.2 percent in 1977.

U.S. imports of machines for making paper boxes, cartons, and similar rigid containers increased in value from $14,484,000 in 1975 to $23,952,000 in 1976 and increased to $25,519,000 in the first ten months of 1977, compared to $19,427,000 in the same period of 1976.

The imports to domestic production ratio for machines for making paper boxes, cartons, and similar rigid containers increased from 13.4 percent in 1975 to 21.8 percent in 1976.

The Packaging Machinery Division of Sheldahl, Inc. lost several bids to foreign competitors for production of poly bag making machines during fiscal year 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with packaging machines produced by Sheldahl, Inc., Packaging Machinery Division, East Providence, R. I., contributed importantly to the decrease in sales and production and to the total or partial separation of workers at that division. In accordance with the provisions of the Act, I make the following certification:

All workers at Sheldahl, Inc., Packaging Machinery Division, East Providence, R. I., who became totally or partially separated from employment on or after August 2, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[FR Doc. 78-11937 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2347]

STANDARD RUBBER PRODUCTS, INC., HANOVER, MASS.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2347: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on September 12, 1977, in response to a worker petition received on September 12, 1977, which was filed on behalf of workers and former workers producing rubber soling compound at Standard Rubber Products, Inc. in Hanover, Mass.

The Notice of Investigation was published in the FEDERAL REGISTER on October 4, 1977 (42 FR 54031). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Standard Rubber Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met.

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

Evidence developed during the Department's investigation revealed that Standard Rubber Co. produces shoe soles from rubber soling compound and rubber sheets from rubber soling compound. The value of the rubber sheets increased in the first 9 months of 1977 compared to the same period of 1976. Rubber sheets are produced exclusively for one company, which does not purchase imported rubber sheets for shoe soles.

Sales of rubber soles decreased in the first 9 months of 1977 compared to the same period of 1976. The decline in sales was the result of Standard Rubber's major customer discontinuing the manufacture of completed shoes in early 1977. Although workers at this shoe manufacturer were certified as eligible to appply for adjustment assistance, imports of shoes which incorporate bottom stock of the same origin are not like or directly competitive with bottom stock (shoe soles) produced by Standard Rubber Products. This shoe manufacturer did not import bottom stock.

CONCLUSION

After careful review, I conclude that all workers at Standard Rubber Products, Inc. in Hanover, Mass. be denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[FR Doc. 78-11938 Filed 5-1-78; 8:45 am]

[4510-28]

[TA-W-2863]

SUPERIOR CUTTING DIE CO., ST. LOUIS, MO.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2863: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 5, 1978, in response to a worker petition received on December 20, 1977, which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing cutting dies used in the production of leather garments and shoes at Superior Cutting Die Co., St. Louis, Mo.

The Notice of Investigation was published in the FEDERAL REGISTER on January 20, 1978 (43 FR 2952). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Superior Cutting Die Co., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

During the five year period from 1973 through 1977, imports of cutting dies remained less than one-half of one percent (0.5) of domestic production. The impact of imported cutting dies on domestic production can be termed "negligible". Declines in domestic production can be attributed to declines in aggregate domestic production of shoes, the production of which employs cutting dies.

CONCLUSION

After careful review, I conclude that all workers at Superior Cutting Die Co., St. Louis, Mo. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed. at Washington, D.C. this 25th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-2775]

TENNESSEE FORGING STEEL CORP., NEWPORT, ARKANSAS DIVISION

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2775: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 22 of the Act.

The investigtion was initiated on December 14, 1977, in response to a worker petition received on December 6, 1977, which was filed on behalf of workers and former workers producing carbon steel structural shapes and re-shapes and re-bars at the Newport, Ark., Division of Tennessee Forging Steel Corp. During the course of the investigation it was determined that the workers produced carbon steel structural shapes and carbon steel bar-size light shapes.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1556). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Tennessee Forging Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 22 of the Act must be met. The investigation has revealed that all of the requirements have been met.

Imports of carbon steel bar-size light shapes increased from 164 thousand tons in 1976 to 263 thousand tons in 1977. Imports of carbon steel bar-size light shapes relative to domestic production increased from 19.5 percent in 1976 to 26.5 percent in 1977. Imports of carbon steel structural shapes increase from 1311 thousand tons in 1976 to 1604 thousand tons in 1977. Imports of carbon steel structural shapes relative to domestic production increased from 38.8 percent in 1976 to 45.0 percent in 1977.

Customers of the Newport, Tenn., Division of Tennessee Forging Steel increased purchases of carbon steel bar-size light shapes and carbon steel structural shapes from foreign suppliers in 1977 while reducing purchases from Tennessee Forging Steel Corp.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with carbon steel bar-size light shapes and carbon steel structural shapes the Newport, Ark., Division of the Tennessee Forging Steel Corp., contributed importantly to the decline in sales or production at those facilities. In accordance with the provisions of the Act, I make the following certification:

All workers at Newport, Ark., Division of Tennessee Forging Steel Corp., who became totally or partially separated from employment on or after September 23, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 21st day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-3155]

TOWER FASHIONS, NEW YORK, N.Y.

Notice of Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 3, 1978 in response to a worker petition received on that date which was filed by the International Ladies Garment Workers Union on December 14, 1977, on behalf of workers and former workers producing ladies coats at Tower Fashions, New York, N.Y.

Notice of investigation was published in the FEDERAL REGISTER on

V 43 — 85

March 3, 1978 (43 FR 8863). No public hearing was requested and none was held.

During the course of the investigation it was established that the ILGWU does not represent the workers at Tower Fashions. The ILGWU represented workers employed at Latest Fashions, Inc. Evidence developed indicates that all workers were separated from employment at Latest Fashions, Inc., on November 6, 1975, more than one year from the filing date of this petition (Dec. 14, 1977).

In a letter dated March 17, 1978, the petitioner, the ILGWU, requested that this petition be withdrawn. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 18th day of April, 1978.

MARVIN M. FOOKS,
Director, Office
Trade Adjustment Assistance.

UNION CARBIDE CORP., METALS DIVISION, SHEFFIELD, ALA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2563: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 3, 1977, in response to a worker petition received on October 27, 1977, which was filed on behalf of workers and former workers producing ferroalloys at the Sheffield, Ala., Metals Division plant of Union Carbide Corp. The investigation revealed that the workers produced ferrosilicon.

The Notice of Investigation was published in the FEDERAL REGISTER on November 18, 1977 (42 FR 59583). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Union Carbide Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of ferrosilicon increased in absolute terms from 1972 to 1973, increased from 1973 to 1974 and decreased from 1974 to 1975. Imports increased 40 percent from 1975 to 1976 and increased 18 percent in the first 11 months of 1977 compared to the first 11 months of 1976. The ratios of imports to domestic production and consumption increased from 11.9 percent and 11.2 percent, respectively, in 1975 to 15.3 percent and 13.5 percent, respectively in 1976 and from 15.1 percent and 13.3 percent, respectively, in the first 11 months of 1976 to 18 percent and 15.5 percent respectively, in the first 11 months of 1977.

Customers of Union Carbide Corp., were surveyed for their purchases of ferrosilicon. Customers had decreased purchases from Union Carbide Corp., in 1977 from the previous year and increased purchases of imported ferrosilicon.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ferrosilicon produced at the Sheffield, Ala., Metals Division plant of Union Carbide Corp. contributed importantly to the total or partial separation of workers at that plant.

In accordance with the provisions of the Act, I make the following certification:

All workers at the Sheffield, Ala., Metals Division plant of Union Carbide Corp. who became totally or partially separated from employment on or after November 13, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 21st day of April 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-2866]

U.S. STEEL CORP., SAXONBURG, PA.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2866: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on January 5, 1978, in response to a worker petition received on December 9, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing steel products at the Saxonburg, Pa., and Rankin, Pa., plants of U.S. Steel Corp. The investigation revealed that sintered iron ore is produced at the Saxonburg plant. The investigation also revealed that all workers at the Rankin plant were previously certified eligible to apply for adjustment assistance on September 22, 1977 (see TA-W-1562).

The notice of investigation was published in the FEDERAL REGISTER on January 20, 1978 (43 FR 2952). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. Without regard to whether any of the other criteria have been met, the following cirterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

Average annual employment at the Saxonburg plant increased from 1975 to 1976 and from 1976 to 1977. Layoffs which occurred at the plant during this time were seasonal in nature and were not related to imports.

CONCLUSION

After careful review, I conclude that all workers at Saxonburg, Pa., plant of U.S. Steel Corp., are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-2779]

U.S. STEEL CORP., JOHNSTOWN-CANTON WORKS, JOHNSTOWN, PA.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2779: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 14, 1977, in response to a worker petition received on December 9, 1977, which was filed by the United Steelworkers of America on behalf of workers engaged in employment related to the production of steel products at the Johnstown, Pa., plant of the Johnstown-Canton Works of the U.S. Steel Corp. The investigation revealed that castings and specialty fabricated products are produced at the plant.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1556). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation has revealed that all of the criteria have been met.

The evidence developed during the investigation revealed that the Johnstown plant produces specialty fabricated products and castings. Almost all of the production of each product category is used in the production of steel products at other company manufacturing facilities. A large amount of the castings and the specialty fabricated products produced at the Johnstown plant in 1977 were shipped to U.S. Steel manufacturing facilities for which certifications of eligibility to apply for adjustment assistance have previously been issued by the Department.

Employment at the Johnstown plant declined in 1976 compared to 1975 and continued to decline in the first 11 months of 1977 compared to the like period in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the steel products produced at various plants of the U.S. Steel Corp. have contributed importantly to the total or partial separation of workers at the Johnstown, Pa., plant of the U.S. Steel Corp. as required for certification under section 222 of the Trade Act of 1974. In accordance with the provisions of the Act, I make the following certification:

All wokers at the Johnstown, Pa., plant of the U.S. Steel Corp., who became totally or partially separated from employment on or after December 7, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-2778]

U.S. STEEL CORP., JOHNSTOWN-CANTON WORKS, CANTON, OHIO

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-2778: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 14, 1977, in response to a worker petition received on December 9, 1977, which was filed by the United Steelworkers of America on behalf of workers engaged in employment related to the production of steel products at the Canton, Ohio, plant of the Johnstown-Canton Works of the U.S. Steel Corp. The investigation revealed that iron rolls are produced at the Canton plant.

The Notice of Investigation was published in the FEDERAL REGISTER on January 10, 1978 (43 FR 1556). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the U.S. Steel Corp., and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analyst, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met. The investigation revealed that all of the criteria have been met.

The evidence developed during the investigation revealed that almost all of the total production of iron rolls at the Canton, Ohio, plant in 1977 were shipped to other company facilities for which certifications have previously been issued by the Department. The rolls are used in bar mills where steel bars are produced.

Employment at Canton declined 3 percent in 1977 compared to 1976. In the fourth quarter of 1977, employment decline significantly compared to the like period in 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with the steel products produced at various plants of the U.S. Steel Corp. have contributed importantly to the total or partial separation of workers at the Canton, Ohio, plant of the Johnstown-Canton Works of the U.S. Steel Corp. as required for certification under section 222 of the Trade Act of 1974. In accordance with the provisions of the Act, I make the following certification:

All workers at the Canton, Ohio, plant of the U.S. Steel Corp. who became totally or partially separated from employment on or after October 1, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[TA-W-2551, 2552]

WIDE AWAKE SHIRT CO., READING, PA.; POTTSTOWN, PA.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2551, 2552: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on November 1, 1977, in response to a worker petition received on October 20, 1977, which was filed by the Amalgamated Clothing & Textile Workers Union on behalf of workers and former workers producing uniform shirts at the Reading, Pa., and Pottstown, Pa., plants of Wide Awake Shirt Co.

The notice of investigation was published in the FEDERAL REGISTER on November 15, 1977 (42 FR 59131). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Wide Awake Shirt Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Act must be met. Without regard to whether any of the other criteria have

MY 2 — 78
UMI

V 43 1 85

been met, the following cirterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threats thereof, and to the absolute decline in sales or production.

The Department's investigation revealed that there are no separately identifiable imports of uniform shirts. The product is not listed as a separate item of any U.S. Tariff Schedule grouping. However, industry sources have indicated that there are negligible imports of civilian uniform shirts. There are no imports of U.S. Military uniforms due to Armed Service Procurement Regulations.

None of the customers of Wide Awake Shirt Co. that were surveyed purchased imported uniform shirts. Customers confirmed that import influence in the uniform shirt industry is negligible and that uniform shirts are not competitive with other shirt styles.

CONCLUSION

After careful review I conclude that all workers at the Reading, Pa., and Pottstown, Pa., plants of Wide Awake Shirt Co. are denied eligibility to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 19th day of April 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

[4510-28]

[TA-W-2747]

WITTEMAN STEEL MILLS, FONTANA, CALIF.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2747: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on December 7, 1977 in response to a worker petition received on November 28, 1977 which was filed on behalf of workers and former workers producing steel reinforcing rod at Witteman Steel Mills, Fontana, Calif.

The notice of investigation was published in the FEDERAL REGISTER on December 30, 1977 (42 FR 65308). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Witteman Steel Mills, its customers, the American Iron and Steel Institute, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with those produced by the firm or subdivision have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

Most customers which decreased purchases of rebars from Witteman also decreased purchases of imported rebars. Witteman attempted to improve its competitiveness by shifting from ingot mold production to continuous casting. However, the depressed state of the construction industry combined with lowered prices offered by major domestic rebar manufacturers made it diffiucult for independent rebar firms to operate profitably and Witteman was forced to close.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that all workers at Witteman Steel Mills, Fontana, Calif. are denied eligibility to apply for trade adjustment assistance.

Signed at Washington, D.C. this 21st day of April 1978.

HARRY J GILMAN,
Acting Director, Office of Foreign Economic Research.

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

HUMANITIES PANEL ADVISORY COMMITTEE

Meeting

APRIL 26, 1978.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that a meeting of the Humanities Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in Room 807, from 9 a.m. to 5:30 p.m. on May 22, 1978.

The purpose of this meeting is to review NEH Archaeology Program applications submitted to the National Endowment for the Humanities for projects beginning after September 1, 1978.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen J. McCleary, 806 15th Street NW., Washington, D.C. 20506, or call area code 202-724-0367.

STEPHEN J. MCCLEARY,
Advisory Committee, Management Officer.

NATIONAL SCIENCE FOUNDATION

AD HOC SUBCOMMITTEE ON RIVFLO

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Ad Hoc Subcommittee on Riverine Flux to the Oceans (RIVFLO) of the Advisory Committee for Ocean Sciences.
Date and time: 19 May 1978—9 a.m. to 5 p.m.
Place: National Science Foundation, 1800 G Street NW., Room 643, Washington, D.C. 20550.
Type of meeting: Closed.
Contact person: Dr. Lauriston R. King, Acting Head, International Decade of Ocean Exploration Section, Room 605, National Science Foundation, Washington, D.C. 20550, telephone 202-632-7356.
Purpose of subcommittee: To provide advice and recommendations concerning support for research on RIVFLO.
Agenda: To review and evaluate research proposals as part of the selection process for awards.
Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.
Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 19, 1977.

Dated: April 27, 1978.

M. REBECCA WINKLER,
Committee Management Coordinator.

ADVISORY COMMITTEE FOR INFORMATION SCIENCE AND TECHNOLOGY

Establishment

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463); it is hereby determined that the establishment of the Advisory Committee for Information Science and Technology is necessary, appropriate, and in the public interest in connection with the performance of the duties imposed upon the Director, National Science Foundation (NSF) by the National Science Foundation Act of 1950, as amended, and other applicable law. This determination follows consultation with the Committee Management Secretariat, pursuant to the Federal Advisory Committee Act and OMB Circular No. A-63, Revised.

Name of committee: Advisory Committee for Information Science and Technology.
Purpose: To provide advice, recommendations, and oversight concerning support for activities related to the Foundation's programs in information science and technology.
Effective date of establishment and duration: The establishment of the Committee is effective upon filing the charter with the Director, NSF, and the standing committees of Congress having legislative jurisdiction of the NSF. The Committee will operate on a continuing basis contingent upon its renewal every two years.
Membership: The Committee will consist of up to 15 distinguished persons. Members of the Committee will include information scientists, information managers, and

MY 2 78 UMI

V 43 | 85

users of information. Specific expertise will be sought from many disciplines and fields including: basic and applied information science research, information science research applications, economics, behavioral and social sciences, computer science, information and communication policy, library science, publishing and communication services, scientists, engineers, and R&D management.

Operation: The Committee will operate in accordance with provisions of the Federal Advisory Committee Act (Pub. L. 92-463); NSF policy and procedures, OMB Circular No. A-63, Revised, and other directives and instructions issued in implementation of the Act.

Dated: April 27, 1978.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-528, STN 50-529, STN 50-530]

ARIZONA PUBLIC SERVICE CO., ET AL

Issuance of Amendment to Construction Permits

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Construction Permit Nos. CPPR-141, CPPR—142 and CPPR-143 issued to the Arizona Public Service Co. Salt River Project Agricultural improvement and Power District, El Paso Electric Co., Southern California Edison Co. and the Public Service Co. of New Mexico. The amendment reflects a change in the ownership of the Palo Verde Nuclear Generating Station, Units 1, 2 and 3 (the facilities) located in Maricopa County, Ariz. The amendment is effective as of its date of issuance.

The amendment provides for the deletion of Arizona Electric Power Cooperative, Inc., as an applicant for all licenses previously requested for the facilities and the transfer of 1.0 percent ownership interest to Arizona Public Service Co., 1.0 percent interest to Salt River Project Agricultural Improvement and Power District, and 0.4 percent ownership interest to Southern California Edison Co., of the 2.4 percent ownership interest held by Arizona Electric Power Cooperative, Inc. in the facilities.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the amendment.

For further details with respect to this action, see (1) the application for amendment contained in a letter dated July 8, 1977, (2) Amendment No. 1 to Construction Permit Nos. CPPR-141, CPPR-142 and CPPR-143, and (3) the Commission's related Safety Evaluation supporting Amendment No. 1 to the above construction permits. All of these items and other related material are available for public inspection at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C., and the local Public Document Room located in the Phoenix Public Library, Science and Industry Section, 12 East McDowell Road, Phoenix, Ariz.

A copy of items (2) and (3) may be obtained upon written request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, ATTN: Director, Division of Project Management.

Dated at Bethesda, Md. this 19 day of April 1978.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Branch No. 1, Division of Project Management.

[7590-01]

[Docket Nos. 50-329A 50-330A]

CONSUMERS POWER CO.

Order

APRIL 26, 1978.

On April 19, 1978 in ALAB-468, the Appeal Board entered an Order in this proceeding vacating the schedule established by the Licensing Board for a prehearing conference and the commencement of an evidentiary hearing related to the framing of appropriate antitrust license conditions. The Board was directed to take those steps which it believed appropriate to encourage a settlement and thus to avoid unnecessary litigation. It was assumed that the Board will wish to obtain regular progress reports from the parties to satisfy itself that the negotiations are being diligently carried on, and to insure that if settlement should be unlikely, the evidentiary hearing will then take place with no unnecessary further delay.

In accordance with ALAB-468, our notice and order dated April 17, 1978 is canceled, and the prehearing conference scheduled for May 12 and the evidentiary hearing to commence on June 6, 1978 are vacated. The briefs and other documents specified in our prior order will not be required at this time.

In order to monitor the progress of the pending negotiations and to obtain progress reports at regular intervals, a conference with counsel will be held at 9:30 a.m., local time, on May 31, 1978 in the Nuclear Regulatory Commission's Hearing Room, 5th Floor, East West Towers, located at 4350 East West Highway, Bethesda, Md. 20014.

Dated at Bethesda, Md. this 26th day of April 1978.

It is so ordered.

For the Atomic Safety and Licensing Board.

HUGH K. CLARK,
Chairman.

[Dockets Nos. 50-245 and 50-336]

NORTHEAST NUCLEAR ENERGY CO., ET AL

Issuance of Amendments to Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 48 to Provisional Operating License No. DPR-21 and Amendment No. 40 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Co., The Connecticut Light and Power Co., The Hartford Electric Light Co., and Western Massachusetts Electric Co., which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Units Nos. 1 and 2, located in the Town of Waterford, Conn. The amendments are effective as of their date of issuance.

These amendments modify the Environmental Technical Specifications to incorporate restrictions on the radioactive waste effluent which could potentially be discharged from the condensate polishing waste neutralizing sumps into the Long Island Sound.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings are required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for

amendments dated February 17, 1978, (2) Amendments Nos. 48 and 40 to Licenses Nos. DPR-21 and DPR-65, respectively, and (3) the Commission's letter transmitting these amendments. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 21st day of April 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc. 78-11888 Filed 5-1-78; 8:45 am]

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 39 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Co., the Connecticut Light & Power Co., the Hartford Electric Light Co., and Western Massachusetts Electric Co., which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2, located in the town of Waterford, Conn. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to allow reactor start- up with the reed switch position indicator channel inoperable on Control Element Assembly A-42.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings are required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 20, 1978, (2) Amendment No. 39 to License No. DPR-65, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. A copy of items (2) and (3) may obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 21st day of April 1978.

For the Nuclear Regulatory Commission.

[7590-01]

[Docket No. 50-344]

PORTLAND GENERAL ELECTRIC CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 25 to Facility Operating License No. NPF-1 issued to Portland General Electric Co., the city of Eugene, Oreg., and Pacific Power & Light Co. which revised Technical Specifications for operation of the Trojan Nuclear Plant (the facility), located in Columbia County, Oreg. The amendment is effective as of its date of issuance.

The amendment revises the Design Features section of the Technical Specifications to indicate that the spent fuel pool is designed with siphon breakers in the piping extending into the pool which prevent inadvertent draining of the pool below elevation 83'-11".

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amnedment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 15, 1978, as supplemented March 24, 1978, (2) Amendment No. 25 to License No. NPF-1, and (3) the Commission's related Safety Evaluation. All of these items are available for pulic inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Columbia County Courthouse, Law Library, Circuit Court Room, St. Helens, Oreg. 97051. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 10th day of April 1978.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc. 78-11890 filed 5-1-78; 8:45 am]

[7590-01]

[Docket No. 50-272]

PUBLIC SERVICE ELECTRIC & GAS CO.

Hearing on Amendment of Facility Operating License

Pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection," and Part 2, "Rules of Practice," notice is hereby given that a hearing will be held before an Atomic Safety and Licensing Board to consider the application of the Public Service Electric & Gas Co. (the Licensee) for an amendment to its Facility Operating License No. DPR-70, which presently authorizes the Licensee to possess, use and operate the Salem Nuclear Generating Station, Unit 1, located in Salem County, N.J. The proposed amendment would allow modification of the spent fuel storage pool of this facility so as to increase its capacity from 264 to 1,170 fuel assemblies in accordance with Licensee's revised application for amendment dated February 14, 1978. Approval of the proposed

MY 2 78 UMI

V 43 | 85

modification would result in issuance of an amendment to the above license revising the technical specifications for the facility in order to reflect its increased capacity to store spent fuel.

The hearing, which will take place in the vicinity of the facility, will be conducted by an Atomic Safety and Licensing Board (the Licensing Board) which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel. The Board consists of Mr. Glenn O. Bright and Dr. James C. Lamb III, Members, and Mr. Gary L. Milhollin, Chairman.

A notice entitled "Proposed Issuance of Amendment to Facility Operating License" was published by the Nuclear Regulatory Commission in the FEDERAL REGISTER on February 8 1978 (43 FR 5443). The notice provided that any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene. Petitions were filed by the township of Lower Alloways Creek (Salem County, N.J.), by Alfred C. Coleman, Jr. and Eleanore G. Coleman (the Colemans), by "the Sun People"—Alternative Energy Advocates (South Dennis, N.J.), and by the State of New Jersey. The township of Lower Alloways Creek was admitted as a party to the proceeding, but the petitions of the Colemans and the Sun People were denied with leave to amend within ten (10) days from the date of service of this Board's order. The State of New Jersey was granted leave to participate under 10 CFR 2.715(c).

A prehearing conference or conferences will be held by the Licensing Board designated to preside over this matter. The date and place of the hearing will be set at or after the prehearing conference. Notices of the dates and places of the prehearing conference and the hearing will be published in the FEDERAL REGISTER. The Licensing Board will determine the specific issues to be considered at the hearing.

For further details with respect to the matters under consideration, see the Licensee's revised application for amendment dated February 14, 1978, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and the Salem Free Public Library, 112 West Broadway, Salem, N.J.

Any person who wishes to make an oral or written statement in this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715 of the Commission's Rules of Practice. Limited appearance will be permitted at the time of the hearing in the discretion of the Licensing Board, within such limits and on such conditions as that Board may determine. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, not later than June 1, 1978. A person permitted to make a limited appearance does not become a party, but may state his position and raise questions which he would like to have answered, provided that the questions are within the scope of the hearing as specified above. A member of the public does not have the right to participate unless he has been granted the right to make a limited appearance or to intervene as a party.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705 must be filed by the parties to this proceeding (other than the Regulatory Staff) not later than May 22, 1978.

Papers required to be filed in this proceeding may be filed by mail or telephone addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Pending further order of the Licensing Board designated for this proceeding, the parties are required to file, pursuant to the provisions of 10 CFR 2.708 of the Rules of Practice, an original and twenty (20) conformed copies of each such paper with the Commission.

It is so ordered

Dated at Madison, Wis., this 26th day of April 1978.

For the Atomic Safety and Licensing Board designated to rule on petitions for leave to intervene.

GARY L. MILHOLLIN,
Chairman.

[FR Doc. 78-11891 Filed 5-1-78; 8:45 am]

[7590-01]

[Docket No. 50-206]

SOUTHERN CALIFORNIA EDISON CO., AND SAN DIEGO GAS AND ELECTRIC CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 34 to Provisional Operating License No. DPR-13, issued to Southern California Edison Co. and San Diego Gas and Electric Co. (the licensee), which revised condition 3.E of License No. DPR-13 for the San Onofre Nuclear Generating Station, Unit No. 1 (SO-1), (the facility) located in San Diego County, Calif. The amendment is effective as of its date of issuance.

The amendment changes license condition 3.E to permit the resumption of power operation of SO-1 and the continuation of power operation for twelve cumulative months with the primary coolant temperature greater than 350° F from April 20, 1978. This action is based on the results of the steam generator denting inspection program described in the licensee's April 17, 1978 submittal and request for approval to resume power operation.

The request complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) Amendment Nos. 25 and 32 to License No. DPR-13 dated April 1, 1977 and March 24, 1978, respectively and the related Safety Evaluations, (2) the licensee's submittal dated April 17, 1978, and the report enclosed thereto entitled "Steam Generator Denting Inspections", (3) Amendment No. 34 to License No. DPR-13, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Mission Viejo Branch Library, 24851 Chrisanta Drive, Mission Viejo, Calif. 92676. A single copy of items (1), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 20th day of April, 1978.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc. 78-11892 Filed 5-1-78; 8:45 am]

[7590-01]

[Docket No. 50-281

VIRGINIA ELECTRIC AND POWER CO.

Order for Modification of License

I

Virginia Electric and Power Co. (the licensee), is the holder of Facility Operating License No. DPR-37 which authorizes the operation of the nuclear power reactor known as Surry Power Station, Unit No. 2 (the facility) at steady state reactor power levels not in excess of 2441 thermal megawatts (rated power). The reactor is a pressurized water reactor (PWR) located at the licensee's site in Surry County, Va.

II

On April 1, 1977, the NRC staff issued an Order for Modification of License No. DPR-37 which addressed operation of Surry Power Station Unit No. 2 under conditions in which steam generator tubes have been plugged as a result of tube denting caused by corrosion of the tube support plate in the annular spaces between tube and the tube support plate. On August 17, 1977, an Order was issued to permit continued operation of unit No. 2, to September 15, 1977, under the conditions of the April 1, 1977 Order. The licensee was required to perform an inspection after the September 15, 1977 shutdown. The licensee's fuel cycle for Surry Unit No. 2 ended before September 15, 1977, and during the resulting shutdown the licensee performed the required inspection. On October 8, 1977, an Order was issued to permit continued operation of Unit No. 2 for six equivalent months of operation beyond October 8, 1977. On March 20, 1978, Surry Unit No. 2 shut down for steam generator tube inspection and the results were submitted on April 4, 1978 as supplemented April 6, 1978. The data derived from the inspection demonstrates that the denting has followed the pattern predicted by the preventive plugging criteria established by the licensee with the NRC staff. The additional plugging performed as a result of the inspection using the preventive plugging criteria will provide adequate steam generator integrity under the conditions of this Order for continued operation for an additional six month period. The NRC staff has evaluated the results of this inspection and repair program and has assessed continued safe operation of the facility. This evaluation is set forth in the staff's concurrently issued Safety Evaluation relating to steam generator tube integrity.

Continued growth of the tube support plate continues to impose stresses on the tubes and may result in the development of stress corrosion cracks in denting locations. The NRC staff has considered the effect of the development of stress corrosion cracking during the course of operation of this facility, and has assessed the effect of such cracks in conjunction with the steam line break and loss of coolant accident events. The NRC staff has concluded that under the limitations on tube leakage set forth in this Order, the effect of continued denting on LICA events or on the consequences of the steam line break event would continue to be within those considered in connection with the April 1, 1977 Order. The limitations set forth in this Order will provide reasonable assurance that the public health and safety will not be endangered.

The licensee has proposed in its April 4, 1978, submittal to continue the limitations applicable to this facility in the manner set forth in this Order. The NRC staff believes that the licensee's actions, under the circumstances are appropriate and should be confirmed by NRC Order.

Copies of the following documents are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Swen Library, College of William and Mary, Williamsburg, Va., (1) licensee's submittal of April 4, 1978, (2) Orders for Modification of License, dated April 1, 1977, August 17, 1977, and October 8, 1977, (3) this Order for Modification of license, In the Matter of Virginia Electric and Power Co., Surry Power Station, Unit No. 2, Docket No. 50-281, and (4) the Commission's concurrently issued Safety Evaluation supporting this Order.[1]

III

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *it is ordered* That Facility Operating License No. DPR-37 is hereby amended by replacing in its entirety existing paragraph 3.E. of the license with the following:

E. STEAM GENERATOR INSPECTION

(1) Unit No. 2 shall be brought to the cold shutdown condition in order to perform an inspection of the steam generators within six months of equivalent operation from April 7, 1978.

Nuclear Regulatory Commission approval shall be obtained before resuming power operation following this inspection.

Equivalent operation is defined as operation with th reactor coolant at or above 350° F.

(2) Reactor coolant leakage from the reactor coolant system (RCS) to the secondary system (SS) through the steam generator tubes shall be limited to 0.3 gpm per steam generator, as described in the NRC Safety Evaluation of April 1, 1977. With any steam generator tube leakage greater than this limit the reactor shall be brought to the cold shutdown condition within 24 hours. Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

(3) Reactor operation will be terminated if RCS to SS leakage which is attributable to 2 or more steam generator tubes occurs during a 20 day perod. Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

(4) The concentration of radioiodine in the reactor coolant shall be limited to 1 μCi/gram during normal operation and to 10 μCi/gram during power transients as defined in Appendix A-1 to the Technical Specifications of the license. Appendix A-1 was issued with the April 1, 1977 Order and shall remain in effect for six equivalent months from April 7, 1978.

Dated at Bethesda, Md. this 7th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, Jr.,
Director, Division of Operating Reactors, Office of Nuclear Reactor Regulation.

[FR Doc. 78-11893 Filed 5-1-78; 8:45 am]

[1] A copy of items identified in (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating reactors.

OFFICE OF MANAGEMENT AND BUDGET

PREVENTING WAGE BUSTING FOR PROFESSIONALS

Procedures for Evaluating Contractor Proposals for Service Contracts

AGENCY: Office of Federal Procurement Policy (OFPP, Office of Management and Budget).

ACTION: Notice of a policy concerning procedures for evaluating contractor proposals for service contracts.

SUMMARY: The following letter was signed and issued on March 29, 1978, by Mr. Lester A. Fettig, Administrator for Federal Procurement Policy. It is

MY 2 78 UMI

V 4 3 | 8 5

to be effective on an interim basis and will be implemented through regulatory guidance to be issued under both the Defense Acquisition Regulation and Federal Procurement Regulations. It is being published simultaneously in the FEDERAL REGISTER for comment prior to implementation of permanent regulations.

POLICY

The Federal Government has for many years contracted with American industry for a variety of services in support of Federal programs. In most cases the contracts have been entered into as a result of competitive procurement procedures and they normally are subject to periodic recompetition.

Unwarranted reductions in salaries and fringe benefits can occur during competition for Government service contracts. Since the costs of wage and fringe benefits constitute the largest cost element in a service contract, competitors often have driven down wage rates to unrealistically low levels, even though the employees that will perform the work under the new contract are the same performing the work under the predecessor contract.

The Service Contract Act of 1965 (Pub. L. 89-286), as amended, was enacted to prevent such "wage busting" practices with respect to blue collar and some white collar workers. The Department of Labor sets and maintains wage determinations for these service contract employees. Federal laws setting minimum standards for wages, working conditions or other labor standards do not, however, apply to professional employees. In addition, professional employees traditionally have not been represented by union collective bargaining agreements.

The Government shares a deep concern for inequities such as "wage busting" practices generated in our procurement system. The Government should not inadvertently contribute to unwarranted, severe, and abrupt reductions in compensation provided to Federal service contract employees. This has happened to some professional employees, especially in areas of concentrated Federal support such as Cape Canaveral, Fla., Houston, Tex., Huntsville, Ala., and several areas of California. In these and other areas, experience has in some cases been bad; the potential for further problems is worse.

The Federal Government cannot allow the protracted labor instability, loss of morale, and undermined mission performance that comes from the fact or fear or "wage busting." The human impact on longstanding careers, family dislocations, and personal economic distress makes the problem even more compelling, even if it could be confined to isolated locales.

Therefore, pursuant to the authority vested in me under Pub. L. 93-400, it is the declared policy of the Federal Government that all service employees, including professional employees, employed by contractors providing services to the U.S. Government, be fairly and properly compensated. Federal procurement procedures shall be developed to assure equitable compensation for all such employees. This policy clearly recognizes the fact that there is a predictable and essential link between personnel compensation and work performance. Therefore, evaluation of bids and proposals for service contract work shall take into account the realism of the offeror's proposed personnel compensation plan to assure that the offeror has a proper understanding of the resources required to perform high quality work on an uninterrupted basis.

Therefore, all future solicitations shall include the language contained in the attachment to this Policy whenever professional employees are expected to be needed to perform the services. If the procuring agency feels that a particular procurement covered by this policy statement does not warrant the use of such language in the solicitation, the agency shall request approval from the Administrator, Office of Federal Procurement Policy (OFPP) before omitting the criteria from any solication.

Implementation of the policy to be effective April 1, 1978, shall be made through regulatory guidance to be issued under both the Defense Acquisition Regulation and Federal Procurement Regulations.

This Office has a statutory responsibility to promote uniformity in procurement regulations to the extent it is feasible to do so. Accordingly, each agency is required, not later than 6 months from the date of this Policy, to submit a report to this Office for our review and assessment as to the actions which have been taken to implement this important policy. Following this review and assessment, we will determine whether additional guidance from this Office is required.

INSTRUCTIONS TO BIDDERS

Total compensation (salary and fringe benefits) of professional employees under service contracts may in some cases be lowered by recompetition of such contracts. Such lowering of compensation can be detrimental in obtaining the necessary quality of professional services needed for adequate performance of service contracts. It is therefore in the best interest of the Government that professional employees be properly and fairly compensated in such contracts. The following evaluation factors and criteria, therefore, will be used in assessing the total compensation package submitted by each bidder.

EVALUATION FACTORS AND CRITERIA

Understanding the Requirement: In establishing compensation levels for employees not otherwise covered by the Service Contract Act, the total compensation (both salaries and fringe benefits) proposed, shall reflect a clear understanding of the requirements of the work to be accomplished and the suitability of the proposed compensation structure to obtain and retain qualified personnel to meet mission objectives. The salary rates or ranges must recognize the distinct differences in professional skills and the complexity of varied disciplines as well as job difficulty. They shall reflect the professional contributions, abilities, professional status, responsibility, and value of the education and experience of such professional employees.

Cost Factor: Proposals which are unrealistically low or do not reflect a reasonable relationship of compensation to the job categories so as to impair the contractor's ability to recruit and retain competent personnel may be deemed reflective of failure to comprehend the complexity of the contract requirement. This agency is concerned with the quality and stability of the work force to be employed on this contract. The compensation data required will be used in evaluation of your understanding of the contract requirement. An assessment of the potential for adverse effect upon performance and maintenance of harmonious labor relations with employees resulting from an unrealistic low compensation structure will also be made.

Evaluation of Bids: This agency will evaluate the total compensation (both salaries and fringe benefits) to be paid to professional employees to assure that such compensation reflects an understanding of the requirements to be performed as outlined above. It will include an assessment of the bidder's ability to provide uninterrupted work of high quality. The total compensation proposed will be evaluated in terms of enhancing recruitment of personnel and its realism and consistency with a total plan for compensation (both salary and fringe benefits).

Bids offering total compensation levels less than currently being paid by the predecessor contractor for the same work will be evaluated, in addition to the above, on the basis of maintaining program continuity and availability of required competent professional personnel. Bidders are cautioned that instances of lowered compensation for essentially the same work may be an indication of lack of sound management.

Negotiations: During written and oral discussions, if provided for, bidders will be afforded an opportunity to clarify and support their total compensation plans. Supporting information will include data such as recognized national and regional compensation surveys and studies of professional public and privatre organizations used in establishing the total compensation structure. Failure to correct compensation weaknesses disclosed by agency evaluation may be cause for rejection of the bid.

The Contract: The bidder's proposed total compensation plan will be incorporated into any contract resulting from this solicitation. This will serve to lend authenticity to the plan proposed and reflect a commitment of the bidder to pay the compensation stated therein.

DEPARTMENT OF STATE

[Pub. Notice CM-8/51]

SHIPPING COORDINATING COMMITTEE; SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on safety of navigation of the Shipping Coordinating Committee's Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on Tuesday, May 23, 1978 in Room 7202 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The purpose of this meeting is to:

Discuss the results of last year's twentieth session of the Subcommittee on Navigation of the Intergovernmental Maritime Consultative Organization's (IMCO) Maritime Safety Committee (MSC), and

Prepare for the twenty-first session of the IMCO Subcommittee, which will address matters relating to, inter alia, ships' routing, navigational aids and equipment, single-handed voyages, and the 1972 Regulations for the Prevention of Collisions at Sea (1972 COLREGS).

Requests for further information on the SOLAS working group meeting should be directed to either Commander D.L. Parr or Lt. Commander J.D. Bannan, Commandant (G/WLE-4/73), U.S. Coast Guard, 400 Seventh Steet SW., Washington, D.C. 20590, telephone 202-426-4958.

[Public Notice CM-8/53[

SECRETARY OF STATE'S ADVISORY COMMITTEE ON PRIVATE INTERNATIONAL LAW—STUDY GROUP ON MARITIME LAW MATTERS

Notice of Meeting

A meeting of the Study Group on Maritime Law Matters, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will be held at 10:30 a.m. on Tuesday, May 23, 1978, in room 5519 of the Department of State. Members of the general public may attend up to the limits of the capacity of the meeting room and participate in the discussion subject to instructions of the Chairman.

The purpose of the meeting will be to hear the report of the United States delegation to the Hamburg Conference on the Carriage of Goods by Sea, and to consider future action with respect to the Convention produced by the Conference.

Entrance to the Department of State building is controlled, and members of the general public should use the C Street entrance. Entry will be facilitated if arrangements are made in advance, and it is requested that members of the general public who plan to attend the meeting inform their name, affiliation, and adress to Ms. Dorothy Fagan, Office of the Legal Adviser, Department of State, prior to May 23, 1978. The telephone number is area code 202-632-8134.

Dated: April 27, 1978

CERTAIN FOOTWEAR FROM INDIA

Notice of Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: This notice is to advise the public that a satisfactory petition has been received and that a countervailing duty investigation has been started to determine if benefits are paid by the Government of India to manufacturers or exporters of certain footwear which constitute the payment of a bounty or grant within the meaning of the U.S. Countervailing Duty Law. A preliminary determination will be made not later than September 10, 1978, and a final determination not later than March 10, 1979.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Leon McNeill, Operations Officer, Technical Branch, Duty Assessment Division, Office of Operations, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on March 10, 1978, alleging that benefits conferred by the Government of India upon the manufacture, production or exportation of certain footwear from India constitute the payment or bestowal of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

For purposes of this notice "certain footwear" includes footwear classifiable in items 700.05 through 700.85 inclusive, of the Tariff Schedules of the United States Annotated (except items 700.28, 700.51, 700.52, 700.53, 700.54, 700.60, and 700.8510). It also includes other leather articles cut or partly manufactured into forms or shapes suitable for conversion into footwear, classifiable in item 791.25 of the Tariff Schedules of the United States Annotated. Alleged bounties or grants as provided in the petition include the following:

1. Direct cash assistance provided to exporters of footwear upon exportation ranging up to 20 percent of f.o.b. value of the export product.

2. Direct tax credits of 15 percent of export value which may be applied against payment of any outstanding income or business taxes.

3. Deduction of 150 percent of overseas expenses for export promotion from taxable income. Through the Market Devlopment Fund, the Indian Government may make outright grants for export promotion to individual firms.

4. Remission of Customs duties and excise taxes on machinery and equipment used in export production.

5. Comprehensive export insurance and low rate export credits available to Indian exporters for overseas market development, available through the Export Credit and Guarantee Corporation and the Industrial Development Bank of India, both Indian Government entities.

6. Favorable treatment with respect to import licenses and foreign exchange as a reward for export performance.

7. Special foreign exchange concessions and financial assistance for purchase of equipment to firms located in the Kandla Free Trade Zone.

The unfinished footwear from India specified in the petition which is classifiable under item 791.25 of the Tariff

Schedules of the United States annotated (TSUSA) is eligible for duty-free entry under the Generalized System of Preferences. In the event that it becomes necessary to refer this matter to the United States International Trade Commission (ITC) pursuant to section 303(a) (2), Tariff Act of 1930, as amended, (19 U.S.C. 1303(a) (2)), there is evidence on record concerning injury to, or likelihood of injury to, an industry in the United States.

This evidence includes information indicating that in recent years a sharp rise in foot-wear imports has occurred, causing employment in foot-wear manufacturing to decline substantially. In addition, there is information contained in the petition which indicates that the unempolyment rate in the footwear industry is double the national average. However, information of greater specificity may be required by the ITC before countervailing duties are assessed linking imports of the product defined by a single TSUS number to the alleged injury or threatened injury to the domestic industry, in the event that Treasury determines a bounty or grant is being paid or bestowed on the manufacture, production or exportation of this product.

Pursuant to section 303(a) (4) Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not a bounty or grant is being bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such petition.

Therefore, a preliminary determination on this petition will be made no later than September 10, 1978, as to whether or not the alleged payments or bestowal conferred by the Government of India upon the manufacture, production or exportation of the merchandise described above constitutes a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended. A final determination will be issued no later than March 10, 1979.

This notice is published pursuant to section 303(a) (3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a) (3)), and section 159.47(c), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 to 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, the provisions of the Treasury Department Order No. 165, Revised, November 2, 1954, and section 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

Fiscal Service

[Dept. Circ. 570, 1977 Rev., Supp. No. 18]

SURETY COMPANIES ACCEPTABLE ON FEDERAL BONDS

Change in State of Incorporation

On December 31, 1977, Puritan Insurance Company, Stamford, Connecticut changed its State of incorporation from New York to Connecticut. The company was last listed as an acceptable surety on Federal bonds at 42 FR 34077, July 1, 1977.

A certificate of authority as an acceptable surety on Federal bonds is hereby issued by the Secretary of the Treasury, under Sections 6 to 13 of Title 6 of the United States Code, to Puritan Insurance Company, incorporated in the State of Connecticut. This new certificate replaces the company's former Treasury certificate, effective December 31, 1977. An underwriting limitation of $805,000 has been established for the company. The underwriting limitation is the same as was established as of July 1, 1977, under the certificate issued to the company in its previous State of incorporation.

Certificates of authority expire on June 30, each year, unless sooner revoked, and new certificates are issued on July 1, so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1, in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: April 25, 1978.

D. A. PAGLIAI,
Commissioner, Bureau of Government Financial Operations.

[Rev. S.O. No. 1322]

DISTRIBUTION OF GRAIN CARS

At a session of the Interstate Commerce Commission, Railroad Service Board, acting as an appellate board, held at its office in Washington, D.C., on the 20th day of April, 1978.

Upon consideration of the petitions filed by Beker Industries Corp. and by Owens-Illinois, Inc., on April 14, 1978, both seeking revocation or exceptions to Service Order No. 1322 with respect to the transportation of their traffic.

Service Order No. 1322 was issued by the Railroad Service Board in accordance with applicable law upon its determination that an acute shortage of covered hopper cars and boxcars for transporting grain exists throughout the western part of the United States and that these shortages are particularly prevalent at country grain elevators.

As a result of a review of the massive volume of comments received from the railroads named in the order and from shippers dependent upon these railroads for their car supplies, the order was revised effective 12:01 a.m., April 17, 1978, to eliminate its appliction to boxcars. In addition exceptions were granted to the Union Pacific Railroad Co. (UP) which is the origin carrier mentioned in Owens-Illinois' petition and is also the carrier serving the Idaho, Nebraska and Wyoming points named in Beker's petition, and to the Missouri Pacific Railroad Co. (MP) the railroad serving Taft, La., the remaining origin point provided by Beker. These exceptions require the MP and the UP to use fifty-five (55) percent of their serviceable ownerships of jumbo covered hopper cars in grain service in lieu of the seventy (70) percent requirement of the order.

In the opinion of the Railroad Service Board, the relief requested by the petitioner has been substantially granted by revision of the order and by the exceptions granted to the UP and to the MP.

It is ordered, That the petitions be, and they are, denied

By the Commission, Railroad Service Board, acting as an appellate board. Joel E. Burns, Robert S. Turkington and John R. Michael.

JOEL E. BURNS,
Chairman.

[Notice No. 63]

MOTOR CARRIERS TEMPORARY AUTHORITY APPLICATIONS

APRIL 18, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official name in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIER OF PROPERTY

[Notice No. 66]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

APRIL 25, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interestate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

[Notice No. 67]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

April 25, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the Completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Motor Carriers of Property

No. MC 126844 (Sub-No. 48TA), filed March 30, 1978. Applicant: R.D.S.

MY 2 78
UMI

V 4 3 — 8 5

[Ex Parte No. 297 (Sub-No. 4)]

REOPENING OF SECTION 5a APPLICATION PROCEEDINGS TO TAKE ADDITIONAL EVIDENCE

Clarification of Procedural Rules

AGENCY: Interstate Commerce Commission.

ACTION: Clarification of procedural rules.

SUMMARY: The Commission has received various requests for clarification of procedural rules governing the filings in this proceeding. This notice provides for statements of intent to participate, and the preparation of service lists by the Commission and clarifies the notice served January 6, 1978, and published in the Federal Register on January 11, 1978, at pages 1666 to 1668.

DATES: Statements of intent to participate are due 25 days before the initial statement in each review proceeding is due.

ADDRESS: Statements of intent to participate should be sent to Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Deputy Director Janice Rosenak or Assistant Deputy Harvey Gobetz, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7693.

SUPPLEMENTARY INFORMATION: Comment from various parties has revealed a need to clarify the rules of procedure governing proceedings instituted by Notice published in the Federal Register on January 11, 1978 at pages 1666 to 1668 as corrected by Notice published in the Federal Register on January 31, 1978 at page 4154. The clarifications are as follows:

1. *Consolidation of proceedings.* In its Notice published in the Federal Register on January 11, 1978, the Commission required that all approved and pending agreements, under section 5a of the Interstate Commerce Act be reopened for the purpose of taking evidence to determine whether those agreements still qualify for Commission approval. In view of this proceeding, all new and amendatory agreements currently being considered for approval by the Commission will be consolidated for decision with the appropriate Ex Parte No. 297 (Sub-No. 4) proceeding.

2. *Statements of intent to participate.* All carrier parties to agreements, or their representative, intending to submit an initial statement shall indicate their intent to the Commission no later than 25 days prior to the date the initial statement is due. Due dates are set forth in the notice published in the Federal Register on January 11, 1978 at p. 1668. All other parties intending to participate in a review proceeding shall also indicate to the Commission their intent to participate no later than 25 days before the initial statement in that proceeding is due. The Commission will prepare a service list for each proceeding and distribute the list in time to enable parties filing initial statements to serve the other parties. Parties intending to participate in more than one proceeding may indicate their intent in a single statement. Statements of intent to participate, in an original and one copy, should be sent to the address provided above.

This document was approved April 24, 1978.

By the Commission, Chairman O'Neal.

Reopening of Section 5a Application Proceedings To Take Additional Evidence

For the reasons set forth in the attached notice,

It is ordered. That the rules of procedure and other instructions set forth in the attached Notice, as well as the Interstate Commerce Commission Rules of Procedures not displaced in the attached notice, govern the review proceedings instituted by Order entered December 30, 1977, in this proceeding.

Decided April 24, 1978.

By the Commission, Chairman O'Neal.

H. G. Homme, Jr.,
Acting Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION.

NOTICE OF CHANGE IN SUBJECT MATTER OF AGENCY MEETING

At the commencement of its open meeting held at 11:30 a.m. on April 25, 1978, the Corporation's Board of Directors determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), that Corporation business required the following changes in the subject matter of the meeting and that no earlier notice of the changes was practicable:

Addition of a request by Jamaica Savings Bank, New York (Jamaica), N.Y., for a hearing in connection with the Corporation's interpretation of its regulations regarding the advertising and compounding of interest on deposits in a leap year.

Deletion of a resolution proposing a reorganization of the Office of Corporate Planning.

Dated: April 25, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

3

FEDERAL DEPOSIT INSURANCE CORPORATION.

NOTICE OF CHANGE IN SUBJECT MATTER OF AGENCY MEETING

At the commencement of its closed meeting held at 11 a.m. on April 25, 1978, the Corporation's Board of Directors determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), with Director William M. Isaac concurring with the motion, that Corporation business required the following changes in the subject matter of the meeting and that no earlier notice of the changes was practicable:

Addition of an application of Commerce Bank of New Jersey, Evesham Township (P.O. Marlton), N.J., for consent to establish a branch on Stokes Road at Skeet Road, Medford, N.J.

Addition of a request of an insured bank for financial assistance from the Corporation pursuant to section 13(c) of the Federal Deposit Insurance Act.

Addition of a request by Bank Leumi Trust Co. of New York, New York, N.Y., for modification of certain provisions of the capital note purchased by the Corporation in conjunction with the bank's purchase of certain assets and assumption of the deposit liabilities of American Bank & Trust Co., New York, N.Y.

Addition of a recommendation (Case No. 43,495-L) regarding the liquidation of assets acquired by the Corporation from Banco Credito y Ahorro Ponceno, Ponce, P.R.

Addition of a resolution creating an Office of Congressional Relations and establishing the office's organization and Manning Table.

Deletion of a recommendation (Legal Division memorandum dated April 14, 1978) regading the liquidation of assets acquired by the Corporation from Franklin National Bank, New York, N.Y.

The Board further determined by the same unanimous vote, on the basis of certifications furnished by the Corporation's General Counsel, that the matters added to the agenda were eligible for consideration in a meeting closed to the public observation, pursuant to subsections (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act," since the public interest did not require consideration of the matters in a meeting open to public observation.

Dated: April 25, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

NOTICE OF AGENCY MEETING

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:00 a.m. on Friday, May 5, 1978, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors pursuant to sections 552b(c)(2), (6), (8), (9)(A)(ii), (9)(B), and (10) of title 5, United States Code, to consider the following matters:

Applications for consent to establish branches:

Unity Bank & Trust Co., Boston (Roxbury), Mass., for consent to establish branches at 592 Washington Street, Boston (Dorchester), Mass., and at 1630 Blue Hill Avenue, Boston (Mattapam), Mass.

Application for consent to change a main office location:

Unity Bank & Trust Co., Boston (Roxbury), Mass., for consent to change the location of its main office from 416 Warren Street to 2343 Washington Street, both locations within Boston (Roxbury), Mass.

Application for consent to reduce outstanding capital stock:

V 43 | 85 MY 2 78 UMI

Home Bank & Trust Co., Meriden, Conn.

Application for reversal of Division of Bank Supervision finding that 1978 financial reports subject to Part 335 of the Corporation's rules and regulations were improperly prepared:

Industrial Valley Bank & Trust Co., Jenkintown, Pa.

Request pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of a person convicted of an offense involing dishonesty or a breach of trust as a director, officer, or employee of an insured bank:

Name of person and of bank authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6)).

Application for consent to merge and establish branches:

Flagship Bank of Sanford, Sanford, Fla., an insured State nonmember bank, for consent to merge under its charter, and with the title of "Flagship Bank of Seminole," with Flagship U.S. Bank of Seminole, Sanford, Fla., also an insured State nonmember bank, and for consent to establish the two offices of Flagship U.S. Bank of Seminole as branches of the resultant bank.

Applications for consent to purchase or acquire assets, assume liabilities, and establish branches:

The Town & Country Bank, Raritan Township (P.O. Flemington), N.J., an insured State nonmember bank, for consent to purchase the assets of and assume the liability to pay deposits made in the Phillipsburg and Pohatcong branches of New Jersey Bank (National Association), Clifton, N.J., and for consent to establish those two branches as branches of the Town & Country Bank.

The Commercial Savings Bank, Upper Sandushky, Ohio, an insured State nonmember bank, for consent to acquire the assets of and assume liability to pay deposits made in the Harpster Bank, Harpster, Ohio, also an insured State nonmember bank, and for consent to establish the sole office of the Harpster Bank as a branch of the Commercial Savings Bank.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 43,468-L—South Texan Bank, Houston, Tex.

Case No. 43,486-SR—Sharpstown State Bank, Houston, Tex.

Case No. 43,487-L—First State Bank of Northern California, San Leandro, Calif.

Case No. 43,488-NR—San Francisco National Bank, San Francisco, Calif.

Case No. 43,490-L—American City Bank & Trust Co., National Association, Milwaukee, Wis.

Case No. 43,491-L—Northeast Bank of Houston, Houston, Tex.

Case No. 43,493-SR—Sharpstown State Bank, Houston, Tex.

Case No. 43,498-L—American Bank & Trust, Orangeburg, S.C.

Memorandum re Franklin National Bank, New York, N.Y.

Recommendations with respect to the initiation or termination of cease-and-desist proceedings, termination-of-insurance proceedings, or suspension or removal proceedings against certain insured banks or officers or directors thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Request for authorization to examine a branch of a national bank in connection with the application of a proposed new bank for Federal deposit insurance and for consent to purchase the assets and assume liabilities of the branch:

Names and locations of banks authorized to be exempt from disclosure pursuant to subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act (5 U.S.C. (c)(8) and (c)(9)(A)(ii)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, seperations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in Room 6135 of the FDIC Building located at 550 17th Street NW., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation, at 202-389-4446.

Dated: April 28, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

NOTICE OF AGENCY MEETING

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 11:30 a.m., Friday, May 5, 1978, to consider the following matters:

Disposition of minutes of previous meetings.

Recommendation regarding liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 43,485-L—First Citizens Bank & Trust Co. of Utica, Utica, N.Y.

Recmmendation with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Morgan, Lewis & Bocklus, Philadelphia, Pa., in connection with the liquidation of Centennial Bank, Philadelphia, Pa.

Recommendation with respect to the amendment of Corporation rules and regulations:

Memorandum and resolution proposing the final adoption of amendments to Part 329 of the Corporation's rules and regulations, entitled "Interest on Deposits," so as to permit preauthorized, automatic transfers from savings to other deposit accounts.

Memorandum proposing the payment of a second dividend of 15 percent in connection with the receivership of Coronado National Bank, Denver, Colo.

Memorandum proposing the adoption of a Corporation Merit Promotion Plan.

Memorandum proposing the adoption of a Corporation Training Policy.

Memorandum and resolutions proposing the delegation to the Administrative Counsel of the responsibility for processing grievances and discrimination complaints filed by employees of the Office of Employee Relations.

Memorandum proposing the appointment of an agent for service of process in the State of Indiana.

Memorandums proposing the amendment of leases in order to expand the Kansas City and Omaha Regional Offices.

Reports of committees and officers:

Minutes of the actions approved by the Committee on Liquidations, Loans and Purchases of Assets pursuant to authority delegated by the Board of Directors.

Report of the Executive Secretary regarding his transmittal of "no significant effect" competitive factor reports.

Reports of the Director of the Division of Bank Supervision with respect to applications or requests approved by him and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Chief, Division of Liquidation, detailing all disbursements in excess of $10,000 and all sales of real estate properties in connection with the liquidation of the Hamilton National Bank of Chattanooga, Chattanooga, Tenn., during the period February 16, 1978 through April 16, 1978.

Reports of security transactions authorized by the Chairman.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Alan R. Miller, Executive Secretary of the Corporation at 202-389-4446.

Dated: April 28, 1978.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

FEDERAL ENERGY REGULATORY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENTS: To be published, May 1, 1978.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m., May 3, 1978.

CHANGE IN THE MEETING: The following items have been added:

Item No., Docket No., and Company

RP-4.—RP75-30, United Gas Pipe Line Co.

RP-5.—RP73-3 (PGA76-2), RP73-69 and RP72-99 (EPGA76-3), Transcontinental Gas Pipe Line Corp.

CI-5.—RI78-4, Superior Oil Co.

CP-5A.—CP75-362, El Paso Natural Gas Co.

CP-5B.—CP77-140, Delhi Gas Pipeline Corp., CP77-307, Northern Natural Gas Co., CP77-328, Natural Gas Pipeline Co. of America.

CP-6A.—CP78-171, Southern Natural Gas Co., Texas Gas Transmission Corp. and United Gas Pipe Line Co.

CP-6B.—CP77-612, Texas Gas Transmission Corp.

M-4.—Contract Provisions under section 154.93.

M-5.—Inflated rate increase filings.

ER-5.—ES78-42, Pacific Power & Light Co.

P-5.—Project No. 199, South Carolina Public Service Authority.

KENNETH F. PLUMB,
Secretary.

7

UNITED STATES METRIC BOARD.

APRIL 28, 1978.

TIME AND DATE: 10 a.m., Wednesday, May 10, 1978.

PLACE: Room 6802, Commerce Building, 14th Street and Constitution Avenue, Washington, D.C. 20230.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO CONSIDERED:

Portions open to the public:
(1) Budget review.
(2) Program review.

Portions closed to the public:
(1) Personnel matters.

CONTACT PERSON FOR MORE INFORMATION:

Alban Landry, 301-921-3815.

LOUIS POLK,
Chairman,
United States Metric Board.

8

NUCLEAR REGULATORY COMMISSION.

TIME AND DATE: Thursday, May 4, 1978.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and closed.

MATTERS TO BE CONSIDERED:

9:30 A.M.

1. Discussion of petition for rulemaking regarding pat-down physical searches (approximately 1 hour—public meeting).
2. Discussion of reconsideration of Board notification procedure (approximately 1 hour—public meeting).
3. Affirmation items (approximately 5 minutes—public meeting):
   a. Subsidiary arrangements to the US/IAEA safeguards agreement.
   b. Action plan for modifying the ECCS rule in 10 CFR § 50.46 and Appendix K.

1:30 P.M.

1. Discussion of Nuclear Nonproliferation Act including changes to Part 110 (approximately 1 hour—public meeting).

NOTE.—May be affirmed without discussion.

2. Joint NRC/ACRS MEETING (approximately 1 hour)—open and closed:
   a. Review of operations at "Stretch" Power.
   b. ACRS comments concerning the establishment of a statutorily independent, quasi-judicial board for evaluation of reactor accidents.
   c. Planned meetings with FRG Reactor Safety Committee and French Groupe Permanent.
   d. Proposed use of "Class 9" Accidents in Site Comparisons (78-137).
   e. ACRS fellowship program.
   f. Recent papers by Dr. Ernest Sternglass concerning the effects of normal releases of radioactive materials on the health of the general public living in the vicinity of nuclear power plants.

NOTE:—The Committee will not report on the above item but will be prepared to answer questions, if any. (above items will be open.)

g. New members (closed—exemption 6).

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202-634-1410.

ROGER M. TWEED,
Office of the Secretary.

9

THE RENEGOTIATION BOARD.

DATE AND TIME: Tuesday, May 9, 1978; 10 a.m.

PLACE: Conference Room, 4th Floor, 2000 M Street NW., Washington, D.C. 20446.

STATUS: Matters 1 through 10 are open to public observation. Matters 11 and 12 are closed to public observation. Matters 13 and 14 are not applicable for status.

MATTERS TO BE CONSIDERED:

1. Approval of minutes of meeting held May 2, 1978, and other Board meetings, if any.
2. Report of the Chairman concerning:
   a. Budget.
   b. Case Processing.
   c. Personal Actions.
   d. Organization Progress of the Staff.
   e. Rulemaking and Regulations.
3. Partial mandatory exemption of new durable productive equipment:
   Eastman Kodak Co., fiscal years ended December 29, 1968, and December 28, 1969.
4. Partial mandatory exemption of new durable productive equipment:
   Kearney & Trecker Corp., fiscal year ended September 30, 1967.
5. Recommended clearances without assignment (list 1902):
   A. Triangle Refineries, Inc., fiscal year ended December 31, 1974.
   B. Kerr McGee Chemical Corp., fiscal year ended December 31, 1974.
   C. Kerr McGee Nuclear Corp., fiscal year ended December 31, 1974.
   D. Southwestern Refining Corp., fiscal year ended December 31, 1974.
   E. Cato Oil and Grease Co., fiscal year ended December 31, 1974.
6. Recommended clearances without assignment (list 1903):
   A. Williams Research Corp., fiscal year ended December 31, 1975.
   B. Swedlow, Inc., fiscal year ended March 28, 1976.
   C. Alcan Aluminum Corp., fiscal year ended December 31, 1975.
   D. Esterline Corp., fiscal years ended October 31, 1974 and 1975.
7. Claim for partial mandatory exemption of new durable productive equipment:
   Buffalo Forge Co., fiscal year ended November 30, 1975.
8. Recommended clearances without assignment (list 1904):
   A.CapTech Inc., fiscal year ended December 31, 1975.
   B. Intermetrics, Inc., fiscal year ended February 29, 1976.
   C. Ainslie Corp., fiscal years ended July 31, 1975 and 1976.
   D. Hydronautics, Inc., fiscal year ended June 30, 1976.
   E. Carleton Controls Corp., fiscal year ended September 30, 1975.
   F. Dyna-Empire, Inc., fiscal year ended July 31, 1976.
   G. A. C. Ball Co., fiscal year ended August 31, 1976.
   H. Thames Valley Steel Inc., fiscal year ended May 31, 1975.
   I. Auto Specialties Manufacturing Co., fiscal year ended August 1, 1976.
9. Assignment to division:
   Kaiser Aerospace & Electronics Corp., fiscal year ended December 31, 1972.
10. Recommended clearance:
   A. Kaiser Steel Corp., fiscal years ended December 31, 1970, 1971, and 1972.
   B. Myers Drum Co., fiscal year ended December 31, 1972.
   C. Kaiser Industries Corp., fiscal year ended December 31, 1972.
   D. Kaiser Engineers, Inc., fiscal year ended December 31, 1972.
   E. Henry J. Kaiser Co., fiscal year ended December 31, 1972.
11. Organization and operations of the regional boards.
12. Personnel matter.
13. Approval of agenda for meeting to be held May 23, 1978.
14. Approval of agenda for other meetings, if any.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 16883, April 20, 1978.

STATUS: Open meeting; closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, April 27, 1978, 10 a.m.

RESCHEDULED TIME: Thursday, April 27, 1978, 9 a.m.

CHANGES IN THE MEETING: The following additional items will be considered by the Commission at the open meeting scheduled for Thursday, April 27, 1978, at 9 a.m.:

1. Consideration of rules and interpretations relating to transactions by members of national securities exchanges under Section 11(a) of the Securities Exchange Act of 1934. (Section 11(a) prohibits a member from effecting a transaction for its own account.)
2. Consideration of proposed rule changes filed by the New York Stock Exchange, Inc., and the American Stock Exchange, Inc., concerning floor trading.
3. Proposed transmittal of comments to the House Committee on Government Operations regarding H.R 10749, the Federal Acquisition Act of 1977.
4. Proposed transmittal of comments to the Senate Subcommittee on Securities of the Committee on Banking, Housing, and Urban Affairs regarding S. 1815, the Small Business Venture Capital Act of 1977.

The following item will not be considered by the Commission at the open meeting scheduled for Thursday, April 27, 1978, at 9 a.m.;

Proposed submission of the Commission's Annual Report to Congress for the fiscal year ended September 30, 1977, and transition quarter to the Government Printing Office for publication.

The following additional items will be considered by the Commission at the closed meeting scheduled for Thursday, April 27, 1978, immediately following the open meeting:

Formal orders of investigation.
Referral of investigatory files to Federal, State or Self-Regulatory authorities.
Regulatory matters bearing enforcement implications.
Consideration of amicus participation.
Other litigation matters.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)A and (10) and 17 CFR 200.402(a)(8)(9)(i) and (10).

Chairman Williams, Commissioners Loomis, Evans, and Karmel determined the Commission business required the above changes and that no earlier notice thereof was possible.

APRIL 26, 1978.

Food and Nutrition Service

FOOD STAMP ACT OF 1977

V 4 3 — 1 8 5

[3410-30]

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

[7 CFR Parts 271, 272, 273, 274, 278, 279, 282]

[Amdt. No. 132]

FOOD STAMP ACT OF 1977

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rulemaking discusses major aspects of the Food Stamp Act of 1977, including the issuance of allotments at no cost, eligibility criteria, certification and issuance procedures, research and demonstration authority, fraud disqualification requirements, and retailer/wholesaler participation. The changes are intended to tighten eligibility criteria, to facilitate participation by eligible households, to strengthen program administration, and to reduce program fraud and abuse.

DATES: Comments should be received on or before June 16, 1978.

ADDRESS: Comments should be submitted to: Nancy Snyder, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Alberta Frost, Food Stamp Regulation Task Force, Food and Nutrition Service, Washington, D.C. 20250, 202-447-6993.

SUPPLEMENTARY INFORMATION:

INTRODUCTION

The Food Stamp Act of 1977 (the Act) is the most comprehensive and detailed statutory revision of the Food Stamp Program (FSP) since its inception. That Act, as reported by the House Committee on Agriculture, "* * * represents the culmination of two and one-half years works by the Committee," and is a "* * * tightly inter-related package of provisions that accomplishes several major objectives." These objectives include simplifying and tightening program administration, facilitating access to the program for eligible and potentially eligible households, eliminating households with high gross incomes, and reducing the potential for errors and program fraud or abuse.

In preparing this regulatory proposal, the Department actively sought the advice and assistance of other Federal agencies, State public assistance departments, State and local food stamp agencies, food advocacy groups, public interest organizations, and the general public. The Department was especially interested in soliciting the views of persons likely to be substantially affected by these massive program changes. Some of the procedures employed to encourage public participation in this unique and extensive program revision are taken from the official recommendations of the Administrative Conference of the United States (Administrative Conference). This organization, which is authorized under Federal law (5 U.S.C. 571-576),[1] as a "* * * permanent independent agency, * * *" is composed of Federal "* * * agency heads, other Federal officials, private lawyers, university professors, and other experts in administrative law and government * * *." 1 CFR 301.2[2] In this regard,[3] the Department sponsored 17 public hearings in October 1977.[4] The hearings were publicized through the media, the display of posters and FEDERAL REGISTER notice.[5] (42 FR 44251, Sept. 2, 1977).[6] Numerous invitations were sent to individuals and organizations from mailing lists prepared by the Department's national and regional offices.[7] 862 individuals testified at these public hearings. To insure the adequate representation of the poor at these hearings, the Department paid the personal expenses of certain persons to enable them to testify.[8] Person unable to present comments at the hearings were invited to submit written suggestions. A total of 7,191 transcript pages were generated and 316 letters were received pursuant to Departmental efforts to encourage public participation.

The Department also met with various organizations with technical expertise, experience or knowledge concerning more specific aspects of the program such as the National District Attorneys' Association, the American Public Welfare Association, the Southern California Grocery Association, the Food Research and Action Center,[9] retail food chain representatives and various Federal agencies and Departments. Additionally, copies of a working draft[10] of proposed regulations were issued to participants at the Third Annual Food Stamp Conference (Jan. 29-Feb. 1, 1978). Participants included Food and Nutrition Service Regional Administrators and staff, representatives of various State and county agencies, public interest law and nutritional advocacy organizations, and staff from the FNS headquarters in Washington, D.C.

[1] This reference is to Title 5 of the United States Code (U.S.C.), sections 571 to 576. The U.S.C. should be available in all law libraries and most public libraries.

[2] This reference is to Title 1 of the Code of Federal Regulations (CFR), section 301.2. The CFR should be available in law libraries.

[3] Recommendation 68-5 of that Administrative Conference provides:

1. Federal agencies should engage more extensively inaffirmative, self-initiated efforts to ascertain directly from the poor their views with respect to rulemaking that may effect them substantially.

(a) Agencies should seek to inform the poor of all rulemaking proposals that may affect them substantially and should provide opportunities for the poor to submit their views concerning these and related proposals.

(b) Agencies should hold formal public hearings or informal conferences in close geographic proximity to the poor substantially affected by contemplated rulemaking.

(c) Agencies should take care to invite individuals constituting a representative cross-section of the poor to submit their views orally or in writing as to proposed rules substantially affecting the poor.

(d) Agencies should conduct field surveys among the poor to discover their attitudes concerning particular government policymaking substantially affecting them.

(e) Agencies should use advisory committees made up of representatives of the poor as continuing consultants for all programs having a substantial effect on such persons.

(f) When necessary to assure adequate representation for the poor, agencies should pay the personal expenses and wage losses incurred by individuals incident to their participation in rulemaking hearings * * * 1 CFR 305.68-5 (Jan. 1, 1977).

[4] See Administrative Conference Recommendation 68-5(A)(2)(b). Moreover, the Administrative Conference recommends two cycles of notice and comment rulemaking where complex issues are involved. 1 CFR 305.76-2. The Department modified this Recommendation by holding public hearings and reviewing the extensive public input in preparing this proposal for further public scrutiny.

[5] The Administrative Conference has recommended that: Each agency should utilize such methods as may be feasible, in addition to the FEDERAL REGISTER's official public notice, to inform the public and citizen groups about proceedings . . . where their participation is appropriate. Among the techniques which should be considered are factual press releases written in lay language, public service announcements on radio and television, direct mailings, and advertisements where the affected public is located, and express invitations to groups which are likely to be interested in and able to represent otherwise unrepresented interests and views. 1 CFR 305.71-6. (Jan. 1, 1977).

[6] 42 F.R. 44251 refers to Volume 42 of the FEDERAL REGISTER, page 44251. The FEDERAL REGISTER should be available in many law libraries.

[7] See Administrative Conference Recommendation 71-6(E) and 68-5(A)(2)(c).

[8] See Administrative Conference Recommendation 68-5(a)(2)(f).

[9] The Food Research and Action Center is a legal advocacy group representing program participants in litigation against the Department.

[10] Copies of that working draft have been made available upon request. 43 F.R. 10568 (March 13, 1978).

The public hearing transcripts[11] and suggestions from State and local agencies, public interest organizations, advocacy groups, and other Federal Departments, were carefully considered in drafting these proposals.

The legislative history was closely examined to determine the purpose and intent of statutory provisions.[12] *Nonetheless, the written comment period which follows this notice represents the critical opportunity to affect final regulatory policies. The Department, therefore, encourages careful public scrutiny of this proposal and welcomes detailed written criticism and comment.*

While the current regulations are approximately thirty pages in length, those current regulations are interpreted by a "Food Stamp Certification Handbook" (FNS Instruction 732-1), which is one hundred forty-five pages in length, in addition to hundreds of pages of other written instructions. To insure that the public has an opportunity to comment on all significant aspects of these massive statutory changes, the Department has decided to publish a detailed, explicit and extensive proposal. It is hoped that intensive public scrutiny, even of rules which merely interpret and explain statutory provisions, will assist the Department in drafting final regulations. Provisions of the proposed regulations which are unlikely to significantly affect the public may not have been analyzed in the preamble. However, comments on all aspects of the proposed rules will be considered.

ELIMINATION OF THE PURCHASE REQUIREMENT

The Act of 1977 will result in the issuance of food stamp benefits to eligible households at no charge. While no provision or section of the Act of 1977 specifically eliminates the charge for coupons required by the Act of 1964, the regulatory implementation of certain provisions of the Act of 1977 will result in the issuance of coupons at no cost. This should result in program simplification, reduced administrative costs, increased access to the program and the elimination of the potential for fraud in the handling of cash.

The Department wishes to make clear that, under the Act, most households will receive a smaller allotment than would have been provided under the Act of 1964. Under the Act of 1964 households received the full value of the "Thrifty Food Plan"[13] upon payment of the purchase requirement. Under the new Act, households will receive coupons equal in value to the Thrifty Food Plan reduced by 30 percent of net income as defined under the new Act. Only the poorest households will receive allotments equivalent to the full cost of Thrifty Food Plan. All other households will have to spend cash, in addition to the stamps, to purchase the equivalent of the Thrifty Food Plan.

IMPLEMENTATION

The Act contains no specific implementation schedule. It does, however, direct the Secretary to implement the Act "* * * as expeditiously as possible consistent with the efficient and effective administration of the food stamp program." Many of the proposed changes are closely interrelated and should be concurrently implemented to achieve a smooth and orderly transition to the new program. To expedite the implementation of significant statutory revisions which directly affect households, the Department has divided the implementation of the Act into at least two major notice and comment rulemaking packages. This first package contains the major legislative changes affecting eligibility and benefit levels, as well as related certification, issuance and hearing procedures necessary for a coherent implementation of these new provisions.

Implementation of the first package requires careful timing. It will take place in two distinct phases. The first phase occurs after publication of final regulations. During this phase, States must prepare, print and distribute the necessary instructions and forms, train staff on the new procedures, reprogram data-processing equipment, and inform the public of the new program regulations.

The second phase involves converting the current caseload to the new program, as well as certifying all applicants under the new procedures. As households come due for recertification, they will be converted according to the new regulations. All households which would not normally have been recertified during phase two shall be converted through State agency reviews of each case file (desk reviews).

In general, States agencies would be allowed between 3 and 4 months from the publication date of final regulations for phase one implementation and an additional 120 days to complete phase two conversion. While the Department would have preferred to simultaneously convert the entire caseload in one month, that is not feasible. Under normal circumstances, local food stamp offices handle less than one-third of the caseload in any given month. It would be impossible to triple that workload, especially while using new income computation, issuance and certification procedures. Moreover, an increased influx of applicants, complaints and inquiries is anticipated during that initial conversion period.

Based on an examination of prior rulemakings, as the House Report pointed out, the House Committee "somewhat optimistic[ally]" discussed a 90-day conversion period. The Department believes that 120 days is more realistic considering the extent of this program revision.[14] However, the Department believes that staggered implementation of the free coupon issuance provisions would be administratively impossible. State agencies have indicated that computer and data systems limitations mandate a single free coupon conversion date. Moreover, a gradual phase out of the purchase requirement will prolong and complicate cash accountability for FNS and coupon issuers. A gradual phase out may discourage current coupon issuers from continuing to provide service to participants. Issuance of free coupons to some households, and not others, will induce confusion, information requests and program dissatisfaction. Numerous households are likely to demand free issuances while others will forward unneeded money orders or checks. Many households could fail to send in needed purchase requirements, thus delaying the receipt of coupons. To avoid these and other problems, and for the effective and efficient conversion to a new program, the Department will authorize free coupon issuances for all households simultaneously with the completion of phase one implementation. As a result, some currently participating households will temporarily receive the old bonus amount until the desk review or recertification is done. Thus, until converted to the new program, currently participating households will continue to receive the level of benefits (only

[11] These transcripts are available for public inspection and copying during regular business hours at 500 12th St., S.W., Room 698, Washington, D.C.

[12] The legislative history includes, among other documents, the extensive and through report of the House Committee on Agriculture (H. Rept. 95-464; June 24, 1977); the report of the Senate Committee on Agriculture, Nutrition and Forestry (S. Rept. 95-180; May 16, 1977); and the Conference Committee Report (H. Rept. 95-599; Sept. 12, 1977).

[13] The Thrifty Food Plan is the diet required to feed a family of four persons. The Department has adjusted this diet for different household sizes.

[14] A gradual food stamp program conversion affecting levels of program benefits was recently upheld. The Federal district court note: "The defendants [USDA] decided to implement the utility standard on a case-by-case basis, as recipients were certified or recertified, because this was * * * administratively convenient * * * A mass review of all [State] recipients would have involved substantially more work and time, delaying the date when the utility standard could be made available to *any* recipient." The court found that this gradual conversion was "eminently rational," did not violate the equal protection clause, and was consistent with due process. *Newberry v. Bergland*, USDC, S.D. Ga, Civ. No. 277-67 (Mar. 3, 1978).

M Y 2 — 7 8 UMI

V 43 | 85 MAY 2 78 UMI

the bonus amount) authorized by the Act of 1964, as amended. Currently participating households, which are converted, all recertified households and *all new applicants* will receive the level of benefits authorized by the Act of 1977. The Department recognizes that *currently participating households*, not yet converted, could temporarily receive benefits less than or greater than those benefits which would have been provided a similar household under the Act of 1977. Nonetheless, no household would receive a level of benefits not authorized by either Act of 1964 or 1977. No new applicant could receive the bonus allotment under the Act of 1964, as amended. Providing bonus amounts, under the Act of 1964, to new applicants without charging a purchase requirement would expand the food stamp program in a manner not contemplated by either Act. The Department believes that this gradual conversion is a legitimate response to the inability to convert every household in the same month.[15] The Department proposes the following specific implementation procedures.

Phase 1. Not later than the first of the month beginning no less than 3 nor more than 4 months after publication of final regulations, State agencies must implement the new eligibility criteria, application processing procedures and timeliness standards (including expedited certification), reporting requirements, recertification procedures, notice and fair hearing requirements for all new applicants and households undergoing recertification. The joint recertification procedures, for households receiving public assistance and general assistance, the fraud disqualification procedures and all other recertification and issuance related procedures, except as noted below, must also be in effect at this time. All forms and notices, including the standard application form, must also be in use by the above date.

Phase 2 It is proposed that all currently certified households be converted to the new program within 120 days after the start of phase 2. implementation. Households coming due for recertification during this time will be converted to the new program at the recertification review. Remaining households must be converted by a desk review during phase two. The new income definition, deductions, and allotment calculations must be completed for all households which are desk reviewed. Formerly exempt household members who must register for work under the new regulations shall be advised of the need to register and be provided a reasonable opportunity to comply. To the extent that the case file and other information available to the State so permits, other eligibility factors (such as resources, tax dependency, and alien status) shall be considered during the desk review. Otherwise, nonincome changes shall be deferred until the household is recertified. In no event will a household's certification period be extended at the desk review. Subsequent recertification action for these households must be in accord with all provisions of the final regulations.

Other changes. It is proposed that the outreach requirements for the transition period must be in effect one month prior to the implementation of phase 1. Within six months of the publication date of final regulations, the State agency must have implemented any remaining portions of these regulations.

In addition, within six months of the publication of final regulations, State agencies without a currently approved utility standard must have an FNS approved utility standard in use for all new applicants as of the first of the month following FNS approval. Currently certified households will be advised of the standard and will be allowed to use the standard in lieu of actual utility costs. Otherwise, actual utility costs will continue to be used until the household is recertified or desk reviewed, whichever comes first. The Department will provide technical assistance to those States which request help in developing a utility standard methodology.

Regulations regarding retailer/wholesaler provisions will be effective as of the date the final rulemaking on these proposed regulations is published.

Extensions. FNS may grant extensions to some, but not all, of the above implemention schedules. In particular, implementation of the basic financial and nonfinancial eligibility criteria and free coupon issuance shall not be extended for any reason. For other provisions, extensions may be granted by FNS upon submission by the State agency of compelling justification and an acceptable alternative schedule.[16] When extensions are granted, the current relevant Department regulations will remain in effect until superseded by implementation of the new rules. For example, if an extension is granted for expedited action on zero income applicants, the State agency must continue the current rules pertaining to waiving verification for zero income households and the special rules for migrant income mandated by *Gutierres* v. *Bergland*, 415 F. Supp. 827 (D.C. 1976). In no event will the Department grant an extension in excess of 120 days, from the specified implementation date.

The Department is particularly interested in receiving comments regarding the proposed timetable for implementation of new regulations. The remaining sections of the preamble discuss policies and procedures in the same order in which they are presented in the proposed regulations.

General Purpose and Scope

Coupons as Obligations of U.S. Crimes and Offenses

Coupon issuer penalties and the monitoring of coupon issuer activity received considerable attention prior to passage of the Food Stamp Act of 1977. The Emergency Food Stamp Vendor Accountability Act, Pub. L. 94-339, was enacted in 1976 in response to reports of vendor abuses involving the loss, embezzlement and theft of coupons and cash. As noted in the House Report, the need for strict controls will be greatly reduced by implementation of the Act of 1977 since coupon issuers will handle a reduced volume of stamps and will not handle any cash. The Department hereby withdraws the proposed regulations regarding Pub. L. 94-339 published at 42 FR 1479, January 7, 1977, and instead proposes new regulatory standards for coupon and inventory security. These proposals are discussed under the heading "Issuance and Use of Food Coupons."

Penalties. In accord with the Act, the proposed regulations require coupon issuers and bulk storage points to submit monthly activity reports to FNS through the State agency. The State agency will be required to closely monitor the day-to-day activities of all of its coupon issuers and bulk storage points and report any violations to FNS. The Act and regulations provide that any coupon issuer or bulk storage point convicted of failing to provide required monthly reports shall be subject to a fine of not more than $1,000 or imprisoned for not more than one year, or both. In addition, as required by the Act, any coupon issuer or bulk storage point convicted of knowingly providing false information on the required reports shall be subject to a fine of not more than $10,000 or imprisoned for not more than five years, or both.

[15] The total conversion of the current caseload on one date, as compared to a phase in beginning on that date, would reduce the overall level of benefits provided those households during that period. The Act of 1964, *for most of the existing caseload*, provides a level of benefits in excess of that provided under the Act of 1977. The legislative history does not seem to prohibit this proposed gradual conversion. In making its budget predictions to the Senate and House Committees the Department assumed, as it now proposes, that States would issue all coupons at no cost beginning on an exact date and would gradually phase in other regulatory provisions.

[16] Under the Supremacy Clause of the U.S. Constitution, State notice and comment rulemaking requirements (State Administrative Procedure Acts) may not delay implementation of this program beyond deadlines set forth in the final Federal regulations. States desiring local input to formulate optional rules and operating procedures may wish to provide for comment periods, in advance of implementation requirements, so as not to impede or delay that process.

Requirements for Participating State Agencies

Program Administration and Personnel Requirements

Staffing standards. The Department intends, after appropriate study, to develop comprehensive standards aimed at improving the quality, timeliness and efficiency of services while recognizing the diversity of program operations from project area to project area. The standards will be published as proposed rulemaking and comments will be solicited and analyzed prior to adoption of final rules. Until that final publication, it is proposed that State agencies employ sufficient staff to certify and issue benefits to eligible households and process fair hearing requests within the appropriate timeliness standards as required by the Act and final regulations.

Bilingual requirements. The legislation requires that State agencies "• • • use appropriate bilingual personnel and printed material in the administration of the program in those portions of political subdivisions in the State in which a substantial number of members of low-income households speak a language other than English."

The House Report states that, at a minimum, bilingual printed material would include "• • • all application forms, instruction sheets, and outreach and nutrition education material." While that report stresses that hiring quotas are not mandated by the Act, neither the report nor the Act is explicit regarding the caseload concentrations that trigger the need for bilingual services.[17] The Department is concerned that data on the numbers of low-numbers of low-income non-English-speaking households may not be readily available for many areas. States will have to use a variety of sources to secure pertinent information.

The proposed regulations require bilingual service based on the total number of households needing that service compared to the number of low-income households in a given project area. bilingual service is mandated where, at least, 150 households of a single language low income group[18] reside in projects with 3,000 or more low-income households. Project areas with fewer than 3,000 low-income households, in which at least 50 single-language low-income households reside, must also provide bilingual service.

The Department rejected a uniform percentage test since that could require bilingual service in areas with few low-income households where only very few single non-English language households resided.

Theoretically, the presence of one household could exceed a percentage test. Even worse, in densely populated low-income areas significant concentrations of non-English-speaking households might not be entitled to bilingual service.

Under the Department's proposal, no matter how low a percentage 150 same-language non-English-speaking households constituted (as compared to the total number of low-income households), those 150 or more households would receive bilingual service. Conversely, concentrations of fewer than 50 same-language non-English-speaking households, no matter how high a percentage of low-income households that represented, would not be entitled to bilingual service. If this standard is adopted, the Department intends to closely monitor its effectiveness to develop data on which to base possible future rulemaking.

States may provided bilingual service under stricter numerical requirements than are provided in the proposed regulations where the State believes this would be appropriate. Imposition of bilingual service does not mean that certification staff would have to be released and other staff hired to meet the criteria. It does mean, however, that States must have a staffing plan that would move toward meeting the minimum Federal requirements as expeditiously as possible. Paid or volunteer interpreters may be used to meet the need where appropriate.

Areas that anticipate an influx of non-English-speaking households during certain seasons must be prepared to respond with bilingual staff and program materials. The use of interpreters or temporary employees for these periods is acceptable. The proposed numerical standards for determining the need for bilingual staff and materials apply during influx periods.

States may find, in large project areas with more than one certification office, that bilingual capabilities are not needed in all offices. In these situations bilingual staff can be concentrated in those offices where the need exists. Bilingual materials must be developed and distributed for use by program participants and the potentially eligible as expeditiously as possible.

Divisons of responsibilities. The current requirements (FNS(FS) Instruction 734-2 and FNS Notice 77-30) on the division of certification and issuance responsibilities are included in these proposed regulations. While the Department recognizes that limitations in staff and funding may necessitate the combining of certification and issuance functions, such a combination of responsibilities seriously weakens controls and involves risks of losses. The proposed regulations require that the State agency divide the responsibility for eligibility determinations and coupon issuance between certification, data management and issuance units. However, with prior Departmental approval, a project area may combine unit responsibilities where other alternatives have been explored and determined to be not feasible. The conditions under which such approvals will be provided are spelled out in the proposed regulations.

Training. The Act requires the State agency to provide a "• • • continuing, comprehensive program of training for all personnel undertaking [Food Stamp] certification." The proposed regulations expand the training requirement beyond the certification worker to help ensure more effective and efficient program operations. Those included in the expanded training program are outreach workers and others who pre-screen or provide other services to applicants.

The proposed regulations require States to designate a training coordinator to develop training materials, supervise training sessions, ensure that appropriate personnel receive training, and monitor compliance with the standards for public participation in training sessions. States shall also designate additional staff at either the State or local level to provide training.

The House Report expressed an interest in allowing "• • • community groups and volunteers • • • to participate in training sessions so that they can more accurately perform prescreening and assist in completing application forms." A minimum of 10 percent of the training slots or 10 training slots, whichever number is smaller, at State, region, or city-wide sessions must be reserved for the public.

The effectiveness of State and local training will be evaluated through the performance reporting system and appropriate corrective action will be taken.

Outreach

The outreach provisions of the new law require comprehensive informa-

[17] This phrase refers to households which speak the same non-English language and which do not contain adults fluent in English as a second language.

[18] The 5 percent staring point (150/3,000) is reflected in the voting Rights Act of 1965, as amended, which requires bilingual materials where 5 percent of the voting age population speak a language other than English. Localities might have developed useful statistical analyses based on implementation of that Act.

V 43 | 85 MAY 2 78 UMI

tional activities to advise low-income households of the benefits of program participation. Proposed regulations to implement the outreach requirements will be published in subsequent rulemaking. However, there is a critical need during the transition from the current to the new program for the dissemination of clear and accurate information.

The House Report states "• • • this legislation will drastically change eligibility requirements and procedures. Low-income families should be informed about how the 'new' food stamp program would work and about participant duties and responsibilities under the new program." The Department proposes special outreach procedures for the transition period to avoid confusion and misunderstanding during implementation. These procedures would be an addition to existing requirements contained in FS regulations and FNS(FS) Instruction 732-6(Rev. 1). Current requirements, as well as the special outreach procedures, would be in effect until such time as the changes in outreach required by the Act are implemented.

These special procedures direct the States to place emphasis on informing current food stamp participants of program changes. The special procedures also include distribution of printed materials describing program changes and the installation of toll-free hotlines to facilitate the answering of questions. The proposal requires that written notices be provided to participating households, recipients of public assistance, and recipients of a State-administered SSI supplemental payments at least once prior to implementation. Other printed materials describing the new program would be available in local food stamp and welfare offices and may be available through local social security, State employment security, and unemployment compensation offices. Printed materials would be made available to the public upon request. The Department will provide a basic publication on program changes which State agencies may supplement.

At the same time information efforts are initiated, State agencies would begin the operation of State level toll-free hotlines which can be used by participants and potential participants to secure information. The proposal permits the use of hotlines in local areas where large numbers of low-income households reside. Individuals staffing the hotlines must be knowledgeable in program rules and procedures and must ensure that complaints are referred to the proper officials. Hotlines are to operate, at a minimum, during normal business hours. There must be at least one hotline for caseloads of less than 100,000 people, two hotlines when the caseload is between 100,000 and 500,000, three hotlines where the caseload is between 500,000 and 1,000,000 and four hotlines where the caseload exceeds 1,000,000. In situations where local hotlines are used, the above requirements for State level hotlines could be reduced accordingly, except that there must continue to be at least one toll-free hotline at the State agency level. Hotline numbers must be extensively publicized. In addition, the proposal requires the use of press releases and radio spots to publicize program changes and permits the use of TV spots.

These procedures, and particularly the use of hotlines, were chosen as the most expeditious way of disseminating information without greatly burdening local project areas.

Non-Discrimination Compliance

Non-discrimination. The proposal includes non-discrimination criteria required by the Food Stamp Act and Title 6 of the Civil Rights Act of 1964 (42 U.S.C. 2000d). Most of these requirements are now imposed by Departmental regulation and FNS Instruction. Reporting and monitoring requirements will be included in a later publication of regulations.

Complaints. The complaint procedure provides that individuals who believe that they have suffered discriminatory treatment while applying for or participating in the program may direct complaints to the Administrator, FNS or the Secretary. State agency personnel must also accept all such complaints and forward them to the Administrator or the Secretary. This ensures a review of each complaint at a high level of authority and experience and will provide a uniform and consistent review process. The location of all files at one site will facilitate effective review of civil rights policies in relation to the Food Stamp Program. The 180 day time period for filing a complaint is in accord with current Departmental regulations (7 CFR 15.6). These are not significant changes but provide more specific direction to program administrators.

Public notification. The proposed requirement to publicize civil rights complaint procedures is a part of an overall effort to inform applicants and recipients of program rights.

Civil rights data. The data standards require numerical measures of racial and ethnic factors regarding potential eligibles, participation rates, applications, certifications, denials, fair hearings and office staffing. These data will provide program administrators with a useful tool for analyzing the impact of racial or ethnic factors and for identifying possible civil rights abuses. While legitimate factors may explain seemingly disparate treatment of certain groups of individuals, examination of exact data may alert administrators to situations needing closer review.

Certification of Eligible Households

Household Concept

Cooking facilities. The common cooking facilities requirement imposed by the Food Stamp Act of 1964 has been omitted from the new Act. The House Report appropriately noted that there "• • • is no nutritional necessity to eat hot or cooked food."

Economic unit. The Act of 1977 does not include the provision in the Food Stamp Act of 1964 that permitted persons sharing living quarters, but who were separate economic units, to apply for food stamps as separate households. The House Report notes that what household members do with food money is more relevant to the household concept than how they handle nonfood costs. The primary concern of the new Act is with "food units" rather than economic units. The Act provides that person living together who both purchase food and prepare meals together constitute a food stamp household, provided they are not residents of institutions or commercial boarding houses. Persons who do not perform these two functions together, or persons who purchase food and prepare meals with others but are boarders by virtue of paying compensation for such meals, constitute separate households.

Household definition. A new definition of household was written into law. As is currently the case, residents of federally subsidized housing for the elderly and residents of FNS approved drug or alcoholic treatment centers are the only residents of institutions that may participate in the program. Other than ineligible residents of commercial boarding houses or institutions, any of the following individuals or groups of individuals may make up a household: (1) An individual living alone; (2) An individual living with others, but who customarily purchases food and prepares meals for home consumption separate and apart from the others; (3) An individual who is a boarder, in a noncommercial boarding house, living with others and paying reasonable compensation to the others for meals for home consumption; (4) A group of individuals living together and customarily purchasing food and preparing meals together for home consumption; or (5) A group of individuals who are boarders, in a noncommercial boarding house living with others as a group and paying reasonable compensation to the others for meals for home consumption.

The Department proposes that State agencies accept household statements regarding household status and that

home visits not be required for verification. Unless the reported household status is inconsistent with other information known to the State agency, it would seem that the cost and effort expended in verification would not be justified in most circumstances. The House Report notes that, "[i]f a group of persons sharing living quarters state that they do purchase food and prepare meals together and do not pay compensation for the meals, they should be treated as a household • • • without any significant burden of proof unless the State agency has good cause to believe that the applicants are misrepresenting the facts." The report further states that if individuals state that they do not meet the household criteria, they should be treated as separate households.

Nonhousehold members. The Department proposes to continue disregarding the following individuals as household members when determining household size and allotment: Roomers, boarders, live-in-attendants, ineligible aliens, SSI recepients in "cash-out" States, ineligible student tax dependents, disqualified individuals, and individuals who share living quarters with the household, but who do not customarily purchase food and prepare meals with the household. The proposed definition allows boarders or groups of boarders in noncommercial boarding situations to participate in the program. The Department proposes prohibiting the assignment of boarder status to spouses, including common-law spouses, or to minors under 18 years of age if they are under the parental control of a member of the household. In such instances it is very likely that the spouses and the children are integral members of the primary household as opposed to being boarders. Application of these specific provisions will provide a uniform national policy.[19]

The Department proposes to maintain certain requirements on the amount which must be paid for meals to qualify household members as boarders. Boarders will be classified as members of the primary household unless they contribute one of the following monthly amounts for meals:

(1) An amount which equals or exceeds the amount of the Thrifty Food Plan for the appropriate household size, for example, under current coupon allotment standards these amounts would be $52 for a single boarder, or $96 for two boarders.

(2) An amount which is less than the appropriate Thrifty Food Plan if the local community has a prevailing rate for board which is less than the amount of the Thrifty Food Plan, and the boarder is paying an amount equal to or in excess of that local rate. The Department proposes that State standards for board be prohibited because local rates for board may vary from one project area to another or may vary within neighborhoods in one project area.

(3) An amount which corresponds to the number of meals the boarder eats with the primary household. Thus, if the boarder routinely eats meals outside of the board arrangement, the State agency must prorate the board payment to determine if that payment is adequate to properly compensate for the meals eaten under the board arrangement. It is proposed that the amount be calculated by multiplying the number of meals routinely eaten outside of the board arrangement by a standard 60 cents per meal. The proposed 60 cents per meal is the approximate average amount allotted by the program for each meal.

Boarding house. The Department proposes defining boarding houses as establishments that are recognized by the community as commercial enterprises which offer meals and lodging for compensation. Current policy defines a boarding house as a place where three or more individuals are funished meals, or lodging and meals, for compensation. The House Report indicated that the strictly numerical approach to the definition should be abandoned in favor of considering the commercial nature of the boarding house. The report notes that "[t]he Committee does not want the Department to allow States to assume that any time three or more persons contribute to a household's meal costs, the household automatically becomes a boarding house regardless of the relationship of the parties involved. If the contribution to food costs involves friends or relatives and is not part of a commercial enterprise, the home is not a boarding house, and those who eat there remain eligible for food stamps if they satisfy the other eligibility criteria." The Department decided not to use licensing to determine if a particular residence is in fact a boarding house because there is little uniformity in licensing ordinances and because commercial boarding houses may be functioning in some States without licenses or licensing requirements.

The Department proposes to eliminate the current restrictions which prevent the households of boarding house operators from participating in the program since, as the House Report notes, the source of a household's income should not determine its eligibility for food stamps.

Head of household. The title "head of household" is currently assigned to the person in whose name application is made for the program. The Department proposes that the State agency shall classify as head of household that household member who "• • • was responsible for acquiring the greatest amount of financial support within the last 60 days." The change is proposed in response to the statutory requirement that a household not already certified be ineligible for program benefits for 60 days after the "head of household" voluntarily quits a job without good cause. This statutory disqualification places new importance on the definition of household head. The Congressional purpose is to prevent the family bread winner from voluntarily quitting work and then immediately relying on the program for support. The Department's proposed head of household definition enforces that purpose.

Residents of institutions. Residents of federally subsidized housing for the elderly and drug addicts or alcoholics residing in FNS approved treatment and rehabilitation centers will continue to be the only individuals who may qualify for program benefits while residing in an institution. The Act specifically allows these two exceptions and no others.

Authorized representatives. The legislation requires "• • • that any applicant household may be represented in the certification process • • • by a person other than a member of the household so long as that person has been clearly designated • • • and, where the certification process is concerned, the representative is an adult who is sufficiently aware of the relevant household circumstances."

The proposed regulations would implement this policy, and represent little change from the current approach. Authorized representatives are allowed to make application, obtain coupons and purchase food on behalf of the household because of employment, health, transportation or other problems.

Because of the special needs of addicts and alcoholics, employees of approved addict/alcoholic treatment centers shall act as authorized representatives for eligible resident members of the center. Additionally, in an effort to limit program abuse as recommended by the House Report, authorized retailers and employees of public welfare departments are prohibited under this proposal from acting as authorized representatives unless they are specifically allowed to do so by the local welfare director.

Application Processing

Food stamp application form. The new law requires that the Secretary design a simplified, uniform national application form which contains, in understandable terms and in promi-

[19]Common law marriage standards do vary from State to State. Nonetheless, since many States define this status and accordingly impose marital support obligations, the Department proposes to treat common law marriages in the same manner as formal marriage relationships.

V 4 3 | 8 5

nent bold face lettering, a description of the civil and criminal penalties for violating provisions of the Act.

The Department has contracted out the design of this application form along with the application worksheet, the participant reporting form, the notice of eligibility/denial, the notice of adverse action, the notice of expiration, the tax dependency form, and the demand letters for claims against households.

Since several State agencies have requested that they be involved in the design of the application form, the Department plans to invite persons from outside the Department to assist in evaluating the forms designed by the contractor. The contract requires that the forms be tested on volunteer food stamp participants and volunteer workers in several food stamp offices.

Once the model forms are designed and tested, State agencies will be expected to print State forms using the same format and design, unless a deviation is granted by the Department. The Act specifies that a deviation from the model application form may be granted only where: (1) the State agency plans to use a combined public assistance/food stamp application form for all households; (2) the requirements of a computer system necessitate a different format; or (3) the deviation is required by "• • • other exigencies as determined by the Secretary." The Department also proposes that all other FNS model forms be adopted on a uniform basis, with deviations granted only under the same conditions as would permit a deviation on the application form. The Act requires that State agencies use bilingual forms in those areas in which a substantial number of low-income households speak a language other than English. Therefore, State agencies will be required to provide bilingual application forms in certain areas.

Household cooperation. The Act requires that "[n]o household shall be eligible to participate • • • if it refuses to cooperate in providing information • • • necessary for making a determination of its eligibility or for completing any subsequent review of its eligibility." The legislation emphasizes the importance of the household's cooperation in the certification process by enforcing the current practice of denying applications for refusal to cooperate at initial or subsequent certification, as well as disqualifying households which do not cooperate in subsequent reviews of eligibility, such as quality control reviews. However, the House Report makes clear that such denials or terminations can only be for refusals to cooperate, "• • • not merely a negligent omission to provide information, but a positive denial of requested data." For example, the application can be denied if the household refuses to be interviewed, but not because the household failed to keep a scheduled interview.

The proposed regulations include an obligation for the State agency to assist households which are unable to complete the certification or review process. As such, the State agency is directed to assist households in overcoming an inability to cooperate. Suggested aids include out-of office certification procedures, assistance in obtaining needed verification, and use of foreign language materials and staff.

Interview. The Department currently requires, with few exceptions, that all food stamp households, including those who submit applications by mail, be personally interviewed prior to certification. The interview represents a critical exchange between the State agency and the household and serves to satisfy the eligibility worker and the applicant household that all necessary information has been provided. The interview provides a mechanism for the eligibility worker to understand the household's circumstances and provides an avenue for the household to obtain a basic understanding of the program. On the basis of past experience, the Department believes that the interview is critically important to the certification process and must be carefully monitored and regulated. Proposed rules which impact on the interview process are discussed throughout the preamble.

The regulations provide that the interview "[f]acilities • • • be of adequate size and layout to preserve privacy and confidentiality • • •," and to protect the dignity of the applicants. It also requires that "[h]ouseholds shall be advised of their rights and responsibilities during the interview." To protect the integrity of the program, the Department proposes that the interview process "• • • explore and resolve • • • unclear and incomplete information." While the face-to-face interview will remain the primary interview technique, modifications to the interview process are proposed under certain special circumstances, as required by the Act.

Upon household request, the State agency is required to waive the office interview if the household is unable to appoint an authorized representative and has no adult member able to visit the office because of age (65 or older) or mental or physical handicap. In addition, the State agency may waive the office interview for households unable to appoint an authorized representative and which have no responsible member able to come to the food stamp office because of hardships such as illness, lack of transportation, bad weather or work hours that preclude in-office certification.

Where an office interview is waived, the proposal requires a home visit or a telephone interview. This rule should increase program accessibility without inviting program abuse. To ensure equal treatment for these households, it is proposed that States not be allowed to alter the length of the certification period solely because of waiver of the office interview. Since verification may become even more critical without face-to-face interviews, waivers will not exempt households from verification requirements, although special procedures may be developed to facilitate timely verification compliance. Moreover, State agencies are required to schedule all interviews promptly, to meet the 30 day benefit delivery standard.

Verification and documentation. The Act provides that nonexempt gross income must be verified along with "• • • such other eligibility factors as the Secretary determines necessary • • •." Presently, States are required to verify income and other eligibility factors that are unclear, incomplete or inconsistent. Some States utilize the "prudent worker concept" and allow individual eligibility workers to decide what should be verified and how much verification is needed. Others have expanded verification requirements on a statewide basis to mandate uniform verification of eligibility factors, in addition to income.

Under the proposed rules, all gross nonexempt income shall be verified. If all attempts by the State agency and the household to verify income have been unsuccessful (such as where an employer refuses to provide a wage statement to the applicant), the eligibility worker shall determine an amount to be used for certification purposes based on the best available information. Nonfinancial and resource information will be verified only if inconsistent with other information known to the State agency and if the applicant is unable to satisfactorily explain the apparent inconsistency or contradiction. The reason for additional verification must be noted in the case file to allow for subsequent review.

The proposals limit verification requirements concerning citizenship status and certain deductible expenses. Only utility or other shelter cost components which exceed State standards shall be verified. The proposals also limit verification to expenses which would actually result in a deduction. It is unnecessary, for example, to verify shelter expense components in excess of the $75 maximum limit.

The Department proposes that asserted alien status be verified since many aliens may not know into which technical Federal alien category they have been placed. A person's exact alien classification is critical, under the Act, to program eligibility. The Department further proposes to verify statements concerning citizenship only when there is good cause to believe that the citizenship of a household member is being misrepresented. The proposed regulations prohibit States from routinely requiring applicants to produce verification of citizenship. While the law mandates that illegal aliens not participate in the program, the House Report notes that this specific statutory exclusion should not be used as an excuse to harass "• • • applicants who appear to be of foreign extraction, be they urban residents or seasonal farmworkers."

These proposed standards afford States sufficient flexibility to develop appropriate verification standards but insure that applicants will not be harassed or suffer delays over items with little or no bearing on eligibility or level of benefits. At recertification, it is proposed that unchanged information, as determined by a participant's statement, and previously verified income and expenses which have changed by less than $25, not be routinely verified.

Documentary evidence provided by the household will, in most cases, be accepted by the State agency. However, acceptance of such documentation does not preclude the State agency from initiating an investigation, if the State agency has reason to believe the evidence is fraudulent.

Normal processing standards. In accord with the statute, the proposed regulations specifically prohibit the withholding of applications until an interview can be scheduled. Applications must be immediately provided to all persons who "• • • make what may reasonably be interpreted as an oral or written request for food stamp assistance • • •." However, the regulations do not require States to provide same day interviewing. Households whose initial contact with the office is on the telephone or by mail shall have an application mailed to them the day the request for assistance is received. The regulations stress that application forms must be accessible to potentially eligible households at the certification office and require that forms be made available to outreach groups. To ensure households are advised of this rule, the same day filing requirement and procedures shall be clearly indicated on the application forms and outreach materials and be posted in certification offices.

The regulations provide for the 30-day benefit delivery standard specified in the Act. The 30-day processing standard begins with receipt of an identifiable application. An identifiable application contains the applicant's name, address, and the signature of either a responsible member of the household or the household's authorized representative. The application need not be complete to start the 30-day standard. For households exercising the same day filing rights, the 30 days will begin the day of initial contact with the certification office. For households which decide not to file an application that day or which contact the office by mail or telephone, the 30 days will start when an identifiable application is returned to the office.

Within the 30 days following the filing of an application, the household must complete the application, be interviewed, have certain information verified, be notified of eligibility or ineligibility, and, if eligible, be provided an opportunity to participate. Providing an opportunity to participate is not merely the mailing of an ATP card. Eligible households must be allowed at least two days to receive mailed ATP cards so as to be able to exchange them at an issuance office within the 30 days. The regulations stress that 30 days is a maximum standard and that all applications should be processed as quickly as possible.

Expedited service. The Act requires that households with no income, after appropriate exclusions and deductions, be provided expedited certification and issuance services. The House Report also suggests use of expedited service for households whose ATP cards or coupons are lost or stolen.

The proposed regulations identify two different types of "no income" situations—(1) households with zero net income for the month, and (2) households that are destitute of income at the time the application is filed, but expect to receive or have received income at some other time during the month. Expedited service must be provided to both types of households.

Households that are destitute of income at the time the application is filed are those households who currently have no income although they may start receiving some new income later in the month, and those households who lost their sole income source earlier in the month and now are without income.

To be considered destitute of income at the time the application is filed, the household's only income during the month of application must be "nonrecurring"[20] and must not be received in the same quarter of the month the application is filed. For households that have lost a source of income, income will be considered nonrecurring if it will not be received again from the same source during the balance of the month of application and the following month. For households that currently have no income but anticipate a new source of income later in the month, the income will be considered nonrecurring if income, from that same source, has not been received within 30 days prior to the date the application was filed. To determine whether the nonrecurring income is received in the same quarter of the month the application is filed, the month will be divided into four quarters (1-7, 8-15, 16-22, 23—end of month). For households that anticipate but have not yet received a new source of income, the Department is proposing that these households be entitled to a special calculation of their income in addition to being entitled to expedited service. These special procedures are explained in more detail under the section entitled "Determining Household Eligibility and Benefit Levels."

For those households which are eligible for expedited service and which are in especially dire straits because they (1) have insufficient food to enable them to wait even two working days and (2) have liquid resources less than the value of the Thrifty Food Plan for a one-person household, an opportunity to participate must be provided the same day the application is filed. (This same-day service does not apply to residents of drug addict or alcoholic treatment centers.) Generally, households entitled to same day service should have an opportunity to obtain the full monthly allotment. However, if an issuance facility is not immediately available or open, the food stamp office shall provide the household with at least one-fourth of its entitlement on the same day the application is filed and shall provide the remainder within five working days. The use of limited issuance will preclude food stamp offices from having to maintain a large supply of coupons in their office.

Same day service for all zero income households was rejected because the increased risks to ATP and coupon security did not warrant the marginal increase in service, except for the few households whose immediate need dictates a same day response.

In accord with the House Report and to prevent abuse of this provision a collateral contact or other verification of the household's identity and residence is mandated. The State agency is responsible for promptly acting on the collateral contacts provided by the household. Households certified under expedited procedures shall be certified for the month of application only. However, if the household provides the verification which was postponed within 30 days of the date the application was filed, the State agency shall extend the certification period as appropriate. In this way, households would not be required to submit a new application. Eligibility

[20]The distinction between recurring and nonrecurring income is made because recurring income typically represents the income which the household should be required to budget.

M Y 2 7 8 UMI

V 4 3 — 8 5

for future coupons based on that application will be determined by normal processing standards, including normal verification requirements. Successive certification under expedited standards is permitted, provided that verification postponed by the initial expedited service has been provided before the next expedited issuance. Households denied expedited service shall be eligible for an expedited fair hearing under § 273.15, upon request.

The Department proposes emergency replacements for coupons which have been lost or stolen after the household has received its coupons. To guard against possible program abuse, the household must report the loss or theft to the police and provide the State agency with a copy of the official report or shall provide other information showing that the loss was reported to the police. To reduce the potential for abuse, replacements will be allowed only once in each three month period. If adopted, the effectiveness and usefulness of this three month limit will be monitored. Replacement of lost or stolen ATP cards is addressed in part 274 of the proposed regulations.

Delays in processing. The Department proposes that applications be denied at the end of 30 days if a certification determination cannot be reached solely because the household failed to take a required action after a reasonable period of time. If verification is lacking, the State agency shall deny the application only if the household has had at least 10 days from the date of the State agency's last request for verification and the State agency has met all of its responsibilities to help the household obtain the verification. The denial notice must advise the household exactly what information is needed to complete the application, and that the State agency will reopen the case without requiring a new application if the household provides the requested information within the additionsl 30 days. Households that take the necessary action within the additional 30-day period and are found to be eligible will be provided an opportunity to obtain benefits retroactive to the month of application.

This procedure allows State agencies to close the casefile in situations where it appears the household has abandoned its application and requires that households initiate action to reopen its case. This procedure protects the household in that it avoids jeopardizing a household's entitlement to benefits, retroactive to the month of application, if the household takes the required action within the additional 30 days. The household is not required to file a new application.

If, however, the certification process is not completed due to failure or inaction on the part of the State agency, the State agency must take whatever additional processing time is required to make an eligibility determination. If a determination of eligibility is reached and an opportunity to participate is provided to the household within 60 days of the date of application, the household will receive a lump-sum payment of coupons back to the original month of application. Should the certification be completed beyond 60 days from the date of application, the household will receive its current month's entitlement and retroactive benefits back to the month of application, as provided in § 273.17. State agencies are out of compliance if they do not fulfill all of their responsibilities and, as a result, exceed the 30-day processing standard.

Requiring that States hold applications pending, when the State is at fault, eliminates unnecessary reapplications by the household and maintains the household's entitlement to benefits retroactive to the period of application.

If deductions are questionable and not verified, the household will not be denied or held pending if otherwise eligible. The application should be processed without allowing the unverified expense. Only if such expense is the difference between eligibility and ineligibility should the application be pended. If the household can demonstrate that the State agency contributed to its inability to properly verify such expenses (such as scheduling the interview or asking for verification too late in the process for the household to timely comply), and the household subsequently provides the necessary verification within 60 days of the initial date of application, the household will be entitled to any benefits lost as a result of the disallowance of the expense.

RESIDENCY

The proposed regulations continue to prohibit any durational residency requirement and yet require that an individual live in a project area to receive food stamp benefits. The proposed regulations emphasize that a fixed residence is not required. Physical presence within a project area coupled with the intention to reside there at least temporarily is sufficient, except that persons in a project area solely for vacation purposes are not to be considered residents for food stamp eligibility. Thus, presence at a migrant camp site would meet the residency requirement.

CITIZENSHIP AND ALIEN STATUS

Citizenship. The Act establishes five categories of aliens eligible for program benefits. Among those omitted from the list are aliens not lawfully present, alien visitors, tourists, diplomats, temporary laborers, and trainees.

The proposed regulations require verification when the applicant declares that a member of the household is an alien. The Immigration and Naturalization Service (INS) has assured the Department that eligible aliens should have no difficulty in providing proper identification for verification purposes. Actual documentation is necessary when the applicant declares a household member to be an alien since many aliens might not know into which technical alien category they fall under Federal law.

Income and resources. In accord with the House Report, the proposed regulations disregard the income and resources of an ineligible alien when determining eligibility for the other household members. Likewise, the individual is not counted in determining the applicable eligibility limits or level of benefits for the household. Consideration of those resources and income could result in the reduction of food stamp benefits for the remainder of the household because of the technical alien status of the ineligible member, even though the reaminder of the household is already receiving reduced benefits since the ineligible member is not counted in determining the vaule of the allotment.

TAX DEPENDENCY

The Act of 1977 has made the current tax dependency critieria as amended, more stringent by declaring that a student 18 years of age or older is ineligible if the student is properly or *could be properly claimed* as a dependent by a taxpayer in an ineligible household, whether or not the taxpayer intends to claim the student as a dependent.

The House Report notes that, "• • • what matters is the actual fact of considerable support of the person applying for food stamps and not how that support is handled for income tax purposes by a person not seeking eligibility." The report explains that the "• • • complexity of the tax dependency critieria was singled out as a major concern of state and local administrators • • •." In addition "• • • community groups cited • • • certification delays caused by the tax dependency criteria as a significant problem for student applicants." To avoid these delays and complications, the Department proposes that information provided by the student can be sufficient for a determination of tax dependency. Verification of tax dependency status is required if information provided on the application is inconsistent, contradictory or other documented evidence indicates likely tax dependency stauts. A review of the student's source of income for educational and living expenses will assist in determining if the information provided is inconsistent or indicates likely tax dependency.

Only when an application indicates that the student is a tax dependent, or other information would indicate that the student could be claimed as a tax dependent,[21] would the student be asked to supply the taxpayer's household size and gross income. If the student does not know the tax dependent status or is unable to provide the taxpayer's household size and gross income, a simplified verification form will be used in corresponding with the taxpayer household. The verification form will require the taxpayer to state whether the student is claimed or could be claimed as a tax dependent. If the student is or could be claimed as a dependent, the taxpayer will be required to provide basic information that will facilitate a determination of the taxpayer household's potential eligibility for food stamps based on gross income. This gross income analysis should expedite certification and reduce the detail required of the eligibility worker as well as the taxpayer.

Income and resources. In situations where additional verification is required, remaining household members may be certified while awaiting the student member's verification. In such instances, the income and resources of the student are not considered in determining eligibility or coupon allotment levels. This eliminates the possibility of penalizing the remaining household members because of tax dependency complications.

This procedure strikes a fair balance between the need to enforce the statutory tax dependency restrictions and the student's interest in a timely determination of eligibility while taking into consideration the food needs of the rest of the student's household.

Taxpayer failure to supply requested verification may result in a denial of program benefits to the student. However, students will be allowed to present other evidence to support their program eligibility despite taxpayer failure to cooperate.

[21] "The Act of 1977 focuses on whether the student is a "• • • dependent child for Federal income tax purposes • • •." Normally, a child is a dependent of the taxpayer's household if that household supplies over half of the child's support. That support includes cash payments, a place to live, clothes, medical and dental care, and the cost of education. IRS does not count scholarships in determining the total amount of support provided to the student.

Federal income tax law also may define a child as a dependent when less than half of the support is provided by the taxpayer's household. These situations involve students receiving support under multiple support agreements or under separation or divorce arrangements. These circumstances will be resolved by use of the special verification form when appropriate.

WORK REGISTRATION

Congress retained the requirement that able-bodied household members must register for and accept suitable employment as a condition of eligibility. Hence, with only very specific exceptions, all household members between the ages of 18 and 60 must register for work at the time of application and every six months thereafter. The House Report explains that the provision was designed to strenthen the work requirement through some modifications but to retain its current structure. The report notes that, to the extent that the Employment Service is involved, joint regulations between USDA and the Department of Labor (DOL) should be established concerning the manner in which work registration requirements shall be administered. However, transferring the point of actual registration to ES Offices was prohibited. Those parts of the legislation that require joint rulemaking with DOL will be covered in subsequent rulemaking.

In most cases, the work registration provisions contained in these regulations are required by the Act or specifically addressed in the legislative history.

Exemptions from work registration. Several changes were made in defining those required to register for work and those exempt. Congress lowered the maximum work registration age from 65 to 60, exempted persons registered for work under the AFDC-WIN program or the unemployment insurance (or unemployment compensation) programs; provided an exemption to the caretaker of a child as long as another member in the household is work-registered, and exempted those working at least 30 hours per week or working less than 30 hours but earning an amount equivalent to 30 hours times the Federal minimum wage. In addition, the law allows an exemption to those who care for dependent children under the age of 12 (previously under 18), requires students 18 or over to register for full-time work during any school recess of more than 30 days and further requires college students to register for 20 hours of work per week or to earn an amount equivalent to 20 hours times the Federal minimum wage during the school year. College students who are participating in Federally financed work study programs and certain students who are heads of households or are otherwise exempt from work registration would not have to register for 20 hours work per week.

Providing exemptions to unemployment compensation insurance (UI) recipients and persons in households, where one member is a already work-registered, and decreasing the maximum work registration age from 65 to 60 avoids duplicative work registration efforts unlikely to lead to any increased employment. Lowering the age of the dependent child from 18 to 12 means fewer people will be able to claim an exemption from work registration to care for a dependent child. College students who were previously totally exempt must now fulfill work registration requirements.

With regard to students, Congress passed two requirements. First, a student 18 years of age or older and enrolled at least half-time at the high school or college level must register for and accept full time employment whenever any recess or vacation exceeds thrity days. The second requirement applies only to students enrolled in institutions of higher learning. During the regular school year, students enrolled at least half-time must register for 20 hours work per week. Exceptions to this requirement apply to students already working 20 hours or working less than 20 hours if they are earning an equivalent of 20 hours times the Federal minimum wage. Additionally, students participating in a federally financed work-study program, or students who are heads of households containing one or more other persons to whom the student supplies more than half of the individuals' support, or students already exempt for another reason, such as being a WIN registrant, are also exempt.

Additionally, the Department has reviewed the work exempt status of Volunteers in Service to America (VISTA) program participants. Since VISTAs receive compensation for the service provided, and are considered to be employed, no change in VISTA work registration status is proposed.

Voluntary quit. Congress added a provision to disqualify for sixty days a household where the household head quits a job without good cause, unless the household was on the Food Stamp Program at the time of the quit. This provision will be discussed in subsequent rulemaking.

Job search. Implementation of this provision will be accomplished in subsequent rulemaking.

Failure to comply. The Department proposes that the penalty for failure to comply with the work registration requirements without good cause be set at sixty days, or until the household has come back into compliance with those work registration requirements. This proposal is consistent with the House Report and with the 60-day disqualification specified in the Act for voluntarily quitting a job.

Additionally, the Act distinguishes between all students over 18 who fail to comply during a 30-day recess and college students who fail to meet the 20 hours work requirement during the school year. In the former case, as provided by the Act, failure to comply results in disqualification of the entire

M Y 2 — 7 8
UMI

V 43 | 85

household; in the latter, disqualification pertains to the individual student.

Good cause. The House Report indicates that the current regulations on good cause be retained except that the proposed regulations allow a household member to reestablish eligibility for refusal to accept a bonafide offer of employment by accepting employment of less than 30 hours if the weekly earnings are equivalent to 30 hours times the Federal minimum hourly wage. The household can also reestablish eligibility by accepting other employment of less than 30 hours a week, as long as the earnings are equivalent to the job refused. This recommendation seems appropriate so as not to punish household members that obtain employment at the minimum wage, or higher, even though they refuse a job referred by the Employment Service.

Suitable employment. For a job offer to be considered suitable, the Act requires that the wage offered be at least the applicable Federal or State minimum wage, or if neither applies, 80 percent of the Federal minimum wage. Previously, a job paying as low as $1.30 could have been considered suitable work. Suitable work does not include any employment which interferes with "religious observances, convictions or beliefs." The House Report emphasizes that the "* * * Department should administer the work registration requirement in such a fashion so as to avoid infringing upon any individuals religious convictions and beliefs." For college students, work which disrupts class hours or that requires over 20 hours work per week may be considered unsuitable. Interference with class room attendance or the reduction in available study time beyond 20 hours may seriously impede the person's ability to obtain an education.

The House Report noted that *Jaramillo* v. *Santa Clara County*[21] "* * * held invalid the Department's regulation and instruction limiting the term 'strike' to mean only strikes which have not been determined to be unlawful by a court decision (injunction or other order) currently in force * * *. The court noted that Congress in the Act of 1964 had not itself made any distinction between lawful and unlawful strikers, but instead had expressly, unqualifiedly, and mandatorily provided that households with a striking member not be denied participation on that ground alone. Accordingly, the court found that the Department had exceeded its authority in adopting such a rule."

The House Report observes that the House Committee failed to make "any distinction between lawful and unlawful strikers" in the Act of 1977. In fact, the 1977 statutory language is basically identical to that 1964 statutory language which was determined, by *Jaramillo* not to allow for the disqualification of "unlawful" strikers. In consideration of these developments, the Department decided to carefully reexamine its regulatory position on strikers regarding the Act of 1977.

Under the current regulations, the Department has experienced difficulty in defining and fairly applying the phrase "unlawful strike." Court orders about a particular labor dispute often concern only a particular union. Sympathy strikers, not under court order, can be eligible while original strikers are declared ineligible. Courts have not been consistent in determining whether a given strike was "unlawful." Moreover, similarly situated strikers in adjacent States could be subject to variously worded injunctions issued by different courts. The same court could issue several decrees, one after the other, regarding the same dispute. Thus, persons working in the same industry a few miles from each other could be subject to different and changing court decrees. Each of these injunctions would have to be carefully reviewed to determine food stamp eligibility.

To avoid the inequities and uncertainties caused by the current policy, the Department recommends a much more precise and uniform striker disqualification provision.

The Department proposes that "suitable employment" include employment at a site or plant subject to a strike which has been enjoined pursuant to court order issued under section 208 of the Labor-Management Relations Act (29 U.S.C. 178), commonly known as the Taft-Hartley Act. To enjoin a strike under the Taft-Hartley Act the appropriate Federal court must determine, upon petition of the President of the United States through the Attorney General, that a "* * * threatened or actual strike affecting an entire industry or a substantial part thereof * * *" will "* * * imperil the national health or safety * * *." (29 U.S.C 178). The U.S. Supreme Court has explained that the Taft-Hartley Act recognizes "* * * certain rights in the public to have unimpeded for a time production in industries vital to the national health or safety." *United Steel Workers of America* v. *U.S.*, 361 U.S. 37 (1962).

The Department proposes, in those critical and unusual situations, that the entire household of the work registrant who refuses an offer of employment at the struck plant shall be disqualified. Even a limited issuance to the household could undermine the intent of the Taft-Hartley Act, at a time of national crises and could prolong the strike enjoined by court order.[22]

Registrants for other programs. Public assistance households residing in project areas with no available WIN program must register for work as any other food stamp household. However, State agencies may be granted an exception to this requirement for public and general assistance households if they have work registration procedures at least as strict as those for regular food stamp work registrants. Sanctions against household members which fail to comply must be equivalent to those in the Act. These procedures would avoid "double" registration for work by these households while assuring that equal or more stringent work requirements are being applied.

RESOURCES

Uniform standards. The Food Stamp Act of 1977 establishes uniform household resource limits which must be applied to all households, including those in which all members receive public assistance and/or supplemental security income.

Maximum allowable resources. The Act raises the maximum resource limit from $1,500 to $1,750 for all households except those consisting of two or more persons when at least one person is 60 years of age or older. The statutory resource limit for these elderly households will remain at $3,000.

Definition of resources. The Act requires that the Department, in establishing inclusions and exclusions from resources, shall "* * * follow the regulations in force as of June 1, 1977, and shall, in addition * * *", include as resources certain specified types of vehicles and mobile or vacation homes. Those June 1 regulatory exclusions include, among other resource exclusions: (1) income producing property which is producing income consistent with its fair market value; (2) property deemed essential to the employment of a household member; (3) the fair market value, less encumbrances, of one licensed vehicle; (4) household goods and personal effects; and (5) resources whose cash value is not accessible to the household.

A major concern of Congress was the treatment of the value of automobiles and other licensed vehicles in determining a household's eligibility. The Act and the House Report provide a

[21] United States District Court, N.D. Calif., April 19, 1976 (No. 75-1445 WTS).

[22] The legislative history of that labor statute notes that the emergency provisions "* * * provide for the extreme cases which threaten national paralysis." 93 Congressional Record 4281. U.S. Supreme Court Justices Frankfurter and Harlan explained that those provisions "* * * were the comprehensive interest of the community [and] * * * they must be construed to give full effect to the protections they seek to afford," 381 U.S. at 54.

detailed framework for determining the resource value and exempt status of vehicles.

The law requires that licensed vehicles will be totally exempt if used "to produce earned income." To qualify for this exemption, the vehicle must actually be involved in generating income, e.g., a taxi, tractor, or truck. Vehicles used only for transporting household members to work will not qualify as income producing vehicles.

The Department has some discretion in determining which vehicles qualify for the exemption as "income producers." The proposed regulations define income producing vehicles as those vehicles which are used primarily (over 50 percent of the time the vehicle is used) to produce income or those which annually produce income consistent with their fair market value. If necessary to determine if a vehicle is exempt, income produced by the vehicle on a seasonal basis will be averaged over the year to determine the annual income. The exemption will also apply during temporary periods of unemployment when the vehicle is not in use. This defintion is fair to households as it allows an exemption for vehicles used mostly for producing income, even if the business enterprise is not earning a profit at the time of certification. It also exempts vehicles annually earning income consistent with the fair market value, even if used less than 50 percent of the time for income producing purposes. This definition should protect the program from abuse by setting specific and uniform standards for income producing vehicles, rather than extending the exemption to all vehicles which are occasionally used to produce income, e.g., a snowmobile or boat which is used by the household mostly for recreation and which is rented occasionally.

The law requires that all nonincome producing licensed vehicles will be individually evaluated for fair market value. The portion of the value which exceeds $4,500 will be counted in full toward the household's resource level, regardless of any encumbrances on the vehicle. To determine the fair market value of vehicles, the Department proposes, in accord with the House Report, using the publications written for the purpose of providing guidance to automobile dealers. The publications are usually referred to as "blue books." The "average trade in value" or "wholesale value" as listed in blue books will be considered the fair market value if the car in question is in average condition for its age. If the car is in less than average condition for any reason, such as body damage or inoperability, the household will be given the opportunity to present evidence of the actual value from a reliable source. If such an appraisal shows that the car is worth less than blue book value, the State agency will assign the lesser value as the fair market value.

The "blue books" referred to in the House Report, such as the "NADA Used Car Guide Book," are updated monthly and are universally available for reference. The Department proposes that the "blue books" used by the State agencies be updated at least once every six months. Reliance on these estimates greatly simplifies cost determinations and program administration. Use of "the average trade in value" or "wholesale value," instead of the average retail value, establishes an appraisal the best reflects the price that most households would likely receive for vehicles sold or traded in.

The law also requires that nonincome-producing licensed vehicles, other than the household's primary vehicle, also be evaluated for equity value (fair market value minus encumbrances), if the vehicles are not necessary for household members to seek employment or to transport household members to and from employment. As is currently the case, the equity value will be counted toward the household's resource level, except in those few cases where both equity and fair market value for the same vehicle must be considered. This situation is dealt with below.

In summary, the Act requires that each licensed vehicle be handled as follows: First, it will be evaluated to determine if it is exempt as an income producer. If not exempt, it will be evaluated to determine if its fair market value is more than $4,500. If worth more than $4,500, the portion in excess of $4,500 for each vehicle will be attributed to the household's resources. The vehicle will also be evaluated, to see if it is equity exempt as the household's only vehicle *or* if it is equity exempt as necessary for transportation to work. If not exempt, these regulations approved by Congress require that the value the household has invested in the vehicle (fair market value less encumbrances) will be considered as a resource. If both the fair market value, in excess of $4,500, and the equity value are considered for a particular vehicle, the amount counted as a resource shall be the greater of the two. Otherwise, if a household's "second car" were worth $5,000 and were not necessary to transport a household member to work, the State agency would have to consider not only the $500 excess fair market value, but also the equity value of the car. To avoid this double counting (excess value plus equity value) it is proposed that the greater of the two amounts will be counted as a resource.

Home and lot exclusion. In the past, The Department has received numerous comments regarding difficulties State agencies have encountered administering the Department's current resource exemption for "* * * the home and lot normal to the community". There has been no uniformity or consistency in the application of this exemption. This area is targeted for review as part of the Department's study of assets, which is mandated by the new Act. In the interim, for purposes of consistency and program efficiency, the Department proposes to exempt the home and all surrounding property which adjoins the plot on which the home is located. This standardized and revised definition of home and lot normal to the community is easy to apply and will eliminate the need for State agencies to establish acreage limits or lot size limits. It will also establish a uniform national policy and eliminate the need for the Department to determine if State-approved acreage limits are appropriate.

Income-producing property exclusion. As required by the regulations in force on June 1, 1977, which were incorporated by the Act, the Department proposes that property (such as land used for farming or houses used for rental purposes) be allowed a resource exemption if annually producing income consistent with fair market value, or if essential to the employment or self-employment of a member of the household.

The Department proposes allowing an exemption for vacation homes only if the home is annually producing income consistent with the fair market value. If the vacation home is not producing adequate income, the household will not be able to claim an employment exemption for the property as it would with non-vacation property. This proposal is consistent with the House Report which favored a restrictive approach to vacation home exclusions.

Also excluded from resources would be any other property which is needed for purposes of employment, such as the tools of a tradesman or the machinery of a farmer, which are deemed essential to the employment of a household member. Property sold under an installment contract, even where the title is temporarily retained, would be exempt as an inaccessible resource to the seller since the property could not be sold again. The value of the installment contract, itself, is also exempt since it would be producing income consistent with its value.

Disaster payment exclusion. The Department proposes a resource exemption for governmental payments which are made to a household to restore the household's home which has been damaged in a disaster. This exemption will not apply unless the household is subject to a legal sanction if the funds are not used as intended. Under the

MY 2 78 UMI

V 43 | 85 MY 2 78 UMI

proposed regulations, governmental payments which are made to restore property damaged in a disaster are already exempt as income in the month received. The effects of the disaster and the shortage of supplies or service often make it not possible for households to repair damaged homes the same month the governmental payment is received. Therefore, the Department feels that the household should not have the funds, which are earmarked for that purpose, counted as a resource in the following months if the household is unable to purchase the necessary replacement or repairs. Counting such funds as resources could disqualify needy households which have recently suffered disaster damage which has caused both a loss of income and a loss of property.

Trust funds. The Department proposes to continue the exemption for resources which have a cash value that is inaccessible to the household. To prevent confusion regarding trust funds, a new paragraph has been added to the regulations to explain when a trust fund will be considered inaccessible.

Federal law exclusions. The Department proposes allowing exclusions for only those funds which are cited in Federal law as specifically exempt or intended to be exempt as resources for the Food Stamp Program. A list of these statutory resource exclusions is contained in the regulations.

Handling of excluded funds. The Department also proposes a system for identifying excluded resources if the funds are commingled in a bank account with other resources which are not excluded. Excluded resources will retain the exclusion indefinitely, if kept in a separate account easily identified by the State agency. If exempt resources are commingled in an account with other funds, the exempt resources will retain an exempt status for six months from the date of deposit. If the household's total resources exceed the allowable limits after that time, the following method is proposed to determine what portion of the total resources are exempt funds. The household will establish for the State agency the total amount of exempted funds which were deposited, the total amount of withdrawals subsequent to the date of deposit, and the current balance. All withdrawals after the deposit of exempt funds will be treated as withdrawals from all remaining exempt funds. The earliest deposited exempt funds will be considered exhausted first. Suppose $400 of exempt funds is deposited on December 1, into an account with $200 in nonexempt funds, and $100 more of exempt funds is deposited into that account on December 15. If $300 is withdrawn on June 1, $200 worth of exempt funds remain. When the amount withdrawn equals or exceeds the amount of the exempted funds, the exempted funds will be considered spent. The Department feels that this method is equitable because it allows the participant to provide evidence that the exempt funds have not been spent; and yet in most situations should not be overly complex. In effect, this rule assumes that commingled excludable resources are exhausted after a six-month time limit. The participant is then, however, free to provide evidence that the exempt funds have not been spent. This may be accomplished by presentation of a current bank book or any other verification that would support the participant's statement.

Transfer of resources. The Act prohibits households from transferring resources for the purpose of qualifying or attempting to qualify for food stamp benefits. However, this rule does not restrain the bona fide sale of property for a price at or near fair market value or any sale of property not done in an attempt to qualify for benefits. Likewise, the transfer of assets which would not otherwise affect eligibility is not affected by this provision. For example, transferring a family heirloom to a non-household member would not affect eligibility since that particular property is exempt as a personal effect. Also, a household gift of $500 to a relative would not be an improper transfer unless that $500 (or a portion thereof) would have affected the household's eligibility by reducing the household's assets to within the resource limit and the transfer was made with the intent of qualifying for program benefits. The Department also proposes that households be permitted to transfer assets to other members of the household, because such transfers would not affect eligibility.

The transfers to be considered are those which involve non-exempt resources, which affect eligibility and which are transferred for less than fair market value for the purpose of qualifying for food stamps.

The first issue to arise concerning asset transfers is the length of time which has expired between the time the asset was transferred and the time the household makes application for food stamps. Far ranging investigations of asset transfers are likely to greatly delay the certification process and unreasonably burden certification offices. For that reason and because of the difficulties in establishing intent, the Department proposes that the assets transferred in the three months prior to application or during the prior certification period be taken into consideration. At the time of application, initial applicants will be asked if they have transferred any assets in the past three month period. At recertification, households will be asked about transfers during the previous certification period. If a household reports that it has transferred assets which would have affected eligibility, the State agency must then explore the basis for the transfer to determine if it was knowingly made to qualify for program benefits.

The proposed regulations require State agencies to evaluate each transaction individually to determine whether or not the transfer affects eligibility, and the reason for the transfer. If it appears that the transaction was for fair market value, detailed verification should not be required for program eligibility.

If it is established that a household knowingly transferred non-exempt assets to qualify or attempt to qualify for program benefits, the law requires that the household be disqualified for a period of up to one year from the date of the discovery. The Department proposes that the period of the disqualification be directly related to the value of the asset transferred. A chart demonstrating the proposed periods of disqualification is printed in the proposed rules. The period of disqualification increases as the value of the resource transferred increases. The establishment of strictly defined periods of disqualification will eliminate the need to deliberate over a suitable period of disqualification and will ensure uniform national disqualification periods. The sliding scale establishes an appropriate relationship between the value of the transfer and the period of disqualification.

INCOME AND DEDUCTIONS

Income eligibility standards. The Act provides that the income standards of eligibility shall be the annual nonfarm income poverty guidelines prescribed by the Office of Management and Budget (OMB). To insure that these guidelines are current, the Act requires the Department to make an annual adjustment in the OMB poverty guidelines effective July 1, 1978. The adjustment is computed by multiplying the most recent income poverty guideline by the change between the average 1977 Consumer Price Index (CPI) and the CPI for March 1978 and rounding the result in accordance with procedures prescribed by OMB. The income poverty guidelines for future periods are to be similarly adjusted.

The adjustment is necessary to correct an inequity produced by the current method of establishing income poverty guidelines. The new poverty lines are announced each spring, based on the previous calendar year's average CPI. The poverty line announced in the spring of 1978 will reflect prices during the calendar year 1977. Since those poverty lines would be used in the Food Stamp Program from July 1978 through June 1979, they could be two years behind by the end of the time period. The adjustment lessens this problem by using the more recent data on changes in price.

Below are the income eligibility standards, prior to rounding, which would have existed on January 1, 1978, if the legislation had been implemented at that time. These standards were derived by taking the OMB nonfarm income poverty guidelines published in May 1977 and increasing them by the percent change between the average 1976 CPI and the CPI for March 1977.

	Monthly	Annual
1	$259	$3,104
2	342	4,107
3	426	5,111
4	510	6,114
5	593	7,118
6	677	8,121
7	760	9,124
8	844	10,128

Add $84 monthly or $1,003 annually for each additional household member.

The income eligibility standards which will be effective after July 1978 cannot be computed until the OMB poverty guidelines are published in May 1978, and then increased by the percent change between the average 1977 CPI and the CPI for March 1978. These income limits apply to household income *after* application of all income exclusions and deductions. Thus, households with gross income in excess of the guidelines would be eligible for program benefits.

For outlying areas. The Department proposes to use the same income eligibility standards in Puerto Rico, Guam, and the Virgin Islands as in the contiguous United States. This proposal is consistent with the practices of other federal programs that use eligibility standards based on the poverty line. If separate eligibility standards were calculated for these outlying areas employing the same methodology used to determine the poverty line for the contiguous United States, the standards for Puerto Rico, Guam, and the Virgin Islands would be higher because of the high cost of food in these areas. However, the Food Stamp Act requires that the income eligibility limit in Puerto Rico, Guam, and the Virgin Islands not exceed the OMB poverty guidelines for the 48 States. Therefore, a separate calculation for these areas would be pointless. The Department will monitor use of the established poverty guideline in the outlying areas and may propose changes in the future, if appropriate.

For Alaska and Hawaii, the regulations follow the statutory directive that the net income limits be based on the OMB poverty guidelines specifically issued for those States.

Definition of Income. The Act states that household income "• • • shall include all income from whatever source • • •," except for specified exclusions and deductions. The House Report notes that its "• • • broad-guaged definition of income [is] rational and equitable, since [the Committee] intends to measure income as broadly as possible to be fair to all recipients as well as the tax-paying public and not simply by reference to purchasing power available for food." The proposed regulatory definition of income follows the all encompassing language of the statute. Monies not specifically cited as includable will be considered as income, unless specifically excluded.

The regulations distinguish between earned and unearned income to allow application of the statutory deduction for 20 percent of earned income. The regulations continue to define training allowances as earned income. The House Report notes that "• • • the term 'earned income' • • • appl[ies] to any household member who is involved in any training program recognized by any Federal, State, or local government agency." To simplify program administration, the proposed regulations limit the definition of a training allowance to those payments received directly from a training program recognized by the Federal, State or local government, such as WIN. Allowances received by trainees from other sources will be treated as unearned income. The House Report emphasizes that the earned income deduction applies only to nonexcluded earnings. For example, any portion of the training allowance which is excluded as a reimbursement for work-related expenses shall be disregarded prior to computing the deduction.

The regulations also propose treating certain assistance payments as earned income. This policy applies to assistance payments which are provided in lieu of wages or salary, to individuals required to work as a condition of receiving the assistance. In some areas, persons seeking general assistance must take public service jobs, without compensation other than the assistance payment and, perhaps, an additional work allowance. In such cases, since the individual actually works for the assistance payments, the household will receive the deduction for work related expenses the same as any other employed household.

While the statutory definition of income is broad, the Department believes that there are two instances of "payments" which are not encompassed in the income definition and are, therefore, disregarded under the proposal. These payments are recoupments of prior overpayments and the surrender of child support payments to the Title IV-D agency (Child Support Enforcement Program). In the typical recoupment situation, a household may be overpaid cash benefits in another program for a period of time. The agency which issued that overpayment then lowers the amount of its current payment below the proper level to recoup the full amount of the overpayment over a period of time. Thus, an AFDC household entitled to $100 per month, which received $120 per month for five months, might then be issued only $80 per month for the next five months. Under the proposed regulations, the household should have the entire $120 considered income during those months that the household is receiving the excessive payment of $120 per month. When the household's payment is reduced to $80 per month, the Department proposes to count the household's income as $80 a month. Since the $20 recoupment had previously been counted in income, computing benefit levels based on $100 per month would result in double counting of the $20 per month. In certain situations, the prior overpayment might not have been actually used to calculate food stamp income because the household did not apply for food stamps until after the recoupments began. However, to simplify program administration and avoid certification delays, the Department proposes the general rule that recoupments not be considered as income.

Title IV-D of the Social Security Act involves the Federal and State governments in the enforcement of collection of child support payments. Under the terms of Title IV-D, a child support payment due to an AFDC household must go directly to the Title IV-D agency rather than to the family. The State agency then forwards the child support payment to the household by adjusting the household's AFDC payment to reflect the amount of child support received by the Title IV-D agency. For food stamp purposes, the AFDC payment to the household, but not the child support payment which went directly to the Title IV-D agency, is considered income to the household. However, there are limited situations in which the AFDC household receives the child support payment directly. The household must then turn the payment over to the Title IV-D agency to maintain their AFDC eligibility. The child support payment is then used by the State agency to adjust the AFDC payment in the same manner as if the Title IV-D agency had received the payment directly. To maintain equity between these households, the Department proposes not to count as income child support payments surrendered by households to the Title IV-D agency.

The definition of income specifies that the income of individuals disqualified from program participation,

V 4 3 | 8 5

less that member's prorated share, shall continue to be attributed to the household from which the member was disqualified. The regulations provide that the prorated share is computed by dividing the disqualified member's gross income, less exclusions, equally among all household members, including the individual being disqualified. The disqualified member's prorated share is then subtracted from the individual's gross income and the remaining amount is attributed to the household as available income. This procedure is explained more fully under the section of the preamble entitled "Certifying Households with Special Income Circumstances."

INCOME EXCLUSIONS

1. *Inkind benefits and vendor payments.* The Act provides for the exclusion of "• • • any gain or benefit which is not in the form of money payable directly to the household." As the House Report notes, this provision would exclude from income "• • • inkind benefits, such as meals, clothing, or shelter, [and] • • • money payments made on behalf of a household to another party by a third party • • •," commonly known as vendor payments. Neither the statute nor the legislative history makes any distinction between public and private vendor payments, nor do they limit the vendor payment exclusion by the type of expense being paid. Therefore, the proposed regulations exclude any payments made on the household's behalf by a third party from that party's funds. For example, rent subsidies from the Department of Housing and Urban Development (HUD), payments to service providers under Title XX of the Social Security Act, and mortgage payments by a nonhousehold member, such as an absent spouse, are all excludable vendor payments.

The House Report makes it clear that "• • • any money *payable* to a household, but diverted from it to a third party, either of the household's own free will (e.g., an arrangement with an employer to deduct the rent and mail it to the landlord) or involuntarily (e.g., a court-ordered garnishment of wages) would be counted as income. • • •" Even though the household does not directly receive these monies, the entire wage is considered income and no exclusion is allowed as a vendor payment. Otherwise, households could intentionally alter their financial arrangements so as to increase food stamp benefits.

Similarly, money deducted or otherwise diverted from the household's public assistance grant for purposes of managing the household's expenses shall be treated as income and not excluded as a vendor payment. These situations (sometimes termed protective payments) typically arise where the household has demonstrated inability to properly budget the grant. As with garnishments, this policy prevents households from increasing food stamp benefits by altering their financial arrangements. This policy does not apply to payments over and above the AFDC grant which are paid directly to service providers by the State agency, such as payments under Title XX.

Except for these diverted payments the regulations will exclude payments which go directly to a third party, but will not exclude monies actually received by the household, even though earmarked or legally obligated for a particular expense. An exception is proposed for certain experimental HUD programs in which a rent subsidy is paid to the household. In order to maintain a consistent policy on treatment of HUD housing subsidies, and to avoid interfering with the results of these existing experimental projects, the regulations propose to exclude as vendor payments both the HUD housing subsidies which go directly to the landlord and the payments, in those few experimental projects, which go through the household to the landlord.

2. *Irregular income.* The Act excludes "• • • any income in the certification period which is received too infrequently or irregularly to be reasonably anticipated, but not in excess of $30 in a quarter." As the House Report notes, this "• • • exclusion is reasonable because counting and documenting such income • • • would present administrative difficulties and because the amounts of money involved are too small to justify [the needed administrative time]." The proposed regulatory provision follows the language of the Act.

3. *Tuition and mandatory fees.* The legislation continues to count scholarships, deferred education loans, fellowships, veteran's educational benefits, and the like as income. Instead of the current education deduction, the Act substitutes an income exclusion to the extent that the above benefits are used for "tuition and mandatory school fees at an institution of higher education or school for the handicapped." The House Report points out that the "• • • idea is to count as income that portion of a scholarship that goes for living expenses, but not to count the portion that is clearly unavailable because it is used for tuition and fees." The Senate and House Reports, read together, indicate that the statutory phrase "institution of higher education" would include vocational, correspondence or technical schools. The Department proposes adopting this broad definition so as to treat students receiving the above educational benefits in a similar fashion.

Additionally, the House Report provides that the statutory phrase mandatory fees "• • • would encompass an *expense required* by a school in order to attend or enroll in a particular course. • • •" [Emphasis added.] The House Report recognizes that lab fees and expenses for equipment (e.g., a microscope) which are required for *all* students taking a particular course would be an excludable mandatory fee. However, expenses for books, transportation and personal "maintenance" are listed by the House Report as examples of nonmandatory expenses. Normally, uniform expenses for these items would not be required by institutions. For example, books that are required reading for courses may be borrowed or purchased used.

While this regulatory provision may seem unfair to some students, on balance, the requirement that the expense, itself, be uniformly required by the school should reduce program abuse and avoid the administrative inconvenience and the delay of determining and verifying disparate individual costs to each student for numerous items. However, reimbursements for certain educational expenses which are not mandatory fees are excludable under § 273.9(c)(5) of the proposed regulations.

4. *Loans.* The legislation continues the current income exclusion for "all loans other than educational loans on which repayment is deferred." The exclusion for loans covers monies obtained from both private and commercial sources. The purpose for which the money is borrowed will not affect the exempt status of the money. In accord with the House Report, the proposed regulations mandate that, when verification of a loan from private sources is needed, a signed statement by both parties attesting to the loan is sufficient. No formal payment schedule is necessary.

5. *Reimbursements.* The Act excludes reimbursements "• • • which do not exceed expenses actually incurred and which do not represent a gain or benefit to the household." The legislation extends the current exclusion for volunteer reimbursements to others, such as employees and trainees who receive work or training related reimbursements.

The House Report makes clear that flat allowances received in advance of an expected expense should be treated as a reimbursement, as well as monies paid after the expense has been incurred. It is equitable that the timing of compensation for expenses borne by the participant not determine whether or not the compensation should be excluded. Monthly travel allowances provided to students or trainees are, therefore, excludable as reimbursements.

The House Report does place two clear limitations on what monies can

be excluded as a reimbursement. The first limitation is that the reimbursement not exceed the actual expense. However, to avoid verification complications, the House Report suggests that reimbursements not be considered excessive unless the household or the provider of the reimbursement indicates the amount may be in excess of actual costs. Since most reimbursements are for small amounts, the State agency is not obligated to check with providers about the level of reimbursements or the amount of actual expenses, but should do so in cases where the claimed reimbursement is inconsistent with other known information. Serious delays could result if the State agency had to verify numerous individual expenses covered by reimbursements. In those cases of excessive reimbursement, however, the amount up to the actual expense is excludable; the amount in excess of actual costs is income.

The second statutory limitation is that the reimbursement not be a gain or benefit to the household. The phrase "gain or benefit" raised issues unresolved by the legislative history. How should "indirect" or "intangible" benefits (education, travel, or practical experience) be treated? If the person retains a tangible item (book, uniform or tool), is there a gain and what is the amount of the gain? Is there always a "benefit" if the reimbursement covers an expense that particular household would normally have borne on its own? If a uniform can be worn off the job, is there a gain and what is the amount of the gain?

The Department believes that payments received for normal living expenses of the household, such as rent, mortgage, personal clothing, or food eaten at home, will always represent a direct benefit to the household and therefore, should not be excluded. Most of these households would save money which would have otherwise been spent to cover these typical household costs.

However, to simplify program administration, reimbursements for intangible benefits other than normal living expenses and even reimbursements where the person retains a tangible item, such as a book, will not be considered a gain to the household. To involve the State agency in the complex problems of valuing indirect benefits or tangible goods would not be cost effective considering the small value usually associated with reimbursements. The regulations cite common examples of excludable reimbursements or allowances, such as the out-of-pocket expenses of volunteers, or job and training expenses for travel, per diem, or uniforms.

6. *Third-party funds.* The Act exempts ". . . money received and used for the care and maintenance of a third-party beneficiary who is not a household member." Such money flows through the household to the nonhousehold member and is spent for the nonhousehold member's maintenance. To the extent that the money is not used for the nonhousehold member's benefit, it must be included in household income.

This provision of the legislation does not exclude all monies paid to a third party, such as support or alimony payments. The legislation clearly provides an exclusion only for money which is received by the household on behalf of a nonhousehold member and is then used for the care and maintenance of that nonhousehold member. The provision excludes, for example, social security, public assistance or other payments received by the household for the care and maintenance of a nonhousehold member, e.g., a person receiving institutionalized care. In the event the State agency is unable to determine the amount of the payment that has been allotted for the nonhousehold member, the exclusion will apply on a prorated basis to payments received jointly where the nonhousehold member was intended as a beneficiary of the payment.

7. *Earnings of children.* The legislation continues the exclusion for monies received by a child under 18 who is at least a half-time student. As the House Report notes ". . . any attempt to include child earnings would create administrative complexity and result in the counting of small and difficult to document sums of money." The regulations, in conformance with the House Report, provide that the exclusion continues during school breaks, if the student intends to resume schooling at least half-time after the break. However, emancipated minors or students living alone are not allowed the exclusion as they do not qualify as children living with the household.

The Department recognizes that migrant families containing students may present an unusual problem. In some cases, the entire family may be paid for labor without differentiating which member earned what amount. Therefore, the student's earnings could not be identified and excluded. To simplify this problem, the regulations require that if the earnings of or amount of work performed by the student cannot be separated from that of other household members, the total earnings shall be prorated evenly among the working members and the student's prorated share will be excluded.

8. *Lump-sum payments.* The Act provides an exclusion ". . . for monies received . . . as nonrecurring lump sum payments." The House Report notes that the ". . . list of . . . nonrecurring lump sum payments is intended to be openended." Lump-sum payments made from other programs, such as AFDC, are excluded under this provision. While excluded as income, the Act requires that lumpsum payments be counted as a resource when received, unless they are otherwise excluded.

9. *Cost of self-employment.* The legislation continues the current regulatory exclusion for the costs of producing self-employment income. These exclusions are discussed in section 273.11, "Certifying Households With Special Income Circumstances."

10. *Income excluded by other laws.* The legislation recorgnizes an exclusion for "• • • any income that any other law specifically excludes from consideration as income for the purpose of determining eligibility for the food stamp program." The other Federal statutory exclusions need not mention the Food Stamp Program by name so long as it is clear that the exclusion applies to the Program. For example, section 356 of the Youth Employment and Demonstration Projects Act of 1977 provides: "Earnings received by any youth under this part [Youth Employment Demonstration Programs] shall be disregarded in determining the eligibility of the youth's family for, and the amount of, any benefits based on need under any Federal or federally assisted programs." Since that language excludes earnings from being considered for all Federal eligibility or benefit level computation purposes, the Department believes that it must be excluded for Food Stamp Program purposes.[24]

As new legislation is enacted it will be reviewed in light of its specific terms and the associated intent of Congress to determine if exclusion from food stamp income is appropriate. The list of legislative income exclusions found in the regulations will then be revised as required. State agencies will be immediately notified of any statutory changes which affect food stamp benefit computations. To insure uniform standards, State agencies are required to abide by the Department's interpretation of Federal law.

The list of legislative exclusions contained in the regulations does not include benefits excluded under the provisions of their own legislation if they are also excluded under other income

[24] An examination of the legislative history of the Youth Employment and Demonstration Projects Act of 1977 confirms the Departmental analysis that the all exclusive statutory language would apply to food stamp benefits. House Report 95-314 (May 13, 1977) notes that "[w]ithout such a provision, youth might be deterred from entering these programs by the prospect that their families' welfare or food stamp benefits would be reduced because of their participation."

M Y 2 7 8 UMI

V 43 | 85

exclusions of the Food Stamp Act of 1977. For example, the value of supplemental food assistance provided under the Child Nutrition Act of 1966 (42 U.S.C. 1780(b)), the National School Lunch Act (42 U.S.C. 1960(e)), and the Nutrition Program for the Elderly (Title VII, Older Americans Act of 1965), is excluded under the Food Stamp Act as an in-kind benefit, although those three laws also exclude their benefits from treatment as income by the Food Stamp Program. Similarly, refunds of Federal income taxes, including earned income tax credits, are excluded as nonrecurring lump sum payments.

Income deduction. The Act specifies deductions which will be allowed in computing a household's net income for determining eligibility and the level of benefits. The statutory deductions eliminate current itemized deductions for medical expenses in excess of $10 a month; ten percent of earned income, up to $30 a month; court-ordered support and alimony payments; mandatory payroll deductions; employment related child care payments; disaster or casualty losses; shelter costs in excess of 30 percent of income; and tuition and mandatory school fees.

Instead of these itemized deductions, the Act provides a monthly standard deduction for all households, a deduction of 20 percent of earned income, and a limited dependent care deduction for working households, and a limited shelter deduction for costs in excess of 50 percent of income after all other deductions. In the 48 States and the District of Columbia, the standard deduction will be $60 and the dependent care and shelter deductions will be limited to $75 a month. The $75 maximum will apply singly to either the dependent care or shelter deduction, or, if the same household is claiming both expenses, the combined deductions cannot exceed $75. In Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands, the amount of the standard deduction will be adjusted by a ratio of current average itemized deductions for each of those areas to the average itemized deductions in the 48 States and the District of Columbia. Similarly, the limit on the shelter/dependent care deduction will be adjusted for each of these areas based on a similar comparison of shelter costs.

20 percent of earned income. Households with earned income recieve a deduction of 20 percent of gross earnings. This standardized deduction replaces itemized deductions for taxes and other mandatory withholdings, as well as the former deduction of 10 percent of earnings, up to the maximum of $30 per household per month. As noted earlier, the regulations specify that the 20 percent earned income deduction applies not only to wages and salaries, but also to certain training allowances, self-employment income, and certain general assistance payments.

Dependent care deduction. The Act allows a deduction for the actual costs of dependent care "* * * when such care enables a household member to accept or continue employment, or training or education which is preparatory for employment," subject to a $75 maximum.

As the House Report makes clear, this statutory dependent care deduction applies only to direct compensation to the care provider. If a live-in attendant provides these services, only direct payments to the attendant will be permitted, not the cost of in-kind benefits, such as meals and lodging.

The report explains that this deduction also covers dependent care expenses which allow "job search" activities. To ensure uniform application of this rule and to reduce possible abuse, the Department proposes that a dependent care deduction for job seekers only be allowed if the effort meets the job search requirements, regardless of whether the job seeker is required to comply with job search requirements as a condition of eligibility or is doing so voluntarily.

Shelter deduction. The Act provides a deduction for shelter expenses to the extent that the allowable shelter costs exceed 50 percent of household income after all other income exclusions and deductions are allowed. The maximum excess shelter cost deduction is $75. However, if the household also claims dependent care expenses, the statute provides that the combined dependent care and shelter cost deductions for any household cannot exceed $75 in any given month. The proposal encompasses all the current allowable shelter costs such as rent, mortgage, insurance, taxes, and utilities such as, electricity, heating, cooling, and water costs. In addition, it has been broadened to include initial installation fees for utilities.

The proposed regulations also continue the use of standard utility allowances in lieu of actual utility expenses in computing the shelter deduction. Although the House Report would appear to prohibit utility standars, the House bill was amended in conference and the Act, as passed, allows the Department the flexibility of continuing the current standard utility allowance.

Congressman Foley noted in the *Congressional Record* (H. 9534; September 16, 1977) that the "* * * shelter deduction does not have to reflect as it did in the House version of the bill actual expenses paid * * * standard utility allowances could ease the paperwork burden on both recipient and administrator. * * *"

This standardization can also expedite the certification process and reduce errors and administrative costs. The Department proposes to mandate that all States establish a utility standard under guidelines provided by the Department. The regulations continue the present practice of allowing participants the option of choosing the standard utility allowance or providing verification of actual costs. The regulations propose that households be allowed to switch between actual utility costs and the utility standard at any time.

The regulations also propose two situations in which shelter costs would be allowed on a home not currently occupied by the household. If the home is temporarily not being used as a residence because of employment away from home, such as households involved in migrant labor, or abandonment of the home caused by a natural disaster or casualty loss, the household may claim both the costs of its actual residence and the costs of the unoccupied home for purposes of computing the shelter deduction. The household is still subject to the maximum $75 ceiling on total excess shelter/dependent care costs.

To claim these shelter costs the household must intend to return to the home and must demonstrate that the current occupants of the home, if any, are not claiming the same shelter costs for food stamp purposes. Additionally, the household is not entitled to an excess shelter cost deduction for homes which are rented. Leased homes are treated as self-employment property and, therefore, certain expenses of the home (but not payments on the principal) would be excluded as a cost of doing business rather than as part of the household's current shelter costs. (See the section of the preamble on self-employment income for a detailed treatment of this issue.)

Adjustment of deductions. In order to keep allowable deductions as up-to-date as possible, the legislation provides for cost of living adjustments. Starting July 1, 1978, standard deductions shall be adjusted semiannually every July 1 and January 1 to the nearest $5. The adjustments are to reflect changes in the Consumer Price Index for items other than food for the six months ending the preceding March 31 and September 30, respectively. The House Report specifies that amounts below $2.50 should be rounded down to the nearest $5 and amounts of $2.50 and above should be rounded upward.

The legislation provides that the combined shelter/dependent care deductions shall be adjusted only annually, beginning on July 1, 1978. The adjustments shall be to the nearest $5 increment to reflect changes in the shelter, fuel, and utilities components of housing costs in the Consumer Price Index for the twelve-month period ending the preceding March 31.

DETERMINING HOUSEHOLD ELIGIBILITY AND BENEFIT LEVELS

Period of application. The Act requires that a household's initial benefits be issued within 30 days of the filing of an application and be retroactive to the period of application. The Act itself does not define the period of application. However, the House Report implies that the Department should review various accounting periods for eligibility determinations including consideration of periods of time of less than a month.

The proposed regulations define the period of application as the calendar month in which the household applies. The household's initial eligibility will be determined based on income received, expenses billed, and other relevant circumstances during the month of application. The calendar month is a convenient, easily understood and explained, measure of time. Households customarily incur, budget and pay expenses on a monthly basis. The month of application provides a workable time frame within which to determine household income and expenses. However, use of the month of application can adversely affect certain households which have no income at the time of application, but are anticipating income later in the month. Rather than alter the period of application for these households, to concentrate benefits only in the that portion of month when they are without income, the Department proposes special income handling rules to cover those situations. These rules are described in the preamble under the section entitled "Destitute households anticipating income."

The period of application is, in most circumstances, also the first month of the household's certification period. In rare instances, the household may be ineligible for the period of application, but anticipate, at time of application, changes which will result in eligibility for subsequent months, such as an anticipated loss of income. In those instances, the household will not be required to return in the subsequent month to file a new application, but may be both denied for the period of application and certified for a subsequent certification period based on a single application. In this way, households do not have to file an additional application and the State agency can save administrative time and cost. Additionally, if income is expected to change from one month to another during the certification period, the State agency may vary the household's benefit level from month to month within that certification period rather than assigning a shorter certification period.

Determining income. The Act requires the State agencies to consider both the income received in the 30 days prior to application as well as the income anticipated for the remainder of the certification period to determine the income to be used in determining eligibility and the level of benefits. According to the House Report, the income from the last 30 days is used "* * * solely to find out whether the income actually received in those 30 days offers a sufficiently strong basis to predict precisely what income would be actually available in the upcoming certification period. * * * The past is thus not totally excluded from the purview of the certifier, but it is subordinate to the central task of reasonably predicting the future availability of funds."

The regulations continue the current policy of basing eligibility and benefits on anticipated income. However, the regulations make clear that if the amount or date of receipt of income is uncertain, the income should not be counted. Income will be counted only in the month in which it is received. Averaging of income over the certification period is permitted at the household's option, provided the difference between the highest and lowest total monthly income received during the certification period does not exceed $50. The greater the difference in monthly income, the greater the likelihood that benefit levels based on average monthly income would not be representative of the household's food needs in any given month. While the Department proposes that $50 be used to determine when averaging may be used, it will monitor the effectiveness of that choice in balancing household and administrative convenience against the importance of focusing on exact monthly income.

The Act provides different requirements for determining the income of students and those households which derive annual income in periods of time shorter than one year, such as certain self-employed persons and teachers. Students receiving deferred education loans, scholarships, or other such lump-sum education payments shall have that income averaged over the period it is intended to cover.

For the self-employed and those under contract which derive annual incomes in periods less than a year, the Act requires that income be averaged over twelve months. To attribute the annual income of these households only in the months received would result in overstating their financial circumstances when the income is received, since it must be used not only for expenses that month but also for expenses in future non-income months. Similarly, it would understate their financial circumstances in the non-income months. A farmer who sells one crop each year does not spend the income from that crop only in the month received. Therefore, the regulations propose that the gross income from the sale of the crop, minus the cost of producing that crop, be averaged over the next twelve months. The regulations propose the use of past income and costs for these households as it is the net income from the sale of the most recent crop which the household actually has available to defray current expenses, not the anticipated profit from the sale of a future crop.

Determining deductions. On November 30, 1977, the Department published final rules (42 FR 60916) which changed FNS provisions for determining allowable deductions as far as utility and heating costs are concerned. Those regulations allowed the costs of utilities on an "as billed" basis (rather than the previous "as paid" method) in calculating excess shelter costs. For the kinds of expenses that are allowed as deductions under the new Act, "paying" and "billing" are virtually synonymous. Additionally, it is easier to verify a bill as opposed to verifying when the bill was in fact paid. The "as billed" approach is more convenient for program participants and administers alike. Expenses billed on other than a monthly basis shall be averaged forward over the period the billing is intended to cover or deducted at the household's option in the month billed. The household cannot claim an expense more than once, even if billed more than once. The regulation also proposes that households may elect to have expenses averaged over the certification period if the anticipated difference between the highest and lowest amounts if $25 or less. This household option should simplify the certification process. To ensure more equitable treatment among households with similar financial circumstances an expense will not be deductible if covered by vendor payments or reimbursements. If otherwise deductible expenses were allowed to households meeting these expenses through a vendor payment or reimbursement, these households would, in effect, receive a double benefit.

Determining eligibility and benefits. The proposed regulations provide certain criteria for rounding computations in eligibility calculations. All cents shall be dropped at various stages in the computation, with the exception of shelter expenses. Exact shelter costs will be computed and any cents in the total figure will then be dropped prior to subtracting from 50 percent of income. It was determined that use of whole dollars except in shelter computations would facilitate the income calculation process without significantly affecting households. However, because of the number of

MY 2 7 8 UMI

V 43 | 85 MY 2 78 UMI

components included in shelter computations, rounding each shelter expense down, and then summing them, could reduce the total figure by several dollars.

Destitute households anticipating income. The proposed regulations provide for special eligibility and benefit calculation procedures for households which have no current income, but which anticipate income from a new source during the month. Without these procedures temporarily destitute households could be without income and coupons for that portion of the month when the need for food assistance is the greatest. For example, a household may anticipate income from a new job late in a month, but have no income at the time of application. Basing eligibility and benefits on total anticipated monthly income could result in the household being ineligible for the month or in providing too few coupons to meet food needs until the income from the new job is received.

The House Report indicates that one method of meeting the needs of destitute households which anticipate income later in the month would be to expand the rules currently applicable to destitute migrants under the *Gutierrez* v. *Butz*, 415 F. Supp 827 (D.C. 1976) court order. The *Gutierrez* procedures require a half-month certification for newly arrived destitute migrants anticipating income prior to the 15th of the month, and the disregard of that initial payment for the first period of eligibility. Destitute migrants, under that order, receive a half or full month allotment at no cost, depending on how late in the month they anticipate income from a new source.

The Department has determined that the continuation of these procedures is inappropriate under the new Act. The *Gutierrez* court was concerned with situations in which the anticipation of income resulted in coupon purchase requirements which destitute migrants could not pay since the income was not currently available. The purchase-requirement, however, will be eliminated under the 1977 Act and proposed regulations. Moreover, these proposed regulations specify that only reasonably anticipated income may be counted in determining eligibility.

The total disregard of income from a new source, particularly if the household anticipates receipt within a few days, would significantly understate the household's financial circumstances for the month compared to another household anticipating the same amount of income, but from a recurring source. In addition, continuation of the *Gutierrez* half-month certification periods is complicated because the standard deduction and shelter and dependent care limits are, by law, monthly amounts. It is unclear if these amounts would be divided between the two half-month periods or applied only in the period in which income is received. Eligibility limits and processing standards make half-month certifications a further administrative problem. While some households would benefit, others, such as those households applying only in the second half of the month, would lose benefits under half-month certification. Finally, even with half-month certification periods, the household anticipating significant income toward the very end of the certification period could be determined ineligible or be eligible for only a minimal amount of benefits.

In light of all these factors, the Department proposes a special eligibility and benefit calculation which provides destitute households with coupons for periods of the month when they are without income. The proposed procedures preserve the responsiveness of the program to households in special need while also applying these procedures to nonmigrant households.

Under the special income calculation procedure, the food stamp adjusted net income is calculated using monthly income and expense figures. However, the amount of the food stamp benefit level received by the household is dependent on the household's adjusted net income and on the day in the month income from a new source is anticipated to be received.

For purposes of the special income procedure, the month is divided into two distinct periods. The first period encompasses the time in which the household is without the new income (the pre-income period); the second (the post-income period) includes that portion of the month in which the new income is anticipated to be received. For administrative convenience in determining how much of the month will fall into the pre-income and post-income periods, the month is divided into four quarters (1st-7th, 8th-15th, 16th-22nd, 23rd-the end of the month). The pre-income period will take into account those quarter(s) prior to anticipated receipt of income. The post-income period will encompass the quarter in which the new income is received and all subsequent quarters remaining in the month. For example, if income from the new source is anticipated on the 10th of the month, the pre-income period would consist of one quarter (1-7) and the post-income period would include three quarters (8-15, 16-22, 23-end of the month). The allotment levels are then distributed evenly over these quarters, i.e., one quarter corresponds to ¼ an allotment, two quarters compares with ½, three quarters corresponds with ¾ and four quarters equals a fully Thrifty Food Plan allotment.

In determining the household's entitlement to benefits, the State agency would first compute the adjusted net income in the normal fashion (gross monthly income minus allowable exclusions and deductions equals the food stamp adjusted net income). The adjusted net income will then be multiplied by 30 percent, as is also normally the case in figuring food stamp benefits levels.

In a normal income computation the resulting amount is then subtracted from the monthly cost of the Thrifty Food Plan to determine the household's benefit level. It is here, however, that a somewhat different procedure is followed for the special households. The amount equal to 30 percent of the household's net income is compared to that portion of the Thrifty Food Plan (¼, ½, or ¾) that corresponds to the number of quarters in the household's post-income period. If the amount equal to 30 percent of net income *exceeds* the portion of the Thrifty Food Plan corresponding to the number of quarters in the post-income period, then the household receives no benefits for the post-income period, but receives full benefits for the pre-income period. This is accomplished simply by providing the household with an allotment equal to the portion of the Thrifty Food Plan that corresponds to the number of quarters in the pre-income period.

For example, assume a one-person household expects to receive income from a new source in the fourth quarter of the month, and has no other income for the month. The household thus has a pre-income period of three quarters and a post-income period of one quarter. Also assume that the amount of income expected from the new source, after exclusions and deductions, is $140. The $140 is multiplied by 30 percent to yield an amount of $42. This amount of $42 is compared to one quarter of the Thrifty Food Plan for a one-person household, or $13. Since the $42 exceeds $13, the household is not entitled to benefits for the final quarter of the month (the post-income period), but it is entitled to full benefits for the other three quarters (the pre-income period). The household receives, for these other three quarters, ¾ or the Thrifty Food Plan for a one-person household, or $39. This will provide the household with food until the new income is actually available.

Had benefits for this same household been calculated in the normal fashion, the household would have received only $10 in benefits. This special income calculation procedure thus is responsive to the needs of households that otherwise might have received few if any food stamps during a

period when they actually had no income with which to buy food.

It should be noted that if the State agency finds that 30 percent of the household's net income for the month *is equal to or less than* the portion of the Thrifty Food Plan corresponding to the number of quarters in the post-income period, then no special calculation is needed. In such instances, the household's benefits can be figured in the normal fashion. For example, assume that a one-person household is expecting net income of $30 from a new source in the fourth quarter. The houshold has a pre-income period of three quarters and a post-income period of one quarter. The $30 of net income is multiplied by 30 percent to yield an amount of $9. This amount is compared to one-quarter of the Thrifty Food Plan for a one-person household, or $13. Since $9 is less than $13, no special income calculation is necessary. The $9 is simply substracted in the normal fashion from the full Thrifty Food Plan level of $52, and the household's benefits are $43. No special calculation is used in this situation because it would not make any difference. If the household had received the difference between $13 (one quarter of the Thrifty Food Plan) and $9 for the post-income period, and also received three-quarters of the Thrifty Food Plan ($39) for the pre-income period, it would end up with exactly the same benefit level of $43.

Households that have no income at the time of application for food stamps because they have recently lost their sole source of income, but that did receive final income from this source earlier in the month, are eligible for expedited service but are not eligible for the special income calculation. The Department has chosen not to provide these households with a special calculation of their income, since income received early in the month is as available for the remainder of the month for these households as for households receiving like amount from sources which have not been terminated.

Thrifty Food Plan. The Act bases benefits on the value of the Thrifty Food Plan reduced by 30 percent of household income. The value of this plan, as the Act specifies, is the cost of the "• • • diet required to feed a family of four persons," taking into account adjustments for different size families. The Act requires that the Secretary make cost adjustments for Alaska and Hawaii to reflect the cost of food in those States. The Act provides that a Thrifty Food Plan for Alaska and Hawaii may be higher than the amount in the other 48 States. The Thrifty Food Plan for Guam, Puerto Rico, and the Virgin Islands will also be adjusted to reflect the cost of food in those areas, provided that their Thrifty Food Plans not exceed the cost of food for the 50 States. The Thrifty Food Plan, by law, shall be adjusted semiannually to reflect increases in the price of food. The semiannual adjustments shall be rounded to the nearest whole dollar.

Certification periods. For the most part, the Act places into law current policy regarding the length of certification periods. This current policy places emphasis on the probability of changes in household circumstances. Under the proposed regulations, the minimum certification period will be one month and the maximum will remain one year.[25]

In accord with the intent expressed in the House Report, it is proposed that all households be assigned the longest certification period possible in light of household circumstances. As a general rule, short certification periods create an administrative burden upon State agency staff and result in unnecessary inconvenience to participating households. Given the inconvenience to households, especially in rural areas where distance and transportation problems create additional hardships, the Department believes that households should not be scheduled for recertification any more often than is absolutely necessary, as determined by individual circumstances. Consequently, these regulations propose that, at the time of certification, the State agency may increase certification periods of three months or less by one month, if the certification process is completed after the 15th day of the month of application. For example, if a household makes application in January and a determination of eligibility is not completed until the end of that month or early February, the certification period should include both January and February, if it appears the household is also eligible for February benefits. This one month increase will postpone the household's return to the certification office and will lessen the State agency's administrative burden.

The Act provides that certification periods shall not be less than three months except for households where there is a "• • • substantial likelihood of frequent and significant changes in income or household status • • •" The Department believes that the assignment of certification periods of less than three months may be appropriate for the following types of households: Migrant farm workers, especially when they initially arrive at a worksite or when employment opportunities are uncertain; strikers; initial applicants whose circumstances are subject to change; and any other household with extremely uncertain circumstances. Those procedures are described in § 273.10(f)(3).

Additionally, State agencies have, in the past, encountered many difficulties coordinating the reviews of public assistance (PA) and general assistance (GA) households with recertification interviews for food stamps.

Those State agencies which review the PA/GA caseload on a timely basis may assign definite certification periods which expire the month after the PA/GA review. Most AFDC households will therefore, receive a 7-month certification period.

However, for those State agencies which, due to staffing problems or other difficulties, are unable to accurately predict the month in which each PA/GA review will be conducted, the Department proposes the following method of assigning certification periods. Upon approval for PA/GA and food stamps, the household will be notified that its certification period will expire the month after the next PA/GA review, or in one year, whichever comes first. Since a definite expiration date is not assigned, the food stamp certification period will not expire in advance of the PA/GA review date, unless that review is not done within a year. In that event, recertification of food stamps must be accomplished prior to the continuation of food stamp benefits. However, under usual circumstances, the PA/GA review will be accomplished within a year and the household will complete a joint interview for the PA/GA review and the food stamp recertification.

To comply with the requirement for notices of expiration for PA/GA households, as explained in section 273.14(b), it is essential that State agencies develop a system for determining, in advance, when a certification period will end. State agencies must also develop a system for completing the recertification in time to prevent an interruption in food stamp benefits. The assignment of certification periods that expire the month after the month of the PA/GA review should enable State agencies to accomplish timely recertifications. In addition, State agencies should use safeguards to ensure that food stamp eligibility and basis of issuance are examined each time a PA/GA grant is changed or terminated.

The Department proposes retaining the maximum one year certification period for all households consisting entirely of elderly or disabled members whose income and other circumstances are not likely to change.

Certification notices to households. The proposed regulations make specific references to notices which must be sent to applicants and participants.

[25] The House Report indicated that even for public or general assistance households the maximum certification period should be one year.

V 4 3 — 8 5

The proposed regulations specify the information which must be included on such notices and when they must be sent. In addition, the Department is currently working with a private contractor to develop model notices for use by State agencies. Deviations from use of the model forms will be granted only under the same conditions as would permit a deviation on the application form. (See "Application processing" in this preamble.)

Identification cards. In response to concerns about the lack of security over the identification (ID) cards, the proposed regulations would require that ID cards be serialized and handled by the State agency as accountable documents. The ID cards should contain the names of persons most likely to use the card to obtain food coupons.

The proposed regulations allow State agencies to use photo ID cards, if the household consents. The unwillingness or inability to be photographed will not affect eligibility or benefit levels.

CERTIFYING HOUSEHOLDS WITH SPECIAL INCOME CIRCUMSTANCES

Self-employed households. The new Act continues the current regulatory provision of excluding the costs of producing self-employment income. The kinds of expenses that are currently allowable as a cost of producing self-employment income have remained basically the same under the proposed regulations, with two exceptions.

The Department proposes to count depreciation as an allowable cost of producing self-employment income.[36] The House Reports suggests that simplified schedules of depreciation "covering entire categories of equipment," be provided for administrative ease. The Department proposes to base depreciation on the household's federal tax form, regardless of whether the household claimed a straight-line or accelerated form of depreciation. After reviewing IRS rules on depreciation, the Department decided, for administrative ease and the convenience of applicants, to rely strictly on amounts claimed for federal income tax purposes. In cases where the federal tax form is not available, the proposed regulations provide a calculation methodology for depreciation using IRS guidelines (the Asset Depreciation Range tables) for assigning the useful life of the asset. The Department will supply State agencies with appropriate depreciation tables. The second change from the current rules is the proposal to compensate self-employed households for taxes, retirement costs, and other work-related personal expenses (such as transportation to and from work) through the 20 percent earned income deduction rather than allowing itemized exclusions as a cost of producing self-employment income. This approach is endorsed by the House Report and simplifies and expedites the calculation of these costs.

Households with boarders. The House Report states that since "• • • the income received from a boarder for meals or meals and lodging would be self-employment income • • •" there would be an income exclusion for the expenses incurred in producing that income • • •." For households that own and operate a commercial boarding house, the Department proposes that the cost of producing income be calculated in the same manner as any other self-employed household. However, since many households with boarders may not keep itemized records of the cost of providing meals, the Department proposes that the value of the Thrifty Food Plan for a household size that is equal to the number of boarders be used as the cost of producing the income, unless the household can demonstrate higher actual costs. This approach is endorsed by the House Report and will expedite the certification process.

Boarders as households. The Act specifies that a boarder may be eligible as a food stamp household as long as the boarder is not a resident of a boardinghouse. The Department proposes that the boarder household receive a deduction for identifiable shelter costs or, if it makes a single payment for both room and board, for the amount of the boarder payment which exceeds a reasonable payment for board, as defined in § 273.1(b)(ii).

Treatment of income and resources of a disqualified member. Under the new Act, individuals can be disqualified for fraud or for failure to comply with the student work registration requirement during the school year. Although the House Report states that the income and resources of disqualified members are to be excluded, Senator Dole subsequently pointed out (*Congressional Record*, September 9, 1977; S. 14578) that it was not intended that a household benefit if one or more of its member was disqualified for fraud. Disallowing the income and resources of disqualified persons would significantly hinder the Department's ability to deter fraud or noncompliance with the student work registration requirements. Since the head of the household and primary wage earner will, in most cases, be the individual disqualified, excluding that income would leave the remaining household members with increased benefits. As a result, the household and the disqualified individual could benefit by intentionally defrauding the program or intentionally failing to comply with the student work registration requirements. The Department believes that adoption of such a policy could serve to encourage fraud and noncompliance with the student work registration requirements and would thus contravene the intent of the Act. The Department is, therefore, proposing that a pro rata share of the income of the disqualified member be counted when determining the eligibility of the remaining members.

This pro rata share is calculated by subtracting allowable exclusions from the disqualified member's income and dividing this amount evenly among the household members, including the disqualified member. All but the disqualified member's share is counted as income to the remaining members. In addition, the Department proposes that any allowable shelter or dependent care expenses paid by or billed to the disqualified member be prorated in the same way that the income is prorated. If the prorated income was earned by the disqualified member, the household would also receive the 20 percent earned income deduction.

Under the proposal, the remaining members would not be provided a notice of adverse action, if the benefits are reduced or terminated within the certification period because one of the households members has been disqualified for fraud. The rationale for not providing a notice of adverse action in these cases is discussed in "Notice of Adverse Action."

Treatment of income and resources of other nonhousehold members. The Department proposes that the income and resources of all nonhousehold members, except disqualified members, be entirely disregarded. Since the ineligibility of certain aliens, tax dependents, and SSI recipients in cash-out States is predetermined by the Act and is not intended to be a penalty, the Department believes no penalty should be suffered by the remaining eligible household members by having a pro rata share of the ineligible member's income counted.

Addicts and alcoholics. The proposed regulations permit participation by narcotics addicts or alcoholics who reside in a treatment and rehabilitation center, in accordance with provisions of the Act. As recommended by the House Report, the proposed regulations continue the current provision that requires the center to designate an authorized representative to apply on behalf of the addict or alcoholic and to spend the coupon allotment for the meals of such addict or alcoholic.

[36]The House Report indicates that the Department should allow depreciation since "• • • some factor for wear and tear of machinery and buildings, obsolescence and accrued replacement costs should be inherent in doing business, • • • (although) the accelerated forms of depreciation afforded under the Internal Revenue Code as a matter of legislative grace would not necessarily constitute costs of doing business • • •".

M Y 2 — 7 8 UMI

The proposed regulations place responsibility upon the institution for providing the appropriate information at certification and for the accurate and prompt reporting of changes in household circumstances. The regulations hold the institution liable for food coupons held on behalf of resident participants and for all overissuances. The proposed regulations authorize FNS to disqualify the institution as an authorized firm when a finding is made that the institution has misappropriated coupon allotments or has used the coupons for purposes other than for food for its household.

Narcotics addicts or alcoholics residing in a drug addict or alcoholic treatment center will be entitled to one half of their authorized coupon allotment upon leaving the treatment program prior to the 16th day of the allotment month. Since a coupon allotment is an entitlement of the household, not the institution, it is appropriate that there be some return to the household. A prorated return based on the exact number of days a household resided in an institution was discarded. That approach would require complicated calculations and ignores the fact that centers need to purchase food for future meals to take advantage of economies of scale.

In addition, the proposed regulations state that addicts or alcoholics residing in an authorized treatment and rehabilitation program are entitled to notice of adverse action, fair hearings, and lost benefits in the same manner as any other food stamp household.

REPORTING CHANGES

Household responsibility to report. The Act gives the Secretary discretion in the area of reporting requirements. Departmental regulations have, in the past, required households to report changes of $25 or more in income or deductions to the State agency within ten days of the date the change becomes known to the household. This policy was adopted because the current income brackets are in increments of $10. Therefore, changes of less than $25 frequently do not affect the household's level of benefits. Additionally, State agencies could avoid diverting administrative time to process insignificant changes that did not affect household benefit levels.

However, it has been brought to the Department's attention that the $25 reporting requirement is difficult for households to understand and causes confusion. For example, if the household has two sources of income each of which increases by $13, those changes *cumulatively* exceed $25 and must be reported under current regulations. Most households would, however, look at each change separately and fail to report them as each is under $25.

In addition, the $25 rule does not conform to AFDC reporting rules which require that all changes be reported. Therefore, PA households are, in effect, required to report all changes while nonassistance households are required to report only those changes over $25. This results in disparate treatment between assistance and nonassistance households.

The Department proposes that households be required to report all changes in income. This proposal is consistent with AFDC income reporting requirements and can be readily understood by households. Since even the smallest change in income can affect the household's benefits under the 30 percent benefit reduction rate, this policy also assures that benefits are determined by the statutory formula.

In addition to public comment on the proposed regulatory provision for reporting of and State action on all income changes, the Department solicits public comment on two alternative requirements which are also under consideration:

1. The household reports all income changes, but the state agency does not have to act on monthly changes of $10 or less. Action would be required when a single change in income was more than $10, when multiple changes cumulatively exceed $10, or at recertification, whichever is earlier.

2. The household is only required to report monthly changes in income of $20 or more. This requirement differs from the current reporting requirement in that the $20 would apply separately to each income source and would not be cumulative in nature. The State would have to act on any changes reported.

While the Department's preliminary analysis led to the proposal of reporting and acting on all income changes, additional comment is sought on the administrative efficiency, cost effectiveness, and affect on households' benefits of all three alternatives.

The Department further proposes that households be *required* to report changes in dependent care or shelter costs only at recertification. To require a report each month on changes such as monthly fluctuations in utility bills would result in an enormous amount of paperwork and would not be cost effective. Changes of this nature are generally small and the $75 cap limits both the number of changes that would affect a household's benefit level and the degree to which such changes would affect benefits. Households are, of course, free to report these changes if they wish.

Report form. The Act requires that households report changes in income or household circumstances on a form designed or approved by the Secretary. The Department has contracted for the design of a model form for use by State agencies. Deviations from this design would only be approved on the same basis under which deviations on application forms would be granted. (See section 273.2(b) "Food Stamp Application Form".)

State action on changes. The Act does not specifically address the issue of State action on changes reported by the household. However, the House Report indicates that States are expected to act promptly, particularly if income anticipated at the start of the certification period later turns out to be unavailable. The House Report states that "[i]f anticipation does not comport with reality and no income or less income than projected appears, then anticipation must be scrapped and swiftly in favor of operating on the basis of what has occurred." Inresponse to these concerns, the Department proposes that State agencies expedite action on changes which have a significant impact on the household's circumstances and result in an increase in benefits. Significant changes are defined as those which reduce a household's total gross monthly income by more than $50 or result from the addition of a new household member. If the reduction in gross monthly income of $50 or more also reduces the household's net monthly income to zero, the proposed regulations require even faster action. In most of these case, the household will be entitled to an adjustment in the current month's allotment if the household had not already participated, or to a supplemental ATP card if the household has already transacted its ATP. In this way, the household would not be left without income or coupons to meet food needs until the next normal allotment is received.

For those changes which do not require expedited action and those changes which result in a decrease in benefits, the Department proposes that current procedures remain in effect.

The Department proposes that households be disqualified for failure to report only if the failure to report was fraudulent, as determined by either an administrative fraud hearing or a court of law. However, whether or not fraud is involved, the State agency shall establish a claim against the household. It is proposed that liability for the overissuance begin in the month the change became known to the household. This policy assures that households which fail to report are not better off than households that timely report changes. Making participating households aware of this policy could help to preclude intentional failure to report and operate as an incentive for reporting changes promptly.

V 4 3 | 8 5

Mass changes. The Department proposes that overall adjustments in PA payments, Federal adjustments in the food stamp eligibility standards and deductions, and State adjustments to the utility standards be handled as mass changes. Mass adjustments to GA payments will also be handled as a mass change if the State agency administers the GA program. Although households are not entitled to a notice of adverse action for mass changes the regulations propose that States send households an individual notice which informs the household of the change but does not grant the household continuation rights if the household appeals the State agency action. In this way, households are advised of the change and can adjust household budgets accordingly.

For those mass changes in Federal benefits, such as Social Security or SSI, the household has primary responsibility for reporting changes. The State agency may not get enough information concerning these changes to make the change effective when it occurs. In addition, States have experienced problems in obtaining accurate information on these mass changes. States that have the capability may, however, use mass change procedures to adjust food stamp benefit levels as a result of changes in SSI and SSA benefits.

PA households. In accordance with current procedures, State agencies are required to establish procedures and controls to ensure that communication is maintained among PA, food stamp and issuance offices to assure that timely action is taken on changes reported by PA participants to PA workers. Since a termination of the PA grant does not necessarily result in a termination of food stamp benefits, the proposed regulations require that State agencies review the household's circumstances to determine the effect of the termination on the household's food stamp eligibility and benefit level. If there is not enough information to determine how the termination of the PA grant affects the household's food stamp benefits, the proposed regulations require that State agencies send the household a notice of expiration. The use of these procedures for handling changes in the PA grant should ensure that a household's food stamp benefits are not interrupted if the household remains eligible for the Food Stamp Program.

NOTICE OF ADVERSE ACTION

Use of Notice. The Department estimates that when State agencies apply the eligibility criteria as mandated by the new law, many households will receive decreases in benefits or will be terminated from the program. The Department proposes, as recommended by the House Report, that State agencies send an individual notice of adverse action to each household that will receive a reduced bonus allotment or that will be terminated as a consequence of implementation of the new Act. The proposed adverse notice must explain the reason for the forthcoming reduction or termination of benefits and the amount of the new allotment, if any. The proposed notice must also include an explanation of the household's right to request a fair hearing and should explain that the reduction or termination of benefits is the result of changes in Federal law. The notice will advise that benefits will not be continued while the household awaits the fair hearing, unless the issue raised is that the household is being adversely affected by State misinterpretation or misapplication of Federal law or that benefits have been miscalculated. The Department does not believe that all those households which experience a reduction or termination of benefits under the new Act, and request a fair hearing, should be entitled to a continuation of the level of benefits provided under the Act of 1964.

After the mass implementation is accomplished, routine reductions or terminations of benefits will be treated as follows:

State agencies, with the exception described below, will continue to provide a 10 day advance notice period before reducing or terminating a household's benefits. It is proposed that adverse notices which are mailed should allow for an additional two days from the postmarked date to compensate for delivery time. Also, if the adverse notice period ends on a weekend or holiday, the notice period must be extended to the next work day.

The Department also proposes to offer each State agency the option of adopting the adverse notice period it uses for the public assisance caseload, provided that period is no shorter than the minimum 10-day advance notice requirement. For example, those States which use a 15 day adverse notice period for AFDC recipients may also apply that notice period to food stamp households. This should enable State agencies to better coordinate and manage both programs.

The Department proposes to expand the adverse notice to include, in understandable language, the following information: the proposed action; the reason for the proposed action; the household's right to request a fair hearing; the name and telephone number of the person to contact for additional information; the availability of continued benefits; and the potential liability of the household for any overissuance received while awaiting a fair hearing. Additionally, if free legal advice is available in the community the State should advise the household of the presence of this service.

The Department is working with a private firm to develop a standard national adverse action form. Since State agencies may, under certain conditions, request exemptions from the national form, the Department believes it necessary to include in the regulations all adverse notice form requirements.

The Department proposes to maintain the current exemption for an adverse action notice when the household provides a written statement that benefits are no longer desired or which acknowledges that information it has provided will lead to a reduction or termination of benefits.

The Department proposes new exemptions for the adverse action notice under certain circumstances. Households that have been receiving an increased allotment to restore lost benefits should not receive a notice of adverse action to indicate that all lost benefits have been restored to the household. It is proposed that these households simply be notified in writing of the anticipated termination of the increased allotment. This reduction in benefits does not represent an actual decrease in the household's basic eligibility and, therefore, those households should not be entitled to a continuation of benefits pending a hearing.

Adverse action notices would not be required for households which receive a variable basis of issuance within the certification period, if the household was notified at the time of certification of the forthcoming changes. This policy would facilitate the issuance of coupon allotments on a variable basis of issuance. Variable issuances are assigned to households to tailor the benefit levels to anticipated income in specific future months. State use of variable bases of issuance will increase the length of certification periods and reduce the number of times households have to reapply for benefits. Adverse notice requirements, for changes meant to accommodate household circumstances, could discourage State agencies from providing variable issuance.

The Department proposes that adverse action notices not be required for households which make joint application for PA and food stamp benefits and receive food stamp benefits pending approval of the PA grant, if the household was notified at the time of certification that food stamp benefits would be reduced upon approval of the PA grant. This exemption will allow State agencies to assign longer certification periods and thus reduce the number of times households have to reapply for benefits. Without this exemption, households awaiting the approval of a PA grant would likely be certified for only one or two months.

Household members disqualified for fraud, and the remaining household members whose benefits are reduced or terminated as a result of the fraud disqualification, would be sent special notices under subsection 273.16. The individual disqualified for fraud has already received a hearing prior to termination of benefits, which reduces the need for a fair hearing under the regular notice of adverse action provisions.

In addition, providing a notice of adverse action to the remaining household members would negate the fraud disqualification if the household requested a fair hearing and received a continuation of benefits pending the appeal.

Finally, adverse action notices would not be required for households containing a striker or a person subject to a lockout, when the strike or lockout ends and the household is again receiving income, if a waiver of the adverse notice was signed by the household at the time of certification. This waiver would enable the State agency to assign a longer certification period than is normally allowed for such households, because the State agency could reduce or terminate benefits immediately upon resumption of income because the strike or lockout has been settled. These households should, nonetheless, receive a notice of termination or reduction in benefits to advise the household of changes in future assistance levels.

RECERTIFICATION

Notice of expiration. The Act requires the State agency to notify households, prior to the expiration of the current certification period, that a new application must be submitted in order to renew eligibility for benefits. Households which file an application by the 15th of the last month of certification shall, if determined eligible, receive uninterrupted benefits. The statute further provides that households determined ineligible or eligible for fewer benefits shall not continue to participate at the former basis of issuance level once the current certification expires, even if a timely fair hearing request is made.

Public concern over recertification procedures were recently aired in response to a proposed rulemaking published in June 1977. These concerns were resolved with the publication of final rulemaking on December 23, 1977 (42 FR 64357-64360), which is in general conformity with the provisions of the Food Stamp Act of 1977. Those regulations are essentially republished in this package for further public comment, except that the Department eliminated the State agency's option to set the date for timely reapplication. In accord with the Act, the 15th will be the date used in all States, except in cases where the notice of expiration is provided at the time of application.

The proposed regulations require that the notices be mailed far enough in advance of the 15th to provide the household a reasonable opportunity to comply. Therefore, notices of expiration must be received by the household no later than the 1st of the last month of certification and no earlier than the 15th of the prior month. This notice schedule provides the household adequate opportunity to file a timely reapplication and maximizes the State agency's processing time, without delaying benefits. The final regulations published on December 17, 1977, specified that households certified for one month are to be provided a notice of expiration at the time of certification, since it is impossible to provide these households with a notice of expiration by the 1st of the last month of the household's certification period. If the State agency assigns a two-month certification period but the household is not certified until the month following the month of application it would also be impossible for States to provide the notice of expiration prior to the 1st of the last month. Therefore, the Department proposes that these households also be provided a notice of expiration at the time of certification. A timely reapplication for such households will be 15 days from the date the notice is received (allowing two days for mail lag if the notice is mailed). Households redetermined eligible shall have an opportunity to participate no later than 30 days after the date the household first had an opportunity to obtain its last allotment.

In the past, the Department has been asked to permit the use of an abbreviated application form for reapplication which would focus on changes in circumstances rather than redocumenting all factors of eligibility. The Act requires households to file a "new application" in order to renew eligibility. The Department does not believe that filing a change report will satisfy that requirement. However, the proposed regulations do not prohibit States from designing a form more appropriate for reapplications than the uniform application form. Departmental approval would be required to insure that the forms meet minimum Federal requirements.

As with initial applications, the State agency is required by the Act to promptly process reapplications and provide timely benefits. However, the Act does not authorize extensions of the former basis of issuance for households which are not timely processed. These regulations, therefore, require that the State agency take extraordinary means, if necessary, to provide households whose timely reapplications have been delayed in processing an immediate opportunity to participate once eligibility is determined. Any benefits lost by such households due to the State agency's untimely processing shall be restored as part of future issuances.

FAIR HEARINGS

While Act does not require any specific changes to the current fair hearing procedures, the following proposals are made in an effort to improve existing hearing procedures.

Timely action on hearings. The House Report notes that the bill "* * * would retain the fair hearings provision of the (food stamp) law intact and would encourage the Department to enforce its excellent regulations and instructions on the subject." The report suggests, however, that the Department "* * * reduce the sixty day maximum decision period should that prove to be administratively feasible."

The Department is concerned that the 60 day period for processing appeals is too lengthy and results in hardships to households. However, the Department recognizes that upon implementation of these new regulations States will have the tremendous task of redetermining the eligibility or basis of issuance of every household. Also, States are likely to encounter an increase in fair hearing requests as a result of reductions or terminations of benefits resulting from implementation of new eligibility criteria. Thus, blanket acceleration of fair hearing procedures at this time would be difficult. A reduction in the time allowed for most State level fair hearings is not proposed in this rulemaking. However, a study of the fair hearing procedures is being conducted to determine the feasibility of reducing the time limit on processing appeals.

For the present, the Department proposes that State agencies which choose to use the local level hearing system, with appeal rights to a State level hearing, must complete the local hearing process within 45 days of the hearing request. In addition, if the local level decision is appealed, the State level hearing process must also be completed within 45 days of that appeal. This reduction in the time limits allowed for the two tiered hearing system enables households to receive a final decision on an appeal within 90 days, as compared with the current 120 days. State agencies will also be required to expedite fair hearing procedures for those households which are denied emergency benefits under the expedited certification procedures described in § 273.2(i). The expedited hearing provisions require State agencies to schedule an agency

M Y 2 7 8 UMI

V 4 3 | 8 5

conference within two working days of the request for a hearing, unless the household wishes to waive the conference and instead be scheduled for a hearing. These agency conferences will seek an informal resolution of grievances and, if successful, will eliminate the need for further action. However, the agency conferences are not intended to replace hearing procedures for those households which do not wish to attend the conferences or which are dissatisfied with the results of the conferences. The expedited hearing regulations require a State level hearing as soon as is reasonably possible so that a hearing decision can be rendered within 15 working days after the hearing request. If the hearing official reaches a decision in favor of the household, the State agency will be required to provide that household with an opportunity to participate within two working days of receipt of the decision. The Department feels that this requirement will ensure that households with little or no income will not be subjected to lengthy waiting periods before the hearing is completed.

Note that the time limits on regular fair hearing procedures will not apply to the time within which a decision must be rendered, but to the time within which the household must be provided an opportunity to participate at the benefit level determined by the hearing decision.

Time period for requesting hearing. The Department proposes to allow households a standard period of one year within which to appeal an adverse action. A household may request a hearing on any action by the State agency or any loss of benefits which occurred in the past 12 months. The policy currently in effect allows households "• • • a reasonable period of time • • •" to appeal an adverse action. Most State agencies have incorporated the State public assistance standard into the State food stamp manual. Those standards usually allow a household between 30 and 90 days within which to appeal an adverse action. The adoption of a uniform national standard will avoid the disparity of time limits currently imposed by States, and should afford adequate time to file appeals.

Hearing official. The Department proposes using the term "hearing official" to describe what the current regulations refer to as both the hearing authority and the hearing official. The two terms unnecessarily lead to confusion. Criteria for who may act in the capacity of a hearing official are proposed along with the proposed powers and duties of the hearing official.

Attendance at hearing. It is proposed that each hearing be attended by the household and/or its representative and by a representative of the State agency who initiated the action being challenged.

Conduct of hearing. To ensure household access to all necessary information prior to scheduled fair hearings, the proposed regulations require the State agency to make the contents of the case record available to the household and/or its representative. If requested, the State agency must also provide free copies of the relevant documents. However, the Department proposes to permit the State agency to withhold information which is confidential in nature such as information regarding pending criminal investigations, or the names of informants that may have provided information about the household. Confidential information not provided to a household or its representative shall not be considered in deciding the case. Thus, while the State agencies will have to identify the verification which determined the reduction or termination of benefits, such as a wage stub, it would not be necessary to provide the name of the person who provided the name of the employer.

Hearings decisions. The Department proposes standards for the implementation of both local level and State level decisions. These standards were introduced to ensure that all decisions are acted upon in a timely fashion, equitable to both the household and the State agency. The proposed regulations expand the current policy to ensure that local agency administrators, as well as households, may appeal to the State agency level the hearing decisions made by local level hearing officials.

The Department proposes that State agencies with local level hearing systems be required to routinely review those hearing decisions. If excessive numbers of local level decisions are appealed and reversed, the State agency must evaluate the situation and take appropriate corrective action.

The Department is also considering procedures for Regional office review of certain fair hearing decisions. Those procedures will be published as proposed rulemaking at the same time that the procedures for review of State claims, required by section 13 of the Act, are proposed.

FRAUD DISQUALIFICATIONS

Under the current regulations, State agencies may disqualify a household for fraud for a period of time specified by the State. Fraud disqualification procedures and punishments vary widely from State to State. The proposed regulations, in accordance with the Act, would limit these variations by establishing disqualification time ranges, requiring that fraud determinations be made at administrative or judicial hearings, and prohibiting the disqualification of innocent household members. Individuals suspected of fraud will be allowed to participate pending the fraud hearing determination if they are otherwise eligible, but will be subject to a claim for any overissued benefits resulting from the continued participation if the hearing results in a fraud disqualification.

Fraud disqualification penalties. The Act requires that individuals found guilty of fraud at an administrative hearing shall be ineligible to participate in the Food Stamp Program for three months, and individuals found guilty of criminal or civil fraud by a court of appropriate jurisdiction shall be ineligible for not less than six months and not more than twenty-four months, as determined by the court.

Definition of fraud. While no definition of fraud can guarantee uniform application and treatment, the Department proposes a definition which provides some guidance to hearing authorities and participants. The critical element of the definition is that the fraud must be committed "• • • knowingly, willfully and with deceitful intent." The mere failure, for example, to report a change in circumstances does not automatically mean that fraud has been committed. Before such action can be considered fraudulent, the State agency must prove that the individual intentionally failed to report the change in an attempt to get food stamp benefits which the person knew would exceed the proper level. The proposed definition also includes a catch-all provision which covers "• • • any other fraudulent act • • •" to obtain unauthorized food stamp benefits and other acts related to the misuse of coupons. The Department believes this broad language is necessary to avoid technical legal defenses regarding intentional and deliberate deceptive schemes. In addition, the proposed regulations specify that any disqualification must be based on clear and convincing evidence.

Administrative disqualifications. The Act does not specify the kind of administrative hearing that should be conducted to determine fraud. The Department proposes that the procedures for conducting administrative fraud hearings be similar to those for hearings requested by households. Those hearing procedures were commended by the House Report and seem fully applicable to fraud determinations. The Department expects that most State agencies will simply expand the system used to provide fair hearings to include fraud hearings. There are, however, a few ways in which the proposed fraud hearing procedures would differ from the proposed fair hearing procedures. These differences are as follows:

(1) *Fraud hearing procedures.* Unlike fair hearings, administrative fraud hearings are initiated by the State agency. In addition, for a fraud hearing the individual must be eligible and participating when the hearing is initiated.

(2) *Advance notice.* The household member suspected of fraud must be provided a written notice of the date of the hearing and other pertinent information. The notice must be received by the household member at least 30 days in advance of the hearing and the State agency must mail the notice by certified mail, return receipt requested.

(3) *Scheduling of hearings.* Fraud hearings can be conducted without the household member or representative, if the household member or representative cannot be located or fails to appear at the hearing without good cause. However, the hearing official cannot draw any negative inference because the household member was not present or represented. If the household member demonstrates good cause for that absence, the previous adverse hearing decision is void and a new hearing must be conducted.

(4) *Participation during appeal.* In the case of fair hearings, a household's benefits can be continued at the benefit level authorized immediately prior to the notice of adverse action if the adverse action is to be taken during its certification period. In this way, households are not harmed by an adverse action if the fair hearing official later rules the adverse action is incorrect. In the case of fraud hearings, the household member cannot be disqualified prior to the fraud hearing. However, the eligibility and benefit level of the household must be determined the same as any other household. For example, the State agency shall reduce or terminate the household's benefits if the State agency has facts to substantiate that the household is ineligible or eligible for fewer benefits even if these facts led to the suspicion of fraud and the resulting fraud hearing. If benefit levels could not be appropriately reduced pending the fraud hearing, then households containing persons accused of fraud would be more favorably treated than other households.

(5) *Appeal rights of household members.* A household appealing a local fair hearing can receive a new or "de novo" hearing at the State level only if the household specifically requests one. However, in fraud hearings, a de novo hearing will be conducted every time an individual appeals a local level decision to the State level. In a de novo hearing, the prior hearing decision is not taken into consideration.

The regulations propose that an individual can be disqualified based on an administrative finding of fraud at a local hearing only if the individual fails to timely appeal that decision to a hearing at the State level. Therefore, unlike fair hearings, adverse decisions made at a local administrative fraud hearing do not take effect if the individual appeals the local level decision within 15 days of the date the individual receives the notice. For the State to accurately calculate the date the notice is received, States are required to send the notice by certified mail, return receipt requested.

Court imposed disqualifications. The Act and the proposed regulations make clear that individuals found to have committed fraud by a court can be disqualified only if the court orders disqualification and only for the length of time specified by the court. State agencies should encourage State or county attorneys to request this judicial disqualification determination. In the event the court does not address disqualification, State agencies cannot impose a period of disqualification based on that fraud determination. However, administrative disqualification may be pursued in addition to, or independently of, judicial action.

Entitlement to lost benefits. The proposed regulations specify that a disqualified household member may be entitled to lost benefits if the decision to disqualify a household is subsequently vacated or reversed. This is explained in the preamble under "Restoration of Lost Benefits."

RESTORATION OF LOST BENEFITS

Entitlement. The current food stamp regulations specify that lost benefits are to be restored only if the loss was caused by an administrative error on the part of the State agency. The Department proposes that lost benefits be restored whenever the loss was not caused by an intentional act or omission on the part of the household. For example, when a household fails to timely apply for recertification with good cause, the household would be entitled to restoration of any resulting lost benefits.

Time limit for establishing entitlement to lost benefits. After carefully considering the advantages and disadvantages of establishing a time limit for discovering and requesting lost benefits, the Department decided to propose a 12 month time limit. Under the proposed regulations, benefits shall not be restored if they were lost more than 12 months prior to the date the State agency receives information or a notice which indicates that coupons may have been underissued to a household. This information may come from the State's own review system, the Department's Office of Audit, the participant or a variety of other sources.

The 12 month limit should provide adequate opportunity to discover suspected lost benefits and yet establish a definite limit which avoids the problem of computing and documenting claims from periods far in the past. Additionally, since the Food Stamp Program is designed to respond to immediate food needs, compensation for failure to provide for those needs more than a year after the loss does not seem justified in light of the difficulty for both State agencies and households in establishing such old claims. The proposed 12 month time limit is also consistent with the time limit for establishing nonfraud claims.

The proposed rulemaking retains the current provision which allows State agencies to offset the amount to be restored against any unpaid claim owed by the household. Since the offset is only against amounts to be restored and will not affect the current entitlement to food coupon assistance, the household is not nutritionally harmed by the offset.

Disputed benefits. The Department believes that households should not be required to request a fair hearing to receive a restoration of lost benefits if the State agency and household agree on the amount of benefits owed to the household. This approach was adopted by the Department in final regulations published in the FEDERAL REGISTER on March 19, 1976 (41 FR 11464). The Department proposes to continue that policy. In this way, the household and the State agency would be free to resolve these cases without conducting pointless fair hearings.

Computing the amount to be restored. In cases where benefits have been wrongfully denied or terminated, it is difficult to compute the amount to be restored since it is difficult to predict how long the erroneous action acted as a barrier to participation. To assure that States uniformly calculate the length of time affected by erroneous denials and terminations, the Department proposes that the erroneous action not be considered to be in effect the first month the error is corrected, the first month the household is correctly found to be ineligible, or the first month the household reapplied. For example, if a household's benefits were erroneously denied in May, and the State agency, after calculating the correct allotment the household would have been eligible to receive during May and all subsequent months, finds the household is ineligible in September, the household would be entitled to restoration of lost benefits for May through August. If there is no information in the household's case file to document that the household was actually eligible during those months, the proposed regulations specify that it is the household's responsibility to provide the necessary information to determine eligibility. Otherwise, the household will be considered ineligible for the month documentation is not provided.

M Y 2 7 8 UMI

V 43 | 85 MY 2 78 UMI

The House Report specifies that when benefits are delayed, benefits are to be provided retroactive to the period of application. However, to avoid providing households with large sums of coupons at one time and thus inviting the exchange of coupons for cash, the Department proposes that eligible households be provided benefits retroactive to the period of application only if benefits are delayed less than 60 days from the date the application was filed. If benefits are delayed more than 60 days by the State agency, the benefits lost are to be restored under the normal procedures for restoring lost benefits.

Lost benefits to individuals disqualified for fraud. Both the legislation and the House Report are silent on the issue of whether a disqualifed household member is entitled to a restoration of lost benefits if the decision to disqualify for fraud is subsequently reversed.

The Department proposes that lost benefits be provided to individuals only if the specific action which resulted in disqualification is reversed. Therefore, if a conviction for criminal fraud is reversed on appeal by the appropriate appellate court, or is otherwise overturned by the proper judicial authorities, lost benefits should be provided. However, this same reversal of a criminal conviction would not affect a determination of fraud at an administrative fraud hearing. Inability of the State to satisfy the stringent criminal burden of proof does not demonstrate that the administrative hearing burden of proof has not been met. In other words, even though the evidence may not be strong enough to support a criminal conviction, this finding would not invalidate the administrative determination and disqualification. The administrative finding, itself, would have to be specifically reversed or overturned to entitle the household to lost benefits.

Method of restoring lost benefits. The Act requires that States promptly restore in coupons any food stamp benefits that were wrongfully denied. Although the legislation does not indicate how many coupons a household can receive at one time, the Conference Report does allow "* * * that the Secretary may distribute these restored benefits over such period of time as the Secretary determines to be appropriate."

The proposed regulations state that households will receive not more than 100 percent of the maximum allotment, according to household size, *in addition to* the allotment the household is normally eligible to receive. Therefore, if a four person household is entitled to $300 in lost benefits and is eligible to receive $137 in coupons each month, the household would receive $170 in lost benefits during the first month, assuming $170 is the maximum allotment for the household's size. When added to the household's normal allotment of $137, the household would receive a total of $307 in food stamp benefits for the first month. In the second month the household would receive the remaining $130 in lost benefits plus its normal allotment of $137 which would total $267 in food stamp benefits during the second month. This procedure requires little computational effort by the eligibility worker and can be easily computerized. Also, this method is equitable to all households, regardless of income or current eligibility.

Furthermore, it restores lost benefits in a reasonable amount of time without providing households with more coupons than might be used for food in one month, thus minimizing the potential for abuse.

Another significant change in the way benefits are currently restored is the Department's proposal to promptly restore lost benefits to ineligible households rather than waiting until the household is once again eligible. This proposed change is endorsed by the House Report and appears equitable in that it provides all households that have lost benefits with the same remedy.

CLAIMS AGAINST HOUSEHOLDS

The Act provides broad authority for the Department to establish, settle, adjust or compromise fraud and nonfraud claims against households. The Act specifically provides that this broad settlement and adjustment authority regarding claims against participants may be delegated to the State agencies. To reduce the current duplication of effort between State and Federal levels on the handling of claims, the proposed regulation delegates this settlement and compromise authority to State agencies. In turn, the Department will focus its attention on monitoring each State's overall activities in handling all fraud and nonfraud claims. States will, however, be required to follow certain minimum requirements specified in these proposed regulations for handling claims. These minimum requirements generally follow the guidelines established under the Federal Claims Collection Act of 1966 for collecting claims owed the Federal Government. However, modifications to these general guidelines have been made, when appropriate, to take into consideration the low income levels of most households owing claims for food stamp overissuances.

Nonfraud claims—Procedural errors. In some instances, households are technically ineligible to participate in the program even though the household is eligible for needed food benefits based on all other financial and nonfinancial eligibility standards.

For example, a household may be eligible to participate in the program based on the household's income and resources even though the State failed to ensure that the required work registration form was completed or that the application was signed. Collection of claims for procedural errors is unfair where the household was in need of food assistance and would have been determined eligible except for the procedural error. Therefore, the Department proposes that States not establish claims against households for amounts which the household would have been entitled to receive but for the unintentional technical error.

Nonfraud claims—Agency errors. The Department proposes that households be liable for non-procedural agency errors even if the household is not at fault. Since the household has received the benefit of the State's error, the Department proposes that the household be required to return this benefit. Other Federal programs do not automatically decline collection of losses caused solely by agency error. This procedure is consistent with the general guidelines provided in the joint regulations published by the General Accounting Office and the Department of Justice under the authority of the Federal Claims Collection Act. Eliminating collection activity on all agency errors would have the net effect of writing off significant amounts of potentially collectible money owed the Federal Government.

However, the Department believes, in some circumstances, that the cost of collection activities may exceed the possible returns. Therefore, the Department proposes that State agencies not be required to initiate collection action on agency errors or errors caused by household misunderstanding if the amount of the claim is less than $35 or if the State agency has information which documents that the household cannot be located. (The $35 amount is the current minimum amount for claims against retailers and wholesalers.) Additionally, the proposed regulations allow State agencies to terminate collection of nonfraud claims in situations where there is little likelihood that the household will pay or where the claim has been held in suspense for more than 3 years.

The Department also proposes a 12-month time limit for establishing nonfraud claims. This time limit eliminates the administrative burden of documenting and computing errors that occurred more than a year prior to discovery and is consistent with the 12-month limit proposed for restoring lost benefits. In those cases where auditors discover errors dating back several years, the Department believes it would be more cost efficient to concentrate on correcting the cause of the error, rather than trying to compute a claim which could be difficult to collect.

Fraud claims. The Department proposes that a fraud claim be established if a determination of fraud has been made by either a court, an administrative fraud hearing or by the State agency's fraud investigators. Prior to the fraud finding, the claim shall be handled as a nonfraud claim. In cases where the determination of fraud was made by the State's fraud investigators, the proposed regulations specify that the State agency is not allowed to coerce a household into paying a claim by threatening to initiate an administrative fraud hearing or by threatening to prosecute.

The proposed procedures for establishing and collecting fraud claims are similar to nonfraud procedures except that there is no 12-month time limit for establishing a fraud claim and States are required to send additional demand letters. The length of time needed to prosecute and investigate fraud claims makes imposition of a 12-month time limit unwarranted.

Criteria for suspending action—Fraud and Nonfraud. The Department proposes that States suspend but not terminate collection action on any claim if the household is financially unable to currently pay the claim but may be able to pay the claim at some future time. For example, nearly all claims which currently participating households are financially unable to pay will be held in suspense, since a possibility exists that the household may be entitled to restoration of lost benefits which could be used to offset the claim. States can also hold a claim in suspense until the household's circumstances have improved. States will not be required to hold any claim in suspense for more than 3 years. This rule benefits both States and households in that households can arrange for repayment at a time when it will cause the household the least hardship and States need not continue sending demand letters to households that are financially unable to pay at the present time.

Submission of payments. In the past, the Department has allowed States to submit to FNS individual claims checks received from households. This procedure, together with the delays in the receipt of payments, has created problems in that the checks are often stale and will no longer be honored by banks. In addition, the likelihood is increased that there are insufficient funds to cover the payment. Therefore, the Department proposes that each State submit a single consolidated check, draft, or warrant to FNS which consolidates all of the payments collected at the State or local level during the previous calendar month. To assure timely submission of payments, the Department proposes that the consolidated check be due no later than the 15th of each calendar month and that no more than 45 days elapse between the date a household makes a payment on a claim and the date the payment is submitted.

To effectively monitor State claims activities, the Department proposes that each State agency submit a report to FNS which summarizes the State's activities relating to claims during the previous calendar month. This report is also due on the 15th of each calendar month and shall be submitted even if the State agency has not collected any payments. A draft of this report form is included in the proposed rulemaking.

The proposed procedures for establishing and collecting fraud claims are similar to nonfraud procedures except that there is no 12-month time limit for establishing a fraud claim and States are required to send additional demand letters. The length of time needed to prosecute and investigate fraud claims makes imposition of a 12-month time limit unwarranted.

60-DAY CONTINUATION OF CERTIFICATION

The Act of 1977 provides that certified households moving between project areas will remain certified for participation in the new project area for sixty days after the move. The House Report emphasizes the need for States to comply with this requirement even though other provisions of the new Act will expedite certification in the new project area. The House Report, in quoting testimony supporting the 60 day continuation, noted that without that provision and "* * * despite the family's need and dependency upon food stamps, that family would not be eligible [because of administrative delays] to participate in the program."

The Department is aware of a need to make the availability of the transfer procedure better known to households. The Department is considering a requirement that information on this provision be printed on the food stamp application and change report forms, and be included in outreach materials. These regulations propose that households be advised that they have the option in the new project area of using the transferred eligibility, or of reapplying under emergency certification provisions if their income has been substantially reduced.

The proposed regulations retain the current requirements governing the transfer of eligibility, except that one change from current procedures has been introduced. Recent audits have indicated that households certified under these procedures may begin receiving substantial income in the new project area which would otherwise render them ineligible. Similarly, households may not be using the current transfer procedures because income in the new project is less than shown on the transfer form. Therefore, the regulations require that when the household submits a transfer form in the new project area, it must report any changes in circumstances. The State agency shall then process these changes as described below.

Unless the household is eligible for expedited participation in the new project area, the first month's benefits will be based on the information provided on the transfer document. The second issuance will be based on the reported changes. Households which receive significant increases in income after the move could receive zero benefits during the second month, whereas households with reductions in income could receive an increased allotment. The Department believes that this approach is consistent with the intent of the Act as a whole and is in accord with the 60 day certification for participation statutory language.

The transfer form will be redesigned to facilitate updating the household's circumstances in the new project area. As the Department has encountered complaints from State agencies that States are required to maintain larger supplies of accountable transfer documents than actually needed, the Department will take steps to ensure that States are not overburdened with unnecessary supplies of transfer forms.

ISSUANCE AND USE OF FOOD COUPONS

This part of the proposed regulations deals with more technical aspects of program administration and should be of special interest to State agencies, coupon issuers, bulk storage points and the U.S. Postal Service. The sections concerning the use or redemption of coupons by eligible households, the close-out of coupon issuers and the return of coupons are of more general interest. Briefly, this section discusses (1) State agency issuance responsibilities, (2) types of issuance systems that shall be used, (3) mail issuance standards, (4) distribution of bulk supplies of coupons, (5) responsibilities of coupon issuers and bulk storage points, (6) reconciliation of issuance records and their retention and security, (7) State agency reporting, (8) procedures for the close out of coupon issuers, and (9) requirements concerning the use and return of coupons. The Department encourages interested parties to carefully examine this proposed regulatory language and make specific and detailed comments.

In large part, these proposed regulations are based on past experience with various coupon issuance methods. Those procedures which the Department believes have worked well in the past are being proposed in this rulemaking. As a result, much of the proposal is similar or identical to existing Departmental requirements. Some of the proposed regulations, however, represent changes from current requirements because a cash purchase

V 43 | 85 MY 2 78 UMI

requirement will no longer be collected from participants.

STATE AGENCY RESPONSIBILITIES

State Financial Protection. Under the Act, State agencies are "• • • responsible • • • for any financial losses involved in the acceptance, storage and issuance of coupons." The Department proposes to change the current policy of requiring State agencies to carry bonding and allow States the additional option of self-insuring. The Department believes that States should be accorded flexibility to appropriately tailor insurance and security standards according to State priorities.

State monitoring of coupon issuers. The Act requires the Department to develop procedures for determining and monitoring the level of coupon inventories held by coupon issuers. To fulfill this requirement, the proposed regulations require State agencies to establish accountability systems to monitor the day-to-day activities of all coupon issuers. In addition, the State agency is required to conduct an on site review, including a count of coupons on hand, of each coupon issuer and bulk storage point at least once a year.

ISSUANCE SYSTEMS

System classification. States may issue food coupons through a variety of methods, including a direct coupon mailing system. A direct coupon mailing system does not utilize an authorization document. This system is an outgrowth of an earlier policy which allowed States to send food coupons to zero purchase households without using Authorization To Participate (ATP) cards.

The Department will encourage direct coupon mailing in rural areas due to limited access to issuance facilities; and will discourage its use in high risk urban areas, due to on-going problems with thefts of coupons. Direct coupon mailing, when used appropriately, will simplify issuance procedures and will improve State agency accountability.

Household Issuance Record (HIR) Issuance. The proposed regulations would provide that States with an HIR issuance system may stagger issuance of coupons to households through the 15th of the month, as long as each household can obtain coupons on or about the same day of the month during the certification period. In an HIR system, the State agency must also provide households that are certified after the 25th of the month with the option of obtaining the coupon allotment for the month of certification in the next month. This will insure that households have an opportunity to obtain benefits for which they were certified.

ATP Issuance. Currently, most States use ATP cards as the means by which households obtain food stamp coupons. Expiration dates on ATP cards facilitate the State agencies ability to reconcile issuance while still providing the houshold with a reasonable opportunity to obtain the full coupon allotment in the period of certified need.

Since households no longer have to coordinate income flow with coupon purchasing, the proposed regulations require that normally only one ATP be issued per month and that each ATP be clearly marked with an expiration date. The expiration date insures that coupon receipt coincides with periods of documented need for food assistance. Use of undated ATP's could encourage the exchange of coupons for cash. The ATP shall be valid only for the month of issuance unless an ATP has been issued after the 25th day of the month. In such situations the ATP shall not expire until the end of the following month.

To avoid crowded issuance offices and long waits by participants to obtain the coupons, the proposed regulations provide that the State agency may stagger the issuance of ATP's to certified households through the 15th day of the month, provided that each household cycle is established so that it receives its ATP at the same time each month in its certification period.

Issuance of coupons to special households. Instructions currently provide that, at the participant's request, blind persons may be issued coupon allotments in coupon books of one denomination. It is proposed that this policy be extended to any visually handicapped participants.

ISSUANCE OF COUPONS THROUGH THE MAIL

Types of mail issuance systems. The Act imposes the responsibility for the issuance, control and accountability of coupons to States. The proposed regulations allow States to issue all or part of the coupon allotments either by "regular mail issuance" or direct coupon mailing. A regular mail issuance system is one which uses as an intermediate step an authorization document which must be redeemed before coupons can be issued. A direct coupon mailing system, as its name implies, consists of the direct mailing of coupons to households.

Coupons lost in the mail. The Department is concerned over current loss rates of coupons in "high risk" urban areas and over the difficulties which participants encounter when attempting to obtain replacement issuances. The proposed regulations require State agencies to use certified mail for regular or direct mailing programs when the value of monthly coupon replacements for an area exceeds the monthly cost of certified mail.

Nonetheless, the Department will continue to accept liability for losses of coupons placed in the mail if the allotments are mailed in accordance with FNS requirements. However, State agencies must take corrective action to report, trace and eliminate mail losses. If State agencies fail to initiate corrective action or if the action taken fails to significantly reduce the losses, FNS may notify the State that the loss rate is unacceptable. Financial liability may then be transferred to the State and all further mailings shall be at the risk of the State agency. States which refuse to use certified mail as required by FNS shall be held liable for future mail issuance losses.

Mail issuance controls and records. States with direct mailing systems must, under the Department's proposal, stagger the mailing of coupons to certified households through the 10th day of the month and may stagger mailings through the 15th, provided that each household's cycle is established so that it receives coupons at the same time each month. As an additional means of curtailing losses, States are prohibited from mailing coupons to large concentrations of households with the same zip code on the same day. Waivers from these requirements will be considered, for example where the mail issuance caseload is so small that a staggered mail system is unnecessary.

RECONCILIATION

Reconciliation of ATP's with the HIR Master File. New procedures for replacement of lost or stolen coupons and for valid coupon issuance into a subsequent month mandate certain changes in reconciliation procedures. Currently, States must merge the records of the emergency and replacement ATP issuances with the HIR master file prior to posting and reconciling the transacted ATP's. However, because ATP's issued after the 25th of the month can be redeemed in the following month, States will now be required to establish a mechanism for the redemption of two valid ATP's in one month, and the reconciliation and posting to the correct month of issuance. In addition, replacement ATP's issued as a result of lost or stolen coupons, as well as the original ATP's, must be reported and posted on the HIR master file as valid issuances for the month.

STATE AGENCY REPORTING AND DESTRUCTION OF UNUSUABLE COUPONS

State agency reporting. The Department is currently reevaluating all reporting requirements to determine if any of the reporting burdens on State agencies can be alleviated. The results

of the study may lead to further changes in the reporting requirements beyond those reflected in the proposed regulations. In the proposed regulations, due dates of certain issuance activity reports are extended to allow State agencies additional time to submit correct and complete reports. The Department has added a new report for all State agencies with ATP systems. This report will record the results of the reconciliation of transacted ATP's to the HIR master file. The identification of all unreconciled ATP's will enable the States and the Department to establish the liabilities for those cards and will allow the Department to monitor any corrective action or claims action taken by the State agencies.

State agency destruction of unusable coupons. Coupons that are unusable because they have been mutilated or improperly manufactured are currently returned to the Department through the mail. To allow for improved accountability and control over these coupons and for savings on postage fees, the proposed regulations require the State agency to destroy the coupons and to report the destruction to the Department. This destruction authority is limited to not more than $200 per coupon issuer or bulk storage point per month. If the value of the coupons to be destroyed exceeds $200, the Department must be consulted prior to destruction, to determine what steps should be taken.

CLOSE-OUT OF A COUPON ISSUER

Maintenance of participant service. Proposed regulations will prohibit State agencies from using an issuer or bulk storage point any longer than 30 days from the date a decision to terminate a coupon issuer for noncompliance with contractual requirements has been reached. States will further be required to perform on site reconciliation of the issuer's activity on a weekly basis. Food stamp participants using a coupon issuer that is to be terminated must be notified 30 days prior to the close-out of the issuer. Additionally, the State must take whatever action is necessary to maintain participant service. Notification of participants is proposed to ensure that States remain responsive to the needs of participants and that participants continuously receive timely service.

PARTICIPATION OF RETAILER FOOD STORES, WHOLESALE FOOD CONCERNS, AND BANKS

This section of the preamble discusses changes required as a result of the new Act regarding participation by food retailers and wholesalers. Because existing provisions regarding retailer/wholesaler activities have generally been considered successful, major portions of this section are a restatement of existing regulations, instructions or procedures. The Department encourages detailed comments on this section, especially from organizations, businesses or persons likely to be directly affected by its provisions.

Staple food. The proposed regulations implement language in the Act defining staple food as food intended for "• • • home preparation and consumption, such as meat, poultry, fish, bread, cereals, vegetables, fruits, dairy products, and the like, but not including accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, and spices • • •." The statute provides that retail food stores would be authorized to accept food stamps only if food sales are more than 50 percent staple foods. The list of staple food items in the proposed regulations includes fruit and vegetable juices, which are not specifically mentioned in the list of staple food items in the Act. This is a logical extension of the kinds of items named in the Act, but would not necessarily be readily inferred from that list. The staple food list is only relevant to the definition of "retail food store" and does not limit the types of foods households may purchase with food coupons.

Eligible food. The proposed regulations implement the statutory requirement that "• • • hot foods or hot food products ready for immediate consumption • • •" no longer be eligible for purchase with food stamps.

Approval of retail food stores and wholesale food concerns. The proposed regulations implement the statutory requirement that retail food stores have a food sales volume that is more than half staple foods. FNS does not expect this requirement to adversely affect any large group of retail food stores. The House Report explains that retailers should not be required to set up any elaborate system of record keeping to prove to FNS that the sales of staple foods warranted authorization. The intention is to eliminate certain stores, such as candy and ice cream stores, spice stores, donut shops which do not also sell bread products, and house-to-house delivery routes which sell primarily food items that are not staple foods.

Concern has been expressed that these changes would withdraw the authorization of large numbers of small rural groceries, convenience stores, health food stores, or dairies and other stores which sell a single kind of food. Such fears are unfounded. The House report notes that "• • • there should be no question that the retail food store definition would not disqualify such places as gasoline stations that handle food items as a recognized separate line or department • • • or drug stores that stock eligible food items or specialty stores, such as bakeries, that sell a line of staple products • • •."

The Act does not change the present criteria regarding retail store authorizations, except for the requirement that retailers must have food sales that are more than 50 percent staple foods. The Department has, however, clarified authorization requirements in the proposed regulations to provide more guidance concerning specific participation criteria. In addition, the location of a store may be considered when determining whether the store could be expected to attract food stamp business.

The proposed regulations list farmers markets "• • • which are involved in the direct marketing of farmers' produce to the public • • •" as one category of food store which can be expected to be authorized. Where farmers rent space on a routine basis in these markets, each farmer would be authorized individually. In addition, where a roadside stand or market is operated by a single farmer the farmer would be authorized individually. However, where farmers participate in a farmers market but do not rent space on a routing basis, the market itself (rather than the individual farmers) would be authorized. A farmer who is certified to receive food stamps as a participating household may also be authorized to accept food stamps as a retailer.

When reviewing a firm's authorization request, the Department may consider records of criminal convictions, removal from other programs, civil suits reflecting on business integrity, and fraudulent misuse of food stamps.

Concern has been expressed that stores which raise prices when welfare checks or food coupons are issued should not be allowed to participate. The Act prohibits the Department from specifying the prices at which food may be sold. However, if there is evidence that a store is manipulating its prices to increase profits at the expense of program participants, the proposed regulations, as well as present regulations, allow the Department to consider that evidence in reevaluating the store's authorization. Further, compliance with the local and State regulations on sanitation and food safety should be considered in determining a firm's business integrity.

The proposed regulations authorize wholesalers only if staple foods make up over 50 percent of the total food sales and an authorized retailer (retail food store, meal service, nonprofit food purchasing venture, or drug addict or alcoholic treatment and rehabilitation center) depends on the wholesaler to redeem food stamps. This provision will remove a number of wholesalers from participation in the program. The Act states that no

V 43 | 85
MY 2 78
UMI

firm may be simulateneously authorized as both a retailer and a wholesaler. This requirement will require firms, which meet the criteria for both retailers and wholesalers, to choose whether they wish to be authorized to redeem food stamps as retailers or as wholesalers.

These changes in the criteria for authorizing wholesalers are warranted by program changes that have taken place over the years. In the early days of the program, authorizing numerous wholesalers served an important function by making it easier for retailers, without access to banks, to redeem food stamps. This, in turn, encouraged retailers to participate in the program. Retailers currently have better access to banks, and wholesalers are, for the most part, not a vital part of the redemption process. Moreover, the authorization of large numbers of wholesalers increases administrative and enforcement burdens.

Participation of retail food stores. The Act states that participating households may receive cash in change in amounts less than $1. The proposed regulations implement this directive. The House Report notes that the intent was to replace credit slips and tokens with cash change. Mandating cash change will relieve retailers of the burdens of providing, issuing, and accounting for credit slips or tokens. Food stamp participants will be relieved of the burden of returning to the stores where credit slips or tokens were issued.

In order to minimize any potential for abuse, the regulations provide that store personnel may not knowingly enter into a series of small transactions for less than $1 with the same food stamp participant when such transactions are designed to allow the food stamp participant to accumulate cash change.

The proposed regulations implement language in the Act which allows private nonprofit food purchasing ventures to accept and redeem coupons before delivering the food orders bought with the coupons. The proposed regulations require that private nonprofit food purchasing ventures deliver the food bought with coupons within 10 days of receiving the member's coupons for the order. This added requirement will protect participating households without interfering with the operations of private nonprofit food-purchasing ventures which may have capitalization problems.

Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications. To implement the Act, the proposed regulations state that FNS may fine a firm up to $5,000 per violation in lieu of disqualifying the firm for violations, if a disqualification would cause hardship to participating households. It has been suggested that the Department establish a table of specific fines for various kinds of violations, increasing in severity with the increase in the seriousness of the violation. This approach was rejected because it does not allow for differences in ability to pay among stores, or for differences in the effect of disqualification on profits. The method adopted takes into account that a disqualified firm will lose regular food and nonfood sales, as well as food stamp sales, and that the firm's overhead will not necessarily drop in proportion to the drop in business as a result of disqualification.

In conjunction with the guidelines on determining the amounts of the civil money penalties, the proposed regulations list the standard periods of disqualification and the criteria used to determine which period of disqualification should be used. The sliding scale of disqualification periods provides for longer periods of disqualification for violations which are considered more serious.

Demonstration, Research, and Evaluation Authority

Legislative authority. The Department has been provided with statutory authority to conduct demonstration, research, and evaluation projects. While developing the proposed regulations, contacts were made with representatives from the Departments of Labor; Health Education and Welfare; and Housing and Urban Development to determine how these Departments administer demonstration, research and evaluation projects. The Department obtained significant guidance in the development of the proposed regulations and on the subject of actual project operations. These proposed regulations supersede proposed rules on demonstration projects which were published in the Federal Register on June 11, 1976 (41 FR 23720).

Demonstration projects. The demonstration project authority allows the Department to waive specific requirements of the Act and regulations to conduct tests designed to improve program administration and benefit delivery. As required by the law, no project will be undertaken if it would lower or further restrict the income or resource standards or benefit levels established in the Act.

Research projects. Such projects are authorized to study means to improve both program administration and the effectiveness of the program in delivering nutrition related benefits.

Evaluation projects. The law mandates an annual evaluation of the program's impact on the nutritional and economic status of participating households, the agricultural economy, and the program's fairness to program participants.

In establishing demonstration project priorities for fiscal year 1979 (FY 1979), the Department will review the proposals already received and the specific comments on project operations made during proposed rulemaking. This publication, however, is not intended to solicit comments on particular demonstration projects. The Department will take the initiative in determining the types of demonstration and evaluation projects that should be undertaken, either through publication of a Notice of Intent in the Federal Register or a solicitation made in conformance with the Federal Procurement Regulations. This should assure that the Department achieves its demonstration project priorities given the limited availability of funds for this purpose.

Approval of proposals. Proposals will be evaluated by a panel consisting of Departmental and Agency personnel. Selection will be based on the bidder's responsiveness to both general and specific project criteria.

Pre-Operational rulemaking procedures. Applicable rulemaking requirements contained in the Administrative Procedure Act will be followed prior to project implementation.

Federal financial participation. The Department will assume up to 100 percent of State agency costs involved in demonstration projects, to the extent that such costs exceed those usual and customary to program operations.

All cross-referenced "reserved" sections of the proposed regulations refer to future rulemaking. Current regulations relevant to reserved sections will remain in force until revoked, superseded or modified by future regulatory language.

All comments received on sections of the proposed rulemaking that impact on current HEW regulations will be taken into consideration in analyzing and developing the final proposal.

Reorganization of the Regulations

The food stamp regulations have been extensively revised and restructured. When reviewing the reorganized material, please note that several new provisions are reserved since these provisions will be proposed rulemaking in a second package of regulations. In addition, several provisions in the current regulations are expected to change when the second package of proposed rulemaking is published. To show that these current provisions have not been deleted but will remain in force and effect until the second package is published as final rulemaking, these provisions in the current regulations are retained by reference but are not restated.

Certain sections of the Food Stamp Act are effective without publication of regulations. These sections include: 4(c) (notice and comment rulemaking requirements, advance copies of rules to the Committees); 7(c) (coupon design); and 11(g) (injunctive relief against State agencies).

To help in relating the current regulations to the proposed regulation, the following table of redesignations has been compiled:

Table of Redesignations

[1]The language in these paragraphs of the old regulations will remain in full force and effect.

The proposed structure of subchapter C is as follows:

SUBCHAPTER C—FOOD STAMP PROGRAM

Part
270 [Reserved]
271 General information and definitions.
272 Requirements for participating State agencies.
273 Certification of eligible households.
274 Issuance and use of food coupons.
275 Program monitoring systems (reserved).
276 State agency liabilities and federal sanctions (reserved).
277 Payment of certain administrative costs of State agencies (reserved).
278 Participation of retail food stores, wholesale food concerns and banks.
279 Administrative and judicial review—food retailers and food wholesalers.
280 Emergency food assistance for victims of disasters (reserved).
281 Designation of Indian tribes as State agencies (reserved).
282 Demonstration, research, and evaluation projects.

PART 270 [RESERVED]

1. Part 270 is revised and redesignated as Part 271. The new Part 270 is reserved. The definitions in paragraphs (a), (uu), and (vv) of former section 270.2 remain in force and effect but are redesignated in Part 271. The new Part 271 reads as follows:

PART 271—GENERAL INFORMATION AND DEFINITIONS

Sec.
271.1 General purpose and scope.
271.2 Definitions.
271.3 Delegations to FNS for administration.
271.4 Delegations to States for administration.
271.5 Coupons as obligations of the United States, crimes, and offenses.
271.6 Complaint procedures.

Authority: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 271.1 General purpose and scope.

(a) *Purpose of the Food Stamp Program.* The Food Stamp Program is designed to promote the general welfare and to safeguard the health and well being of the Nation's population by raising the levels of nutrition among low-income households. Section 2 of the Food Stamp Act of 1977 states, in part:

Congress hereby finds that the limited food purchasing power of low-

V 4 3 — 8 5 M Y 2 7 8 UMI

income households contributes to hunger and malnutrition among members of such households. Congress further finds that increased utilization of food inestablishing and maintaining adequate national levels of nutrition will promote the distribution in a beneficial manner of the Nation's agricultural abundance and will strengthen the Nation's agricultural economy, as well as result in more orderly marketing and distribution of foods. To alleviate such hunger and malnutrition, a food stamp program is herein authorized which will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.

(b) *Scope of the regulations.* Part 271 contains general information, definitions and other material applicable to all parts of this subchapter. Part 272 sets forth policies and procedures governing State agencies which participate in the Program. Part 273 describes the eligibility criteria to be applied by State agencies and related processing requirements and standards. Part 274 provides requirements for the issuance of coupons to eligible households and establishes related issuance responsibilities. Part 275 sets forth guidelines for monitoring the Food Stamp Program, analyzing the results and formulating corrective action. Part 276 establishes State agency liability and certain Federal sanctions. Part 277 outlines procedures for payment of administrative costs of State agencies. Part 278 delineates the terms and conditions for the participation of retail food stores, wholesale food concerns, meal services and banks. Part 279 establishes the procedures for administrative and judicial reviews requested by food retailers, food wholesalers and meal services.. Part 280 explains procedures for issuing emergency coupon allotments to certain victims of disasters unable to purchase adequate amounts of food. Part 281 sets forth guidelines for designating Indian tribes as State agencies. Part 282 provides guidelines for initiation, selection and operation of demonstration, research and evaluation projects.

§ 271.2 Definitions.

"Affidavit" (reserved).

"Allotment" means the total value of coupons a household is authorized to receive during each month or other time period.

"Application for participation" means the application to participate in the program, as designed or approved by FNS, which is completed by a household member or authorized representative.

"Authorization to participate card (ATP)" means a document which is issued by the State agency to a certified household to show the allotment the household is authorized to receive on presentation of such document.

"Bulk storage point" means an office of the State agency or any person, partnership, corporation, organization, political subdivision, or other entity with which a State agency has contracted for, or to which it has assigned responsibility for, the security and storage of food coupons.

"Communal dining facility" means a public or nonprofit private establishment, approved by FNS, which prepares and serves meals for elderly persons, or for Supplemenmtal Security Income (SSI) recipients, and their spouses. It shall include senior citizens' centers, apartment buildings occupied primarily by elderly persons or SSI households, public or private nonprofit establishments (eating or otherwise) that feed elderly persons or SSI recipients, and federally subsidized housing for the elderly at which meals are prepared for and served to the residents. It shall also include private establishments that contract with an appropriate State or local agency to offer meals at concessional prices to elderly persons or SSI recipients.

"Coupon" means any coupon, stamp, or certificate provided pursuant to the provisions of this subchapter for the purchase of eligible food.

"Coupon issuer" means any office of the State agency or any person, partnership, corporation, organization, political subdivision, or other entity with which a State agency has contracted for, or to which it has assigned responsibility for, the issuance of coupons to households.

"Drug addiction or alcoholic treatment and rehabilitation program" means any drug addiction or alcoholic treatment and rehabilitation program conducted by a private nonprofit organization or institution which is certified by the State agency or agencies designated by the Governor as responsible for the administration of the State's programs for alcoholic and drug addicts puruant to Pub. L. 91-616, "Comprehensive Alcohol Abuse and Alcoholism Prevention Treatment and Rehabilitation Act of 1970" and Pub. L. 92-255, "Drug Abuse Office and Treatment Act of 1972" as providing treatment that can lead to the rehabilitation of drug addicts or alcoholics.

"Elderly person" means a person 60 years of age or older.

"Eligible food" means: (1) any food or food product intended for human consumption except alcoholic beverages, tobacco, and hot foods and hot food products prepared for immediate consumption; (2) seeds and plants to grow foods for the personal consumption of eligible households; (3) meals prepared and delivered by an authorized meal delivery service, or served by a communal dining facility for the elderly or SSI households, to elderly persons, SSI households, and their spouses, and to households eligible to use coupons under § 274.10 (b) or (c); (4) Meals prepared and served by an authorized drug addict or alcoholic treatment and rehabilitation center to households eligible to use coupons under § 274.10(d) and (5) in the case of certain eligible households living in areas of Alaska as specified in § 274.10(e), equipment for the purpose of procuring food for eligible households, including nets, lines, hooks, fishing rods, harpoons, knives, and other equipment necessary for subsistence hunting and fishing but not equipment for the purpose of transportation, clothing, or shelter nor firearms, ammunition, or other explosives.

"Federal fiscal year" means a period of 12 calendar months beginning with each October 1 and ending with September 30 of the following calendar year.

"FNS" means the Food and Nutrition Service of the U.S. Department of Agriculture.

"Food Stamp Act" means the Food Stamp Act of 1977 (P.L. 95-113), including any amendments.

"General assistance (GA)" means cash assistance which is financed entirely by State or local funds and which is administered by the State agency, as defined in this section.

"Identification (ID) card" means a serially numbered card which identifies the bearer as eligible to receive and use food coupons.

"Immigration and Naturalization Service (INS)" means the Immigration and Naturalization Service, U.S. Department of Justice.

"Institution of higher education" means any institution providing post-high school education, including but not limited to, colleges, universities, and vocational and technical schools at the post-high school level.

"Low-income household" means a household whose annual income does not exceed 125 percent of the Office of Management and Budget poverty guidelines.

"Meal delivery service" means a political subdivision, a private nonprofit organization, or a private establishment with which a State or local agency has contracted for delivered meals, which prepares and delivers meals and meets the requirements of § 278.1(d).

"Medicaid" means medical assistance under title XIX of the Social Security Act, as amended.

"Nonprofit cooperative food purchasing venture" means any private nonprofit association of consumers whose members pool their resources to buy food.

"Overissuance" means the amount by which coupons issued to a household exceed the amount it was eligible to receive.

"Program" means the Food Stamp Program conducted under the Food Stamp Act and regulations.

"Project area" means the county or geographic entity designated by a State as the administrative unit for program operations. Upon FNS approval, a county, city, Indian reservation, welfare district, or any other entity with clearly defined geographic boundaries, or any combination of such entities, may be designated as a project area, or States as a whole may be designated as single project areas.

"Public assistance (PA)" means any of the following programs authorized by the Social Security Act of 1935, as amended: Old-Age Assistance, Aid to Families with Dependent Children (AFDC), including AFDC for children of unemployed fathers, Aid to the Blind, Aid to the Permanently and totally Disabled and Aid to Aged, Blind or Disabled.

"Regulations" means the provision of this subchapter. Regulatory citations refer to provisions of this subchapter unless otherwise specified.

"Retail food store" means: (1) an establishment or recognized department of an establishment, or a house-to-house trade route, whose food sales volume is more than 50 percent staple food items for home preparation and consumption; (2) public or private communal dining facilities and meal delivery services and drug addict or alcoholic treatment and rehabilitation programs; (3) any store selling equipment for procuring food by hunting and fishing to eligible households in Alaska, as specified in the definition of eligible food; (4) any private nonprofit cooperative food purchasing venture, including those whose members pay for food prior to receipt of the food; and (5) a farmers market.

"Secretary" means the Secretary of the U.S. Department of Agriculture.

"Staple food" means those food items intended for home preparation and consumption, which include meat, poultry, fish, bread, cereals, vegetables, fruits, fruit and vegetable juices, and dairy products. Accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, and spices are not staple foods for the purpose of qualifying a firm to participate in the program as a retail food store.

"State" [Reserved].

"State agency" [Reserved].

"Supplemental security income (SSI)" means monthly cash payments made by the Social Security Administration to an aged, blind or disabled individual who meets the requirements for such aid under title XVI of the Social Security Act, as amended, and also includes State supplementary payments made by a State on a regular basis.

"Thrifty Food Plan" means the diet developed by the Department that includes specific foods, in quantities, the cost of which is the basis for the allotments issued to households according to household size and income.

"Wholesale food concern" means an establishment which sells eligible food to retail food stores or to meal services for resale to households.

§ 271.3 Delegations to FNS for administration.

(a) *Delegation.* Within the Department, FNS shall act on behalf of the Department in the administration of the program. When authority is delegated to FNS, it may be carried out by the Administrator or by another official of FNS as designated. The Secretary reserves the right at any time to withdraw, modify, or amend any delegation of authority to FNS.

(b) *Claims settlement.* FNS shall have the power to determine the amount of and to settle and adjust any claim arising under the provisions of the Act or this subchapter, and to compromise or deny all or part of any claim.

(c) *Demonstration authority.* FNS is authorized to undertake demonstration projects which test new methods designed to improve program administration and benefit delivery. FNS is authorized to initiate program research and evaluation efforts for the purposes of improving and assessing program administration and effectiveness. The procedure for initiating and conducting these projects is established in Part 282.

§ 271.4 Delegations to State agencies for administration.

(a) *General delegation.* The State agency shall be responsible for the administration of the program within the State, including, but not limited to: (1) Certification of applicant households; (2) Issuance, control, and accountability of coupons; (3) Outreach activities; (4) Developing and implementing complaint procedures; (5) Developing, implementing, and evaluating training; (6) Conducting reviews; (7) Keeping records necessary to determine whether the program is being conducted in compliance with these regulations; and (8) Submitting accurate and timely financial and program reports.

(b) *Claims delegation.* FNS delegates to the State agency, subject to the standards in § 273.18, the authority to determine the amount of, and settle, adjust, compromise, or deny all or part of any claim which results from fraudulent or nonfraudulent overissuances to participating households.

§ 271.5 Coupons as obligations of the United States, crimes and offenses.

(a) *Coupons as obligations.* Pursuant to section 15(d) of the Food Stamp Act, coupons are an obligation of the United States within the meaning of 18 United States Code (U.S.C.) 8. The provisions of title 18 of the United States Code, "Crimes and Criminal Procedure," relative to counterfeiting, misuse and alteration of obligations of the United States are applicable to coupons.

(b) *Penalties.* Any unauthorized issuance, use, transfer, acquisition, alteration, possession, or presentation of coupons or ATPs may subject any individual, partnership, corporation, or other legal entity to prosecution under sections 15 (b) and (c) of the Food Stamp Act or under any other applicable Federal, State or local law, regulation or ordinance.

Sections 15 (b) and (c) of the Food Stamp Act read as follows:

(b) Whoever knowingly uses, transfers, acquires, alters, or possesses coupons or authorization cards in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons or authorization cards are of the value of $100 or more, be guilty of a felony and shall, upon conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, or, if such coupons or authorization cards are of a value of less than $100, shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not more than $1,000 or imprisoned for not more than one year, or both.

(c) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred, or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act shall be guilty of a felony and shall, upon conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not more than $1,000 or imprisoned for not more than one year, or both.

(c) *Security for coupons and ATPs.* All individuals, partnerships, corporations, or other legal entities including State agencies and their delegatees (referred to in this paragraph as "persons") having custody, care and control of coupons and ATPs shall at all times take all precautions necessary to avoid acceptance, transfer, negotiation, or use of spurious, altered, or counterfeit coupons and ATPs and to avoid any unauthorized use, transfer, acquisition, alteration or possession of coupons and ATPs. These persons shall safeguard coupons and ATPs from theft, embezzlement, loss, damage, or destruction.

(d) *Fraud.* Participant fraud is defined in § 273.16.

(e) *Coupon issuers.* (1) Any coupon issuer or any officer, employee or

V 4 3 — 8 5

agent, thereof convicted of failing to provide the monthly reports required in § 274.5 or convicted of violating Part 274 shall be subject to a fine of not more than $1,000, or imprisoned for not more than one year, or both.

(2) Any coupon issuer or any officer, employee or agent, thereof, convicted of knowingly providing false information in the reports required under § 274.5 shall be subject to a fine of not more than $10,000, or imprisoned not more than five years, or both.

§ 271.6 Complaint procedure.

(a) *State agency responsibility.* (Reserved)

(b) *Regional office responsibility.* (1) Persons or agencies desiring program information or wishing to file a complaint may contact the appropriate FNS Regional Office.

(i) For Delaware, the District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, the Virgin Islands of the United States, and West Virginia: Mid-Atlantic Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 1 Vahlsing Center, Route 526, Robbinsville, New Jersey 08691.

(ii) For Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: Southeast Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 1100 Spring Street, N.W., Room 200, Atlanta, Georgia 30309.

(iii) For Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin: Midwest Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 536 South Clark Street, Chicago, Illinois 60605.

(iv) For Arkansas, Louisiana, New Mexico, Oklahoma, and Texas: Southwest Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 1100 Commerce Street, Suite 5-C-30, Dallas, Texas 75242.

(v) For Alaska, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon and Washington: Western Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 550 Kearny Street, Room 400, San Francisco, California 94108.

(vi) For Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont: New England Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 33 North Avenue, Burlington, Mass. 01803.

(vii) For Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming: Mountain Plains Regional Office, U.S. Department of Agriculture, Food and Nutrition Service, 2420 West 26th Avenue, Suite 430-D, Denver, Colo. 80211.

(2) Complainants shall be advised by Regional Office personnel of the appropriate State complaint handling and fair hearing procedures. Discrimination complaints shall be handled by FNS. Other complaints shall be pursued by FNS, rather than the State agency, upon household request, unless the complaint is one upon which the complainant wishes to request a fair hearing.

2. Part 271 is extensively revised and the contents redesignated among the new Parts 272 through 277. The following paragraphs of former Part 271 remain in force and effect but are redesignated:

271.1(a) as 272.8; 271.1(c) as 272.1(b); 271.1(h) as 277.16; 271.1(i) as 272.2; 271.1(k) as 272.6(b); 271.1(r) as 272.1(d); 271.1(t) as 276; 271.2 as 277; 271.4(a)(7) as 272.5(a); 271.6(g) as 272.5(b); 271.7(a)–(d) as 276; and 271.8 as 272.3.

The new Part 272 reads as follows:

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

Sec.

272.1 General terms and conditions.
272.2 Federal/State agreement (Reserved).
272.3 Plans of Operation (Reserved).
272.4 Program administration and personnel requirements.
272.5 Operating guidelines (Reserved).
272.6 Outreach.
272.7 Nondiscrimination compliance.
272.8 Dual operations (Reserved).

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 272.1 General terms and conditions.

(a) *Coupons as income.* The allotment provided any eligible household shall not be considered income or resources for any purpose under any Federal, State, or local laws including, but not limited to, laws on taxation, welfare, and public assistance programs.

(b) *No aid reduction.* (Reserved)

(c) *Disclosure.* Use or disclosure of information obtained from applicant households, exclusively for the Program, shall be restricted to persons directly connected with the administration or enforcement of the provisions of the Food Stamp Act or Regulations.

(d) *Information available to the public.* (Reserved)

(e) *records and reports.* Each State agency shall keep such records and submit such reports and other information as required by FNS.

(f) *Retention of records.* Each State agency shall retain all program records in an orderly fashion, for audit and review purposes, for a period of three years from the month of origin of each record. The State agency shall retain fiscal records and accountable documents for three years from the date of fiscal or administrative closure. Fiscal closure means that obligations for or against the Federal government have been liquidated. Administrative closure means that the State agency has determined and documented that no further action to liquidate the obligation is appropriate. Fiscal records and accountable documents include, but are not limited to claims, documentation of lost benefits, and form FNS-286, "Certification of Transfer of Household Benefits." Retention methods for ATP cards are provided in Part 274.

(g) *Implementation.* The implementation schedule for any amendment to the regulations shall be specified in the amendment.

§ 272.2 Federal/State Agreement [Reserved]

§ 272.3 Plans of Operations [Reserved]

§ 272.4 Program administration and personnel requirements.

(a) *Merit personnel.* (1) State agency personnel used in the certification process shall be employed in accordance with the current standards for a Merit System of Personnel Administration or any standards later prescribed by the United States Civil Service Commission under section 208 of the Intergovernmental Personnel Act of 1970.

(2) State agency employees meeting the standards outlined in paragraph (1) of this section shall perform the interviews required in § 273.2(e). Exceptions to the use of State Merit System personnel in the interview and certification process are SSI households certified under § 273.2(1) and disaster victims certified under Part 280. Volunteers and other non-State agency employees shall not be used for certification interviews or to certify food stamp applicants. Volunteers may be used in related activities such as outreach, prescreening, assisting applicants in completing the application, and securing needed verification. Individuals and organizations who are parties to a strike or lockout, and their facilities, may not be used in the certification process except as a source of verification for information supplied by the applicant. Only authorized employees of the Sate agency, coupon issuers, coupon bulk storage points and federal employes involved in administration of the program shall be permitted access to food coupons, ATPs or other issuance documents.

(b) *Staffing standards.* The State agency shall employ sufficient staff to certify and issue benefits to eligible households and process fair hearing requests within the timeliness standards set forth in these regulations. Outreach activities and other program functions shall be performed as specified in these regulations.

(c) *Bilingual requirements.* State agencies shall provide bilingual staff and materials as required by this subsection.

(1) The requirements for use of bilingual staff and materials are based on the estimated total number of low income households in a project area compared to the number of low income households which speak the same non-English language (a single-language minority). Single language minority refers to households which speak the same non-English language and which do not contain adult(s) fluent in English as a second language. These households shall include both participating and nonparticipating low income households. When there are 150 or more low income households of a single-language minority in a project area with 3000 or more low income households, bilingual service shall be provided. Bilingual service is also required in project areas with less than 3,000 low income households, where there are 50 or more single-language minority low income households.

(2) State agencies shall use sufficient bilingual certification staff or interpreters, and bilingual materials in projects meeting the criteria in paragraph (c)(1) of this section. In large project areas that have more than one certification office and that are subject to the requirements of paragraph (c)(1) of this section, bilingual needs must be appraised and service provided on the basis of need at specific sites.

(3) Bilingual services shall be provided in project areas with seasonal influxes of non-English speaking households, if during the seasonal influx the project area meets the requirements of paragraph (c)(1) of this section.

(4) State agencies shall ensure that projects meeting the population criteria outlined in paragraph (c)(1) of this section provide sufficient bilingual capability for the timely processing of non-English speaking applicants.

(5) Bilingual materials shall include application forms, required notices and basic program information material.

(6) State agencies and local offices shall develop estimates of the numbers of low income single language-minority households and their ratios to the total number of low income households for each project area by utilizing census data (including the Census Bureau's *Current Population Report: Population Estimates and Projections,* Series p. 25, No. 627) and knowledge of project areas. Local Bureau of Census offices, Community Services Administration offices, Community Action Agencies, planning agencies, and school officials may be important sources of information in determining the scope of bilingual need.

(7) State agencies shall provide FNS with the data used to determine the need for bilingual services.

(d) *Divisions of responsibilities.* (1) *Requirements.* The State agency shall divide the responsibility for eligibility determinations and food coupon issuance between certification, data management, and issuance units. The certificaiton unit shall be responsible for the determination of household eligibility and the creation of records and documents to authorize the issuance of coupons to eligible households. The data management unit, in response to input from the certificaiton unit, shall create and maintain the household issuance record (HIR) master file on cards, computer discs, tapes, or similar memory devices. The issuance unit shall provide certified households with the authorized allotments.

(2) *Exceptions.* With prior written FNS approval as a part of its Plan of Operation, a project area may combine unit responsibilities where all other alternatives have been explored and found to be administratively infeasible.

(i) To approve combined operations, the State agency shall establish special review requirements which at a minimum shall include:

(A) Biweekly reconcilation and verification of transactions; and

(B) Semiannual comparison of HIR cards and case records as required by § 274.6(d) and, at least once every other month, second party review of certification actions.

(ii) The State agency shall annually determine whether each combined operation continues to be justified and shall so advise FNS in writing. If the combined operation is to continue, the reasons for the determination shall be provided.

(e) *Training.* The State agency shall institute a comprehensive and continuing training program for all personnel who are assigned responsibility for the certification of applicant households, outreach staff including hotline operators, and individuals involved in prescreening activities.

(1) *Minimum Requirements.* (i) The State agency shall designate a State training coordinator who develops training materials, supervises the conducting of training sessions, ensures that appropriate personnel receive training and assures compliance with the public participation standards specified in paragraph (e)(1)(iv) of this section. In addition, the State agency shall designate additional staff at either the State or local level to provide training to the appropriate personnel.

(ii) State agency training programs shall cover eligibility criteria, certification procedures, household rights and responsibilities, and other job-related responsibilities concerning the certification of households. The content of training programs shall be reviewed on a semiannual basis in light of performance deficiencies identified through the State agency's performance reporting system and modifications made where warranted. Changes in policy or procedures stemming from court actions or revisions to legislation and regulations shall be promptly reflected in State training programs.

(iii) Training shall be provided to all new employees who are assigned responsibility for the certification of households prior to the assumption of those duties and shall also be provided periodically to existing staff. Periodic training to existing staff shall be provided based on individual performance, performance data drawn from the Performance Reporting System, and the degree to which policy changes occur.

(iv) The State agency shall allow public attendance at formal certification training sessions that are conducted on a statewide, citywide or regional (multiproject area) basis. Public attendance at these training sessions shall be allowed for ten percent of the total attendance at the session, or ten training slots, whichever number is smaller. The State training coordinator shall notify the public of these training sessions through appropriate means.

(v) Training shall also be provided to State agency outreach workers, including hotline operators, and others who pre-screen or provide other services to applicants. Although this training need not be as comprehesive as that for certification personnel, it should be in sufficient detail and frequency to ensure that low income households have access to accurate program information and that accurate pre-screening determinations are made.

(vi) Training shall also be provided to volunteers and to staff of other organizations and agencies involved in outreach, pre-screening, and disbursement of program information. The training should be in sufficient detail and frequency to ensure that information provided to low income households is accurate.

(vii) Training shall be provided to each State agency hearing official at least once during the first year of official's tenure. This training shall represent a detailed and comprehensive study of the Act, regulations and State agency hearing procedures.

(2) *FNS Review.* (i) FNS will review and approve State agency procedures for training as a part of the review of the Plan of Operation required by § 272.3.

(ii) FNS will review the effectiveness of State agency training based on information obtained from the Performance Reporting System, audits and other sources.

(f) *Locations and hours of certification and issuance service.* (reserved)

§ 272.5 Operating guidelines [Reserved]

§ 272.6 Outreach.

(a) *General purpose.* [Reserved]

(b) *Minimum requirements.* [Reserved]

M Y 2 — 7 8 UMI

V 43 | 85 MY 2 78 UMI

(c) *Staff.* [Reserved]
(d) *Monitoring.* [Reserved]
(e) *Outreach plan.* [Reserved]
(f) *Additional minimum procedures for the transition.* State agencies shall develop special procedures for informing low-income households about the program changes required by these regulations.

(1) *Printed information.* (i) *Notices.* Participating households shall be provided with at least one notice explaining the program changes. The notice may be mailed separately or with the ATP or may be otherwise given to each household. At a minimum, the notice shall describe the new financial eligibility requirements, elimination of the purchase requirement, participant hearing and appeal rights, and the timing of program changes. Notices shall be provided to individual households no later than one month prior to implementation of new eligibility and other regulation changes, and shall also be available at all certification offices for a minimum of six months thereafter.

In addition, a similar notice shall be provided to all recipients of public assistance and SSI if the State administers a supplemental payments program. These notices shall be provided according to the same schedule as the notices to food stamp households and shall also be available at all public assistance offices. When the project area meets the criteria described in § 272.4(c), notice shall be provided in languages other than English.

(ii) *Other printed materials.* State agencies shall also make available written information, such as brochures or pamphlets that describe all financial and nonfinancial eligibility criteria, benefit levels, the application process and participant rights and responsibilities. This written information shall be provided at food stamp certification offices and public assistance offices and shall be made available to local social security offices, State employment services offices, and local offices that administer unemployment compensation programs. This written information shall be available no later than one month prior to implementation.

(2) *Other publicity efforts.* State agencies shall publicize program changes through use of press releases issued in each project area and radio spots. State agencies are also encouraged to use TV spots to alert low-income households to these changes. These publicity efforts shall be initiated no later than one month prior to implementation and shall continue for six months thereafter.

(3) *Hotlines.* During the time period described in paragraph (f)(1)(i) of this section, State agencies shall operate toll-free hotlines at the State level that can be used to secure information on program changes. Project areas may also operate hotlines. Hotlines shall be staffed by employees or volunteers who are generally knowledgeable in food stamp requirements and procedures so that accurate information is provided and complaints are referred to the appropriate officials for resolution. State agencies shall install an adequate number of telephone lines that operate during normal business hours to ensure that callers have reasonable access to program information. At a minimum, State agencies shall install one telephone line for caseloads of less than 100,000 people, two lines for caseloads between 100,000 and 500,000, three lines for caseloads of between 500,000 and one million, and four lines for caseloads of over one million. State agencies may substitute project area lines for State level lines provided that the project area lines meet the minimum requirements contained in this subsection and there is at least one toll-free hotline at the State level. The hotline number shall be posted in certification offices and included in the printed materials required in paragraph (f)(1)(ii) of this section. In addition, State agencies may publicize the hotline number through radio and TV.

(4) *Volunteers.* State agencies shall notify groups and organizations identified in outreach plans as well as other groups and organizations that can assist in contacting low-income households of the availability of training and printed materials on the new program requirements. State agencies shall provide training and printed materials described in paragraph (f)(1) of this section to interested groups and organization upon request.

§ 272.7 Nondiscrimination compliance.

(a) *Requirement.* State agencies shall not discriminate against any applicant or participant in any aspect of program administration, including, but not limited to, the certification of households, the issuance of coupons, the conduct of fair hearings, or the conduct of any other program service for reasons of age, race, sex, religious creed, national origin or political beliefs.

(b) *Complaints.* (1) People who believe that they have been subject to discrimination as specified in paragraph (a) of this section may file a complaint with the Secretary or the Administrator, FNS.

(2) A complaint must be filed no later than 180 days from the date of the alleged discrimination. However, the time of filing may be extended by the Secretary.

(3) The State agency shall accept all complaints of discrimination, written or verbal, and forward them promptly to the Secretary or the Administrator, FNS.

(4) In the event an individual verbally alleges that a discriminatory act has been committed but the individual does not put it in writing, the person receiving the complaint shall do so. If possible, the following information shall be solicited from the complainant:

(i) Name, address and telephone number or other means of contacting the person alleging discrimination.

(ii) Location and name of the organization or office which is accused of discriminatory practices.

(iii) The nature of the incident, action, or the aspect of program administration that led the person to allege discrimination.

(iv) The reason for the alleged discrimination (age, race, sex, religious creed, national origin or political belief).

(v) Names, titles (if appropriate), and addresses of persons who may have knowledge of the discriminatory acts.

(vi) The date or dates on which the alleged discriminatory actions occurred.

(5) Written complaints will be accepted by the Secretary or the Administrator, FNS, even if the information specified in paragraph (b)(4) of this section is not complete. Persons who file written complaints are encouraged to provide this information to facilitate investigation. Investigations will be conducted only if information concerning paragraphs (b)(4) (ii), (iii), (iv) of this section is provided.

(6) Discrimination is prohibited on the basis of § 11(c) of the Food Stamps Act and additionally discrimination on the basis of race, color or national origin is prohibited by Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d). Enforcement action may be brought pursuant to either or both authorities. Matters brought pursuant to Title VI shall be processed in accord with 7 CFR part 15.

(c) *Reviews.* (Reserved)

(d) *Public notification.* State agencies shall: (1) Publicize the procedures described in paragraph (b) of this section.

(2) Ensure that all offices involved in administering the program and that also serve the public, display the nondiscrimination poster "• • • And Justice for All."

(3) Ensure that participants and other low income households have access to information regarding nondiscrimination statutes and policies, complaint procedures, and the rights of participants, within ten days of the date of a request.

(e) *Data Collection.* (1) The State agency shall require the eligibility worker to record the racial/ethnic category of the household. The racial/ethnic categories are: American Indian or Alaskan Native, Asian or Pacific Islander, Black (not of Hispanic origin), Hispanic, and White (not of Hispanic origin). The assigned category will be based on the eligibility worker's observation during the certification interview.

(2) State agencies shall develop and implement a recordkeeping system that contains data by project area and racial/ethnic category for the following:

(i) Total population;
(ii) Low income caseload;
(iii) Applications received;
(iv) Applications certified;
(v) Applications denied;
(vi) Actual participation;
(vii) Fair hearings requested;
(viii) Fair hearings decided in favor of complainant; and
(ix) Staff employed by food stamp offices.

(f) *Reports.* (Reserved)

§ 272.8 Dual Operation [Reserved]

3. Parts 272 and 273 are revised and redesignated as Parts 278 and 279, respectively. The new Part 273 reads as follows:

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

Sec.
273.1 Household concept.
273.2 Application processing.
273.3 Residency.
273.4 Citizenship and alien status.
273.5 Tax dependency.
273.6 SSI cash-out States.
273.7 Work registration requirement.
273.8 Resource eligibility standards.
273.9 Income and deductions.
273.10 Determining household eligibility and benefit levels.
273.11 Certifying households with special income circumstances.
273.12 Reporting changes.
273.13 Notice of adverse action.
273.14 Recertification.
273.15 Fair hearings.
273.16 Fraud disqualification.
273.17 Restoration of lost benefits.
273.18 Claims against households.
273.19 Sixty day continuation of certification.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 273.1 Household concept.

(a) *Household definition.* A household may be composed of any of the following individuals or groups of individuals, provided that such individuals or groups are not residents of an institution, except as otherwise specified in § 273.1(d), or commercial boarding house:

(1) An individual living alone;

(2) An individual living with others, but who customarily purchases food and prepares meals for home consumption separate and apart from the others;

(3) An individual who is a boarder, living with others and paying reasonable compensation to the others for meals for home consumption;

(4) A group of individuals living together and customarily purchasing food and preparing meals together for home consumption; or

(5) A group of individuals who are boarders, living with others and paying reasonable compensation to the others for meals for home consumption.

(b) *Nonhousehold members.* The following individuals residing with a household shall not be considered household members in determining the household's eligibility or allotment:

(1) *Roomers.* Individuals to whom a household furnishes lodging, but not meals, for compensation.

(2) *Boarders.* Individuals to whom a household furnishes lodging and meals with the following restrictions:

(i) Boarder status shall not be extended to a spouse (or to a common law spouse) of a member of the household; or to children under 18 years of age, if under the parental control of a member of the household.

(ii) Boarder status shall not be extended to persons paying less than a reasonable monthly payment for meals. An individual furnished both meals and lodging by the household, but paying compensation of less than a reasonable amount, will be considered a member of the household which provides the meals and lodging. When the boarder's payments for room are distinguishable from the payments for meals, only the amount paid for meals will be evaluated to determine if reasonable compensation is being paid for meals. A reasonable monthly payment for meals shall be any of the following:

(A) An amount which equals or exceeds the Thrifty Food Plan for the appropriate size of the boarder household;

(B) An amount recognized by the State agency as the prevailing local rate for board in the low income area, if less than the amount of the Thrifty Food Plan;

(C) An amount which corresponds to the number of meals for which the boarder is paying compensation to the household. Boarders may pay less than the Thrifty Food Plan because they do not receive all their meals through the board arrangement. In that event, a reasonable monthly amount shall be computed by multiplying the number of meals eaten under the board arrangement by 60 cents per meal.

(3) *Live-in-attendants.* Individuals who reside in a household to provide medical, housekeeping, child care or other similar personal services.

(4) *Ineligible aliens.* Individuals who do not meet the citizenship or permanent alien status in § 273.4(a).

(5) *SSI recipients in "cash-out" States.* Recipients of SSI benefits who reside in a State designated by the Secretary of Health, Education, and Welfare to have specifically included the value of the coupon allotments in its State supplemental payments.

(6) *Student tax dependents.* Students who are or could be properly claimed as tax dependents for Federal income tax purposes by a member of a household which is not eligible to participate in the Food Stamp Program, in accordance with § 273.5.

(7) *Disqualified individuals.* Individuals disqualified for fraud, as set forth in § 273.16, or college students disqualified for failure to meet the school year work registration requirements, as set forth in § 273.7(b)(7)(i).

(8) *Others.* Other individuals who share living quarters with the household but who do not customarily purchase food and prepare meals with the household.

(c) *Boarding house.* Residents of boarding houses are not eligible for program benefits. For program purposes, a boarding house shall be defined as an establishment which is recognized by the community as a commercial enterprise which offers meals and lodging for compensation. The number of boarders residing in a boarding house shall not be used to determine if a boarding house is a commercial enterprise. The household of the proprietor of a boarding house may participate in the program separate and apart from the residents of the boarding house, if that household meets all of the eligibility requirements for program participation.

(d) *Head of household.* The household member who was responsible for acquiring the greatest amount of earned income within the previous 60 days shall be classified as the head of the household. For example, if a person who earned the household's greatest amount of income in the 60 days prior to applying for benefits is unemployed at the time of application and temporarily has less income than another household member, the unemployed person would still be classified as the head of household. This classification is made primarily for enforcing § 273.7(c) which imposes a 60-day disqualification period upon households if it is established that the head of household voluntarily quit a job without good cause. State agencies shall not impose additional requirements based on the classification of head of household, such as requiring that the head of household, rather than another responsible member of the household, appear at the certification office to make application for benefits. In the event no member of the household had earned income the applicant shall designate the head of the household.

(e) *Residents of institutions.* Individuals shall be considered residents of

V 4 3 — 1 8 5

an institution when the institution provides them with the majority of their meals as part of the institution's normal services. Residents of institutions are not eligible for participation in the Program, with the following two exceptions:

(1) Residents of federally subsidized housing for the elderly, built under either section 202 of the Housing Act of 1959 or section 236 of the National Housing Act.

(2) Narcotic addicts or alcoholics who for the purpose of regular participation in a drug or alcohol treatment and rehabilitation program reside at a facility or treatment center as described in paragraph (f)(1)(iv) of this section.

(f) *Authorized representatives.* (1) The head of the household, spouse, or any other responsible member of the household may designate an authorized representative to act on behalf of the household in one or all of the following capacities:

(i) *Making application for the program.* When the head of the household or the spouse cannot make application, another household member may apply or an adult nonhousehold member may be designated as the authorized representative for that purpose. The head of the household or the spouse should prepare or review the application whenever possible, even though another household member or the authorized representative will actually be interviewed. The State agency shall inform the household that it will be held liable for any overissuance which results from erroneous information given by the authorized representative, except as provided in § 273.11(e)(6). Adults who are nonhousehold members may be designated as authorized representatives for certification purposes only under the following conditions:

(A) The authorized representative has been designated in writing by the head of the household, or the spouse, or another responsible member of the household; and

(B) The authorized representative is an adult who is sufficiently aware of relevant household circumstances.

(ii) *Obtaining the coupons.* An authorized representative may be designated to obtain coupons. These designations shall be made at the time the application is completed and any authorized representative shall be named on the ID card. The authorized representative for coupon issuance may be the same individual designated to make application for the household or may be another individual. Even if a household member is able to make application and obtain coupons, the household should be encouraged to name an authorized representative for obtaining coupons in case of illness or other circumstances which might result in an inability to obtain coupons. The household may also designate an emergency authorized representative at a later date. An emergency authorized representative is someone not already listed on the ID card who obtains coupons when neither a household member nor the authorized representative is able to obtain them because of unforeseen circumstances. State agencies shall provide for a system that permits the designation, in writing, of an emergency authorized representative to obtain coupons with a particular ATP. A separate written designation is needed each time an emergency authorized representative is used.

(iii) *Using the coupons.* The authorized representative may use coupons to purchase food for the household, with the full knowledge and consent of the household, provided the authorized representative has the household's ID card.

(2) *Drug addict/alcoholic treatment centers as authorized representatives.* Narcotics addicts or alcoholics who regularly participate in a drug or alcoholic treatment program on a resident basis may elect to participate in the Food Stamp Program if the treatment center in which they reside has been authorized by FNS to accept food coupons. The residents shall apply and be certified for Program participation through the use of an authorized representative who shall be an employee of and designated by the private nonprofit organization or institution that is administering the treatment and rehabilitation program. The organization or institution shall apply on behalf of each addict or alcoholic and shall receive and spend the coupon allotment for food prepared by and/or served to the addict or alcoholic. The organization or institution shall also be responsible for complying with the requirements set forth in § 273.11(e).

(3) In the event the only adult living with a household is classified as a nonhousehold member as defined in paragraph (b) of this section, that individual may be the authorized representative for the minor household members.

(4) The following restrictions apply to authorized representatives:

(i) State agency employees who are involved in the certification and/or issuance processes and retailers that are authorized to accept food coupons may not act as authorized representatives without the specific written approval of the designated State agency official and only if that official determines that no one else is available to serve as an authorized representative.

(ii) Individuals disqualified for fraud shall not act as authorized representatives during the period of disqualification except as provided in paragraph (f)(3) of this section.

(iii) The State agency shall ensure that authorized representatives are properly designated. The name of the authorized representative shall be contained in the household's case file. Limits shall not be placed on the number of households an authorized representative may represent. Each certification office shall maintain a current listing of authorized representatives who are not members of the households they represent. This listing will facilitate periodic reviews, which the State agency should conduct, to ensure that authorized representatives with access to large numbers of ATPs or coupons are handling them in conformance with these regulations.

§ 273.2 Application processing

(a) *General purpose.* The application process includes filing and completing an application form, being interviewed, and having certain information verified. The State agency shall act promptly on all applications and provide food stamp benefits retroactive to the period of application to those households that have completed the application process and have been determined eligible. Expedited service shall be available to households in immediate need. Specific responsibilities of households and State agencies in the application process are detailed below.

(b) *Food stamp application form.* All State agencies shall use an application form designed by FNS. FNS may approve a deviation from that form to accommodate the use of a combined PA/food stamp application form, the requirements of a computer system, or other exigencies for which the State agency can submit adequate justification, provided the form is understandable to applicants and easy to complete. Each application form shall contain a description in understandable terms in prominent and bold face lettering of the civil and criminal provisions and penalties for violations of the Food Stamp Act.

(c) *Filing an application.* (1) *Household's right to file.* Households must file a food stamp application by submitting the form to the food stamp office either in person, through an authorized representative or by mail. The amount of time a State agency has to deliver benefits is calculated from the date the application is filed. Each household has the right to file an application form on the same day it contacts any food stamp office during office hours in the project area in which it resides. The household shall be advised that it does not have to be interviewed before filing the application and may file an incomplete application form as long as the form contains the applicant's name and address, and is signed by a responsible

member of the household or the household's authorized representative. Where there is more than one certification office in a project area, any office must accept applications when filed, but may subsequently refer the household to another office for the eligibility determination.

(2) *Contacting the food stamp office.* State agencies shall encourage households to file an application form the same day the household or its representative contacts the food stamp office in person or by telephone and expresses interest in obtaining food stamp assistance. If the household has contacted the food stamp office by telephone but does not come to the office to file the application that same day, or the household has requested food assistance in writing, the State agency shall mail an application form to the household on the same day the written request or telephone call is received.

(3) *Availability of the application form.* The State agency shall make application forms readily accessible to potentially eligible households and those groups and organizations involved in outreach efforts.

(4) *Notice of right to file.* The State agency shall post signs in the certification office which explain the application processing standards and the right to file an application on the day of initial contact. The State agency shall include similar information about same day filing in outreach materials and on the application form.

(d) *Household cooperation.* To determine eligibility, the application form must be completed, the household or its authorized representative must be interviewed, and certain information on the application must be verified. If the household refuses to cooperate with the State agency in completing this process, the application shall be denied at the time of refusal.

To be denied, the household must refuse to cooperate, not merely fail to cooperate or be unable to do so. The household shall also be determined ineligible if it refuses to cooperate in any subsequent review of its eligibility, including reviews generated by reported changes, recertifications, or as part of program review and evaluation. Once denied or terminated for refusal to cooperate, the household may reapply but shall not be determined eligible until it cooperates.

(e) *Interviews.* (1) All applicant households, including those submitting applications by mail, shall have a face-to-face interview in a food stamp office or other certification site, with a qualified eligibility worker prior to initial certification and all recertifications. The individual interviewed may be the head of household, spouse, any other responsible member of the household, or an authorized representative. The interviewer shall not simply review the information that appears on the application, but shall explore and resolve with the household unclear and incomplete information. Households shall be advised of their rights and responsibilities during the interview. The interview shall be conducted as an official and confidential discussion of household circumstances and shall be limited strictly to facts that relate directly to food stamp eligibility criteria. The applicant's right to privacy shall be protected during the interview. Facilities shall be of adequate size and layout to preserve the privacy and confidentiality of the interview.

(2) The office interview shall be waived if requested by any household which is unable to appoint an authorized representative and which has no household members able to come to the food stamp office because they are 65 years of age or older, or are mentally or physically handicapped. The State agency may waive the office interview on a case by case basis for any household which is unable to appoint an authorized representative and which has no household members able to come to the food stamp office because of transportation difficulties or similar hardships. These hardship conditions include, but are not limited to: illness, care of a household member, bad weather, or work hours which preclude in-office certification. The State agency shall determine if the transportation difficulty or hardship reported by a household warrants a waiver of the office interview and shall document this determination in the case file.

(i) The State agency shall offer households for whom the office interview is waived either a telephone interview or a home visit. Home visits shall be used only if the time of the visit is scheduled in advance with the household.

(ii) Waiver of the face-to-face interview does not exempt the household from the verification requirements, although special procedures may be used to permit the household to provide verification and thus obtain its benefits in a timely manner.

(iii) Waiver of the face-to-face interview shall not affect the length of the household's certification period.

(3) The State agency shall schedule all interviews as promptly as possible to ensure eligible households receive an opportunity to participate within 30 days after the application is filed.

(f) *Verification.* Verification is the use of third party information or documentation to establish the accuracy of statements on the application.

(1) *Verification requirements.* (i) Gross nonexempt income shall be verified for all households prior to certification. However, where all attempts to verify the income have been unsuccessful, either because the person or organization providing the income has failed to cooperate with the household and the State agency, or because other sources of verification are unavailable, the eligibility worker shall determine an amount to be used for certification purposes based on the best available information.

(ii) Resource information or the exempt status of income shall be verified prior to certification only if inconsistent with other information on the application, previous applications, or other documented information known to the State agency. In the case of loans, a legally binding agreement is not required to verify that income is exempt as a loan. A simple statement, signed by both parties, shall be sufficient to verify loans.

(iii) Nonfinancial information, except for statements concerning citizenship, shall be verified prior to certification only if inconsistent with other information on the application, previous applications, or other documented information known to the State agency. The State agency shall verify the alien status of those household members identified on the application as aliens. INS documentation in the possession of the household member shall be used to establish eligibility. Verification of a household's statement that its members are U.S. citizens is discussed in paragraph (f)(iv) of this section.

(iv) U.S. citizenship shall be verified only when the citizenship statement is inconsistent with other information on the application, previous applications, or other documented information known to the State agency. For example, verification would be required where a household presented an apparently counterfeit social security card, an employment office report stated that an individual was denied a job due to lack of U.S. citizenship, or a student reported that tax dependency was not an issue because the parents resided in another country. When verification is required, the household shall be asked to provide the appropriate verification. Appropriate verification of citizenship may consist of birth certificates, religious records, or certificates of citizenship or naturalization provided by INS, such as Identification Cards for Use of Resident Citizens in the United States, (INS Form I-179 or INS Form I-197) or U.S. Passports. If the household cannot provide any of these forms of verification, the State agency may accept other forms of verification. If the household is unable to acquire the necessary verification, the State agency shall assist the household by contacting the proper sources. Benefits shall not be delayed for lack of verification of citizenship if the household meets all

M Y 2 — 7 8 UMI

V 43 | 85 MY 2 78 UMI

other eligibility criteria. The State agency shall deny or terminate a household's benefits only if the State agency can substantiate that a household member is not a U.S. citizen and does not qualify as an eligible alien.

(v) Deductible expenses shall only be verified when the expense claimed would actually result in a deduction and one of the following criteria are met:

(A) The household wishes to claim utility expenses in excess of the State agency's utility standard. In the absence of verification, the standard utility allowance shall be used, provided the household is billed for utilities other than the telephone, separately from other shelter costs.

(B) Shelter costs, other than utilities, exceed an amount established by the State agency as reasonable for that shelter component.

(C) Other documented information is inconsistent with the household's claim that it incurs a dependent care expense or that the expense is incurred for reasons specified in § 273.9.

(2) *Sources of verification.* (i) *Documentary evidence.* State agencies shall use documentary evidence as the primary source of verification. Documentary evidence consists of a written confirmation of a household's circumstances. Examples of documentary evidence include wage stubs, rent receipts and utility bills. Although documentary evidence shall be the primary source of verification, acceptable verification shall not be limited to a single document and may be obtained through the household or other source. Where information from another source contradicts statements made by the household, the household shall be immediately afforded the opportunity to resolve the discrepancy. Whenever documentary evidence cannot be obtained, State agencies shall use alternate sources of verification such as collateral contacts and home visits.

(ii) *Collateral contacts.* A collateral contact is a verbal confirmation of a household's circumstances by a person outside of the household. The collateral contact may be made either in person or over the phone. the acceptability of a collateral contact shall not be restricted to a particular individual but may be anyone that can be expected to provide an accurate third party verification of the household's statements. Examples of acceptable collateral contacts are employers, community action groups, migrant service agencies and neighbors of the household.

(iii) *Home visits.* Home visits shall be used as verification only if documentary evidence cannot be obtained and the visit is scheduled in advance with the household.

(3) *Responsibility for obtaining verification.* (i) The household has primary responsibility for providing documentary evidence to support its income statements and to resolve any inconsistent information. Households may supply documentary evidence in person, through the mail, or through an authorized representative. The State agency shall accept any reasonable documentary evidence provided by the household and shall be primarily concerned with how adequately the verification proves the statements on the application. If it would be difficult or impossible for the household to obtain the documentary evidence in a timely manner, the State agency shall offer assistance to the household in obtaining the documentary evidence.

(ii) Whenever documentary evidence cannot be obtained, the State agency shall substitute a collateral contact or a home visit. The State agency shall rely on the household to provide the name of the collateral contact. The household may request assistance in designating a collateral contact. However, the State agency is not required to use a collateral contact designated by the household if the collateral contact cannot be expected to provide an accurate third party verification. If the collateral contact designated by the household is unacceptable, the State agency shall ask the household to designate another collateral contact. The State agency is responsible for obtaining verification from acceptable collateral contacts.

(4) *Documentation.* Case files must be documented to support eligibility, ineligibility, and benefit level determinations. Documentation shall be in sufficient detail to permit a reviewer to determine the reasonableness and accuracy of the determination. Where verification was required to resolve inconsistent information, the State agency shall document why the information was considered inconsistent and what documentation was used to resolve the inconsistent information. The State agency shall also document the reason why an alternate source of verification, such as a collateral contact or home visit, was needed, and the reason a collateral contact was rejected and an alternate requested.

(5) *Bendex.* If documentary evidence of social security benefits is not readily available from the applicant, the State agency may verify the income through the Beneficiary Data Exchange (Bendex). The amount of social security benefits reported on the application shall be used to compute the household's eligibility and benefit level pending receipt of verification from Bendex. Any household member whose social security benefits will be verified through Bendex must sign an information release form prior to submission of the request for verification.

(6) *State Data Exchange (SDX).* (Reserved)

(7) *Verification subsequent to initial certification.* (i) *Recertification.* Unchanged information shall not be verified at recertification unless the State agency has reason to believe the information has changed because of inconsistent information on the application form or other documented information known to the State agency. Changes reported at the time of recertification shall be subject to the same verification procedures as apply at initial certification, except that previously verified income and expenses which have changed by $25 or less since the last time they were verified shall not be verified again.

(ii) *Changes.* Changes reported during the certification period shall be subject to the same verification procedures as apply at initial certification, except that previously verified income or expenses which change by $25 or less since the last time they were verified shall not be verified again.

(g) *Processing standards.* The State agency shall provide eligible households that complete the initial application process an opportunity to participate as soon as possible, but not later than 30 days after the application was filed. If the 30th day falls on a weekend or holiday, the 30 day standard shall be extended to the next working day. An application is filed the day the State agency receives an application containing the applicant's name and address, which is signed by either a responsible member of the household or the household's authorized representative.

(1) *Opportunity to participate.* An opportunity to participate consists of providing households with an ATP or other authorization and having an issuance facility open and available for the household to obtain its allotment.

If the ATP or coupons are mailed, two days shall be allowed for delivery before determining if the household has been provided an opportunity to participate. A household has not been provided an opportunity to participate within 30 days of application if the ATP or allotment is mailed on the 29th or 30 day. Neither has an opportunity to participate been provided if the ATP is mailed on the 28th day but no issuance facility is open on the 30th day where the household can obtain coupons. The household must both have two days in which to receive a mailed ATP and be able to transact the ATP after receipt.

(2) *Unverified deductible expenses.* If a deductible expense cannot be verified before the 30 days expires, the State agency shall determine the household's eligibility and benefit level without providing a deduction for the claimed but unverified expense. The utility standard shall be used if the household wishes to claim utility expenses in excess of the

State's standard but the higher amounts cannot be verified. If the household is eligible without allowing the expense, an allotment which does not reflect a deduction of the expense shall be provided within 30 days after the application was filed. Once the expense is verified, the household shall be entitled to restoration of any benefits lost as a result of the disallowance of the expense, if the State agency contributed to the inability to verify the expense within the initial 30 day period. If the household would be ineligible unless the expense is allowed, the household's application shall be handled as provided in § 273.2(h) of this section.

(h) *Delays in processing.* If it appears that the State agency will not be able to determine a household's eligibility and provide an opportunity to participate within 30 days of the date the application was filed, the State agency shall take the following action:

(1) *Delays caused by the household.* (i) If the State agency cannot take any further action on the application solely because of some action the household is responsible for taking, and the State agency has documented that it has met all of its responsibilities to assist the household in completing the application process, the State agency shall issue a notice of denial to the household on the 30th day after the application was filed. The State agency shall, however, reopen the case without requiring a new application if the household takes action to complete the application process within 30 days of the date the notice of denial was mailed. However, if verification is incomplete, the State agency shall not deny the application unless the household has had at least 10 days to provide verification, from the date of the State agency's last request for verification, and the State agency has provided appropriate verification assistance. Otherwise, the application shall be held pending as provided in paragraph (h)(2) of this section. The notice of denial requirements are explained in § 273.10 (g)(1)(ii).

(ii) Households which take the necessary action to complete the application process within 30 days from the notice of denial and are found to be eligible shall be provided an opportunity to obtain benefits retroactive to the period of application within 60 days of the date the household originally filed the application.

(2) *Delays caused by the State agency.* Whenever the State agency is out of compliance with the 30 day processing standard, it must take immediate corrective action. The State agency shall not deny the application but shall instead notify the household by the 30th day that the application process has not been completed and that the application is being processed. If the State agency still needs information the State agency shall continue to process the application until it determines if the household is eligible.

If an eligible household's benefits are delayed less than 60 days from the date the application was filed, the State agency shall provide benefits retroactive to the period of application. If benefits are delayed more than 60 days, the State agency shall restore any benefits that were lost back to the period of application in accordance with § 273.17.

(i) *Expedited service.* (1) *Two day service.* State agencies shall provide an opportunity to participate within two working days of the date the application is filed to those households that are otherwise eligible and have zero net monthly income, as computed in § 273.10, or are destitute of income, as defined in this paragraph. To be considered destitute, the household's only income during the period of application must be from a nonrecurring source and must not be received or anticipated in the quarter of the month the application is filed. The quarter of the month the application is filed shall be determined by dividing the period of application into quarters as follows: 1st-7th, 8th-15th, 16th-22nd, and 23rd through the end of the month. Destitute households are divided into the following categories to determine if the income is nonrecurring:

(i) *Households losing a source of income.* Income from a terminated source shall be considered nonrecurring if it will not be received again during the balance of the month of application and the following month, or, if normally received less often than monthly, during the balance of the month of application and the normal interval between payments. For example, if income is normally received once every three months, the income is considered nonrecurring if it is not anticipated during the balance of the month of application and is not anticipated within three months of its last receipt.

(ii) *Household's anticipating new income.* Income anticipated from a new source after the quarter of the month the application is filed shall be considered nonrecurring if it has not been received from that source 30 days prior to the date the application was filed. However, if income is normally received less often than monthly, the normal interval between payments shall be substituted for the preceding 30 days to determine if the income is nonrecurring. In addition to being entitled to expedited service, households that are destitute because they are anticipating a new source of income shall be entitled to a special income calculation as provided in § 273.10.

(2) *Same day service.* State agencies shall provide destitute households and households with zero net monthly income an opportunity to participate the same day the application is filed provided:

(i) The household states that it does not have sufficient food through the next two working days;

(ii) The household's liquid resources, as defined in § 273.8, are less than the value of the Thrifty Food Plan for a one-person household; and

(iii) The household is not a resident of a drug addict or alcoholic treatment center. Residents of drug addict or alcoholic treatment centers may, however, be eligible for expedited service within two working days.

(3) *Identifying households needing expedited service.* The State agency's application procedures shall be designed to identify households eligible for expedited service at the time the household requests assistance. For example, a receptionist, volunteer, or other employee may be responsible for screening applications as they are filed or as individuals come in to apply.

(4) *Special procedures for expediting service.* The State agency shall use the following procedures when expediting certification and issuances:

(i) To expedite the certification process, the State agency shall postpone the verification required by § 273.2(f). However, the household's identity and residency shall be verified through a collateral contact or readily available documentary evidence. If possible, the household's income statements should also be verified at the same time.

(ii) Once the household has supplied the name of a collateral contact or has asked the State agency for assistance in locating a collateral contact, the State agency shall promptly contact the collateral contact or otherwise assist the household in obtaining the necessary verification.

(iii) When a household is eligible for same day service but normal issuance services cannot provide an opportunity to participate on the same day or the State agency has failed to complete the collateral contact, the State agency shall issue at least one-fourth of the allotment on the same day. Similarly, where a household is eligible for service within two working days but the State agency has failed to complete the collateral contact, the State agency shall provide at least one-fourth of the allotment within the two working days. In such instances, the collateral contact shall be promptly completed and the balance of the allotment shall be issued within five working days.

(iv) Households certified on an expedited basis shall be certified only for the month of application. The household shall receive no further benefits until the household completes the ver-

V 4 3 1 8 5

ification requirements which were postponed to expedite initial issuance. If verification is obtained within 30 days of the date the application was filed and the household is eligible for subsequent months, the State agency shall extend the certification period as appropriate without requiring that the household submit a new application and without interrupting the household's benefits.

(v) There is no limit to the number of consecutive times a household can be certified under expedited procedures, so long as, prior to each expedited certification, the household completes the verification requirements that were postponed at the last expedited certification.

(vi) Households requesting, but not entitled to, expedited service shall have their applications processed according to normal standards.

(j) *Households requesting replacement allotments.* (1) Households may request a replacement allotment for that portion of the allotment which has been lost, stolen or destroyed after receipt. Households requesting a replacement allotment shall report the loss to the local police and sign a statement at the food stamp office attesting to the loss of the allotment. Households shall obtain either a copy of the police report or provide other information showing that the loss was reported to the police.

(2) State agencies shall provide the household an opportunity to obtain a replacement allotment within two working days of the day a loss is reported, to the State agency, provided the household filed the police report and the household has signed the statement attesting to the loss. The State agency shall not issue a replacement allotment to any household more often than once within a three-month period.

(k) *PA and GA households.* To facilitate their participation in the program, households in which all members are applying for public assistance (PA) or State agency administered general assistance (GA) shall be allowed to apply for food stamp benefits at the same time they apply for PA or GA benefits. The household's food stamp eligibility and benefit level shall be based solely on food stamp eligibility criteria and the household shall be certified in accordance with notice, procedural and timeliness requirements of the food stamp regulations.

(1) *PA households.* (i) The application for AFDC or other public assistance shall contain all the information necessary to determine a household's food stamp eligibility and level of benefits. Information only relevant to food stamp eligibility shall be contained in the PA form or shall be an attachment to it. The PA application shall have a place for the household to indicate if it does not wish to apply for food stamps. The application shall clearly indicate that the household is providing information for both program purposes, is subject to the criminal penalties for false statements of both programs, and waives the notice of adverse action as specified in paragraph (k)(1)(v) of this section. The joint PA/food stamp application used for PA households may also be used for all food stamp households, provided the application form is approved by FNS.

(ii) PA applications, except those on which the household has indicated it does not want food stamps, shall be processed as a food stamp application in accordance with all timeliness standards and procedures specified in this section. If the application is unclear as to the household's desire for food stamps, the State agency shall determine at the interview, or in prior contact with the household, whether or not the household wants the PA application processed for food stamp purposes.

(iii) The State agency shall conduct a single interview at initial certification for both public assistance and food stamp purposes. PA households shall not be required to see a different eligibility worker or otherwise be subjected to two interview requirements in order to obtain the benefits of both programs. Following the single interview, the application may be processed by separate workers to determine eligibility and benefit levels for food stamps and public assistance. A household's eligibility for food stamp out-of-office interview procisions in § 273.2(e)(2) does not relieve the household of any responsibility for a face-to-face interview to be certified for PA.

(iv) If verification requirements for PA differ from the verification required in § 273.2(f), the determination of food stamp eligibility shall not be delayed or denied for failure to comply with PA verification requirements.

(v) As a result of differences in PA and food stamp application processing procedures and timeliness standards, the State agency may have to determine food stamp eligibility prior to determining the household's eligibility for PA payments. Action on the food stamp portion of the application shall not be delayed nor the application denied on the grounds that the PA determination has not been made. If the State agency can anticipate the amount and the date of receipt of the initial PA payment, but the payment will not be received until a subsequent month, the State agency shall vary the household's food stamp benefit level according to the anticipated receipt of the payment and notify the household. Portions of initial payments intended to retroactively cover a previous month shall be disregarded as a Lump sum payment under § 273.9(c)(8). If the amount or date of receipt of the initial PA payment cannot be reasonably anticipated at the time of the food stamp eligibility determination, the PA payments shall be handled as a change in circumstances. However, the State agency is not required to send a notice of adverse action if the receipt of the PA grant reduces or terminates the household's food stamp benefits, provided the household is notified in advance that its benefits may be reduced or terminated when the grant is received. Households whose PA applications are denied shall not be required to file a new food stamp application but shall have their food stamp eligibility determined or continued on the basis of the original application filed jointly for PA and food stamp purposes and any other documented information obtained subsequent to the application which may have been used in the PA determination and which is relevant to food stamp eligibility or level of benefits.

(vi) Households may be required to file a separate application for food stamps if the food stamp household contains members which are not included in the unit filing for public assistance.

(2) *GA households.* State agencies which operate GA programs with formalized application procedures and eligibility criteria that test the level of income and resources shall permit GA applicants to apply for food stamp benefits using the procedure outlined in paragraph (k)(1) of this section. Use of joint application procedures for GA households and any application forms must be approved by FNS. Households receiving benefits through GA programs that do not meet the above criteria should be advised of the availability of food stamp benefits.

(l) *SSI households.* (Reserved).

§ 273.3 Residency.

A household must be living in the project area in which it files an application for participation. No individual may participate as a member of more than one household or in more than one project area in any month. Residency shall not mean domicile nor shall the State impose any durational residency requirements. Residency shall not mean an intent to permanently reside in the State or project area; however, persons in a project area solely for vacations shall not be considered residents. A fixed residence is not required; for example, migrant campsites satisfy the residency requirement.

§ 273.4 Citizenship and alien status.

(a) *Citizenship.* State agencies shall prohibit participation in the program by any person who is not:

M Y 2 7 8 UMI

(1) A resident of the United States, and

(2) One of the following:

(i) A United States citizen.

(ii) An alien lawfully admitted for permanent residence as an immigrant pursuant to sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act.

(iii) An alien who entered the United States prior to June 30, 1948, or some later date as required by law, and has continuously maintained residency in the United States since then, and is not ineligible for citizenship, but is considered to be lawfully admitted for permanent residence as a result of an exercise of discretion by the Attorney General pursuant to section 249 of the Immigration and Nationality Act.

(iv) An alien who qualified for conditional entry because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by a catastrophic natural calamity pursuant to section 203(a)(7) of the Immigration and Nationality Act. Many of the Vietnamese refugees were admitted under this statutory provision.

(v) An alien lawfully present in the United States as a result of an exercise of discretion by the Attorney General for emergent reasons or reasons deemed strictly in the public interest pursuant to section 212(d)(5) of the Immigration and Nationality Act. A majority of the Vietnamese and Cuban refugees were admitted under this statutory provision.

(vi) An alien living within the United States to whom the Attorney General has withheld deportation pursuant to section 243 of the Immigration and Nationality Act.

(b) *Ineligible aliens.* No aliens other than those described above shall be eligible to participate in the program as a member of any household. Among those excluded are aliens who are visitors, tourists, diplomats and students.

(c) *Verification.* The State agency shall verify lawful permanent resident alien status (as defined in paragraphs (a)(2) (i) and (ii) of this section by using Immigration and Naturalization Service (INS) Form I-151 or I-551, "Alien Registration Receipt Card," or the "Reentry Permit," a passport booklet for lawful permanent resident aliens. The other three resident alien categories, as defined in paragraphs (a)(2) (iv), (v), and (vi) of this section, are identified by INS Form I-94, Arrival-Departure Record. This form should state that the bearer is either a refugee granted conditional entrance status, or paroled for an indefinite period, or granted indefinite voluntary departure or entitled to an indefinite stay of deportation; and is usually stamped "Employment Authorized." Aliens unable to furnish the above identification are ineligible. These aliens shall be advised that upon presentation of the proper INS forms, they will be eligible to apply for program benefits.

(d) *Income and resources.* The income and resources of an ineligible alien living in a household shall not be considered in determining eligibility or level of benefits of the household.

§ 273.5 Tax dependency.

(a) *Tax dependent.* No individual who is a member of a household otherwise eligible to participate in the Program shall be eligible to participate as a member of that or any other household if the individual:

(1) Has reached age eighteen;

(2) Is enrolled at least half time in an institution of higher education; and

(3) Is properly claimed or could be properly claimed for the current tax year as a dependent child for Federal income tax purposes by a taxpayer who is not a member of an eligible household. "Child" and tax "dependent" are defined in §§ 151 and 152 of the Internal Revenue Code (I.R.C.) of 1954, as amended.

(b) *Eligibility of taxpayer's household.* (1) Prior to determining the eligibility of students who are or could be properly claimed tax dependents, the eligibility of the taxpayer's household shall be determined. A proper claim of tax dependency exists when the taxpayer provides or will provide over half of the student's support for the current tax year. A proper claim also exists when the taxpayer is or will be treated as having provided over half of the student's support under Internal Revenue Service (IRS) rules for "Children of divorced or separated parents" (§ 152(e) I.R.C.) or dependents supported by two or more taxpayers (§ 152(c) I.R.C.). "Support" is defined in §§ 151-152 of the I.R.C.

(2) The eligibility of the taxpayer's household shall be based on information provided by the student or the taxpayer. If the taxpayer's household is not currently certified for food stamps, its eligibility shall be determined by the household's size and monthly gross income. The allowable gross income limits shall be calculated by increasing the current net income eligibility limits in § 273.9(a) by the standard deduction in § 273.9(d), the maximum shelter deduction in § 273.9(d), and the 20 percent earned income deduction in § 273.9(d). Self-employed households shall have their gross income determined on an annual, rather than a monthly basis, minus the cost of doing business, but prior to deducting taxes. FNS shall provide gross income eligibility tables by household size.

(c) *Verification.* (1) Tax dependency status and the eligibility of the taxpayer's household shall be verified for students when information provided in the application is inconsistent, contradicts other documented evidence, or indicates likely tax dependency status. Verification shall be accomplished by mailing a simple form to the student's parent. The verification form will require the taxpayer to state whether the student is claimed or could be claimed as a tax dependent. If the student is or could be claimed as a tax dependent, the parent will be requested to indicate whether the parent's household is currently certified for food stamps. If the parent's household is not certified, the parent will be asked to provide household size and gross income figures so an eligibility determination can be made based on the FNS gross income tables, discussed in § 273.5(b).

(2) If the student is or could be claimed as a tax dependent then information must be provided on the taxpayer household. The application should state whether or not the taxpayer household is certified and if it is not the taxpayer's household size and gross income must be provided. The student may provide the needed information or request the State to use the verification form mentioned in paragraph (c)(1) of this section to obtain the needed information.

(3) In some instances, a student may not be aware of his or her tax dependency status. In such cases the student must provide verification or he/she may request that the State use the verification form cited in paragraph (c)(1) of this section.

(4) The parents failure to supply requested information, or a parental response which indicates student ineligibility, is grounds for declaring a student ineligible. Students shall have an opportunity to appeal a decision of ineligibility under § 273.15.

(d) *Certifying the household.* (1) While awaiting student tax dependency verification from the parent taxpayer(s), the remaining household members shall be certified based on household size minus the student.

(2) An ineligible student or a student awaiting verification of information is not a member of the household and the student's income and resources are not considered in determining eligibility or the coupon allotment for the remaining household members.

(3) If remaining members of a student's household have been certified while the student is awaiting tax dependency verification, then the result of the verification can affect the participating household in two ways. If the student is or could be the tax dependent of an ineligible household, the participating household will continue participating on the same basis that it was certified. If the student is not and could not be claimed as a tax dependent, or if the student is or could be claimed but the taxpayer house-

V 43 — 85
M Y 2 7 8
UMI

hold is eligible for food stamps, then the participating household's eligibility and benefits must be redetermined to include the student.

§ 273.6 SSI Cash-Out States.

(a) *Ineligibility.* No individual who receives supplemental security income benefits and/or State supplementary payments and resides in the States of California or Massachusetts is eligible to receive food stamp benefits. The Secretary of Health, Education, and Welfare has determined that the SSI payments in these States have been specifically increased to include the value of the food stamp allotment.

(b) *Income and resources.* In California and Massachusetts the income and resources of the SSI recipient who resides with an applicant household shall not be considered available to the household for eligibility or coupon allotment purposes. The SSI recipient's presence in the household shall not be considered in determining eligibility and the level of benefits.

§ 273.7 Work registration requirement.

(a) *Persons required to register.* Each household member who is (1) physically and mentally fit, (2) 18 years of age or over, but not 60 years or over, and (3) not exempted by paragraph (b) of this section shall register for employment prior to certification and once every six months after initial registration. Household members shall register at the food stamp office by completing the work registration form provided by the State agency. The State agency shall forward work registration forms to the appropriate State employment service office.

(b) *Exemptions from work registration.* The following persons are exempt from the work registration requirement:

(1) A household member subject to and participating in the Work Incentive Program (WIN) under Title IV of the Social Security Act, as amended.

(2) A parent or other household member responsible for the care of a dependent child under 12 or an incapacitated person.

(3) A parent or other caretaker of a child under 18 in a household where another able-bodied parent is registered for work, or is exempt as a result of employment.

(4) A person receiving unemployment compensation. Persons who have applied for, but are not yet approved for unemployment compensation shall not qualify for this exemption.

(5) A regular participant in a drug addiction or alcoholic treatment and rehabilitation program.

(6) A person who is employed or self-employed and working a minimum of thirty hours weekly or receiving weekly earnings equal to the Federal minimum wage mutiplied by thirty hours.

(7) A student enrolled at least half time in any recognized school, training program, or institution of higher education except that:

(i) During the regular school year, students enrolled at least half time in an institution of higher education must register for 20 hours of work per week by completing the work registration form provided by the State agency unless they are: (A) employed for a minimum of 20 hours per week or participating in a federally financed work study program; (B) employed less than 20 hours per week but earning an amount at least equal to the Federal minimum wage multiplied by 20 hours; (C) the head of a household containing one or more other persons to whom the student supplies more than one-half of their total support; or (D) otherwise exempt from the work registration requirement.

(ii) When any school, training program or institution of higher education recess or vacation will exceed thirty days, individuals otherwise exempt because of their student status shall register for full time work by completing the work registration form provided by the State agency, and must comply with the requirements of paragraphs (d) and (e) of this section.

(iii) Students 18 or over, enrolled in an institution of higher education at least half time, and who could be claimed as tax dependents must also meet the requirements of § 273.5 to be eligible.

(c) *Voluntary quit.* [Reserved]

(d) *Job search.* [Reserved]

(e) *Additional work requirements.* Work registrants shall also:

(1) Report for an interview upon the reasonable request of the appropriate State employment service office;

(2) Respond to a request from the State employment service office for supplemental information regarding employment status or availability for work;

(3) Report to an employer to whom referred by the State employment service office;

(4) Accept a bona fide offer of suitable employment, as defined in paragraph (i) of this section, to which referred by the State employment service office; and

(5) Continue suitable employment to which referred by the State employment service office. Household members shall continue such employment until it is no longer considered suitable in accordance with paragraph (i) of this section, until they are terminated from employment due to circumstances beyond their control, or until they become exempt from the work registration requirement as provided in paragraph (b) of this section.

(f) *Failure to comply.*

(1) If the State agency determines that a household member, except any student as defined in paragraph (b)(7)(i) of this section, has refused or failed without good cause to comply with the requirements of this section, the household shall be ineligible to participate until the member complies with the requirements in paragraph (h) of this section, the member becomes exempt, or for 60 days, whichever is earlier.

(2) Any student which the State agency determines has failed or refused without good cause to comply with the requirements of paragraphs (b)(7)(i) or (e) of this section to register for and accept 20 hours work per week during the regular school year shall be ineligible to participate as a member of any household. The disqualification shall apply to the individual student alone and not to the entire household. The disqualified student shall be ineligible until the student complies with the requirements in paragraph (h) of this section, the student becomes exempt, or for 60 days, whichever is earlier.

(g) *Determining good cause.* In determining if good cause existed for failure to comply with any registration requirement, the State agency shall consider all facts and circumstances, including information submitted by the State employment service office, the household member involved and the employer. Good cause shall include circumstances beyond the member's control, such as, but not limited to, illness, illness of another household member requiring the presence of the member, a household emergency or unavailability of transportation.

(h) *Ending disqualification.* Following the end of the 60-day disqualification period, a household or student may apply again to establish eligibility. Eligibility may be established or reestablished within a disqualification period if the household or student is otherwise eligible and the member or student becomes exempt from the work requirement or the member or student complies as follows:

(1) Refusal to register—registration by the household member or student.

(2) Refusal to report for interview to the State employment service office—reporting for the required interview.

(3) Refusal to respond to a request from the State employment service office requiring supplemental information regarding employment status or availability for work—compliance with the State employment service office request.

(4) Refusal to report to an employer to whom referred by the State employment service office—reporting to this employer or another employer to whom referred.

(5) Refusal to accept a bona fide offer of suitable employment to which referred by the State employment service office—acceptance of this employment, of any other employment which yields earnings per week equivalent to the refused job, of any other employment of at least 30 hours per week, or of any employment of less than 30 hours per week with weekly earnings equal to the Federal minimum wage multiplied by 30 hours.

(6) Refusal to continue suitable employment to which referred by the State employment service office—returning to this employment, or acceptance of any other employment which yields earnings per week equivalent to the refused job, or of any other employment of at least 30 hours per week or of less than 30 hours per week but with weekly earnings equal to the Federal minimum wage multiplied by 30 hours.

(i) *Suitable employment.* (1) Any employment shall be considered unsuitable if:

(i) The wage offered is less than the highest of:

(A) The applicable Federal minimum wage;

(B) The applicable State minimum wage; or

(C) Eighty percent (80%) of the Federal minimum wage.

(ii) The employment offered is on a piece-rate basis and the average hourly yield the employee can reasonably be expected to earn is less than the applicable hourly wages specified in paragraph (i)(1)(i) of this section.

(iii) The household member, as a condition of employment or continuing employment, is required to join, resign from, or refrain from joining any legitimate labor organization.

(iv) The work offered is at a site subject to a strike or lockout at the time of the offer unless the strike has been enjoined under § 208 of the Labor-Management Relations Act (29 U.S.C. 178).

(2) In addition, employment shall be considered suitable unless the household member involved can demonstrate or the State agency otherwise becomes aware that:

(i) The degree of risk to health and safety is unreasonable.

(ii) The member is physically or mentally unfit to perform the employment, as documented by medical evidence or by reliable information from other sources.

(iii) The employment offered within the first 30 days of registration is not in the member's major field of experience.

(iv) The distance from the member's home to the place of employment is unreasonable considering the expected wage and the time and cost of commuting. Employment shall not be considered suitable if daily commuting time exceeds 25 percent of daily work time.

(v) The working hours or nature of the employment interferes with the member's religious observances, convictions or beliefs. For example, a Sabbatarian could refuse to work on the Sabbath and not affect the household's eligibility.

(vi) For students, the employment is offered during class hours or is more than 20 hours per week.

(j) *Participation of strikers.* No household shall be denied participation solely on the grounds that a member of the household is not working because of a strike or a lockout at his or her place of employment unless the strike has been enjoined under § 208 of the Labor-Management Relations Act (29 U.S.C. 178).

(k) *Registration of PA and GA households.* (1) In project areas where a WIN program is in operation, registrants for the WIN program are exempt from food stamp work registration as provided in paragraph (b) of this section.

(2) In project areas where there is no WIN program, PA households shall register for work as provided in paragraph (a) of this section, unless the household members are exempt as provided in paragraph (b) of this section. The State agency may request a waiver of this procedure for PA and GA households under the conditions described in paragraph (k)(3) of this section.

(3) State agencies may request approval from FNS to substitute State procedures for work registration for PA households in project areas with no WIN program and for GA households. To receive approval, State agencies must demonstrate that:

(i) The PA or GA work registration procedures are at least equivalent to food stamp work registration requirements.

(ii) Registrants' activities are monitored so that appropriate sanctions as required by these regulations will be applied.

(iii) All PA or GA household members which are not exempt under the regulations are either registered for work under the PA or GA work requirement procedures or are registered for work as provided in paragraph (a) of this section.

(4) Household members who are required to register for work under WIN or unemployment compensation and fail to comply with the work registration requirements of those programs shall not be denied food stamp benefits solely for this failure. These members lose their exemption under paragraph (b) of this section and must register for work if required to do so in paragraph (a) of this section.

§ 273.8 Resource eligibility standards.

(a) *Uniform standards.* Each State agency shall apply the uniform national resource standards of eligibility to all applicant households, including those in which members are recipients of federally aided public assistance, general assistance or supplemental security income.

(b) *Maximum allowable resources.* The maximum allowable resources, including both liquid and nonliquid assets, of all members of the household shall not exceed $1,750 for the household, except that, for households of two or more members including a member or members age 60 or over, such resources shall not exceed $3,000.

(c) *Definition of resources.* In determining the resources of a household, the following shall be included and documented by the State agency in sufficient detail to permit verification in the event it becomes necessary because of inconsistent information or for quality control review:

(1) Liquid resources, such as cash on hand, money in checking or savings accounts, savings certificates, stocks or bonds; and

(2) Nonliquid resources, personal property, licensed vehicles, buildings, land, recreational properties and any other property, not specifically excluded under paragraph (e) of this section.

(d) *Jointly owned resources.* Resources held jointly by separate households shall be considered available in their entirety to each household, unless it can be demonstrated by the applicant household that such resources are inaccessible to that household.

(e) *Exclusions from resources.* In determining the resources of a household, only the following shall be excluded:

(1) The home and surrounding property which is not separated from the home by intervening property owned by others. Public rights of way, such as roads which run through the surrounding property and separate it from the home, will not affect the exemption of the property. The home and surrounding property shall remain exempt when temporarily unoccupied for reasons of employment, illness, vacation, or inhabitability caused by casualty or natural disaster, if the household intends to return.

(2) Household goods, personal effects, including one burial plot per household member, and the cash value of life insurance policies and pension funds, including funds in pension plans such as a Keogh Plan or an Individual Retirement Account (IRA) as long as the funds are not withdrawn from the pension plans.

(3) The entire value of any licensed vehicle, such as, but not limited to, a taxi, tractor, or fishing boat, if the vehicle is used primarily (over 50 percent of the time the vehicle is used) for income producing purposes, or, if the vehicle annually produces income con-

V 4 3 | 8 5

sistent with its fair market value, even if only used on a seasonal basis. This exemption will apply when the vehicle is not in use because of temporary unemployment.

(4) One licensed vehicle, other than vehicles excluded under paragraph (3) of this section, to the extent that the fair market value is less than $4,500, and additional licensed vehicles necessary for household members to seek employment or to transport household members to and from employment, to the extent that the fair market value of each vehicle is less than $4,500. A vehicle customarily used to transport household members to and from employment shall be covered by this exclusion during temporary periods of unemployment.

(5) Property which annually produces income consistent with its fair market value, even if only used on a seasonal basis.

(6) Property, such as farm land and rental homes, or work related equipment, such as the tools of a tradesman or the machinery of a farmer, which is essential to the employment or self-employment of a household member, except that rental homes which are used by households for vacation purposes at some time during the year shall be counted as resources unless excluded by paragraph (5) of this section.

(7) Installment contract for the sale of land or other property if the contract or agreement is producing income consistent with its fair market value and the value of any property sold under contract or held as security in exchange for a purchase price consistent with the fair market value of that property.

(8) Any governmental payments, such as those made by the Individual and Family Grant Program or the Small Business Administration, which are designated for the restoration of a home damaged in a disaster, if the household is subject to a legal sanction if the funds are not used as intended.

(9) Resources whose cash value is not accessible to the household, such as but not limited to, irrevocable trust funds, property in probate and property which the household is making a good faith effort to sell at a reasonable price and which has not been sold. In such cases, the State agency shall establish that the property is for sale and that the household will accept a reasonable offer. Any funds transferred to a trust, and the income produced by that trust, shall be considered accesible to the household unless:

(i) The trust is under the control and management of an institution, corporation or organization (the trustee) which is not under the direction or ownership of any household member;

(ii) That trustee acts in a fiduciary capacity and uses the funds solely to make investments on behalf of the trust or to pay the educational expenses of any person named by the household creating the trust;

(iii) The trust investments do not directly involve or assist any business or corporation under the control, direction or influence of a household member;

(iv) The trust arrangement will not likely cease during the certification period; and

(v) No household member has the power to revoke the trust arrangement or change the name of the student beneficiary during the certification period.

(10) Resources, such as those of students or self-employed persons, which have been counted as income under § 273.9. The handling of student income is explained in § 273.10(c) and the handling of self-employment income is explained in § 273.11(a).

(11) Indian lands held jointly with the Tribe, or land that can be sold only with the approval of the Bureau of Indian Affairs; and

(12) Resources which are excluded for food stamp purposes by express provision of Federal law. The following is the current listing of resources excluded by Federal law:

(i) Payments received under the Alaska Native Claims Settlement Act (Pub. L. 92-203, section 21(a)) or the Sac and Fox Indian claims agreement (Pub. L. 94-189);

(ii) Payments received by certain Indian tribal members under Pub. L. 94-114, section 6, regarding submarginal land held in trust by the United States;

(iii) Benefits received from the Special Supplemental Food Program for Women, Infants and Children (WIC) (Pub. L. 92-443, section 9);

(iv) Reimbursements from the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (Pub. L. 91-646, section 216);

(v) Earned income credits received as a result of the Tax Reform Act of 1976 (Pub. L. 94-455, section 402), the Revenue Readjustment Act of 1975 (Pub. L. 94-164, section 2(d)) and payments received under section 102 of the Tax Reduction Act of 1975 (Pub. L. 94-12);

(vi) Payments received from the Youth Incentive Entitlement Pilot Projects, the Youth Community Conservation and Improvement Projects, and the Youth Employment and Training Programs under the Youth Employment and Demonstration Project Act of 1977 (Pub. L. 95-93), but not payments from the Young Adults Conservation Corps under that Act nor any payments under the Comprehensive Employment and Training Act (CETA) (Pub. L. 93-203).

(f) *Handling of excluded funds.* Excluded monies that are kept in a separate account, and that are not commingled in an account with nonexcluded funds, shall retain the resource exclusion for an unlimited period of time. Those excluded monies which are commingled in an account with nonexcluded funds shall retain their exemption for six months from the date they are commingled. If the household's total resources including all funds in the commingled account exceed the allowable limit after that time, the following method shall be used to determine what portion of the total resources are exempt funds. Each withdrawal of funds, after deposit of exempt funds into an account, shall reduce any exempt funds in that account by the value of the withdrawal. When the total amount withdrawn from an account equals or exceeds the total amount of exempted funds deposited into that account, the exempted funds will be considered totally spent. Households desiring to exempt commingled funds, six months after commingling, must document: the dates and amounts of exempt fund deposits and subsequent withdrawals; the amounts and dates of withdrawals after the date of first commingling; and the current account balance.

(g) *Value of resources.* (1) The value of resources shall be determined at fair market value less encumbrances, except for licensed vehicles which shall be handled as follows:

(i) Licensed vehicles are totally exempt if the vehicles' primary use (over 50 percent of the time it is used) is for income producing purposes, if the vehicle annually produces income consistent with its fair market value, or if exempt under § 273.8(e)(1).

(ii) All licensed vehicles not exempt under paragraph (g)(1)(i) of this section shall individually be evaluated for fair market value and that portion of the value which exceeds $4,500 shall be attributed in full toward the household's resource level, regardless of any encumbrances on the vehicles. For example, a household owning an automobile with a fair market value, as defined in paragraph (2) below, of $5,500 shall have $1,000 applied toward its resource level. Any value in excess of $4,500 shall be attributed to the household's resource level, regardless of the amount of the household's investment in the vehicle, and regardless of whether or not the vehicle is used to transport household members to and from employment. Each vehicle shall be appraised individually. The values of two or more vehicles shall not be added together to reach a total fair market value in excess of $4,500.

(iii) All non-income producing licensed vehicles, other than the household's primary vehicle and vehicles necessary for household members to seek employment or to transport household members to and from employment shall also be evaluated for equity value. The equity value shall be attributed toward the household's resource level.

(iv) In the event a licensed vehicle is assigned both a fair market value in excess of $4,500 (under paragraph (g)(1)(ii) of this section) and an equity value (under paragraph (g)(1)(iii) of this section) only the greater of the two amounts shall be counted as a resource. For example, a second car which is not used to transport a household member to work will be evaluated for both fair market value and for equity value. If the fair market value is $5,000 and the equity value is $1,000, the household shall be credited with only the $1,000 equity value.

(2) The fair market value of licensed automobiles, trucks, and vans will be determined by the "average trade-in value" or the "wholesale value" of those vehicles as listed in publications written for the purpose of providing guidance to automobile dealers and loan companies. Publications listing the value of vehicles are usually referred to as "blue books." The State agency shall ensure that the blue book used to determine the value of licensed vehicles is updated a minimum of once every six months. The National Automobile Dealers Association's (NADA) Used Car Guide Book is a commonly available and frequently updated publication. The State agency shall assign the blue book value to vehicles, unless a household indicates that for some reason, such as body damage or inoperability, the vehicle is in less than average condition. Any household which claims that the blue book value does not apply to its vehicle shall be given the opportunity to acquire verification of the true value from a reliable source. Also, households shall be asked to acquire verification of the value of licensed antique, custom made, or classic vehicles, if the State agency is unable to make an accurate appraisal.

(h) *Transfer of resources.* (1) At the time of application, households shall be asked to provide information regarding any resources which any household member has transferred within the three month period immediately preceding the date of application. Households which have transferred resources knowingly for the purpose of qualifying or attempting to qualify for food stamp benefits shall be disqualified from participation in the program for up to one year from the date of the discovery of the transfer. This disqualification period shall be applied if the resources are transferred knowingly in the three month period prior to application or if they are transferred knowingly after the household is determined eligible for benefits. An example of the latter would be assets which the household acquires after being certified for benefits and which are then transferred to prevent the household from exceeding the maximum resource limit.

(2) Eligibility for the program will not be affected by the following transfers: (i) Resources which would not otherwise affect eligibility, for example, resources consisting of excluded personal property such as furniture or of money that, when added to other household resources, totalled less at the time of the transfer than the allowable resource limits; (ii) Resources which are sold or traded at, or near, fair market value; (iii) Resources which are transferred between members of the same household; and (iv) Resources which are transferred for reasons other than qualifying or attempting to qualify for food stamp benefits, for example, a parent placing funds into an educational trust fund described in paragraph (e)(9) of this section.

(3) The length of the disqualification period shall be based on the amount by which nonexempt transferred resources, when added to other countable resources, exceed the allowable resource limits. For example, if a one person household with $1,500 in a bank transferred ownership of a car worth $5,000, $250 of that transfer would be considered because the first $4,500 of the car's value was exempt and an additional $250 of the transferred asset was applied toward the $1,750 resource limit. The following chart will be used to determine the period of disqualification:

Amount in excess of the resource limit	Period of disqualification
0 to $249	1 mo.
$250 to $999	3 mo.
$1,000 to $2,999	6 mo.
$3,000 to $4,999	9 mo.
$5,000	12 mo.

(i) *Resources of nonhousehold members.* The resources of nonhousehold members, as provided in § 273.1(b), shall not be counted as available to the household, unless the member:

(1) Is disqualified from the program, in accordance with § 273.16 for fraud; or

(2) Is a student and is disqualified from the program, in accordance with § 273.7(e)(2), for failing to comply with the work registration requirement during the school year.

§ 273.9 Income and deductions.

(a) *Income eligibility standards.* Participation in the program shall be limited to those households whose incomes are determined to be a substantial limiting factor in permitting them to obtain a more nutritious diet.

(1) The income eligibility standards for the Food Stamp Program shall be uniform for the contiguous 48 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam. The income eligibility standards are derived from the Office of Management and Budget (OMB) nonfarm income poverty guidelines for the 48 States and the District of Columbia. The income eligibility standards for Alaska and Hawaii are derived from separate OMB nonfarm income poverty guidelines. The annual income poverty guidelines shall be devided by 12 to determine the monthly net income eligibility standards.

(2) The monthly income eligibility standards shall be adjusted annually on July 1, by multiplying the most recent OMB nonfarm poverty income guidelines by the change between the average Consumer Price Index (CPI) for the 50 States and the District of Columbia for the preceding calendar year and the CPI for March of the current year.

(3) The income eligibility standards for the 48 States the District of Columbia, Puerto Rico, the Virgin Islands and Guam; for Alaska; and for Hawaii will be published as an appendix to this section.

(b) *Definition of income.* Household income shall mean all income from whatever source excluding only items specified in paragraph (c) of this section.

(1) Earned income shall include:

(i) All wages and salaries for services performed as an employee. Assistance payments from programs which require, as a condition of eligibility, the actual performance of work without compensation other than the assistance payments themselves shall be considered earned income to the extent that the payments actually subsititute for wages or salaries.

(ii) The total gross income from a self-employment enterprise, including the total gain from the sale of any capital goods or equipment related to the business. Payments from a roomer or boarder and returns on rental property shall be considered self-employment income.

(iii) Training allowances from vocational and rehabilitative programs recognized by Federal, State or local governments, such as the Work Incentive Program, and programs authorized by the Comprehensive Employment and Training Act, to the extent they are not a reimbursement.

(2) Unearned income shall include, but not be limited to:

(i) Assistance payments from Federal or federally aided public assistance programs, such as Supplemental Security Income (SSI) or Aid to Families with Dependent Children (AFDC), general assistance (GA) programs, or other assistance programs based on need except as provided in paragraph (b)(1)(i) of this section.

(ii) Annuities; pensions; retirement, veteran's, or disability benefits; work-

M Y 2 7 8 UMI

V 43 — 85 MY 2 78 UMI

man's or unemployment compensation; old-age, survivors, or social security benefits; strike benefits; foster care payments for children or adults.

(iii) Support or alimony payments made directly to the household from nonhousehold members.

(iv) Scholarships, educational grants, fellowships, deferred payment loans for education, veteran's educational benefits and the like in excess of amounts excluded under § 273.9(c).

(v) Payments from government-sponsored programs such as Agricultural Stabilization and Conservation Service programs, dividends, interest, royalties, and all other direct money payments from any source whatever which can be construed to be a gain or benefit.

(3) The earned or unearned income of an individual disqualified from the household for fraud in accordance with § 273.16 or for failing to comply with the student work registration requirements in § 273.7(b)(7)(i) shall continue to be counted as income, less the pro rata share for the individual. Procedures for calculating this pro rata share are described in § 273.11.

(4) Income shall not include the following:

(i) Monies withheld from an assistance payment, earned income, or other income source, or monies received from any income source which are voluntarily or involuntarily returned to repay a prior overpayment received from that income source, provided that the overpayment was not excludable under paragraph (c) of this section.

(ii) Child support payments received by AFDC recipients which must be transferred to the agency administering Title IV-D of the Social Security Act of 1935, as amended, to maintain AFDC eligibility.

(c) *Income exclusions.* Only the following items shall be excluded from household income and no other income shall be disregarded:

(1) Any gain or benefit which is not in the form of money payable directly to the household, including:

(i) *In-kind income.* Nonmonetary or in-kind benefits, such as meals, clothing, public housing, or produce from a garden.

(ii) *Vendor payments.* A payment made in money on behalf of a household shall be considered a vendor payment whenever a person or organization outside of the household uses its own funds to make a direct payment to either the household's creditors or a person or organization providing a service to the household. For example, if a relative, who is not a household member, pays the household's rent directly to the landlord, the payment is considered a vendor payment and is not counted as income to the household. Wages garnished by employers, or money deducted or otherwise diverted from a household's public assistance grant by a State for purposes of managing the household's expenses shall not be considered a vendor payment, since the person or organization making the payment is using money payable to the household rather than its own funds. Payments made directly to the household are counted as income and are not excluded as a vendor payments; except that rent or housing subsidies paid to a landlord by the Housing and Urban Development (HUD) Department shall be considered a vendor payment regardless of whether the payment is made directly to the landlord or paid to the landlord through the household.

(2) Any income in the certification period which is received too infrequently or irregularly to be reasonably anticipated, but not in excess of $30 in a quarter.

(3) Educational loans on which payment is deferred, grants, scholarships, fellowships, veterans' educational benefits and the like to the extent that they are used for tuition and mandatory school fees at an institution of higher education, a correspondence school or a school for the physically or mentally handicapped. Mandatory fees are those charged to all students or those charged to all students within a certain curriculum. For example, uniforms, lab fees, or equipment charged to all students in order to enroll in a chemistry course would be excluded. However, transportation, supplies and text book expenses are not uniformly charged to all students and, therefore, would not be excluded as mandatory fees.

(4) All loans, including loans from private individuals as well as commercial institutions, other than educational loans on which repayment is deferred.

(5) Reimbursements for past or future expenses, to the extent they do not exceed actual expenses, and do not represent a gain or benefit to the household. Reimbursements for normal household living expenses such as rent or mortgage, personal clothing, or food eaten at home are a gain or benefit and, therefore, are not excluded. To be excluded, these payments must be provided specifically for an identified expense, other than normal living expenses, and used for the purpose intended. When a reimbursement, including a flat allowance, covers multiple expenses, each expense does not have to be separately identified as long as none of the reimbursement covers normal living expenses. The amount by which a reimbursement exceeds the actual incurred expense shall be counted as income. However, reimbursements shall not be considered to exceed actual expenses, unless the provider or the household indicates the amount is excessive. Examples of excludable reimbursements which are not considered to be a gain or benefit to the household are:

(i) Reimbursements or flat allowances for job or training related expenses such as travel, per diem, uniforms, and transportation to and from the job or training site. Reimbursements for these expenses are excluded; however, these expenses, if not reimbursed, are not otherwise deductible.

(ii) Reimbursements for out-of-pocket expenses of volunteers incurred in the course of their work.

(iii) Medical or dependent care reimbursements.

(iv) Reimbursements or allowances to students for specific education expenses, such as travel or books, but not allowances for living expenses, such as food or clothing. Portions of a general grant or scholarship must be specifically earmarked for education expenses rather than for living expenses to be excludable as a reimbursement.

(v) Reimbursements received by households to pay for services provided by Title XX of the Social Security Act.

(6) Monies received and used for the care and maintenance of a third-party beneficiary who is not a household member. If the intended beneficiaries of a single payment are both household and nonhousehold members, any identifiable portion of the payment intended and used for the care and maintenance of the nonhousehold member shall be excluded. If the nonhousehold member's portion cannot be readily identified, the payment shall be evenly prorated among intended beneficiaries and the exclusion applied to the nonhousehold member's pro rata share or the amount actually used for the nonhousehold member's care and maintenance, whichever is less.

(7) The earned income (as defined in paragraph (b)(1) of this section) of children who are members of the household, who are students at least half-time, and who have not attained their eighteenth birthday. The exclusion shall continue to apply during temporary interruptions in school attendance due to semester or vacation breaks, provided the child's enrollment will resume following the break. If the child's earnings or amount of work performed cannot be differentiated from that of other household members, the total earnings shall be prorated equally among the working members and the child's prorata share excluded. Individuals are not considered children for purposes of this provision if they are emancipated.

(8) Money received in the form of a nonrecurring lump sum payment, including, but not limited to, income tax refunds, rebates, or credits; retroactive lump-sum social security, SSI, public assistance, railroad retirement benefits or other payment; or retroactive lump-sum insurance settlements. These payments shall be counted as resources in the month received, unless specifically excluded from consideration as a resource by other Federal laws.

(9) The cost of producing self-employment income. The procedures for computing the cost of producing self-employment income are described in § 273.11.

(10) Any income that is specifically excluded by any other law from consideration as income for the purpose of determining eligibility for the Food Stamp Program. The following laws provide such an exclusion:

(i) Reimbursements from the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (Pub. L. 91-646, Section 216).

(ii) Payments received under the Alaska Native Claims Settlement Act (Pub. L. 92-203, Section 21(a));

(iii) Any payment to volunteers under programs covered by the Domestic Volunteer Services Act of 1973 (Pub. L. 93-113) as amended. Included under this Act are Title I (VISTA), Title II (RSVP, Foster Grandparents, and others) and Title III (SCORE and ACE).

(iv) Income derived from certain submarginal land of the United States which is held in trust for certain Indian tribes (Pub. L. 94-114, Section 6).

(v) Payments from the Special Crisis Intervention Program (SCIP), the Crisis Intervention Program (CIP) and the Emergency Energy Assistance Program (EEAP) administered by the Community Services Administration (CSA).

(vi) Payments received from the Youth Incentive Entitlement Pilot Projects, The Youth Community Conservation and Improvement Projects, and the Youth Employment and Training Programs under the Youth Employment and Demonstration Project Act of 1977 (Pub. L. 95-93), but not payments from the Young Adults Conservation Corps under that Act nor any other payments under the Comprehensive Employment and Training Act.

(d) *Income deductions.* Deductions shall be allowed only for the following household expenses:

(1) *Standard deduction.* A standard deduction of $60[1] per household per month for the 48 contiguous States and the District of Columbia. The standard deductions applicable in Alaska, Hawaii, Puerto Rico, Guam, and the Virgin Islands will be published as an appendix to this section.

(2) *Earned income deduction.* Twenty percent of gross earned income as defined in paragraph (b)(1) of this section, less earnings exluded in paragraph (c) of this section.

(3) *Dependent care.* Payments for the actual costs for the care of a child or other dependent when necessary for a household member to accept or continue employment, seek employment in compliance with the job search criteria (or an equivalent effort by those not subject to job search), or attend training or pursue education which is preparatory to employment. This deduction shall not exceed $75[1] in the 48 contiguous States and the District of Columbia, or an amount that will be specified in the appendix to this section for Alaska, Hawaii, Puerto Rico, Guam, and the Virgin Islands.

(4) *Shelter costs.* Monthly shelter costs in excess of 50 percent of the household's income after all other deductions in § 273.9(d) (1), (2), and (3) have been allowed. The shelter deduction alone, or in combination with the dependent care deduction in § 273.9(d)(3), shall not exceed $75 in the 48 contiguous States and the District of Columbia, or an amount that will be specified in the appendix to this section for Alaska, Hawaii, Puerto Rico, Guam, and the Virgin Islands. Shelter costs shall include only the following:

(i) Continuing charges for the shelter occupied by the household, including rent, mortgage, or other continuing charges leading to the ownership of the shelter such as loan repayments for the purchase of a mobile home, including interest on such payments.

(ii) Property taxes, State and local assessments, and insurance on the structure itself, but not separate costs for insuring furniture or personal belongings.

(iii) Charges for heating and cooking fuel; cooling and electricity; water and sewer; garbage and trash collection fees; the basic service fee for one telephone, including tax on the basic fee; and fees charged by the utility provider for initial installation of the utility. One time deposits shall not be included as shelter costs.

(iv) The shelter costs for the home if not occupied by the household because of employment away from home, illness or abandonment caused by a natural disaster or casualty loss. For costs of a home vacated by the household to be included in the household's shelter costs, the household must intend to return to the home; the current occupants of the home, if any, must not be claiming the shelter costs for food stamp purposes; and the home must not be leased or rented during the absence of the household. To facilitate certification, the household may be certified taking into account the costs on the unoccupied home pending verification of these costs. However, verification must be obtained prior to recertification.

(5) *Standard utility allowances.* The State agency shall develop a method, subject to FNS approval, for calculating a standard utility allowance for use in calculating shelter costs of those households which incur utility costs, other than telephone costs, separate and apart from their rent or mortgage. The household shall be advised that actual utility costs which exceed the standard shall be deducted if the household can verify these costs. Households may change between actual utility costs and the utility standard at any time. Households shall be reminded on the change report form of the right to claim actual utility costs if they exceed the standard at any time. The State agency shall review, at least annually, and adjust the utility standard as necessary to reflect changes in the costs of utilities. State agencies may use data gathered through quality control sampling, surveys of utility company rates, or another method for establishing and updating the standard developed by the State and approved by FNS. The amount of the standard shall vary seasonally unless the State agency can demonstrate that such variations are not warranted. In addition, the State agency may have other variations in its standard to reflect other differences, such as geographical variations or separate standards for each utility.

(6) *Semiannual adjustment of standard deductions.* Effective July 1, 1978, the standard deductions shall be adjusted on January 1 and July 1 to the nearest $5. The adjustment shall reflect changes in the CPI for items other than food for the six months ending the preceding September 30 and March 31, respectively. The semiannual adjustment shall be based on the previous half year's unrounded number, and the result of the adjustment rounded to the nearest $5.

(7) *Annual adjustment of shelter deduction.* Effective July 1, 1978, the maximum limit on shelter and dependent care deductions shall be adjusted on July 1 to the nearest $5. The adjustment shall reflect changes in the shelter, fuel, and utilities components of the CPI for the 12-month period ending the preceding March 31. The annual adjustment shall be based on the previous year's unrounded numbers, and the result rounded to the nearest $5.

[1]The actual amounts of the standard deduction and of the limit on the child care and shelter deduction that will apply when these regulations are implemented will be determined according to the cost of living adjustments described in this section and will be published as an appendix to these regulations.

V 43 | 85 MY 2 78 UMI

APPENDIX (RESERVED)

§ 273.10 Determining household eligibility and benefit levels.

(a) *Period of application.* (1) The period of application for all households submitting an initial application is the calendar month in which the household filed its application. In most cases, the month of application will be the first month of the household's initial certification period. The State agency shall determine a household's eligibility and benefit level during the month of application based on the household's circumstances for the entire calendar month, even if the household filed its application on the last day of that calendar month.

(2) There is no "period of application" for applications for recertification filed during the current certification period. Eligibility and the basis of issuance for recertifications shall be determined based on circumstances anticipated for the calendar month following the expiration of the current certification period. If an application for recertification is not received until after the current certification period has expired, the period of application shall be the month in which the application was filed, as for any initial application.

(3) As a result of anticipated changes, a household may be eligible for the month of application, but ineligible in subsequent months. The household shall be entitled to benefits for the month of application even if the processing of its application results in the benefits being issued in a subsequent month. Similarly, a household may be ineligible for the month of application, but eligible in subsequent months due to anticipated changes in circumstances. Even though denied for the month of application, the household does not have to reapply in the subsequent month. The same application shall be acted on both for the denial for the month of application and the determination of eligibility for subsequent months, within the timeliness standards in § 273.2, provided that benefits are not issued prior to the start of the household's certification period.

(b) *Determining resources.* The household's resources at the time the application is filed shall be used to determine whether or not the household's resources are below the maximum allowable resources described in § 273.8.

(c) *Determining income.* (1) *Anticipating income.* (i) For the purpose of determining the household's eligibility and basis of issuance, the State agency shall take into account the income already received by the household during the certification period and any anticipated income the household and the State agency are reasonably certain will be received during the remainder of the certification period. If the amount of income that will be received, or when it will be received, is uncertain, that portion of the household's income that is uncertain shall not be counted by the State agency. For example, a household anticipating income from a new source, such as a new job or public assistance benefits recently applied for, may be uncertain as to the timing and amount of the initial payment. These monies shall not be anticipated by the State agency unless there is reasonable certainty concerning the month in which the payment will be received or in what amount. Households are required in § 273.12 to report the income when it is received.

(ii) Income received during the past thirty days shall be used as an indicator of anticipated income. However, past income shall not be used for any month in which a change in income has occurred or can be anticipated.

(iii) As a result of anticipating changes, the household's allotment for the month of application may differ from its allotment in subsequent months. The State agency shall establish a certification period for the longest possible period over which the household's circumstances can be reasonably anticipated. The household's allotment shall vary month to month within the certification period to reflect changes anticipated at the time of certification, unless the household elects the averaging techniques in paragraphs (c)(3) and (d)(3) of this section.

(2) *Income only in month received.* (i) Income anticipated during the certification period shall be counted as income only in the month it is expected to be received, unless the income is averaged. Whenever a full month's income is anticipated but is received on a weekly or biweekly basis, the State agency shall convert the income to a monthly amount by multiplying weekly amounts by 4.3 and biweekly amounts by 2.15. Nonrecurring lumpsum payments shall be counted as a resource starting in the month received and shall not be counted as income.

(ii) Wages held at the request of the employee shall be considered income to the household in the month the wages would otherwise have been paid by the employer. However, wages held by the employer as a general practice, even if in violation of law, shall not be counted as income to the household, unless the household anticipates that it will ask for and receive an advance, or the household anticipates that it will receive income from previously held wages. Advances on wages shall only count as income if reasonably anticipated as defined in paragraph (c)(1) of this section.

(3) *Income averaging.* (i) Households may elect to have income averaged if the difference between the anticipated highest and lowest amounts during the certification period is $50 a month or less.

(ii) Households that derive their annual income in a period of time shorter than one year shall have that income averaged over a 12-month period, provided the income is not received on an hourly or piecework basis. These households may include school employees, share croppers, farmers, and other self-employed households. However, these provisions do not apply to migrant or seasonal farm workers. The procedures for averaging self-employed income are described in § 273.11.

(iii) Households receiving scholarships, deferred educational loans, or other educational grants shall have such income, after exclusions, averaged over the period for which it was provided.

(d) *Determining deductions.* Deductible expenses include only certain costs of dependent care and shelter as described in § 273.9.

(1) *Disallowed expenses.* (i) An expense covered by an excluded reimbursement or vendor payment shall not be deductible. For example, the portion of rent covered by excluded vendor payments shall not be calculated as part of the household's shelter cost.

(ii) Expenses shall only be deductible if the service is provided by someone outside of the household and the household does not provide compensation for the service through an in-kind benefit. For example, a dependent care deduction shall not be allowed if another household member provides the care, or compensation for the care is provided in the form of an in-kind benefit, such as food.

(2) *Billed expenses.* Except as provided in paragraph (d)(3) of this section, a deduction shall be allowed only in the month the expense is billed or otherwise becomes due, regardless of when the household intends to pay the expense. For example, rent which is due each month shall be included in the household's shelter costs, even if the household has not yet paid the expense. Amounts carried forward from past billing periods are not deductible, even if included with the most recent billing and actually paid by the household. In any event, a particular expense may only be deducted once.

(3) *Averaging expenses.* Households may elect to have an expense averaged if the anticipated difference between the highest and lowest amounts during the certification period is $25 a month or less. Households may elect to have expenses which are billed less often than monthly averaged forward over the interval between scheduled billings, or, if there is no scheduled interval, averaged forward over the period the expense is intended to cover. For example, if a household receives a single bill in February which covers a three-month supply of fuel oil, the bill may be averaged over February, March, and April. The household may elect to have one-time only expenses averaged over the entire certification period in which they are billed.

(4) *Anticipating expenses.* The State agency shall calculate a household's expenses based on the expenses the household expects to be billed for during the certification period. Anticipation of the expense shall be based on the most recent month's bills, unless the household is reasonably certain a change will occur. When the household is not claiming the utility standard, the State agency may anticipate changes during the certification period based on last year's bills from the same period updated by overall price increases; or, if only the most recent bill is available, utility cost increases or decreases over the months of the certification period may be based on utility company estimates for the type of dwelling and utilities used by the household. The State agency shall not average past expenses, such as utility bills for the last several months, as a method of anticipating utility costs for the certification period.

(e) *Calculating net income and benefit levels.* (1) *Net monthly income.* (i) To determine a household's net monthly income, the State agency shall:

(A) Add the gross monthly income earned by all household members minus earned income exclusions, to determine the household's total gross earned income.

(B) Multiply the total gross earned income by 20 percent and subtract that amount to determine the net monthly earned income (or multiply the total gross earned income by 80 percent).

(C) Add to net monthly earned income the total monthly unearned income of all household members, minus income exclusions.

(D) Subtract the standard deduction.

(E) Subtract monthly dependent care expenses, if any, up to the maximum amount allowed for the area (see appendix to § 273.9). If dependent care costs equal or exceed the maximum amount allowed, the household's net monthly income has been determined. If not, the household's adjusted income has been determined and shall be used to compute excess shelter expenses in subparagraph (F) of this section.

(F) Total the allowable shelter expenses to determine shelter costs. Subtract from total shelter costs 50 percent of the adjusted income (the household's monthly income after all the above deductions have been subtracted). The remaining amount, if any, is the excess shelter cost. If there is no excess shelter cost, the net monthly income has been determined. If there is excess shelter cost, compute the shelter deduction in subparagraph (G) of this section.

(G) Subtract from the adjusted income in subparagraph (E) of this section the excess shelter cost up to the maximum amount allowed for the area. The maximum amount allowed for shelter is the maximum used in subparagraph (E) of this section, minus the amount of dependent care expenses, if any. The household's net monthly income has been determined.

(ii) In calculating net monthly income, the amounts shall be rounded down to whole dollar amounts by dropping all cents. Such rounding shall occur before and after each calculation, except for the computation of shelter costs. For example, any cents in gross weekly earnings shall be dropped prior to the application of the weekly conversion factor. Any cents resulting from that multiplication shall then be dropped prior to the computation of the 20 percent earned income deduction. The cents shall be dropped from this deduction prior to being subtracted from earned income. However, because these procedures could result in a signficant decrease in the shelter expenses the household may be entitled to use in determining excess shelter cost, the individual costs used in paragraph (e)(1)(i)(F) of this section shall be computed using exact dollars and cents. The cents will be dropped from the total shelter costs prior to determining the shelter deduction for the household's net monthly income.

(2) *Eligibility and benefits.* (i) Except for households considered destitute in paragraph (e)(3) of this section the household's net monthly income as calculated in paragraph (e)(1) of this section shall be compared to the monthly income eligibility standards for the appropriate household size to determine eligibility for the month.

(ii) The household's monthly allotment shall be equal to the Thrifty Food Plan for the household's size reduced by 30 percent of the household's net monthly income as calculated in paragraph (e)(1) of this section. After multiplying the net income by 30 percent, the result shall be rounded by dropping all cents prior to subtracting that amount from the Thrifty Food Plan. All eligible one and two person households shall receive a minimum monthly allotment of $10.

(3) *Elibility and benefits for destitute households.* A special eligibility and benefit determination shall be used for households which anticipate income from a new source later in the month, but which do not have any income available for their current food needs. Households which anticipate income from a new job or are awaiting benefits from public assistance, unemployment compensation, social security, SSI, or the like may be totally without income for one to three weeks before the new income begins. If these households are destitute, as defined in paragraph (e)(3)(i) of this section, the new income will be anticipated, but it will not be used to deny or reduce benefits for the period of the month prior to the anticipated receipt of the new income.

(i) To determine if a household is to receive the special eligibility and benefit determination, the State agency shall use the following procedures:

(A) The month is divided into four quarters and the quarters arranged into two accounting periods to identify that portion of the month in which the household is without income. The quarters of the month are 1st-7th; 8th-15th; 16th-22nd; 23rd to the end of the month. The first accounting period shall contain the one, two or three quarters prior to the quarter in which the new income is received. The second accounting period shall contain the quarter in which the new income is first received and all subsequent quarters in the month. For example, if the new income is not anticipated until the 20th (which falls in the third quarter), each accounting period will contain two quarters. If the income is not anticipated until the 25th (which is in the fourth quarter), the first accounting period will contain three quarters, and the second accounting period will contain the one quarter remaining in the month.

(B) A household will be considered destitute and eligible for the special procedures if its only income in the month is from a new source and that income will be received after the quarter in which the application is filed. Income shall be considered from a new source if it was not received from that source in the preceding 30 days. However, if the income is normally received less often than monthly, the normal interval between payments shall be subsituted for the preceding 30 days to determine if the income is from a new source.

(C) If otherwise eligible, households determined to be destitute shall have their applications processed on an expedited basis and their benefits calculated in accordance with paragraph (e)(3)(ii) of this section.

(ii) Destitute household shall have their benefits calculated as follows:

(A) The Thrifty Food Plan shall be divided between accounting periods based on the number of quarters in each period. If income is anticipated

V 43 | 85 MY 2 78 UMI

for the second quarter, one-fourth of the Thrifty Food Plan will be assigned to the first accounting period and the remaining three quarters to the second period. If income is anticipated in the third quarter, one-half of the Thrifty Food Plan will be assigned to each accounting period. If income is not anticipated until the final quarter, three-quarters of the Thrifty Food Plan will be assigned to the first accounting period and one fourth to the second.

(B) The household's net monthly income shall be calculated in accordance with prargraph (e)(1) of this section as for any other household. The household's net monthly income shall be multiplied by 30 percent and the result rounded as in paragraph (e)(1)(ii) of this paragraph.

(C) If 30 percent of the household's net monthly income is less than or equal to the portion of the Thrifty Food Plan assigned to the second accounting period in paragraph (e)(3)(ii)(A) of this section, the household's benefits shall be calculated for the whole month as for any other household. Because their monthly income is so low, the normal procedures will result in the same allotment as the special benefit calculation.

(D) If 30 percent of the household's net monthly income exceeds the portion of the Thrifty Food Plan assigned to the second accounting period, the household shall receive only the amount of the Thrifty Food Plan assigned to the first accounting period. Even if the household's net monthly income exceeds the monthly income eligibility standard, destitute households shall receive the portion of the Thrifty Food Plan assigned to the first accounting period, since the household has no income in this period.

(iii) The above procedures shall apply not only for initial applications, but for any month during the certification period or at recertification if the only income anticipated for that month is from a new source. To be eligible for the special procedures during the certification period or at recertification, the only income in the month must be from a new source as defined in paragraph (e)(3)(i)(B) of this section, and must be anticipated after the quarter in which the household's ATP or coupon allotment is normally received.

(iv) A household eligible for any portion of the month under these special procedures shall be considered eligible for the whole month for reporting and notice purposes.

(4) *Thrifty Food Plan.* (i) *Level of the thrifty Food Plan.* The Thrifty Food Plan shall be uniform by household size throughout the 48 contiguous States and the District of Columbia. The Thrifty Food Plans for Alaska and Hawaii shall be the Thrifty Food Plan for the 48 States adjusted by the price of food in Alaska and Hawaii. The Thrifty Food Plans for Guam, Puerto Rico, and the Virgin Islands shall be adjusted by the cost of food in those areas provided that the costs of these plans shall not exceed the cost of the Thrifty Food Plan for the 50 States. The Thrifty Food Plan in each area will be provided in the appendix of this subchapter.

(ii) *Semiannual adjustment.* The Thrifty Food Plan shall be adjusted semiannually to reflect changes in the price of food. The semiannual adjustments shall be rounded to the nearest whole dollar. The semiannual adjustments shall occur on July 1 based on the change in the price of the Thrifty Food Plan over a six-month period ending the preceding March 31; and on January 1 based on the change in a six-month period ending the preceding September 30.

(f) *Certification periods.* The State agency shall establish definite periods of time within which households shall be eligible to receive benefits. At the expiration of each certification period, entitlement to food stamp benefits ends. Further eligibility shall be established only upon a recertification based upon a newly completed application, an interview, and such verification as required by § 273.2(f). Under no circumstances shall benefits be continued beyond the end of a certification period without a new determination of eligibility.

(1) Certification periods shall conform as much as possible to calendar months. The month of application shall be the first month in the certification period of initial applicants; for example, if a household submits an application in January and the application is not processed until February, a six-month certification period would include January through June. Upon recertification, the certification period will begin with the month following the last month of the previous certification period.

(2) Households in which all members are included in a PA or GA grant and which are eligible for joint application procedures, as described in § 273.2(k), shall be assigned certification periods which coincide with the period of the review for the assistance grant. In no event shall such certification periods exceed one year. Recertifications shall be scheduled to enable households to be recertified when their eligibility for PA/GA is reviewed. State agencies which accomplish PA/GA reviews in a timely fashion may routinely assign definite certification periods to expire the month after the PA/GA review. State agencies which, due to staffing problems or other difficulties, are unable to accurately predict the month of each PA/GA review may assign undetermined certification periods which do not exceed one year in length. However, a recertification shall be accomplished simultaneously with the PA/GA review. All State agencies shall advise PA/GA households of the length of the certification period as required by paragraph (g)(1)(i) of this section, and of the expiration of the certification period as required by § 273.14(b).

(3) Other households shall be assigned the longest certification periods possible based on the predictability of the household's circumstances. Households shall be certified for three months, except as follows:

(i) Households eligible for a certification period of three months or less shall, at the time of certification, have their certification periods increased by one month, if the certification process is completed after the 15th day of the month of application and the household's circumstances warrant the longer certification period. For example, if a household which is eligible for a three-month certification period makes application in June and is not certified until late June or early July, the certification period would include June through September.

(ii) Households containing one or more persons subject to a lockout or on strike from their place of employment shall not be certified for periods of more than one month, if the household is certified before the 15th day of the month of application; otherwise, the maximum certification period shall be for two months unless the State agency wishes to assign a longer certification period and the household signs a waiver of notice of adverse action, as specified in § 273.13(b)(9).

(iii) Households may be certified for one or two months as appropriate when the household cannot reasonably predict what its circumstances will be in the near future, or when there is a substantial likelihood of frequent and significant changes in income or household status; for example, day laborers and migrant workers during the work season when income is uncertain and subject to extreme fluctuations due to the availability of employment or due to bad weather and other circumstances.

(iv) Households may be certified for up to six months if there is little likelihood of changes in income and household status; for example, households with a stable income record and for which major changes in income, deductions or composition are not anticipated.

(v) Households consisting entirely of unemployable or elderly persons with very stable income may be certified for up to 12 months provided other household circumstances are expected to remain stable; for example, social security recipients, SSI recipients and persons who receive pensions or disability payments.

(vi) Households whose primary source of income is from self-employment (including self-employed farmers) or from regular farm employment with the same employer may be certified for up to 12 months, provided income can be readily predicted and household circumstances are not likely to change. Annual certification periods may be assigned to farm workers who are provided their annual salaries on a scheduled monthly basis which does not change as the amount of work changes.

(g) *Certification notices to households.* (1) *Initial applications.* State agencies shall provide applicants with one of the following written notices as soon as a determination is made, but no later than 30 days after the date of the initial application:

(i) *Notice of eligibility.* (A) If an application is approved, the State agency shall provide the household with written notice of the amount of the allotment and the beginning and ending dates of the certification period. The household shall also be advised of variations in the benefit level based on changes anticipated at the time of certification. If the initial allotment contains benefits for both the month of application and the current month's benefits, the notice shall explain that the initial allotment includes more than one month's benefits, and shall indicate the allotment amount for the remainder of the certification period. The notice shall also advise the household of its right to a fair hearing and of the name and telephone number of the person to contact for additional information. If there is an individual or organization available that provides free legal representation, the notice shall also advise the household of the availability of the services. The State agency may also include in the notice a reminder of the household's obligation to report changes in circumstances and of the need to reapply for continued participation at the end of the certification period. Other information which would be useful to the household may also be included.

(B) State agencies that do not assign definite certification periods to PA or GA households, as provided in paragraph (f)(2) of this section, will not be required to provde those households with an exact expiration date for the certification period. Instead, the notice shall state that the certification period will expire the month after the next review for the assistance grant or in one year, whichever comes first.

(C) In cases where a household's application is approved on an expedited basis without verification, as provided in § 273.2(i)(4)(iv), and the application indicates the household is eligible in subsequent months, the notice shall explain that if the household provides verification within 30 days of the date the application was filed, the household will not have to reapply at the end of its certification period and will not receive an interruption of benefits.

(D) For households provided a notice of expiration at the time of certification, as required in § 273.14(b), the notice of eligibility may be combined with the notice of expiration or separate notices may be sent.

(ii) *Notice of denial.* If the application is denied, the State agency shall provide the household with written notice explaining the basis for the denial, the household's right to request a fair hearing, and the name and telephone number of the person to contact for additional information. If there is an individual or organization available that provides free legal representation, the notice shall also advise the household of the availability of the service. In cases where the denial was caused by the household's failure to take action to complete the application process, as provided in § 273.2(h)(1), the notice of denial shall also explain: the action that the household must take to reactivate the application; that the case will be reopened without a new application if action is taken within 30 days of the date the notice of denial was mailed; and that the household must submit a new application if, at the end of the 30-day period, the household has not taken the needed action and wishes to participate in the program.

(iii) *Notice of pending status.* If the application is to be held pending because some action by the State is necessary to complete the application process, as specified in § 273.2(h)(2), the State agency shall provide the household with a written notice which informs the household that its application has not been completed and is being processed. If some action by the household is also needed to complete the application process, the notice shall also explain what action the household must take and that its application will be denied if the household fails to take the required action within 60 days of the date the application was filed.

(2) *Applications for recertification.* The State agency shall provide households that have filed an application by the 15th of the last month of their certification period with either a notice of eligibility or a notice of denial by the end of the current certification period. The State agency shall provide households that have received a notice of expiration at the time of certification and have timely reapplied with either a notice of eligibility or a notice of denial not later than 30 days after the date the household had an opportunity to obtain its last allotment.

(3) *Identification (ID) cards.* (i) The State agency shall issue a serially numbered ID card to each certified household as proof of program eligibility. The ID card shall be issued in the name of the household member to whom the ATP is issued. That household member and any authorized representatives shall sign the ID card prior to using it.

(A) The State agency shall limit issuance of ID cards to the time of initial certification with replacements made only in instances of loss, mutilation, destruction, or changes in persons authorized to obtain or use coupons.

(B) The State agency shall place an expiration date only on those ID's issued to households that have been certified for delivered meals for a temporary period.

(ii) ID cards delivered to households by mail shall not be mailed in the same envelope with an ATP or coupons.

(iii) If the household does not name an authorized representative, the State agency shall indicate on the ID card that no designation was made.

(iv) Specially marked ID cards shall be issued as follows:

(A) Any household eligible for and interested in using delivered meal services shall receive an ID card marked with the letter "M".

(B) Any household residing in a remote section of Alaska which has been determined by FNS to be an area in which food coupons may be used to purchase hunting and fishing equipment shall receive an ID card marked with the letters "HF".

(v) Upon household consent, the State agency may use photo ID's to facilitate identification of program participants, except that the State agency shall not deny benefits because household members are unable or refuse to be photographed.

§ 273.11 Certifying households with special income circumstances.

(a) *Self-employment income.* The procedures for handling income received from boarders by a household that does not own and operate a commercial boarding house are described in paragraph (b) of this section. For all other households receiving self-employment income, including those households that own and operate a commercial boarding house, the State agency shall calculate the self-employment income as follows:

(1) *Annualizing self-employment income.* (i) Self-employment income which represents a household's annual support shall be annualized over a 12-month period, even if the income is received in only a short period of time. For example, self-employment income received by farmers shall be averaged over a 12-month period, if the income represents the farmer's annual support. This self-employment income

V 4 3 | 8 5

shall be annualized even if the household receives income from other sources in addition to self-employment.

(ii) Self-employment income which is received on a monthly basis but which represents a household's annual support shall normally be averaged over a 12-month period. If however, the averaged amount does not accurately reflect the household's actual monthly circumstances because the household has experienced a substantial increase or decrease in business, the State agency shall calculate the self-employment income based on anticipated earnings.

(iii) Self-employment income which represents only part of a household's annual support shall be averaged over the period of time the income is intended to cover. For example, self-employed vendors who work only in the summer and supplement their income from other sources during the balance of the year shall have their self-employment income averaged over the summer months rather than a 12-month period.

(iv) If a household's self-employment enterprise has been in existence for less than a year, the income from that self-employment enterprise shall be averaged over the period of time the business has been in operation, and the monthly amount projected for the coming year. However, if the business has been in operation for such a short time that there is insufficient data to make a reasonable projection, the household may be certified for less than a year until the business has been in operation long enough to base a longer projection.

(2) *Determining monthly income from self-employment.* (i) For the period of time over which self-employment income is determined, the State agency shall add all gross self-employment income (including capital gains), exclude the cost of producing the self-employment income, and divide the self-employment income by the number of months over which the income will be averaged.

(ii) For those households whose self-employment income is not averaged but is instead calculated on an anticipated basis, the State agency shall add any capital gains the household anticipates it will receive in the next 12 months, starting with the date the application is filed, and divide this amount by 12. This amount shall be used in successive certification periods during the next 12 months, except that a new average monthly amount shall be calculated over this 12 month period if the anticipated amount of capital gains changes. The State agency shall then add the anticipated monthly amount of capital gains to the anticipated monthly self-employment income, and subtract the cost of producing the self-employment income. Except for depreciation, the cost of producing the self-employment income shall be calculated by anticipating the monthly allowable costs of producing the self-employment income. Like capital gains, depreciation will be anticipated for the next 12 months and a monthly average excluded as a cost of doing business.

(iii) The monthly net self-employment income shall be added to any other earned income received by the household. The total monthly earned income less the 20 percent earned income deduction shall then be added to all other monthly income received by the household. The standard deduction, dependent care and shelter costs shall be computed as for any other household and subtracted to determine the adjusted monthly net income of the household.

(3) *Capital gains.* The proceeds from the sale of capital goods or equipment shall be calculated in the same manner as a capital gain for Federal income tax purposes. Even if only 50 percent of the proceeds from the sale of capital goods or equipment is taxed for Federal income tax purposes, the State agency shall count the full amount of the capital gain as income for food stamp purposes.

(4) *Allowable costs of producing self-employment income.* (i) Allowable costs of producing self-employment income include, but are not limited to, the identifiable costs of labor, stock, raw material, seed and fertilizer, interest paid to purchase income producing property, insurance premiums, and taxes paid on income producing property.

(ii) Depreciation shall be allowed as a cost of producing self-employment income for equipment, machinery or other capital investments necessary to the self-employment enterprise.

(A) *Use of Federal tax forms.* If the self-employment income from the last year is annualized, depreciation as indicated on the household's most recent Federal tax form shall be used as a cost of doing business. If the self-employment income is anticipated, the Federal tax form shall be used as a basis to anticipate the coming year's depreciation. When depreciation is anticipated, adjustments are required if the use of the asset as depreciated on the tax form will likely differ from the use anticipated. For example, the depreciation amount would be increased or decreased, as appropriate, for newly acquired assets or assets which will be retired or sold during the coming year.

(B) *Calculating depreciation.* If the tax form is not available, annual allowable depreciation shall be calculated by dividing the asset's cost by its useful life in years. The cost of the asset is its purchase price or the cost of materials if the asset was built by the household. The cost of the asset shall be reduced by any portion of the cost which is otherwise excludable as a cost of doing business. For example, a tool which was fully deducted as a cost of doing business possesses no remaining cost to be depreciated. The useful life of an asset is the "asset guideline period" from the IRS Asset Depreciation Range (ADR) Tables. Assets which annually produce income consistent with fair market value or which are essential for the self-employment of a household member may be depreciated over the entire year if owned for the entire year, even if not used for portions of the year. The "asset guideline period" starts from the month in which the asset is acquired. Once an asset has been in use in the household's enterprise, or held by the household, for the full "asset guideline period," no further depreciation shall be allowed even if the asset continues to be used.

(C) *Insufficient information.* If neither the tax form nor sufficient information about the asset's cost and use is available from the household, no depreciation shall be allowed.

(iii) The following items shall not be excluded as a cost of producing self-employment income:

(A) Payments on the principal of the purchase price of income producing real estate and capital assets, equipment, machinery and other durable goods;

(B) Net losses from previous periods; and

(C) Federal, State, and local income taxes, money set aside for retirement purposes, and other work related personal expenses (such as transportation to and from work), as these expenses are accounted for by the 20 percent earned income deduction specified in § 273.9(d)(2).

(5) *Assigning certification periods.* (i) Households that receive their annual support from self-employment and have no other source of income may be certified for up to 12 months. For those households that receive other sources of income or whose self-employment income is intended to cover a period of time that is less than a year, the State agency shall assign a certification period appropriate for the household's circumstances.

(ii) For those self-employed households that receive their annual income in a short period of time, the initial certification period shall be assigned to bring the household into the annual cycle. For example, the State agency may provide for a recertification at the time the household normally receives all or a majority of its annual income or the State agency may prefer to have the annual cycle coincide with the filing of the household's income tax.

(b) *Boarders.* (1) *Household with boarders.* Persons paying a reasonable amount for room and board as specified in § 273.1(b) shall be excluded from the household when determining the household's eligibility and benefit level. The income of households owning and operating a commercial boarding house shall be handled as described in paragraph (a) of this section. For all other households, payments from the boarder shall be treated as self-employment income and the household's eligibility determined as follows:

(i) *Income from the boarder.* The income from boarders shall include all direct payments to the household for room and meals, including contributions to the household for part of the household's shelter expenses. Shelter expenses paid directly by boarders to someone outside of the household shall not be counted as income to the household.

(ii) *Cost of doing business.* After determining the income received from the boarders, the State agency shall exclude that portion of the boarder payment which is a cost of doing business. The cost of doing business shall be equal to:

(A) The cost of the Thrifty Food Plan for a household size that is equal to the number of boarders, unless the amount paid for meals is less than this amount;

(B) The amount paid for meals, if this amount is less than the cost of the Thrifty Food Plan for a household size that is equal to the number of boarders; or

(C) The actual documented cost of providing room and meals. If actual costs are used, only separate and identifiable costs of providing room and meals to boarders shall be excluded.

(iii) *Deductible expenses.* The net income from self-employment shall be included with other earned income and the 20 percent earned income deduction taken. Shelter costs the household actually incurs, even if the boarder contributes to the household for part of the household's shelter expenses, shall be computed to determine if the household will receive a shelter deduction. However, the shelter costs shall not include any shelter expenses directly paid by the boarder to a third party, such as the landlord or utility company.

(2) *Boarders as households.* Boarders may be eligible as a food stamp household in their own right, as long as they are not residents of a commercial boarding house. When determining the eligibility and benefit level of a boarder, the State agency shall determine the boarder's shelter expenses by including any identifiable shelter expenses paid by the boarder. If a single payment is made for both room and board, the amount of the payment which is more than the Thrifty Food Plan for the number of persons in the boarder's household shall be considered a shelter expense. The boarder receives no exclusion or deduction for the amount paid for board itself.

(c) *Treatment of income and resources of disqualified members.* Individual household members may be disqualified for fraud or for failure to meet the student work registration requirements during the school year. During the period of time a household member is disqualified, the eligibility and benefit level of any remaining household members shall be determined as follows:

(1) *Resources.* The resources of the disqualified member shall continue to count in their entirety to the remaining household members;

(2) *Income.* A pro rata share of the income of the disqualified member shall be counted as income to the remaining members. This pro rata share is calculated by first subtracting the allowable exclusions from the disqualified member's income and dividing the income evenly among the household members, including the disqualified member. All but the disqualified member's share is counted as income to the remaining household members.

(3) *Deductible expenses.* The 20 percent earned income deduction shall apply to the prorated income attributed to the household as it was earned by the disqualified member. That portion of the household's allowable shelter and dependent care expenses which are either paid by or billed to the disqualified member shall be divided evenly among the household members, including the disqualified member. All but the disqualified member's share is counted as a deductible shelter expense for the remaining household members.

(4) *Eligibility and benefit level.* The disqualified member shall not be included when determining the household's size for purposes of assigning a benefit level to the household or for purposes of comparing the household's net monthly income with the income eligibility standards.

(5) *Reduction or termination of benefits within the certification period.* Whenever an individual is disqualified within the household's certification period, the state agency shall determine the eligibility or ineligibility of the remaining household members based, as much as possible, on information in the case file and shall take the following action:

(i) *Student disqualification.* If a household's benefits are reduced or terminated within the certification period because one of its members has been disqualified for failure to meet the student work registration requirement, the State agency shall issue a notice of adverse action which informs the household that one of its members has been disqualified, the reason for the disqualification, and the eligibility and benefit level of the remaining members.

(ii) *Fraud disqualification.* If a household's benefits are reduced or terminated within the certification period because one of its member has been disqualified for fraud, the State agency shall notify the remaining members of their eligibility and benefit level at the same time the disqualified member is notified of its disqualification. The household is not entitled to a notice of adverse action but may request a fair hearing to contest the reduction or termination of benefits.

(d) *Treatment of income and resources of other nonhousehold members.* For those nonhousehold members that have not been disqualified, such as ineligible aliens or SSI recipients in cash-out States, the income and resources of the nonhousehold member shall not be considered available to the household. If the household shares deductible expenses with the nonhousehold member, only the amount actually paid or contributed by the household shall be deducted as a household expense. If the payments or contributions cannot be differentiated, the expenses shall be prorated evenly among persons actually paying or contributing to the expense and only the household's pro rata share deducted.

(e) *Residents of drug/alcoholic treatment and rehabilitation programs.* (1) Narcotics addicts or alcoholics who regularly participate in FNS authorized drug or alcoholic treatment and rehabilitation programs on a resident basis may voluntarily elect to participate in the Food Stamp Program. The State agency shall certify residents of addict/alcoholic treatment centers by using the same provisions that apply to all other applicant households except that certification must be accomplished through an authorized representative as described in § 273.1(f)(iv). The guidelines for issuing FNS authorizations to these treatment centers are set forth in § 278.1(e).

(2) Each treatment and rehabilitation center shall provide the State agency on a monthly basis with a certified list of currently participating residents. In addition, the State agency shall conduct periodic random on-site visits to the center to assure the accuracy of the listings and that the State agency's records are consistent and up-to-date.

(3) The following provisions apply to residents of treatment centers:

(i) When expedited processing standards as described in § 273.2(i) are necessary, eligibility for the initial application shall be processed on an expedited basis, and the State agency shall complete verification and documentation requirements prior to issuance of a second coupon allotment;

M Y 2 7 8 UMI

V 43 | 85 MY 2 78 UMI

(ii) When normal processing standards apply, the State agency shall complete the verification and documentation requirements prior to making an eligibility determination for the initial application;

(iii) The State agency shall process changes in household circumstances and recertifications by using the same standards that apply to all other food stamp households; and

(iv) Resident households shall be afforded the same rights to notices of adverse action, to fair hearings, and to entitlement to lost benefits as are all other food stamp households.

(4) The treatment center shall provide resident addicts or alcoholics with their ID card and one half of their monthly coupon allotment when the household leaves the treatment and rehabilitation program prior to the sixteenth day of the allotment month. Once the household leaves the treatment center, the center is no longer allowed to act as that household's authorized representative. The household shall be provided a change report form and advised by the center to return the form within 10 days to the appropriate office of the State agency.

(5) The treatment center shall notify the State agency, as provided in § 273.12(a), of changes in the household's income or other household circumstances and of when the addict or alcoholic leaves the treatment center. The treatment center shall return any ATPs or coupons received on behalf of households which are no longer residents of the center.

(6) The organization or institution shall be responsible for any misrepresentation or fraud which it knowingly commits in the certification of center residents. As an authorized representative, the organization or institution must be knowledgeable about household circumstances and should carefully review those circumstances with residents prior to applying on their behalf. The organization or institution shall be strictly liable for all losses or misuse of food coupons held on behalf of resident households and for all overissuances which occur while the households are residents of the treatment center.

(7) The organization or institution may be penalized or disqualified, as described in § 278.6, if it is determined administratively or judicially that coupons were misappropriated or used for purchases that did not contribute to a certified household's meals. State agency penalties and/or disqualifications shall not be imposed without prior approval from FNS. The State agency shall promptly notify FNS when it has reason to believe that an organization or institution is misusing coupons in its possession.

§ 273.12 Reporting changes.

(a) *Household responsibility to report.* (1) Certified households are required to report the following changes in circumstances within 10 days of the date the change becomes known to the household:

(i) All changes in income, except changes in the public assistance grant;

(ii) All changes in household composition, such as the addition or loss of a household member;

(iii) Changes in residence and the resulting change in shelter costs; and

(iv) The acquisition of a licensed vehicle not fully excludable under § 273.8(e).

(2) Changes shall be considered to be reported by the household on the date the report is received by the State agency, or if mailed, the date of the household's report is postmarked.

(3) State agencies shall not impose any reporting requirements on households except as provided in paragraph (a)(1) of this section.

(b) *Report form.* (1) The State agency shall provide households with a form for reporting the changes required in paragraph (a) of this section and shall pay the postage for the household to mail in the request. All State agencies shall use the reporting form designed by FNS, unless FNS approves a deviation. Deviations shall be granted under the same conditions deviations are granted for the application form, as specified in § 273.2(b). The reporting form shall, at a minimum, include the following:

(i) The amount of gross income used to certify the household which has been itemized by household member, and the source and the frequency of the income;

(ii) The civil and criminal penalties for violations of the Act in understandable terms and in prominent and boldface lettering; and

(iii) A reminder to the household of its right to claim actual utility costs if its costs exceed the standard.

(2) The submission of a change report shall not be construed to be a waiver of the household's right to a notice of adverse action. The State agency may provide for a waiver of that right on the report form for the household to sign. This waiver shall warn the household that, upon signing, it waives its right to a notice of adverse action and continuation of benefits if adversely affected by the reported change.

(3) Changes reported over the telephone or in person by the household shall be acted on in the same manner as those reported on the change report form.

(4) A change report form shall be provided to newly certified households at the time of certification and a new form shall be sent to the household whenever a change is reported.

(c) *State agency action on changes.* The State agency is required to take prompt action on all changes to determine if the change affects the household's eligibility or allotment. If the change was reported by the household, the date a change was reported on a change report form shall be computed from the postmark of the change report form, plus two days for mailing time, or whenever the change was actually received by the State agency, whichever is earlier. Even if there is no change in the allotment, the State agency shall document the change in the case file, return another change report form to the household, and notify the household of the effect of the change, if any, on its benefits. Restoration of lost benefits shall be provided to any household if the State agency fails to take action on a change which increases benefits within the time limits specified in paragraph (c)(1) and (2) of this section.

(1) *Increase in benefits.* (i) *Normal processing of changes.* For changes which result in an increase in benefits and which are not handled on an expedited basis, the State agency shall make the change effective for the first allotment issued 10 days after the date the change was reported to the State agency.

(ii) *Expedited action on certain changes.* (A) If a household reports a change in its circumstances which reduces its gross monthly income by $50 or more and reduces its net monthly income to zero, the State agency shall make the change effective within two working days of the date the change was reported.

(B) If the household reports a change which results in an increase in benefits due to either the addition of a new household member that is not a certified member of another household, or due to a reduction in total gross monthly income counted for food stamp purposes of $50 or more, and the change is reported by the 20th of the month, the State agency shall make the change effective no later than 10 days after the change was reported. If the new household member is already a certified member of another household in the month the change is reported, the State agency shall make the change effective no later than the next allotment which will be issued after the change is reported.

(C) For those changes which must be made effective in the same month the household reported the change, the State agency shall make the change effective by either adjusting the household's allotment or, if the household has already participated, by issuing a supplementary allotment. In areas where ATP cards are used and have already been issued when the household reports the change, the State agency shall, if the household has not yet participated, either replace the household's ATP with an adjusted

card or issue a supplementary ATP. If the household has already participated, the State agency shall issue a supplementary ATP.

(2) *Decreases in benefits.* If the household's benefit level decreases or the household becomes ineligible as a result of the change, the State agency shall issue a notice of adverse action within 10 days of the date the change was reported. The decrease in the benefit level shall be made effective with the first allotment to be issued after the 10 day notice of adverse action period has expired, provided a fair hearing and continuation of benefits have not been requested.

(d) *Failure to report.* If the State agency discovers that the household failed to report a change required by paragraph (a) of this section and, as a result, received benefits to which it was not entitled, the State agency shall file a claim against the household in accordance with § 273.18. Individuals shall not be terminated for failing to report a change, unless the individual is disqualified in accordance with the fraud disqualification procedures specified in § 273.16.

(e) *Mass changes.* Certain changes are initiated by the State or Federal government which may affect the entire caseload or significant portions of the caseload. These changes include annual adjustments to the net income eligibility standards and the shelter/dependent care deduction; semiannual adjustments to the Thrifty Food Plan and standard deduction; annual and seasonal adjustments to the State's utility standard; periodic cost-of-living adjustments to social security, SSI and other Federal benefits; periodic adjustments to AFDC or GA payments; and other changes in the eligibility criteria based on legislative or regulatory actions.

(1) *Federal adjustments to eligibility standards, allotments, and deductions, State adjustments to utility standards.* (i) These adjustments shall go into effect for all households at a specific point in time. Semiannual adjustments to the Thrifty Food Plan and the standard deduction shall be effective for all issuances in January and July. Annual adjustments to the shelter/dependent care deduction and the eligibility standards shall be effective for all July issuances.

State agencies may wish to consider timing the annual adjustments to their utility standard to coincide with the Federal shelter deduction adjustment.

(ii) Although a notice of adverse action is not required, State agencies may send an individual notice to households of these changes. State agencies shall publicize these mass changes through the news media; posters in certification, issuance offices or other sites frequented by certified households; or general notices mailed to households. Households whose certification periods overlap a seasonal variation in the utility standard shall be advised at the time of initial certification when the adjustment will occur and what the variation in the benefit level will be.

(2) *Mass changes in public assistance.* (i) When the State agency makes an overall adjustment to public assistance payments, corresponding adjustments to the household's food stamp benefits shall be handled as a mass change. When the State agency has at least 30 days advance knowledge of the amount of the public assistance adjustment, the State agency shall recompute food stamp benefits to be effective in the same month as the public assistance change. If the State agency does not have sufficient notice, the food stamp change shall be effective not later than the month following the month in which the public assistance change was made.

(ii) A notice of adverse action is not required when a household's food stamp benefits change as a result of a mass change in the public assistance grant. However, State agencies shall send individual notices to households to inform them of the change. If a household requests a fair hearing, benefits shall be continued at the former level only if the issue being appealed is the computation of benefits and not the fact that benefits are reduced because of the mass change.

(iii) State agencies which also administer a general assistance program shall handle mass adjustments to GA payments in the same manner as public assistance adjustments. However, in States which do not administer both programs, mass changes in GA payments will be handled according to procedures in paragraph (e)(3) of this section.

(3) *Mass changes in Federal benefits.* Households are responsible for reporting changes in federal benefits such as social security and SSI payments. States which have the capability, and elect to, may treat adjustments as a mass change in accordance with the procedures in paragraph (e)(2) of this section. If not handled as a mass change, individual advance notice of adverse action shall be required according to § 273.13.

(4) *Mass changes resulting from implementation of the Food Stamp Act of 1977.* State agencies shall send individual notices of adverse action to each household that receives a reduction or termination in benefits during its certification period due to the new eligibility requirements prescribed in these regulations. The notice of adverse action shall explain to the household that the change is the result of changes in Federal law and that, although the household has the right to request a fair hearing, benefits will be continued pending the fair hearing, only if the household believes its eligibility and benefit level were computed incorrectly, or that the new law is being misapplied or misinterpreted.

(f) *PA households.* (1) PA households have the same reporting requirements as any other food stamp household, and shall use the food stamp change report form, unless a similar form used in the PA program is approved by FNS for this purpose. PA households which report a change in circumstances to the PA worker shall be considered to have reported the change for food stamp purposes.

(2) Whenever a change results in the reduction or termination of a household's PA grant within its food stamp certification period, and the State agency has sufficient information to determine how the change affects the household's food stamp eligibility and benefit level, the State agency shall take the following action:

(i) If a change in household circumstances requires both a reduction or termination in the PA payment and a reduction or termination in food stamp benefits, the State agency shall issue a single notice of adverse action for both the PA and food stamp actions. If the household requests a fair hearing within the period provided by the notice of adverse action, the household's food stamp benefits shall be continued on the basis authorized immediately prior to sending the notice. However, the household must reapply for food stamp benefits if the food stamp certification period expires before the fair hearing process is completed. If the household does not appeal, the change shall be made effective in accordance with the procedures specified in paragraph (c) of this section.

(ii) If the household's food stamp benefits will be increased as a result of the reduction or termination of the PA grant, the State agency shall issue the PA notice of adverse action, but shall not take any action to increase the household's food stamp benefits until the household decides whether it will appeal the adverse action. If the household decides to appeal and its PA grant is continued, the household's food stamp benefits shall continue at the previous basis. If the household does not appeal, the State agency shall make the change effective in accordance with the procedures specified in paragraph (c) of this section, except that the time limits for the State agency to act on changes which increase a household's benefits shall be calculated from the date the PA notice of adverse action period expires.

(3) Whenever a change results in the termination of a household's PA grant within its food stamp certification period, and the State agency does not

V 4 3 — 8 5 M Y 2 7 8 UMI

have sufficient information to determine how the change affects the household's food stamp eligibility and benefit level (such as when an absent parent returns to a household, rendering the household categorically ineligible for public assistance, and the State agency does not have any information on the income of the new household member), the State agency shall not automatically terminate the household's benefits but shall instead take the following action:

(i) Where a PA notice of adverse action has been sent, the State agency shall wait until the household's notice of adverse action period expires or until the household requests a fair hearing, whichever occurs first. If the household requests a fair hearing and its PA benefits are continued pending the appeal, the household's food stamp benefits shall be continued at the same basis.

(ii) If a PA notice of adverse action is not required, or the household decides not to request a fair hearing and continuation of its PA grant, the State agency shall send the household a notice of expiration which informs the household that its certification period will expire at the end of the month following the month the notice of expiration is sent and that it must reapply if it wishes to continue to paticipate. The notice of expiration shall also explain to the household that its certification period is expiring becuase of changes in its circumstances which may affect its food stamp eligibility and benefit level.

(4) A notification of change shall be provided the household whenever its benefits are altered as a result of changes in its PA grant or whenever the household's certification period is shortened to reflect changes in the household's circumstances. If the certification period is shortened, the household's certification period shall not end any earlier than the month following the month in which the State agency determines that the certification period should be shortened, thus allowing adequate time for the State agency to send a notice of expiration and for the household to timely reapply. If the PA grant is terminated but the household is still eligible for food stamp benefits, members of the household shall be advised of food stamp work registration, if applicable, as their WIN registration exemption no longer applies.

§ 273.13 Notice of adverse action.

(a) *Use of notice.* Prior to any action to reduce or terminate a household's program benefits within the certification period, the State agency shall, except as provided in paragraph (b) of this section, provide the household timely and adequate advance notice before the adverse action is taken.

(1) The notice of adverse action shall be considered timely if it: (i) Conforms to that period of time defined by the State agency as an adequate notice period for its public assistance caseload, except that the period shall not be shorter than the period provided by paragraph (a)(1)(ii) of this section; or (ii) is received by the household 10 days before the date of the adverse action. If the notice is mailed, the State agency shall add to the adverse notice period an additional two days from the postmarked date is to compensate for mail delivery time. Also, if the adverse notice period ends on a weekend or holiday, the notice period shall be extended to the next work day.

(2) All State agencies shall use a notice of adverse action form designed by FNS. FNS may approve a request from a State agency for a deviation from that form because of the requirements of a computer system or other exigencies for which the State agency can submit adequate justification. The notice of adverse action shall be considered adequate if it explains in easily understandable language: the proposed action; the reason for the proposed action; the household's right to request a fair hearing; the name and telephone number of the person to contact for additional information; the availability of continued benefits; and the liability of the household for any overissuances received while awaiting a fair hearing if the hearing official's decision is adverse to the household. If there is an individual or organization available that provides free legal representation, the notice shall also advise the household of the availability of the service.

(b) *Exemptions from notice.* Individual notices of adverse action are not required when: (1) The State initiates a mass change as described in § 273.12(e).

(2) The State agency receives a written statement from the household or the authorized representative which either states that food stamp benefits are no longer desired or which acknowledges that information the household has provided will result in a reduction or termination of benefits and waives the right to notice of adverse action.

(3) The State agency receives notification of the death of all members of a household.

(4) The State agency receives notification that the household has moved from the project area.

(5) The household has been receiving an increased allotment to restore lost benefits, the restoration is complete, and the household was previously notified in writing of when the increased allotment would terminate.

(6) The household's allotment varies from month to month within the certification period to take into account changes which were anticipated at the time of certification and the household was so notified at the time of certification.

(7) The household jointly applied for PA/GA and food stamp benefits and has been receiving food stamp benefits pending the approval of the PA/GA grant and was notified at the time of certification that food stamp benefits would be reduced upon approval of the PA/GA grant.

(8) A household member is disqualified for fraud, in accordance with § 273.16, or the benefits of the remaining household members are reduced or terminated to reflect the disqualification of that household member. The notice requirements for individuals or households affected by fraud disqualifications are explained in § 273.16.

(9) The household contains a member subject to a lockout or strike and, for purposes of receiving a longer certification period than is otherwise allowed for such households, signs a waiver of its right to notice of adverse action to enable the State agency to reduce or terminate benefits when the lockout or strike is settled and the household has begun receiving income from employment again.

§ 273.14 Recertification.

(a) *Action on applications for recertification.* The State agency shall complete the application process and approve or deny timely applications for recertification prior to the end of the household's current certification period and shall provide eligible households with an opportunity to participate by the household's normal issuance cycle in the month following receipt of a timely application. The State agency shall not continue benefits to the household beyond the end of the certification period unless the household has been recertified.

(b) *Notice of expiration.* The State agency shall provide each household, including PA households, with a notice of the expiration of its certification just prior to or at the start of the last month of the household's certification period.

(1) Households shall receive the notice of expiration not earlier than 15 days prior to, nor later than the first day of, the household's last month of certification. If it is impossible for the State agency to provide the notice of expiration by the first day of the last month of the household's certification period because the household is certified for one month or because the household was initially certified for two months during the month following the month of application, the notice of expiration shall be provided at the time of certification. The State agency shall not require the household to submit an application or

appear for an interview before the last month of its current certification period.

(2) The notice of expiration shall contain the date the current certification period ends; the date by which the household must file an application to receive uninterrupted benefits; the household's right to request an application and have the State accept an application as long as it is signed and contains a legible name and address; the address of the office where the application must be filed; the consequences of failure to comply with the notice of expiration; the household's right to file the application by mail or through an authorized representative; and the household's right to a fair hearing if the State agency refuses to accept as good cause the household's reasons for failure to comply with the notice of expiration. The State agency is encouraged to include an application form with the notice of expiration and/or an appointment for an interview. Regardless of when the interview date is assigned, the household has timely applied if the application is received by the 15th of the last month of certification.

(3) Households provided a notice of expiration at the time of certification, in accordance with paragraph (b)(1) of this section, shall have 15 days from the date the notice is received to file a timely application for recertification. All other households which submit an identifiable application by the 15th of the last month of the certification period shall be considered to have made timely application for recertification. To aid the State agency in determining if adequate time has been permitted, the State agency shall use the postmark on the notice of expiration, plus two days for mailing time. In cases of dispute, the household may demonstrate that the notice of expiration was not, in fact, received in a timely manner.

(c) *State action on timely reapplications.* Households that have timely reapplied and have been determined eligible shall not experience an interruption in benefits. State agencies shall take action on timely reapplications within the following time standards, even if, to meet these standards, the State agency must provide an opportunity to participate outside of the normal issuance system:

(1) Households that were provided a notice of expiration at the time of certification and have timely reapplied shall be notified of their eligibility or ineligibility and provided an opportunity to participate, if eligible, not later than 30 days after the date the household had an opportunity to obtain its last allotment.

(2) For those households that have filed an application by the 15th of the last month of their certification period, the State agency shall approve or deny the application and notify the household of its determination by the end of the current certification period. In addition, for households determined eligible, the State agency shall provide an opportunity to participate by the household's normal issuance cycle in the month following receipt of the timely reapplication. Households which have timely reapplied, but due to State agency error are not determined eligible in sufficient time to provide for issuance in the household's normal issuance cycle for the following month, shall receive an immediate opportunity to participate upon being determined eligible, even if the State agency must provide an opportunity to participate outside of the normal issuance system.

(d) *State agency failure to act.* State agency failure to provide eligible households which filed a timely application for recertification with an opportunity to participate in accordance with the above provisions shall be considered an administrative error. These households shall be entitled to restoration of lost benefits if, as a result of such error, the household was unable to participate for the month following the expiration of the certification period.

(e) *Failure to submit a timely reapplication.* A household which fails to submit a timely application for recertification without good cause shall lose its right to uninterrupted benefits. Households which refuse to cooperate in providing required information shall be denied. Any application not submitted in a timely manner shall be treated as an application for initial certification, except that previously verified income or expenses which change by $25 or less shall not be verified if the application is received within 30 days after the certification period expires.

(f) *Good cause for failure to timely reapply.* If the State determines that the household's failure to make timely application, or to otherwise complete the certification process in a timely manner, was for good cause, the household shall be entitled to restoration of lost benefits, if as a result of its failure, the household was unable to participate in the month following the expiration of its certification period. The determination of good cause shall be made on a case-by-case basis, and shall include, but not be limited to, failure to receive timely notice of expiration or personal illness.

§ 273.15 Fair hearings.

(a) *Availability of hearings.* Each State agency shall provide a fair hearing to any household aggrieved by any action of the State agency which affects the participation of the household in the Program.

(b) *Hearing system.* Each State agency shall provide for either a fair hearing at the State level or for a hearing at the local level which permits either the household or the local agency to further appeal a local decision to a State level fair hearing. State agencies may adopt local level hearings in some project areas and maintain only State level hearings in other project areas.

(c) *Timely action on hearings.* (1) *State level hearings.* Within 60 days of receipt of a request for a fair hearing, the State agency shall conduct the hearing, arrive at a decision, and reflect that decision on the coupon allotment.

(2) *Local level hearings.* Within 45 days of receipt of a request for a fair hearing, the State agency shall conduct the hearing, arrive at a decision, and reflect that decision on the coupon allotment.

(3) *Appeals of local level decisions.* Within 45 days of receipt of any request for a State level review of a decision or for a new State level hearing, the State agency shall conduct the review or the new hearing, arrive at a decision, and reflect that decision on the coupon allotment.

(4) *Expedited hearings.* Expedited fair hearing procedures shall be conducted as required by paragraph (d) of this section.

(5) *Household requests for postponement.* The household may request and is entitled to receive a postponement of the scheduled hearing. The postponement shall not exceed 30 days and the time limit for action on the decision may be extended for as many days as the hearing is postponed. For example, if a State level hearing is postponed by the household for 10 days, the final action will be required within 70 days from the date of the request for a hearing.

(d) *Expedited hearings.* Households which indicate that they wish to present their case to a higher authority after being denied benefits under the expedited certification procedures set forth in § 273.2(i) shall be given special expedited handling as follows:

(1) An agency conference shall be scheduled within two working days, upon household consent. The conference may be attended by the eligibility worker who denied the benefits and shall be attended by the agency director, or the eligibility supervisor responsible for the agency action, or both. Agency conferences may lead to an informal resolution of the dispute. However, unless the household makes a written withdrawal of its request for a hearing, the agency conference shall in no way replace the fair hearing process.

(2) If the request for a hearing is pursued after or instead of the agency conference, State agencies shall dis-

V 43 | 85

pense with the local level hearing and shall schedule a State level hearing as soon as reasonably possible.

(3) The State level hearing official's decision shall be issued within 15 working days of receipt of the request for a hearing.

(4) If the State agency action is not upheld, the State agency shall provide the household an opportunity to participate in the program within two working days of the receipt of the hearing official's decision.

(e) *Consolidated hearings.* State agencies may respond to a series of individual requests for hearings by conducting a single group hearing. State agencies may consolidate cases where related issues of State and/or Federal law, regulation or policy are being raised. In all group hearings, the policies governing individual hearings must be followed. Each individual household shall be permitted to present its own case or have the case presented by a representative.

(f) *Notification of right to request hearing.* At the time of application, each household shall be informed in writing of its right to a hearing, of the method by which a hearing may be requested, and that its case may be presented by a household member or a representative, such as a legal counsel, a relative, a friend or other spokesperson. If there is an individual or organization available that provides free legal representation, the household shall also be informed of the availability of that service. Hearing procedures shall be published by the State agency and made available to any interested party.

(g) *Time period for requesting hearing.* A household shall be allowed to request a hearing on any action by the State agency or loss of benefits which occurred in the prior 12 months. The 12 month period includes the month in which the hearing is requested.

(h) *Request for hearing.* A request for a hearing is defined as any clear expression, oral or written, by the household or its representative that it wishes to present its case to a higher authority. The freedom to make such a request must not be limited or interfered with in any way.

(i) *State agency responsibilities on hearing requests.* (1) Upon request, the State agency shall make available without charge the specific materials necessary for a household or its representative to determine whether a hearing should be requested or to prepare for a hearing. Upon request, the State agency shall also help the household with its hearing request and with preparation of its case. Households shall be advised of any legal services available that can provide representation at the hearing.

(2) The State agency shall process each request for a hearing under uniform rules of procedure. The uniform rules of procedures shall be available for public inspection and copying. At a minimum, the uniform rules of procedure shall include all filing limits for requests and appeals, advance notification requirements, expedited and other hearing timeliness standards, rules of conduct at the hearing, and the rights and responsibilities of persons requesting a hearing.

(j) *Denial or dismissal of request for hearing.* The State agency shall not deny or dismiss a request for a hearing unless:

(1) The request is not received within the time period specified in paragraph (g) of this section;

(2) The request is withdrawn in writing by the household or its representative; or

(3) The household or its representative fails, without good cause, to appear at the scheduled hearing.

(k) *Continuation of benefits.* (1) If a household requests a fair hearing and continuation of benefits within the period provided by the notice of adverse action, as set forth in § 273.13, and its certification period has not expired, the household's participation in the Program shall be continued on the basis authorized immediately prior to the notice of adverse action. The period provided by the notice of adverse action as described in § 273.13(a)(1)(i) begins with the postmark or the date of receipt of the notice, whichever is earlier. If a hearing request is not made within the period provided by the notice of adverse action, benefits shall be reduced or terminated as provided in the notice. However, if the household establishes that its failure to make the request within the advance notice period was for good cause, the State agency shall reinstate the benefits to the prior basis. When benefits are reduced or terminated due to a mass change, participation on the prior basis shall be reinstated only if the issue being contested is that food stamp eligibility or benefits were improperly computed or that Federal law or policy is being misapplied or misinterpreted by the State agency.

(2) Once continued or reinstated, benefits shall not be reduced or terminated prior to the receipt of the official hearing decision unless:

(i) The certification period expires. The household may reapply and may be determined eligible for a new certification period with a benefit amount as determined by the State agency;

(ii) The hearing official makes a preliminary determination, in writing and at the hearing, that the sole issue is one of Federal law, regulation or policy and that the household's claim that the State agency improperly computed the benefits or misinterpreted or misapplied such law, regulation or policy is invalid;

(iii) A change affecting the household's eligibility or basis of issuance occurs while the hearing decision is pending and the household fails to request a hearing after the subsequent notice of adverse action; or

(iv) A mass change affecting the household's eligibility or basis of issuance occurs while the hearing decision is pending.

(3) The State agency shall promptly inform the household in writing if benefits are reduced or terminated pending the hearing decision.

(l) *Notification of time and place of hearing.* The time, date, and place of the hearing shall be convenient to the household. Advance written notice shall be provided to all parties involved to permit adequate preparation of the case. The notice shall:

(1) Advise the household or its representative of the name, address, and phone number of the person to notify in the event it is not possible for the household to attend the scheduled hearing.

(2) Specify that the State agency will dismiss the hearing request if the household or its representative fails to appear for the hearing without good cause.

(3) Include the State agency hearing procedures and any other information that would provide the household with an understanding of the proceedings and that would contribute to the effective presentation of the household's case.

(4) Explain that the household or representative may examine the case file prior to the hearing.

(m) *Hearing official.* Hearings shall be conducted by an impartial official(s) who does not have any personal stake or involvement in the case and who was not directly involved in the initial determination of the action which is being contested. State level hearings shall be conducted by state level personnel and shall not be conducted by local level personnel.

(1) *Designation of hearing official.* The hearing official shall be:

(i) An employee of the State agency;

(ii) An individual under contract with the State agency;

(iii) An employee of another public agency designated by the State agency to conduct hearings;

(iv) A member or official of a statutory board or other legal entity designated by the State agency to conduct hearings; or

(v) An executive officer of the State agency, a panel of officials of the State agency or a person or persons expressly appointed to conduct State level hearings or to review State and/or local level hearing decisions.

(2) *Power and duties.* The hearing official shall:

(i) Administer oaths or affirmations if required by the State;

(ii) Ensure that all relevant issues are considered;

(iii) Request, receive and make part of the record all evidence determined necessary to decide the issues being raised;

(iv) Regulate the conduct and course of the hearing consistent with due process to ensure an orderly hearing;

(v) Order, where relevant and useful, an independent medical assessment or professional evaluation from a source mutually satisfactory to the household and the State agency;

(vi) Render a hearing decision in the name of the State agency, in accordance with paragraph (p) of this section, which will resolve the dispute.

(n) *Attendance at hearing.* The hearing shall be attended by a representative of the State agency which initiated the action being contested and by the household and/or its representative. The hearing may also be attended by friends or relatives of the household and the public, upon household consent.

(o) *Conduct of hearing.* The household may not be familiar with the rules of order and it may be necessary to make particular efforts to arrive at the facts of the case in a way that makes the household feel most at ease. The household or its representative must be given adequate opportunity to:

(1) Examine all documents and records to be used at the hearing at a reasonable time before the date of the hearing as well as during the hearing. The contents of the case file including the application form and documents of verification used by the State agency to establish the household's ineligibility or eligibility and allotment shall be made available, provided that confidential information is protected from release. The State agency shall provide free copies of the relevant portions of the case file if requested by the household or its representative. Confidential information that is protected from release and other documents or records which the household will not otherwise have an opportunity to contest or challenge shall not be introduced at the hearing or affect the hearing official's decision.

(2) Present the case or have it presented by a legal counsel or other person.

(3) Bring witnesses.

(4) Advance arguments without undue interference.

(5) Question or refute any testimony or evidence, including an opportunity to confront and cross-examine adverse witnesses.

(6) Submit evidence to establish all pertinent facts and circumstances in the case.

(p) *Hearing decisions.* (1) Decisions of the hearing official shall comply with Federal law, regulations or policy and shall be factually based on the hearing record. The verbatim transcript or recording of testimony and exhibits, or an official report containing the substance of what transpired at the hearing, together with all papers and requests filed in the proceeding shall constitute the exclusive record for a final decision by the hearing official. This record shall be retained in accordance with § 272.2(f). This record shall also be available, for copying and inspection, to the household or its representative at any reasonable time.

(2) A decision by the hearing official shall be binding on the State agency and shall summarize the facts of the case, specify the reasons for the decision, and identify the supporting evidence and the pertinent FNS regulations or policy. The decision shall become a part of the record.

(3) The household and the local agency shall each be notified in writing of: the decision; the reasons for the decision in accordance with paragraph (p)(2) of this section; and the available appeal rights. The notice shall advise that an appeal request will not affect the hearing official's decision, but that an appeal may result in a reversal of the decision which could ultimately result in either a claim against the household for an overissuance or in the restoration to the household of any lost benefits. The following are the available appeal rights:

(i) After a State level hearing decision which upholds the State agency action, the household shall be notified of the right to pursue judicial review of the claim.

(ii) After a local level hearing decision which upholds the state agency action, the household shall be advised of the right to appeal to the State agency for a review of the decision based on the hearing record, and of the right to request a completely new State agency level hearing, and of the difference between the two appeal procedures to enable the household to make the proper choice if it wishes to appeal.

(iii) After a local level hearing which is decided in favor of the household, the local agency shall be advised of the right to appeal to the State agency for a review of the decision based on the hearing record, and of the right to request a completely new State agency level hearing.

(4) If the household or the State agency wishes to appeal a local level hearing decision, the appeal request must be filed within 15 days of receipt of the hearing decision notice. The notice is considered received two days after the postmark date. Within 45 days of receipt of any request for a State level review of the decision or for a new State level hearing, the State agency must conduct the review or the hearing, arrive at a decision and reflect the decision on the coupon allotment. Unless a new hearing is specifically requested by the household or the local agency, the State agency hearing official will review the local level hearing record to determine if the local decision was supported by substantial evidence. State agency review procedures shall provide for notifying the local agency and the household, by Certified Mail-Return Receipt Requested, that each may file a summary of arguments which shall become a part of the record if timely received. Both parties shall be advised that failure to file a summary will not be considered in deciding the case and that the summary must be postmarked within 10 days of receipt of the notice.

(5) All State agency hearing records and decisions shall be available for public inspection and copying, subject to the disclosure safeguards provided in § 272.2(c).

(q) *Implementation of local level hearing decision.* (1) In the event the local hearing decision upholds the State agency action, any benefits to the household which were continued pending the hearing shall be discontinued beginning with the next scheduled issuance, regardless of whether or not an appeal is filed. Collection action for any claims against the household for overissuances shall be postponed until the 15 day appeal request period has elapsed, or if an appeal is requested, until the State agency upholds the decision of the local hearing official.

(2) In the event the local hearing official decides in favor of the household, benefits to the household shall be reinstated, as required by the decision, within the time limits specified in paragraph (c) of this section, regardless of whether or not a appeal is filed. Action to issue lost benefits to the household shall be postponed until it is determined that the local agency will not appeal the decision, or until the State agency upholds the decision of the local hearing official.

(r) *Implementation of final State agency decisions.* The State agency is responsible for ensuring that all final hearing decisions are reflected in the household's coupon allotment within the time limits specified in paragraph (c) of this section.

(1) When the hearing official determines that a household has been improperly denied program benefits or has been issued a lesser allotment than was due, lost benefits shall be provided to the household in accordance with § 273.17.

(2) When the hearing official upholds the State agency's action, a claim against the household for any overissuances shall be prepared in accordance with § 273.18.

MY 2 78
UMI

V 4 3 | 8 5

(s) *Review of appeals of local level decisions.* State agencies which adopt a local level hearing system shall establish a procedure for monitoring local level hearing decisions. The number of local level decisions overturned upon appeal to a State level hearing shall be examined. If the number of reversed decisions is excessive, the State agency shall take corrective action.

(t) *FNS review of decisons contrary to federal law or regulations.* [Reserved]

§ 273.16 Fraud disqualification.

(a) *Fraud disqualification penalties.* Individuals found to have committed fraud at an administrative fraud hearing shall be ineligible to participate in the Program for three months. Individuals found guilty of criminal or civil fraud by a court of appropriate jurisdiction shall be ineligible for not less than six months and not more than twenty-four months as determined by the court. State agencies shall disqualify only the individual and not the entire household.

(b) *Definition of fraud.* Fraud includes any action by an individual to knowingly, willfully and with deceitful intent:

(1) Make a false statement to the State agency, either orally or in writing, to obtain benefits to which the household is not entitled;

(2) Conceal information to obtain benefits to which the household is not entitled;

(3) Alter coupons or authorization cards;

(4) Use coupons to buy ineligible items such as alcohol or tobacco;

(5) Use improperly obtained coupons or authorization cards;

(6) Give or sell coupons or authorization cards to someone not authorized to accept them and who does not use them entirely for the benefit of the household; or

(7) Commit, or conspire to commit, any other fraudulent act to get food stamp benefits in a manner not authorized by Federal law or regulation.

(c) *Notification to applicant households.* The State agency shall inform the household in writing of the disqualification penalties for committing fraud each time it applies for program benefits. The penalties shall be written in clear, prominent, and boldface lettering on the application form.

(d) *Administrative disqualification.* An administrative fraud hearing shall be initiated by the State agency whenever the State agency has documented evidence to substantiate that a currently participating household member has committed fraud as defined in paragraph (b) of this section and the State agency believes the household member should be disqualified. Fraud hearings shall not be conducted if the amount the State agency suspects has been fraudulently obtained is less than $35. The burden of proving fraud is on the State agency. If the household member is not eligible or is not certified when the suspected fraud is discovered, the State agency shall initiate the hearing when the household member becomes eligible and is participating. Even though other legal action is planned against the household member, the hearing may still be conducted.

(1) *Consolidation of administrative fraud hearing with fair hearing.* The State agency may combine a fair hearing and an administrative fraud hearing into a single hearing if the factual issues arise out of the same, or related, circumstances and the household receives prior notice.

(2) *Fraud hearing procedures.* (i) State agencies may adopt a system of providing administrative fraud hearings only at the State level or it may adopt a system of providing a local hearing in some or all of its project areas with a right to appeal to a State level hearing. The system adopted need not be the same as the system adopted for providing fair hearings requested by households.

(ii) The provisions of § 273.15 (m), (o), and (p)(1) are also applicable for fraud hearings.

(iii) Within 60 days of the date the household member is notified in writing that the hearing has been scheduled, or within 60 days of the date the household appeals its case to a State level hearing, the State agency shall conduct the hearing, arrive at a decision and initiate administrative action which will make the decision effective. The household member or representative is entitled to a postponement of up to 30 days. If the hearing is postponed, the 60 day time limit shall be extended for as many days as the hearing is postponed.

(3) *Advance notice of hearing.* (i) The State agency shall provide written notice to the household member suspected of fraud at least 30 days in advance of the hearing. The notice shall be mailed Certified Mail—Return Receipt Requested and shall contain, at a minimum:

(A) The date, time, and place of the hearing;

(B) The charge against the household member;

(C) A summary of the evidence, and how and where it can be examined;

(D) A warning that the decision will be based solely on information provided by the food stamp office if the household member fails to appear at the hearing;

(E) A warning that a determination of fraud will result in a three month disqualification;

(F) A Listing of the household member's rights as contained in § 273.15(o); and

(G) A statement that the hearing does not preclude the State or Federal Government from prosecuting the household member for fraud in a civil or criminal court action, or from collecting the overissuance.

(ii) A copy of the State's published hearing procedures shall be attached to the advance notice.

(iii) The following advance notice is a model format and shall be used unless FNS approves a deviation. Deviations shall be granted under the same conditions deviations from the application form are granted in § 273.2(b).

FOOD STAMP PROGRAM

ADVANCE NOTICE OF FRAUD HEARING

Date _____
Case No. _____
To: (Name of Household Member)
(address)
(City, State Zip Code)

We have reason to believe you may have committed FRAUD because: _____
(Sumarize evidence) _____

A HEARING has been scheduled to examine the facts of your case. The hearing will be held at:
Time _____
Date _____
Place _____

If the hearing finds that you have committed fraud, you will not get food stamps for THREE MONTHS. Therefore, it is important that you be at the hearing. If you are not there, a decision will be based on information provided by the food stamp office. Please call the food stamp office if you cannot be at the hearing for a good reason, and we will try to get the date changed. A copy of the steps involved in a hearing is enclosed. Even though this hearing is scheduled, this does not prevent the State or Federal Government from prosecuting you for fraud in a court or from asking that you pay back in cash the value of any coupons your household was not eligible to receive. If you have any questions or you need the name and phone number of someone who can give you free legal advice (if available), please call the Food Stamp Office at _____.

_____
Signature of State agency representative

YOU HAVE THE RIGHT TO—

1. Look at the evidence that will be used at the hearing, both before and during the hearing. Please call the Food Stamp Office if you wish to look at the evidence before the hearing.
2. Present your own case or have someone present your case for you, such as a lawyer, a friend, relative, or a community worker.
3. Bring your own witnesses.
4. Argue your case freely.
5. Question any statements or evidence made against you.
6. Bring any evidence you may have that would support your case.

(4) *Scheduling of hearing.* Reasonable efforts shall be made to schedule the hearing at a time and place convenient to the household member suspected of fraud. If the household member or its representative cannot be located or fails to appear at the hearing without good cause, the hearing shall be conducted without the household member represented. Even though the household member is not represented, the hearing official is required to carefully consider the evidence and determine if fraud was commited based on clear and convincing evidence. If the household member is found to have committed fraud but a hearing official later determines that the household member or representative failed to appear with good cause, the previous decision shall no longer remain valid and the State agency shall conduct a de novo hearing. The household member has 10 days from receipt of the fraud notice to present reasons indicating a good cause for failure to appear. A hearing official must enter the good cause decision into the record.

(5) *Participation while awaiting a hearing.* Since the State agency cannot disqualify a household member for fraud until the hearing official finds that the individual has committed fraud, the State agency shall determine the eligibility and benefit level of the household in the same manner it would be determined for any other household. For example, the household's benefits shall be terminated if the certification period has expired and the household after receiving its notice of expiration, fails to reapply. The State agency shall also reduce or terminate the household's benefits if the State agency has facts to substantiate that the household is ineligible or eligible for fewer benefits (even if these facts led to the suspicion of fraud and the resulting fraud hearing) and the household fails to contest. For example, the State agency may have facts to substantiate that a household failed to report a change in its circumstances even though the State agency has not yet demonstrated that the failure to report was caused by fraud.

(6) *Criteria for determining fraud.* The hearing authority shall base the determination of fraud on clear and convincing evidence which demonstrates that the household member knowingly, willfully and with deceitful intent committed fraud, as defined in paragraph (b) of this section.

(7) *Decision format.* The hearing official's decision shall specify the reasons for the decision, identify the supporting evidence, identify the pertinent regulation or policy, and respond to reasoned arguments made by the household member or representative.

(8) *Appeal rights of the household member.* If the hearing official rules that the household member has committed fraud, the household member may appeal the decision, as follows:

(i) *Appeal after local hearing.* (A) A household member found to have committed fraud by a local hearing authority has 15 days after the member receives the local hearing decision notice to appeal the decision to a State level hearing. State agencies shall mail the notice by Certified Mail—Return Receipt Requested. If a State level hearing is not requested within the 15-day period, the household member shall be disqualified for three months beginning with the first calendar month after the 15-day period has expired. If, however, the household member requests a State level hearing within the 15-day period, the household member shall not be disqualified unless the State level hearing also finds the household member has committed fraud.

(B) If a State level hearing is requested, a de novo hearing shall be conducted in every case and a decision rendered within 60 days of the request. In a de novo hearing the prior decision is not taken into consideration.

(ii) *Appeal after State level hearing.* After a household member has been found to have committed fraud by a State level hearing official, the household member shall be disqualified for three months beginning with the first calendar month which follows the date the household member has received the State level hearing notice. No further administrative appeal procedure exists after an adverse State level hearing. The determination of fraud made by a fraud hearing official cannot be reversed by a subsequent fair hearing decision. The household member is, however, free to appeal the case to a court. The period of disqualification may be subject to stay or injunction in a court of appropriate jurisdiction.

(9) *Notification of hearing decision.* (i) If the hearing finds that the household member did not commit fraud, the State agency shall provide a written notice which informs the household member of the decision.

(ii) If the administrative fraud hearing finds that the household member committed fraud, the State agency shall mail a written notice to the household member prior to disqualification. The notice shall inform the household member of the decision, the reason for the decision and notify the remaining household members, if any, of either the allotment they will receive during the period of disqualification or that they must reapply because the certification period has expired. The procedures for handling the income and resources of the disqualified member are described in § 273.11. For State level decisions, the notice shall inform the household member of the date disqualification will take effect. For local level decisions, the notice shall inform the household member of the deadline for requesting a State level hearing, the date disqualification will take effect unless a State level hearing is requested and that benefits will be continued pending a State level hearing if the household is otherwise eligible. A list of the household member's rights as contained in § 273.15(o) and the State level hearing procedures shall be enclosed with the local fraud hearing decision notice.

(iii) The following are model forms for notifying individuals that they have been found to have committed fraud at an administrative fraud hearing:

NOTICE OF STATE FRAUD HEARING DECISION

TO: (Name of Household Member) DATE:
(Address) CASE NO.:
(City, State Zip Code)

You have been found GUILTY OF FRAUD at the hearing conducted on _____ (date of hearing). Therefore, you will not get food stamps during _____ (1st month) - _____ (2nd month) _____ (3rd month). If your are not satisfied with this decision you can appeal this decision to the courts. See the box below to find out if the rest of your household can get food stamps while you are ineligible.

This hearing decision does not prevent the State or Federal government from prosecuting you for fraud in a court or from asking that you pay back in cash the value of any extra coupons your household was not eligible to receive.

If you have any questions, please call the Food Stamp Office at _____.

Signature of State agency representative

NOTICE TO REMAINING HOUSEHOLD MEMBERS

We've reviewed your case to see if you can get food stamps while (name of disqualified member) is not allowed to participate. Here's what we've found:

☐ You will receive _____ amount of food stamp during (1st - 3rd month).

☐ You will receive _____ amount of food stamps during _____. After that, you will need to reapply in order to get food stamps since your certification period will be over.

☐ Although your certification period is over, you may be eligible. To see if you are eligible please call, write, or visit the food stamp office and ask to file an application.

☐ You are no longer eligible for food stamps.

If you are not satisfied with the decision, you may ask for a fair hearing.

NOTICE OF LOCAL FRAUD HEARING DECISION

TO: (Name of Household Member) DATE:
(Address) CASE NO.:
(City, State Zip Code)

The hearing conducted on _____ (date of hearing) found that you committed fraud.

You have two choices:

1. If you are satisfied with the decision and do not want a new hearing, you will not get food stamps for _____ (1st month) _____ (2nd month) _____ (3rd month). See the box below to find out if the rest of your household can get food stamps while you are ineligible.

2. If you are NOT satisfied with the decision, you can ask for a new hearing at a higher level by calling the Food Stamp Office or by signing your name below and returning this form to the Food Stamp Office. If you ask for a new hearing within 15 days after you receive this notice, you will continue to get your food stamps until the new hearing if you are eligible. (Be sure to include weekends and holidays when counting the 15 days).

☐ Yes, I want a new hearing. _____ (Sign your name here)

A list of your rights and the steps involved in a hearing is enclosed.

This hearing decision does not prevent the State or Federal Government from prosecuting you for fraud in a court or from asking that you pay back in cash the value of any extra coupons your household was not eligible to receive. If you have any questions, please call the Food Stamp Office at _____.

(e) *Court imposed disqualifications.* (1) A court or appropriate jurisdiction, with either the State, a political subdivision of the State, or the United States as prosecutor or plaintiff, may order an individual disqualified from participation in the Program for not less than six months and not more than twenty-four months if the court finds that individual guilty of civil or criminal fraud. Court ordered disqualifications may be imposed separate and apart from any action taken by the State agency to disqualify the individual through an administrative fraud hearing.

(2) State agencies are encouraged to prosecute food stamp fraud under State or local fraud statutes whenever possible. The State agency shall confer with its legal representative to determine the types of cases which will be accepted for possible prosecution. State agencies shall also encourage State and local prosecutors to recommend to the courts that a disqualification penalty as provided in section 6(b) of the Food Stamp Act be imposed in addition to any other civil or criminal fraud penalties.

(3) State agencies shall disqualify an individual found guilty of fraud by the courts only if the court orders disqualification and only for the length of time specified by the court. If disqualification is ordered but a date for initiating the disqualification period is not specified, the State agency shall initiate the disqualification period with the first calendar month following the date the disqualification was ordered. A court ordered disqualification may run concurrently with the three month period of disqualification imposed as a result of an administrative fraud hearing. The State agency shall not initiate or continue a court imposed or administratively imposed fraud disqualification period contrary to a court order.

(f) *Overturned fraud disqualifications.* In cases where the determination of fraud is overturned or reversed by a court of appropriate jurisdiction, the State agency shall reinstate the individual in the Program if the household is eligible. The State agency shall restore any benefits that were lost as a result of the disqualification in accordance with the procedures specified in § 273.17(e).

§ 273.17 Restoration of lost benefits.

(a) *Entitlement.* (1) Whenever a household receives fewer benefits than it is entitled to receive, and the loss was not caused by the household, the State agency shall restore to the household those benefits which were lost, except that benefits shall not be restored if lost more than 12 months prior to:

(i) The month the State agency was notified by the household or by another person or agency in writing or orally of the possible loss to that specific household;

(ii) The month the State agency discovers in the normal course of business that a loss to a specific household has occurred; or

(iii) The date the household requested a fair hearing to contest the adverse action which resulted in the loss.

(2) Benefits shall be restored even if the household is currently ineligible.

(b) *Errors discovered by the State agency.* If the State agency determines that a loss of benefits has occurred, and the loss was not caused by the household, the State agency shall automatically take action to restore any benefits that were lost. No action by the household is necessary. However, benefits shall not be restored if the benefits were lost more than 12 months prior to the month the loss was discovered by the State agency in the normal course of business, or were lost more than 12 months prior to the month the State agency was notified in writing or orally of a possible loss to a specific household. The State agency shall notify the household of its entitlement, the amount of benefits to be restored, any offsetting that was done, the method of restoration, and the right to appeal through the fair hearing process if the household disagrees with any aspect of the proposed lost benefit restoration.

(c) *Disputed benefits.* (1) If the State agency determines that a household is entitled to restoration of lost benefits, but the household does not agree with the amount to be restored as calculated by the State agency or any other action taken by the State agency to restore lost benefits, the household may request a fair hearing within 12 months of the month the household is notified of its entitlement to restoration of lost benefits. If a fair hearing is requested prior to or during the time lost benefits are being restored, the household shall receive the lost benefits as determined by the State agency pending the results of the fair hearing. If the fair hearing decision is favorable to the household, the State agency shall restore the lost benefits in accordance with that decision.

(2) If a household believes it is entitled to restoration of lost benefits but the State agency, after reviewing the casefile, does not agree, the household has 12 months from the date of the State agency determination to request a fair hearing. The State agency shall restore lost benefits to the household only if the fair hearing decision is favorable to the household. Benefits lost more than 12 months prior to the date the State agency was initially informed of the household's possible entitlement to lost benefits shall not be restored.

(d) *Computing the amount to be restored.* After correcting the loss for future months and excluding those months for which benefits may have been lost prior to the 12 month time limits described in paragraph (b) and (c) of this section, the State agency shall calculate the amount to be restored as follows: (1) If the loss resulted in an incorrect allotment, but the household was determnined to be eligible, the loss of benefits shall be calculated only for those months the household participated. If the loss was caused by an incorrect delay, denial, or termination of benefits, the months affected by the loss shall be calculated as follows:

(i) If an eligible household's application was erroneously denied, or the State agency delayed benefits to an eligible household more than 60 days after the initial application was filed, the month the loss initially occurred shall begin with the month of application. If benefits are delayed less than 60 days from the date the application was filed, the State agency shall provide benefits retroactive to the month of application rather than in the form of lost benefits. If an eligible household that timely reapplied was not provided an opportunity to participate in the month following the expiration of its certification period, the month loss initially occurred shall be the first month following the receipt of the household's last allotment.

(ii) If a household's benefits were erroneously terminated, the month the loss initially occurred shall begin with the first month benefits were not received as a result of the erroneous action.

(iii) After computing the date the loss initially occurred, the loss shall be calculated for each month subsequent to that date until either the first month the error is corrected, the first month the household is found ineligible, or the first month the household reapplied.

(2) For each month affected by the loss, the State agency shall determine if the household was actually eligible. In cases where there is no information in the household's case file to document that the household was actually eligible, it is the household's responsibility to provide the necessary information to determine eligibility for these months. For each month the household cannot provide the necessary information to demonstrate its eligibility, the household shall be considered ineligible.

(3) For the months the household was eligible, the State agency shall calculate the allotment the household should have received. If the household received a smaller allotment than it was eligible to receive, the difference between the actual and correct allotments equals the amount to be restored.

(4) If a claim against a household is unpaid or held in suspense as provided

V 43 | 85 MY 2 78 UMI

in § 273.18, the amount to be restored shall be offset against the amount due on the claim before the balance, if any, is restored to the household. In cases where the initial allotment is received within 60 days of the date the application is filed and is paid retroactive to the month of application, the retroactive payment shall not be reduced to offset claims.

(e) *Lost benefits to individuals disqualified for fraud.* Individuals disqualified for fraud are entitled to restoration of any benefits lost during the months they were disqualified only if the decision which resulted in disqualification is subsequently overturned or reversed. For example, an individual would not be entitled to restoration of lost benefits for the three-month period it was disqualified based solely on the fact that a criminal conviction could not be obtained, unless the individual successfully challenged the three-month disqualification in a separate court action. For each month the individual was disqualified, the amount to be restored, if any, shall be determined by comparing the allotment the household received with the allotment the household would have received had the disqualified member been allowed to participate. If the household received a smaller allotment than it should have received, the difference equals the amount to be restored. Benefits shall be restored regardless of the length of time that has elapsed since the household was disqualified.

(f) *Method of restoration.* Regardless of whether a household is currently eligible or ineligible, the State agency shall restore lost benefits to a household by issuing an allotment equal to the amount of benefits that were lost, provided that the amount restored in any one month does not exceed 100 percent of the maximum allotment for the household's size. The amount restored shall be issued in addition to the allotment currently eligible households are entitled to receive. The State agency shall honor reasonable requests by households to restore lost benefits in amounts of less than 100 percent of the Thrifty Food Plan per month if, for example, the household fears the excess coupons may be lost or stolen.

(g) *Transferring households.* A household that moves from the project area or State where the administrative error occurred shall not lose its entitlement to restoration of lost benefits. To continue receiving its restoration of lost benefits the household must present to its new project area Form FNS-286, Certification of Transfer of Household Benefits. The form must be prepared by the former project area and contain the necessary lost benefits information. Households due lost benefits, but which have neglected to obtain a Form FNS-286 prior to the move, shall be informed by the new project area how to obtain the necessary forms and shall assist the household in doing so, if necessary.

(h) *Changes in household composition.* Whenever lost benefits are due a household and the household's membership has changed, the State agency shall restore the lost benefits to the household containing the individual who was head of the household at the time the error occurred. If the head of the household is no longer living or cannot be located, the State agency shall restore the lost benefits to the household containing a majority of the individuals who were household members at the time the loss occurred.

(i) *Losses of benefits that occurred prior to elimination of the purchase requirement.* Households assigned a purchase requirement that was too high shall be entitled to restoration of lost benefits if the household received fewer bonus stamps as a result. The amount to be restored is equal to the difference between the bonus stamps the household received and the correct amount the household should have received. State agencies shall restore the lost benefits in accordance with the procedures outlined in this section.

(j) *Accounting procedures.* Each State agency shall be responsible for maintaining an accounting system for documenting a household's entitlement to restoration of loss benefits and for recording the balance of lost benefits that must be restored to the household. Each State agency shall develop a form that, at a minimum, documents how the amount to be restored was calculated and the reason lost benefits must be restored. The accounting system shall be designed to readily identify those situations where a claim against a household can be used to offset the amount to be restored.

§ 273.18 Claims against households.

(a) *Establishing claims against households.* Each State agency shall establish a claim against any household that has received more food stamp benefits than it is entitled to receive. Instances which may result in a claim include, but are not limited to, the following:

(1) The household failed to provide the State agency with correct or complete information.

(2) The household failed to report to the State agency changes in its household circumstances.

(3) The household altered its ATP.

(4) The household transacted both the original and its replacement ATP.

(5) The State agency assigned an incorrect allotment.

(6) The State agency failed to take prompt action on a change reported by the household.

(7) The State agency incorrectly computed the household's income, deductions, or both.

(8) The State agency incorrectly issued duplicate ATPs to a household which were subsequently transacted.

(9) The household was found to be ineligible or eligible for fewer benefits than it received pending a fair hearing appeal.

(b) *Nonfraud claims.* Nonfraud claims are those claims established against households for overissuances which were not caused by fraud, such as, but not limited to, overissuances caused by administrative error on the part of the State agency or a misunderstanding or inadvertent error on the part of the household.

(1) *Criteria for establishing a nonfraud claim.* If less than 12 months have elapsed between the month a nonfraud overissuance occurred and the month the State agency discovered a specific case involving an overissuance, the State agency shall take action to establish a claim against the household that received the overissuance. A claim shall not be established against households that have transacted expired ATPs unless the households have altered their ATPs. In addition, a nonfraud claim shall not be established against a household otherwise eligible for the benefits it received if the State agency failed to ensure that the household: (i) signed the application form, (ii) completed a current work registration form, (iii) was certified in the correct project area, or (iv) did not receive food stamp benefits after its certification period had expired.

(2) *Calculating the amount of the nonfraud claim.* (i) After excluding those months that are more than 12 months prior to the date the overissuance was discovered, the State agency shall determine the correct amount of food stamp benefits the household should have received for those months the household participated while the overissuance was in effect. In cases involving reported changes, the State agency shall determine the month the overissuance initially occurred as follows:

(A) If, due to a misunderstanding or inadvertent error on the part of the household, the household failed to report a change in its household circumstances within 10 days of the date the change became known to the household, the first month affected by the household's failure to report shall be the month the change occurred.

(B) If the household timely reported a change, but the State agency did not timely act on the change, the first month affected by the State's failure to act shall be the first month the State agency should have made the change effective. Therefore, if a notice of adverse action was required but was

not sent, the State agency shall assume that the maximum advance notice period as provided in § 273.13(a)(1) would have expired without the household requesting a fair hearing.

(ii) If the household received a larger allotment than it was entitled to receive, the State agency shall establish a claim against the household equal to the difference between the allotment the household received and the allotment the household should have received.

(iii) After calculating the amount of the nonfraud claim, the State agency shall offset the amount of the claim against any amounts which have not yet been restored to the household in accordance with § 273.17. The State agency shall then initiate collection action for the remaining balance, if any.

(3) *Collecting nonfraud claims.* (i) State agencies shall initiate collection action on all nonfraud claims unless the claim is collected through offset or one of the following conditions apply:

(A) The total amount of the nonfraud claim is less than $35.

(B) The State agency has documentation which shows that the household cannot be located.

(ii) State agencies shall initiate collection action by sending the household a written demand letter which informs the household of the amount owed, the reason for the claim, the period of time the claim covers, any offsetting that was done to reduce the claim, how the household may pay the claim, and the household's right to a fair hearing if the household disagrees with the State agency's determination. In addition, the demand letter for nonfraud claims must include a statement which specifies that payment of the claim is voluntary and that refusal to pay the claim will not affect the household's eligibility. If the household agrees to pay the claim, payments shall be accepted and submitted to FNS in accordance with the procedures outlined in paragraphs (e) and (f) of this section. If the household does not respond to the first demand letter, additional demand letters shall be sent at 30-day intervals until the household has responded by paying or agreeing to pay the claim, or until the criteria for suspending or terminating collection action, as specified in paragraph (b)(4) of this section, have been met.

(4) *Criteria for suspending collection of a nonfraud claim.* Where the claim cannot be presently collected, but there is a likelihood that the claim can be collected in the future, the State agency shall suspend collection of the claim. The claim shall be held in suspense until the claim is collected or until the claim has been held in suspense for three years, whichever occurs first. If a possibility exists that the household will be entitled to restoration of lost benefits at a later date which could be used to offset the amount of the claim, the State agency shall suspend rather than terminate collection of the claim. State agencies shall also suspend rather than terminate collection action if the household's financial circumstances are expected to change for the better.

(5) *Terminating collection of a nonfraud claim.* The State agency shall terminate collection action if at least one demand letter has been sent to the household and one of the following criteria is met:

(i) The household is financially unable to pay the claim;

(ii) There is little likelihood that the household will pay the claim;

(iii) The household cannot be located;

(iv) The cost of further collection action is likely to exceed the amount that can be recovered; or

(v) The claim has been held in suspense for three years.

(c) *Fraud claim.* A claim shall be handled as a fraud claim only if an administrative fraud hearing or a court of appropriate jurisdiction has found a household member guilty of fraud as defined in § 273.16(b) or the State agency's fraud investigators have determined and documented that fraud, as defined in § 273.16(b), exists. Prior to the determination of fraud, the claim against the household shall be handled as a nonfraud claim.

(1) *Establishing a fraud claim.* For each month that a household member fraudulently participated, the State agency shall determine the correct amount of food stamp benefits, if any, the household was entitled to receive. The amount of the fraud claim shall be calculated back to the month the fraudulent act occurred, regardless of the length of time that elapsed until the determination of fraud was made. If the household member is determined to have committed fraud by knowingly, willfully and with deceitful intent failing to report a change in its household circumstances, the first month benefits were overissued shall be the month the change occurred. Once the amount of the fraud claim is established, the State agency shall offset the claim against any amount of lost benefits that have not yet been restored to the household in accordance with § 273.17.

(2) *Collecting fraud claims.* (i) If the household is found to have committed fraud at either an administrative fraud hearing, a court of appropriate jurisdiction or by the State's investigative unit, the State agency shall initiate collection action unless the amount of the claim is less than $35, the State agency has documentation which shows the household cannot be located, or the legal representatives prosecuting a member of the household for fraud advise in writing that collection action will prejudice the case. In cases where the household was found guilty of fraud by a court, the matter of restitution shall be brought before the court by the State agency. Collection action must be taken, however, for the full amount of the loss even if the court's decision does not address restitution, the amount of restitution ordered is less than the amount of the loss, or prosecution results in imprisonment. The expiration of the State's statute of limitations does not relieve the State agency from making the required collection efforts.

(ii) Collection action shall be taken by sending the household a written demand letter which informs the household of the amount owed, the reason for the claim, the period of time the claim covers, any offsetting that was done to reduce the claim, how the household may pay the claim, and the household's right to a fair hearing if the household disagrees with the State agency's determination. In addition to the written demand letter, a personal contact shall be made, if possible. In those cases where the claim is being handled as a fraud claim based solely on a determination of fraud by the State's fraud investigators, the State agency shall not coerce a household into paying a claim by threatening to initiate an administrative fraud hearing or by threatening to prosecute. The State agency shall not disqualify a household solely because the household has refused to pay the fraud claim.

(iii) If the household agrees to pay the claim after the first demand letter, the State agency shall follow the procedures for collecting and submitting payments as prescribed in § 273.18 (e) and (f). If the household does not respond to the first demand letter, additional demand letters shall be sent at 30-day intervals until the household agrees to pay the claim, or the criteria for suspending or terminating collection action as specified in paragraph (c)(3) of this section have been met.

(3) *Criteria for suspending collection action.* If the household is financially unable to pay the claim but there is a likelihood that the claim can be collected in the future, the State agency shall suspend collection of the claim until either the claim can be collected or until the claim has been held in susense for three years, whichever occurs first. Therefore, if a possibility exists that the household will be entitled to restoration of lost benefits at a later date which could be used to offset the amount of the claim, the State agency shall suspend collection rather than terminate the fraud claim. State agencies shall also suspend col-

V 4 3 | 8 5

lection action if the household's circumstances are expected to change for the better.

(4) *Criteria for terminating collection of fraud claims.* If the State agency has sent at least one demand letter for fraud claims of less than $100, two demand letters for fraud claims of between $100 and $400, and three demand letters for fraud claims of more than $400, the State agency may terminate further collection action provided one of the following criteria is met:

(i) The household is financially unable to pay the claim;

(ii) There is little likelihood that the State agency can collect or enforce collection of any significant sum from the household;

(iii) The household cannot be located;

(iv) The cost of further collection action is likely to exceed the amount that can be recovered; or

(v) The claim has been held in suspense for three years.

(d) *Changes in household composition.* If a household's membership has changed since the overissuance occurred, the State agency shall initiate collection action against the head of the household. If the head of the household is no longer living or cannot be located, the State agency shall initiate collection action against the household containing a majority of the individuals who were household members at the time the error occurred.

(e) *Methods of collecting payments.* State agencies shall collect fraud or nonfraud claims in one of the following ways:

(1) *Lump Sum.* State agencies shall collect payments from households in one lump sum if the household is financially able to pay the claim in one lump sum.

(2) *Installments.* If the household has insufficient liquid resources or is otherwise financially unable to pay the claim in one lump sum, payments shall be accepted by the State agency in regular installments. If the full amount of the claim cannot be liquidated in three years without creating a financial hardship on the household, the State agency shall compromise the claim by reducing it to an amount that will allow the household to pay the claim in three years. Before any household signs an agreement to make installment payments the State agency must inform the household in writing that its food stamp benefits cannot be denied if the sole reason for the denial is the fact that it has either refused to sign a payment schedule or fails to make the agreed payments. State agencies may, however, initiate civil court action to obtain payment of the claim.

(f) *Submission of payments.* (1) No later than the 15th of each calendar month, each State agency shall submit to FNS a single check, draft or warrant which consolidates all of the payments collected at the State or local level during the previous calendar month. State agencies shall not allow more than 45 days to elapse between the date a household makes a payment on a claim and the date the payment is submitted to FNS. Each State agency shall also submit a monthly report to FNS which details the State's activities relating to claims against households. This report is also due on the 15th of each calendar month and shall be submitted even if the State agency has not collected any payments. The following form is the proposed monthly report each State agency will be required to submit to FNS.

(2) In cases where FNS has billed a State agency for negligence, any amounts collected from households in payment of overissuances which were caused by the State's negligence will be credited by FNS. When submitting these payments, the State agency shall include a note in the remarks section of the monthly reporting form specified in paragraph (e)(1) of this section which shows the amount that should be credited against the State's bill.

(g) *Claims discharged through bankruptcy.* State agencies shall act on behalf of, and as, FNS in any bankruptcy proceeding against bankrupt households owing food stamp claims. State agencies shall possess any rights, priorities, interests, liens or privileges, and shall participate in any distributions of assets, to the same extent as FNS. Acting as FNS, State agencies shall have the power and authority to file objections to discharge, proofs of claims, exceptions to discharge, petitions for revocation of discharge, and any other documents, motions or objections which FNS might have filed. Any amounts collected under this authority shall be transmitted to FNS as provided in paragraph (f) of this section.

FORM FNS-209 (DRAFT)

U.S. DEPARTMENT OF AGRICULTURE
FOOD AND NUTRITION SERVICE

FORM APPROVED OMB NO. (Propos-1) 350

STATUS OF CLAIMS AGAINST HOUSEHOLDS

INSTRUCTIONS: *Each State agency shall prepare an original and 2 copies by the 15th of each month. Submit the original and 1 copy to Finance and Program Accounting Division, Food and Nutrition Service, USDA, Washington, D.C. 20250. The report shall cover the State's activities relating to claims during the previous calendar month. The State's consolidated check draft or warrant shall be attached to the original of the report if payments were collected during the previous calendar month. Retain remaining copy for your record.*

V 43 | 85 MY 2 78 UMI

(h) *Accounting procedures.* Each State agency shall be responsible for maintaining an accounting system for monitoring claims against households. At a minimum, the accounting system shall be designed to readily accomplish the following:

(1) Document the circumstances which resulted in a claim, the procedures used to calculate the claim, the methods used to collect the claim and, if applicable, the circumstances which resulted in suspension or termination of collection action.

(2) Identify those situations in which an amount not yet restored to a household can be used to offset a claim owed by the household.

(3) Identify those households that have failed to make installment payment on their claims.

(4) Document how much money was collected in payment of a claim and how much was submitted to FNS.

§ 273.19 Sixty day continuation of certification.

(a) *Eligibility criteria.* The State agency shall provide for continuation of the certification of any household for 60 days after the date the household moves from one project area to another within the State or between States if the household:

(1) Membership does not change;

(2) Continues to meet the definition of a household as provided in § 273.1(a);

(3) Was not certified under disaster eligibility standards as provided in Part 280 or was not certified under expedited procedures in § 273.2(i) unless the verification that was initially postponed was subsequently completed; and

(4) Does not contain as SSI member when moving into the cash-out States of California or Massachusetts.

(b) *Former project area.* The project area from which the household is moving shall prepare the Form FNS-286, Certification of Transfer of Household Benefits. If the household has received its coupon allotment for the month in which the move takes place, the project area shall authorize the extension of certification for the two months subsequent to the move. The Form FNS-286 is given to the household for delivery to the new project area office.

(c) *New project area.* (1) The project area to which the household moves shall accept the Form FNS-286 and issue the allotment authorized by the form to households which report compliance with the criteria in paragraph (a) (1), (2), and (4) of this section. At the time the household provides the form to the new project area, the household shall report any changes in circumstances. The new project area will act on changes according to § 273.12, except in no event would the changes reported affect the initial issuance under the Form FNS-286. However the second issuance in the new project area, if any, shall reflect changes reported.

(2) If the household has participated in the former project area in the month of the move, and presents the Form FNS-286 to the new project area that same month, it shall be accepted and acted on in time for the next month's issuance. The first issuance shall be based on the income reflected on the Form FNS-286.

(3) If the household has not participated in the former project area in the month of the move and presents the transfer form to the new project area that same month, the household will be provided an opportunity to participate in that month. The first issuance shall be based on the income reflected on the transfer form.

(4) If the household's income has decreased to zero net monthly income upon its arrival in the new project area, an exception shall be made to the use of the transfer form and recorded income figures. The household shall be provided with expedited service and the appropriate change shall be reflected in the allotment for the first issuance.

(d) *Subsequent actions.* (1) Households participating on the basis of a Form FNS-286 shall be intitled to all procedural rights of any other food stamp household, including notice of adverse action on reported changes, and notice of expiration prior to the expiration of the second month of issuance authorized by the Form FNS-286.

(2) Households may elect to be certified in the new project area at any time during their participation under the Form FNS-286.

(3) Households which move during the two months covered by the Form FNS-286 shall be issued:

(i) A Form FNS-286 for the balance of the period covered by original form, and which reflects the changes reported at the time the form was accepted in the new project area;

(ii) A new Form FNS-286 for an additional two months if the household was recertified in the new project area and otherwise qualifies for a transfer of certification as outlined in paragraph (a) of this section.

(e) *Project areas that encompass more than one political subdivision.* Provision must be made to provide unbroken service to eligible households that move from one political subdivision to another in States where the State has been designated as a project area or where project areas encompass more than one political subdivision. This may be accomplished by transferring records or providing the household with Form FNS-286.

(f) *Control of forms.* The State agency shall provide for the secure storage of Form FNS-286, and shall maintain controls to prevent or detect unauthorized issuance, acquisition, acceptance, use, transfer, or alternation of this form.

4. Part 274 remains in force and effect but is redesignated as Part 280. The new Part 274 reads as follows:

PART 274—ISSUANCE AND USE OF FOOD COUPONS

Sec.

274.1. State agency issuance responsibilities.
274.2 Issuance systems.
274.3 Issuance of coupons through the mail.
274.4 Distribution of coupons.
274.5 Responsibilities of coupon issuers and bulk storage points.
274.6 Reconciliation.
274.7 Issuance record retention and security.
274.8 State agency reporting and destruction of unusable coupons.
274.9 Close-out of a coupon issuer.
274.10 Use or redemption of coupons by eligible households.
274.11 Return of coupons.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 274.1 State agency issuance responsibilities.

(a) *Basic issuance requirements.* Each State agency is responsible for the timely and accurate issuance of coupons to eligible households in accordance with these regulations. Each State agency shall establish an issuance and accountability system which will ensure that (1) only certified households receive benefits; (2) coupons are accepted, stored, and protected after delivery to receiving points within the State; (3) program benefits are timely distributed in the correct amounts; and (4) coupon issuance and reconciliation activities are properly conducted and accurately reported to FNS.

(b) *Contracting or delegating issuance responsibilities.* The State agency may assign to other parties such as banks, savings and loan associations, the postal service, community action agencies and migrant service agencies with adequate security, the responsibility for issuance and storage of coupons.

(1) Any assignment of issuance functions shall clearly delineate the responsibilities of both parties. The State agency remains responsible, regardless of any agreements to the contrary, for ensuring that assigned duties are carried out in accordance with these regulations. In addition, the State agency is strictly liable to FNS for all losses of coupons, even if those losses are the result of the performance of issuance, security or accountability duties by another party.

(2) All issuance contracts shall follow procurement standards set forth in Part 277. The State agency shall contract only with responsible contractors who possess the ability to perform successfully under the terms and conditions of the proposed procurement. In making its selection, the State agency shall consider contractor integrity, the record of past performance, financial, and technical resources, and the availability of other necessary resources. State agencies may permit subcontracting of assigned issuance responsibilities. However, the primary contractor shall remain responsible and liable to the State agency for ensuring that the terms of the contract are carried out.

(3) The State agency shall not assign the issuance of coupons to any retail grocery store authorized to redeem coupons from participant households. This restriction may be waived if the State agency can demonstrate, to the satisfaction of FNS, that such an arrangement would be in the best interests of the program.

(4) FNS does not encourage assignment of issuance activities to any entity in the same interrelated corporate structure with an authorized retail food store. However, such entities may be coupon issuers if they are fiscally autonomous, physically separate and employ a different trade name from the retail food store. FNS does not encourage the assignment of issuance activities to firms located within the confines of retail food stores. However, the State agency may contract with a bank or credit union located in such facilities provided that it is financially independent of the retail grocer and is chartered under Federal or State law.

(5) The State agency may contract with the U.S. Postal Service for the issuance of food coupons. The Department and the Postal Service have signed a Memorandum of Understanding which shall govern contracts for coupon issuance between State agencies and the Postal Service, and have developed a model contract. State agencies and the Postal Service may agree to modifications to the model contract so long as the modifications do not conflict with these regulations.

(c) *State monitoring of coupon issuers.* (1) The State agency's accountability system shall include procedures for monitoring the day-to-day operation of all coupon issuers to assure compliance with these regulations, to identify and correct deficiencies and to report violations of the Act or regulations to FNS.

(2) The State agency shall conduct an onsite review of each coupon issuer and bulk storage point at least once a year. This review requirement may be fulfilled in part or in total by the Performance Reporting Review System, Part 275. The State agency shall base each review on the specific activities performed by each coupon issuer or bulk storage point. A physical inventory of coupons shall be taken at each location and that count compared with perpetual inventory records and the monthly reports of the coupon issuer or bulk storage point. This review may be conducted at the offices of subissuers or at each issuance office when a coupon issuer or bulk storage point operates more than one office. The State agency may delegate this review responsibility to another unit of the State government or contract with an outside firm with expertise in auditing and accounting. Except in unusual circumstances, the Postal Inspection Service will conduct onsite reviews of post office issuance operations.

§ 274.2 Issuance systems.

The State agency shall arrange for the issuance of coupons to eligible households.

(a) *System classifications.* State agencies may issue food coupons through (1) a Household Issuance Record (HIR) card system in which the authorizing document is maintained at the issuance office, (2) an Authorization to Participate (ATP) system in which an authorizing document is distributed on a monthly basis to the household and surrendered to the coupon issuer when coupons are obtained, or (3) a direct coupon mailout system. In addition, the State agency may develop an automated issuance system, such as one using online issuance terminals, which cannot be readily categorized as either an HIR card or ATP system. Such alternative or modified systems shall meet the accountability requirements established in these regulations.

(b) *Advance planning documentation.* Prior to implementation of new systems or changes to current systems, the State agency shall submit all procedures in writing for approval by FNS. Plans for upgrading or establishing automated data processing (ADP) systems, including the acquisition, design, development, or installation of ADP equipment, shall be submitted in writing to the FNS Regional Office for prior approval if State and Federal combined costs are $10,000 or more in any calendar quarter. Such plans shall be detailed in an Advance Planning Document, prepared in accordance with the requirements of Part 277.

(c) *Certification documentation.* The State agency shall use either a notice of change or an HIR card to document and transmit information on household eligibility or participation from the certification unit to the data management unit of the State agency.

(d) *HIR master file.* (1) The State agency shall establish an HIR master file which is a composite of the issuance records of all certified food stamp households. The State agency shall establish the HIR master file in a manner compatible with the system used for maintaining case records and divide the HIR master file into active and inactive HIR's. The HIR master file shall contain all the information needed to identify certified households, issue ATPs, record the participation activity for each household and supply all information necessary to fulfill the reporting requirements of FNS.

(2) The HIR master file shall be kept current and accurate. HIR's will be updated, suspended, or terminated based upon notices of change and controls for expired certification periods and nonparticipation.

(3) Before establishing an HIR for a participant household, the State agency shall check the HIR master file to ensure that the household is not currently participating, disqualified or suspended. If the ATP is issued under the expedited service requirements of § 273.2(i), the State agency shall complete as much of the HIR master file check as possible prior to issuance of the ATP. Any uncompleted checks shall be completed after issuance of the ATP and appropriate corrective action shall be taken.

(4) In an ATP issuance system, the State agency shall review the HIR master file monthly for households that have failed to participate in the Program for two consecutive months. For all such households, the State agency shall suspend the printing of ATPs until the household indicates a desire to participate. The State agency shall notify the household of the suspension and advise the household to contact the State agency to continue participation. The State agency shall arrange for the resumption of issuance if the household wishes to continue participation. A suspended household shall not be terminated prior to the expiration of the certification period if otherwise eligible.

(e) *ATP issuance.* (1) ATPs issued by the State agency shall contain at a minimum:

(i) Serial number;

(ii) Case name, address and food stamp case number;

(iii) Coupon allotment of the household;

(iv) Expiration date;

(v) Project area for which that ATP is issued;

(vi) Space for the signature of the household member or the authorized representative; and

(vii) Spaces for household designation of an emergency authorized representative.

(2) The State agency may stagger the issuance of ATPs to certified households through the 15th day of the month provided that each house-

V 43 85 MY 2 78 UMI

hold's cycle shall be established so that it receives its ATP at the same time every month and it has an opportunity to obtain its coupons prior to the end of the month.

(3) The State agency shall clearly mark each ATP with an expiration date. The ATP shall be valid for the entire month of issuance unless an ATP has been issued after the 25th day of the month. If the State agency issues an ATP, on the 26th day of the month or later, it shall not expire until the end of the following month.

(4) The State agency shall void all ATPs mutilated or otherwise rejected during the preparation process. The voided ATPs shall either be filed for audit purposes or destroyed, provided destruction is witnessed by at least two persons and the State agency maintains a list of all destroyed ATP's.

(5) The State agency shall mail the ATP to the household in a first-class, nonforwarding envelope.

(6) The State agency shall exercise the following security and controls for ATPs returned as undeliverable by the Postal Service;

(i) Record the ATP serial number, household name, and case number in a control log.

(ii) Keep the returned ATPs in secure storage with access limited to authorized personnel while attempts are made to locate the household.

(iii) Record the final disposition of the ATP in the control log.

(iv) Destroy returned ATPs not reissued prior to their expiration date. Destruction shall be witnessed by at least two persons and noted on the original listing of returned ATPs.

(7) Prior to coupon issuance, the cashier shall ask the person requesting food stamps for identification as the certified participant, authorized representative or emergency representative. This person shall present to the cashier both the Food Stamp ID card and ATP. The cashier shall examine the ATP for authenticity, alteration and date of expiration. If the ATP is valid the person requesting food stamps shall sign the ATP in the presence of the cashier. The cashier shall compare the signature on the ATP with the signature on the ID card. In cases where an emergency representative obtains the coupons, the signature and identification check shall be governed by local agency policy. If the person requesting coupons has already signed the ATP, the person shall be required to sign a separate piece of paper for signature comparison. If the signatures agree, coupons shall be issued in accordance with paragraph (h) of this section.

(8) The State agency shall clearly differentiate between initial, supplemental, and replacement ATP issuances in its accountability system.

(9) The coupon issuer shall reconcile its issuance on a daily basis.

(10) The State agency shall provide for the issuance of coupon replacements due to improper manufacture, mutilation, or loss.

(f) *HIR card issuance system.* In an HIR card issuance system, the State agency shall divide the issuance responsibilities among a receptionist, cashier and supervisor.

(1) The receptionist shall maintain a separate daily tally sheet in duplicate for each cashier in the issuance unit to record the individual daily issuance transactions.

(2) The issuance supervisor shall prepare daily, or as appropriate, a cashier's daily report for each cashier to account for coupons issued.

(3) The receptionist shall check the ID card of the person wishing to obtain coupons against the HIR card from the HIR master file. An emergency representative must present a signed written statement from the head of the household or spouse authorizing the issuance of food stamps for the certified household. If satisfied with the identification, the receptionist shall select the daily tally sheet of the cashier from whom the household will receive the allotment, enter information about the transaction, and initial the HIR card before it goes to the cashier.

(4) Upon receipt of the HIR card from the receptionist, the cashier shall enter the amount of coupons issued and intiial the HIR card. The cashier shall also obtain the participant's signature on the HIR card and compare the signature with that on the ID card. If the signatures agree, the cashier shall issue coupons in accordance with paragraph (h) of this section.

(5) The coupon issuer shall reconcile daily its issuances using the daily tally sheet and the cashier's daily report.

(6) The State agency may stagger the issuance of coupons to certified households through the 15th of the month.

(7) The State agency shall provide a household certified for program participation after the 25th of the month the opportunity to obtain its allotment in the following month.

(8) The State agency shall provide for the issuance of coupon replacements due to improper manufacture, mutilation, or loss.

(g) *Expedited service.* (1) The State agency shall manually prepare and issue ATPs at the local level if necessary to provide an opportunity to participate to households certified on an expedited basis in accordance with § 273.2(i), to comply with the processing standards for initial and recertifications and for action on reported changes, and to replace lost or stolen ATPs or allotments. To minimize the possibility of misuse of manually-prepared ATPs, the State agency shall:

(i) Divide responsibility for the issuance of the ATP between at least two persons to prevent a single individual from having complete control over both the documents which authorize the issuance of ATPs and the ATPs themselves.

(ii) Record, immediately, on the HIR master file, the serial number and other issuance information from the ATP.

(2) For initial certifications, the State agency shall prevent duplicate or unauthorized participation by checking its records prior to issuing the manual ATP to assure the household is not currently certified for that month or is not disqualified from participation.

(3) The State agency shall issue an emergency replacement ATP only if the original ATP is reported lost or stolen in the period for which it was intended.

(i) Prior to authorizing the issuance of a replacement ATP, the State agency shall determine if:

(A) The household is currently certified.

(B) Sufficient time has elapsed for delivery to have been completed. Sufficient time shall not exceed five days from the miling date.

(C) The lost or stolen ATP was valid for the current month.

(ii) The participant must sign an affidavit stating that the original ATP will be returned to the State agency if recovered by the household. The affidavit shall be filed in the case file.

(iii) After two consecutive reported mail losses by a household, the State agency shall consider other means to deliver ATP's to the household.

(iv) On a monthly basis, the State agency shall provide a list of all ATPs reported as lost or stolen from the mail to the appropriate Postal Inspection service. The State agency should assist the Postal Inspection Service during the investigation and shall, upon request, supply the service with a facsimile of the original and replacement ATP's and a copy of the nonreceipt affidavit. The State agency shall advise the service if the original ATP is transacted.

(h) *Issuance of coupons to households.* The State agency shall issue coupon books in accordance with a table for coupon book issuance provided by FNS. The table provides participants with an efficient and economical distribution of the available coupons and coupon book types and assists FNS in maintaining proper inventory levels. The State agency may deviate from the table if the specified coupon books are unavailable. Exceptions from the table are authorized for blind and visually handicapped participants who request that all coupons be of one denomination. The State agency shall issue the coupon books in

consecutive serial number order whenever possible, starting with the lowest serial number in each coupon book denomination. A household member whose name appears on the ID card shall sign the coupon books.

§ 274.3 Issuance of coupons through the mail.

(a) *Types of mail issuance systems.* The State agency may issue some or all of the coupon allotments through the mail. State agencies shall determine whether to use a regular mail issuance system or a direct coupon mailing system. A regular mail issuance system is one which uses an authorization document as an intermediate step in mail issuance. A direct coupon mailing system is one which does not use an authorization document. The system, controls and forms designed by the State agency to operate a regular or direct coupon mail issuance system must be approved by FNS.

(b) *Mail issuance controls and records.* (1) The State agency shall establish and maintain a mail issuance log to record requests for mail issuance and the date and amount of coupons issued.

(2) All operations involving the maintenance of coupon inventory records, assembly of coupon allotments, envelope stuffing, and preparation of envelopes for mailing shall, if at all possible, be performed by at least two persons. If these functions are performed by one person, a second party review shall be made to verify coupon inventory, the reconciliation of the mail issuance log, and the number of mailings prepared. Offices using prestuffing methods must provide for dual accountability during the stuffing and addressing operations and maintain a perpetual coupon inventory control and mail issuance logs.

(3) The State agency shall establish controls which prevent a participant from obtaining coupons through both the mail and over-the-counter issuance systems.

(4) The State agency shall inform appropriate postal officials of the schedule for mailing coupons, the approximate volume and value of the mailings, and the type of envelopes to be used.

(5) At least first-class mail shall be used in mailing coupon allotments. The coupons shall be mailed in sturdy nonforwarding envelopes or other nonforwarding mailing packages.

(6) To minimize mail theft exposure, direct mail issuances shall be staggered through the 10th day of the month, and may be staggered through the 15th day provided that each household will likely receive its coupons on the same date every month. The State agencies shall ensure that coupons are not mailed to concentrations of households with the same zip code on the same day. FNS may provide waivers to State agencies that present adequate documentation to indicate that thefts from the mail will not represent a significant problem.

(7) State agencies which rely exclusively on mail issuance shall ensure that participants receive allotments on a timely basis and can receive timely replacement issuances either from the mailing center or local facilities. The State agency shall also ensure that it has an alternative issuance system to provide expedited service in accordance with § 273.2(i) and § 274.2(g).

(c) *Coupons lost in the mail.* (1) When a household reports the nondelivery of coupons issued through the mail, the State agency shall:

(i) Determine if the coupons were actually mailed;

(ii) Determine that sufficient time has elapsed for the coupons to have been received by the participant, but not more than five days;

(iii) Review the mail issuance log for the return of undelivered coupons;

(iv) Report all losses to the postal authorities. States shall also report to the postal authorities all patterns of losses in particular project areas or neighborhoods;

(v) Prepare and have the participant sign an affidavit;

(vi) Issue replacement coupons to the household within five days after the report of nondelivery has been received;

(vii) Record the report of nondelivery and the date of replacement on the mail issuance log; and

(viii) Take other action warranted by the reported nondelivery.

(2) After two consecutive reports of nondelivery concerning the same household, the State agency shall employ other issuance methods. These include:

(i) Using special delivery, certified or registered mail;

(ii) Arranging for the household to pick up its coupon allotment at the local post office; or

(iii) Moving the households from the mail issuance system to a regular over-the-counter system.

(3) If there is an increase in the loss of coupons issued through the mail, either in a particular area or throughout the mail issuance caseload, the State agency shall take corrective action to reduce the financial loss rate and improve service to participants.

(4) The State agency shall use certified mail issuance for its regular or direct mail program when the value of coupon replacements for an area exceeds the cost of using certified mail unless the State agency demonstrates to FNS that other corrective action is satisfactory. The State agency may also use certified mail where neighborhoods or individual households are experiencing loss problems.

(5) Coupons are "in the mail" when deposited with the Postal Service. FNS will assume financial liability for all coupons lost in the mail if the coupons were issued in accordance with FNS policies and procedures, unless FNS notifies the State agency that the loss rate has become unacceptable to FNS and that all further mailings shall be at the risk of the State agency. A State agency which refuses to establish certified mail when required to do so by FNS shall be held strictly liable for future mail issuance losses in the project areas concerned.

(d) *Mail issuance reporting on the Food Coupon Accountability Report.* (1) All mail issuance activity, including coupon mail issuance replacements, shall be reported on the Form FNS-250, Food Coupon Accountability Report.

(2) The coupon issuer shall attach copies of all replacement affidavits to Form FNS-250.

(3) Original allotments subsequently recovered by the issuance office during the current month shall be returned to inventory and noted on the mail issuance log. The replacement issuance shall not be reported on the Form FNS-250. The coupon issuer shall notify the post office of the return of coupon allotments previously reported as lost in the mail.

§ 274.4 Distribution of coupons.

(a) *Coupon inventory management.* The State agency shall establish a coupon inventory management system which ensures that coupons are requisitioned and inventories are maintained in accordance with the requirements of these regulations.

(1) The State agency shall monitor the coupon inventories of the coupon issuers and bulk storage points to ensure inventories are at proper levels and are not in excess of the reasonable needs of coupon issuers. The State agency shall consider, among other things, in detemining the reasonable inventory needs, the ease and feasibility of resupplying such inventories from storage supplies within the State as well as from the manufacturer. The inventory levels at coupon issuers and bulk storage points should not exceed a six-month supply, taking into account coupons on hand and on order.

(2) The State agency shall establish an accounting system for monitoring the inventory activities of coupon issuers. The State agency shall review the Form FNS-250, from coupon issuers, and the Form FNS-250-1, Food Coupon Book Reports, from bulk storage points, to determine the propriety and reasonableness of the inventories. Forms FNS-261, Advices of Shipment, Form FNS-300, Advices of Transfer, or an approved State agency form, and reports of returned mail issued coupons, reports of replacements of mail

V 43 | 85 MY 2 78 UMI

issued coupons, reports of improperly manufactured or mutilated coupons, reports of shortage or overage of food coupon books and physical inventory controls shall be used by the State agency to assure the accuracy of monthlky reports and their compliance with required inventory levels and the accuracy and reasonableness of coupon orders.

(b) *Coupon controls.* The State agency shall establish control and security procedures to safeguard coupons, similar to those used to protect currency. The State agency and all persons or organizations acting on its behalf, shall take the necessary precautions to: (1) safeguard coupons from theft, embezzlement, loss, damage, or destruction; (2) avoid unauthorized transfer, negotiation or use of coupons; and (3) avoid issuance and transfer of altered or counterfeit coupons. The exact nature of security arrangements will depend on State agency evaluation of local coupon issuance and storage facilities. These arrangements must permit the timely issuance of coupons while affording a reasonable degree of coupon security.

(c) *State coupon requisitioning.* The State agency shall arrange for the ordering of coupons and the prompt verification and written acceptance of the contents of each coupon shipment. The State agency shall furnish FNS with appropriate delivery hours and the names of the persons authorized to sign delivery acknowledgements.

(d) *FNS review of requisitions.* FNS will assess the reasonableness and propriety of food stamp requisitions submitted by State agencies based on prior inventory changes and will notify the State agency of any adjustments made to requisitions.

(e) *FNS shipment of coupons.* FNS will ship coupons, printed in such denominations as it may determine necessary, directly to State agency designated receiving points. FNS will promptly advise the State agency in writing when coupons are shipped to receiving points using Form FNS-261. Coupons shall be considered delivered to the State agency when FNS or its carrier has a signed receipt.

(f) *Shipment of coupons by the State agency.* (1) Once coupons have been accepted by receiving points within the State, any further movement of the coupons between coupon issuers and bulk storage points within the State is at the risk of the State agency. To minimize the risk of loss, coupons are usually shipped by armored car, armored vehicle, armored tractor/trailer, air, or the Postal Service. Movement of coupons by any of these methods of transportation is normally appropriate because stringent security is applied and the risk of loss is usually borne by the carrier.

(2) In every instance when coupons are transported the person(s) transporting coupons shall:

(i) Acknowledge their receipt, in writing;

(ii) Accord the coupons much protection as is reasonable;

(iii) Advise issuance supervisors of the routes to be taken, the shipment departure time and the estimated arrival time.

(g) *Specimen coupons.* FNS will provide non-negotiable specimen coupons to State agencies and firms upon written request for the purpose of educating and training employees on program operations.

(1) The State agency or firm shall store specimen coupons in secure storage with access limited to authorized personnel. The State agency or firm shall keep a perpetual record of specimen coupon inventory.

(2) Specimen coupons that are mutilated, improperly manufactured, or otherwise unusable, shall be destroyed by the State agency or firm. Such destruction shall be witnessed by two persons and noted on the perpetual inventory record maintained for specimen coupons.

§ 274.5 Responsibilities of coupon issuers and bulk storage points.

(a) *Receipt of coupons.* Coupon issuers and bulk storage points shall promptly verify and acknowledge, in writing, the contents of each coupon shipment delivered to them and shall be responsible for the custody, care, control, and storage of coupons.

(b) *Inventory levels.* Coupon issuers and bulk storage points shall maintain a proper level of coupon inventory not in excess of reasonable needs, taking into consideration the ease and feasibility of resupplying such coupon inventories. Such inventory levels should not exceed the six-month supply provided for in § 274.4(a).

(c) *Monthly reporting.* Coupon issuers and bulk storage points shall report monthly to FNS, through the State agency, using Form FNS-250 of Form FNS-250-1. The State agency shall prescribe a report due date, taking into consideration the time needed to perform the functions required in § 274.8. These reports shall be signed by the coupon issuer or appropriate corporate official, certifying that the information is true and correct to the best of that person's knowledge and belief. Reports shall be submitted to FNS by the State agency by the 45th day following the end of the report month.

(d) *Supporting documentation.* Coupon issuers and bulk storage points shall submit to the State agency supporting documentation which will allow verification of the monthly report. At a minimum, such documentation shall include documents supporting coupon shipments, transfers, and issuances. In those states using an ATP issuance system, coupon issuers shall submit transacted ATP's batched according to each day's activity, in accordance with the schedule prescribed by the State agency but, in any case, not less often than monthly.

(e) *Improperly manufactured or mutilated coupons.* Coupon issuers and bulk storage points shall cancel improperly manufactured or mutilated coupons or coupon books by writing or stamping "canceled" across the face of the coupon(s) and coupon book(s) and shall forward them with the appropriate documentation to the State agency.

§ 274.6 Reconcillation.

(a) *Verification of ATP issuance.* (1) In ATP issuance systems the State agency shall verify the number of ATP's received from the coupon issuers and the total value of authorized coupon issuances.

(2) ATP batches not reconciled shall be maintained intact by the State agency until the discrepancy is resolved with the coupon issuer.

(3) Following receipt and verification of the final batch of ATP's for the month, the State agency shall determine the total value of authorized issuances for each coupon issuer. Any expired or out-of-State ATP's shall be handled as coupon issuer errors and shall not be included in authorized issuance figures.

(b) *Reconciliation of ATP's with the HIR master file.* The State agency shall post and reconcile all transacted ATP's against the HIR master file. This posting and reconciliation shall, at a minimum, include for each ATP a comparison of the total coupon allotment. The State agency shall merge the records of the manually prepared initial, supplemental, and replacement ATP issuances with the HIR master file prior to posting and reconciling the transacted ATP's. Because ATP's issued after the 25th of the month may be redeemed in the following month and because supplemental ATP's may be issued during the month, the State agency shall establish a mechanism for the redemption of two valid ATP's in one month, and for the reconciliation and posting to the correct month of issuance. However, ATP's issued to replace ATP's reported lost or stolen shall be separately identifiable, as the transaction of both the original and replacement ATP represents a duplicate issuance which must be reported on a reconciliation report required in § 274.8(a).

(c) *Identification of unreconciled ATP's.* The State agency shall identify all transacted ATP's that are not reconciled with the HIR master file as expired, duplicated, altered, stolen, counterfeit, or out-of-State. This identification shall be used to establish the liabilities of the State agency and FNS on a reconciliation report and for determination of corrective or claims action.

(d) *HIR reconciliation to the case files.* In an HIR issuance system, the State agency shall conduct a semiannual comparison of the active and inactive HIR cards against the case files. At a minimum, 20 percent of all active and inactive HIR cards shall be selected at random for the comparison. If the State agency discovers an HIR card during the review for which a case file cannot be located, the State agency shall conduct a total review of the active case files. The State agency shall immediately document and report any discrepancies discovered during the semiannual review to FNS.

§ 274.7 Issuance record retention and security.

(a) *Availability of issuance records.* The State agency shall maintain issuance records for a period of three years, following the end of the fiscal year of origin. This period may be extended at the written request of FNS.

(1) Issuance records shall include, at a minimun: notices of change, HIR cards, inventory records, transacted ATP's or similar authorizing documents, Forms FNS-250, Forms FNS-250-1 and substantiating documents, cashier's daily reports, receptionist's daily tally sheets, and the HIR master file.

(2) In lieu of the records themselves, microfilm, microfiche, or computer tapes may be maintained, as long as they are easily retrievable for audit review purposes.

(b) *Control of issuance documents.* The State agency shall control all issuance documents which establish household eligibility while the documents are transferred and processed within the State agency. The State agency shall use numbers, batching, inventory control logs or similar controls from the point of initial receipt through the issuance and reconciliation process. The State agency shall also ensure the security and control of ATP's in transit from the manufacturer to the State agency.

(c) *Accountable documents.* HIR cards, ATP's, ID cards, and Forms FNS-286 shall be considered accountable documents. The State agency shall provide the following minimum security and control procedures for these documents:

(1) Preprinted serial numbers;

(2) Secure storage;

(3) Access limited to authorized personnel;

(4) Bulk inventory control records;

(5) Subsequent control records maintained through the point of issuance or use; and

(6) Periodic review and validation of inventory controls and records by parties not otherwise involved in maintaining control records.

(d) *Notice of change security.* For notices of change which initiate, update, suspend, or terminate the HIR, the State agency shall at a minimum, provide secure storage and limit access to authorized personnel.

§ 274.8 State agency reporting and destruction of unusable coupons.

(a) *State agency reporting.* (1) The State agency shall report to FNS when a project area, reconciliation point, or coupon shipment receiving point is created, changed or terminated at least 30 days prior to the effective date of the action. A reconciliation point is that point in the State agency where transacted ATP's are reconciled with the HIR master file. Although initial notification may be made by telephone, the State agency shall confirm the information in writing as soon as possible.

(2) The State agency shall review Form FNS-250, and Form FNS-250-1, received monthly from coupon issuers and bulk storage points for accuracy, completeness, and reasonableness. The State agency shall attest to the accuracy of these reports and submit them to FNS so that they will be received in FNS by the 45th day following the end of the report month.

(3) The State agency shall submit to FNS a Form FNS-259, Food Stamp Mail Issuance Report, for each project area using a mail issuance system. The State agency shall verify the issuance and replacement figures by a comparison with the issuance and replacement figures on the appropriate coupon issuer's Form FNS-250. This report shall be submitted to FNS so that it will be received in FNS by the 45th day following the end of each quarter.

(4) FNS shall review each Form FNS-250 and FNS-250-1, submitted through the State agency for completeness, accuracy, and reasonableness and shall reconcile inventory with shipping records. FNS will review State agency verification of coupon issuer and bulk storage point monthly reports. FNS may supplement this review by unannounced spot checks of inventory levels and coupon security arrangements at selected coupon issuers and bulk storage points.

(5) Any State agency having an ATP issuance system shall report monthly to FNS on the reconciliation of the transacted ATP's against the HIR master file on a Food Stamp Reconciliation Report. This report shall be prepared at the level of the State agency where the actual reconciliation of the transacted ATP's to the HIR master file takes place. This report shall be submitted to FNS so that it will be received in FNS by the 45th day following the end of the report month.

(6) The State agency shall submit to FNS Form FNS-256, Monthly Report of Participation and Coupon Issuance, for each project area. The State agency shall compile figures after the end of the issuance month based on HIR card data or transacted ATP's. These figures shall be detailed by project area and include all issuances supported by issuance documents including expired, altered, stolen, counterfeit and duplicate issuances. This report shall be submitted to FNS so that it will be received in FNS by the 35th day following the report month.

(b) *Destruction of unusable coupons.* (1) After verification of the reports received from the coupon issuers and bulk storage points, the State agency shall destroy improperly manufactured or mutilated coupons or coupon books received from coupon issuers and bulk storage points, and unusable coupons or coupon books returned by households, provided that:

(i) It has been determined that the value of coupons does not exceed $200 per coupon issuer or bulk storage point for any month; and

(ii) The State agency has determined that the coupons were in fact improperly manufactured or mutilated.

(2) The State agency shall destroy the coupons and coupon books by burning, shredding, tearing or cutting so they are not negotiable. Two State agency officials shall witness and certify the destruction and forward the Form FNS-136, Certificate of Destruction of Food Coupons, with the Form FNS-250 or Form FNS-250-1.

(3) If the value of the coupons to be destroyed exceeds $200 per coupon issuer, the State agency shall request FNS approval prior to any destruction of the coupons.

(4) If either the coupon issuer, the bulk storage point or the State agency cannot determine whether coupons or coupon books were in fact improperly manufactured or establish the value of the coupons involved, the State agency shall promptly forward a written statement of findings and the canceled coupon(s) or coupon book(s) to FNS for a determination.

§ 274.9 Close-out of a coupon issuer.

(a) *Definition of responsibilities.* Whenever the services of a coupon issuer or bulk storage point are terminated, the State agency shall perform the responsibilities described below. If a coupon issuer or bulk storage point has more than one functioning unit and one of these facilities is terminated, the coupon issuer or bulk storage point shall fulfill the responsibilities described in paragraphs (b) and (c) of this section. The coupon issuer or bulk storage point shall notify the State agency of the pending termination of any of its services prior to the actual termination. The State agency shall promptly notify FNS.

(b) *Close-out accountability.* The State agency shall perform a close-out

V 43 1 85

audit of a coupon issuer or bulk storage point within 30 days of termination of the issuance or storage point. The State agency shall report the findings of the audit to FNS immediately upon its completion. If the audit determines that the final FNS-250 or 250-1 is incorrect, the State agency shall promptly provide a corrected report to FNS.

(c) *Transfer of coupon inventory.* (1) Prior to the transfer of coupon inventory to another coupon issuer or bulk storage point, the State agency shall perform an actual physical count of coupons on hand.

(2) The State agency shall transfer the inventory to another coupon issuer or bulk storage point preferable within the same project area. The transfer of coupons shall be properly reported and documented by both the point being terminated and the point receiving the inventory.

(d) *Maintenance of participant service.* (1) At least 30 days before actual termination of a coupon issuer, the State agency shall notify project area participants of the impending closure. Notification shall include identification of alternative issuance locations and available public transportation.

(2) If closure of the issuer will affect a substantial portion of the caseload or a specific geographic area, the State agency shall take whatever action is necessary to maintain participant service.

(3) If a coupon issuer of bulk storage point is to be closed for noncompliance with contractual requirements and alternative issuance facilities or systems are not readily available, the State agency may continue to use the coupon issuer or bulk storage point for a limited time. In these situations, the State agency shall perform weekly on-site reconciliations of coupon issuance. The State agency shall continue to actively seek other issuance or storage alternatives and shall, in no case, use the coupon issuer or bulk storage point for more than 30 days from the date the decision is made to terminate its operations.

§ 274.10 Use or redemption of coupons by eligible households.

(a) *Eligible food.* A household member should sign each coupon book issued to the household. The coupons may be used only by the household, or other persons the household selects, to purchase eligible food for the household, which includes, for certain households residing in certain designated areas of Alaska, the purchase of hunting and fishing equipment with coupons. Uncanceled and unendorsed coupons of 1-dollar denomination, returned as change by authorized retail food stores, may be presented as payment for eligible food. All other detached coupons may be accepted only if accompanied by the coupon book which bears the same serial number as the detached coupons. It is the right of the household or the authorized representative to detach the coupons from the book.

(b) *Meals-on-wheels.* Eligible household members 60 years of age or over or members who are housebound, physically handicapped or otherwise disabled to the extent that they are unable to adequately prepare all their meals, and their spouses, may use coupons to purchase meals prepared for and delivered to them by a nonprofit meal delivery service authorized by FNS.

(c) *Communal dining.* Eligible household members 60 years of age or over and their spouses, or those receiving SSI and their spouses, may use coupons issued to them to purchase meals prepared especially for them at communal dining facilities authorized by FNS for that purpose.

(d) *Addict/alcoholics.* Members of eligible households who are narcotics addicts or alcoholics and who regularly participate in a drug or alcoholic treatment and rehabilitation program may use coupons to purchase food prepared for them during the course of such program by a private nonprofit organization or institution authorized by FNS.

(e) *Alaskan hunting/fishing equipment.* Eligible households residing in areas of Alaska determined by FNS as areas where access to retail food stores is difficult and who rely substantially on hunting and fishing for subsistence may use all or any part of the coupons issued to them to purchase hunting and fishing equipment such as nets, hooks, rods, harpoons and knives, but excluding firearms, ammunition and other explosives.

(f) *Use of ID cards.* Upon request, the household or the authorized representative shall present the household's ID card to the retail food store or meal service when exchanging food coupons for eligible food.

(g) *Prior payment prohibition.* Coupons shall not be used to pay for any eligible food purchased prior to the time at which the coupons are presented to authorized retail food stores or meal services. Neither shall coupons be used to pay for any eligible food in advance of the receipt of food, except when prior payment is for food purchased from a nonprofit cooperative food purchasing venture.

(h) *Cash change.* When change in an amount less than 1 dollar is required in a coupon transaction, the household shall receive the change in cash not to exceed 99 cents.

§ 274.11 Return of coupons.

(a) *Refund of purchase requirement.* In the event of voluntary termination of participation in the program by a household or death of the head of the household, properly issued coupons may be returned to FNS for a refund on the same ratio of cash to coupons as was applied by the State agency in the issuance of the coupons to the household.

(b) *Filing refund request.* A request for a refund shall be submitted to the State agency. The request for such a refund shall be made in accordance with the following requirements: (1) It shall be in ink or typed, (2) it shall contain the claimant's address, (3) it shall be dated and signed, and (4) the unused coupons shall be attached.

(c) *FNS payments.* State agencies shall forward claims to FNS for payment. The claimant's request for a refund, a completed Form FNS-287, Request for Reimbursement or Notification of Return of Unused Food Coupons for Refund, and the unused coupons shall be forwarded to FNS by the State agency.

(d) *Limit on refunds.* Six months after elimination of the purchase requirement, no refunds shall be paid for coupons returned to FNS. Coupons will be accepted by FNS for accounting and disposition only. Households should be reminded that even if they are not currently eligible, properly issued coupons may be redeemed by them at any time in authorized retail stores.

(e) *Old series coupon exchange.* Households which still have old series coupons shall be entitled to a dollar for dollar exchange of old series coupons for new series coupons. When only a 50-cent coupon is offered for exchange or the coupons offered include an odd number of 50-cent coupons, a new series one dollar coupon will be given for the odd 50-cent coupon. Households in possession of old series coupons shall submit the coupons and a request for exchange to the State agency. State agencies may make direct exchange to claimants or request FNS to make the exchange.

5. Part 275 remains in force and effect but is redesignated as a new Part 277. The new Part 275 is reserved except that § 275.10 of former Part 275 remains in force. A new part 276 is added and reserved. As noted previously, former paragraphs 271.1(t) and 271.7(a)-(d) remain in force and effect and are redesignated in the new Part 276. A new Part 277 is added and contains the redesignated Part 275. Former paragraphs 271.1(h), 271.2, 271.5-275.9, 275.11-275.16, and Appendix A of former Part 275 remain in force and effect in the new Part 277. The titles of the new Parts 275, 276, and 278 read as follows:

PART 275—PROGRAM MONITORING SYSTEM

(Reserved. Section 275.10 of the current regulations remains in force.)

M Y 2 7 8 UMI

PART 276—STATE AGENCY LIABILITIES AND FEDERAL SANCTIONS

(Reserved. Sections 271.1(t) and 271.7(a)-(d) of the current regulations remain in force and effect.)

PART 277—PAYMENT OF CERTAIN ADMINISTRATIVE COSTS OF STATE AGENCIES

(Reserved. Sections 271.1(h), 271.2, 275.1-275.9, 275.11-275.16, and Appendix A of Part 275 in the current regulations remain in force and effect.)

6. A new Part 278 contains the redesignated Part 272 and is revised to read as follows:

PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND BANKS

Sec.

278.1 Approval of retail food stores and wholesale food concerns.
278.2 Participation of retail food stores.
278.3 Participation of wholesale food concerns.
278.4 Procedures for redeeming coupons.
278.5 Participation of banks.
278.6 Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.
278.7 Determination and disposition of claims—retail food stores and wholesale food concerns.
278.8 Administrative review—retail food stores and wholesale food concerns.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 278.1 Approval of retail food stores and wholesale food concerns.

(a) *Application.* Any firm desiring to participate in the program shall file an application as prescribed by FNS. FNS shall deny or approve authorization, or request more information, within 30 days of receipt of the application.

(b) *Determination of authorization.* An applicant shall provide sufficient data on the nature and scope of the firm's business for FNS to determine whether the applicant's participation will further the purposes of the program. In making this determination FNS shall consider all of the following:

(1) *The nature and extent of the food business conducted by the applicant.* (i) Retail food stores which sell primarily food for home preparation and consumption and in which one or more staple food items, as defined in § 271.2, make up more than 50 percent of food sales shall normally be considered to have food business of a nature and extent which will further the purposes of the program. These stores shall include: full-line grocery stores; stores which sell meat, poultry, or fish; stands which sell agricultural commodities; farmers markets; milk routes; bread routes; day-old bread stores; bakeries and pastry shops which sell bread; and nonprofit cooperative food-purchasing ventures which meet any applicable local requirements for retail firms and name a manager to deal with FNS, even though they accept coupons before delivering the food orders brought with the coupons.

(ii) Firms whose primary business is not the sale of food for home preparation and consumption, but who have recognized grocery departments in which staple food make up more than 50 percent of foods sales, shall normally be considered to have food business of a nature and extent which will qualify the store for participation in the program. In determining whether a store's staple food business is sufficient for the store to qualify for participation in the program, FNS shall also consider:

(A) The volume of staple food business the store does;

(B) The amount of sales of staple foods compared to other business conducted by the firm; and

(C) The availability of other authorized food stores in the area.

(iii) Wholesale food concerns whose primary business is the sale of eligible food at wholesale, and in which one or more staple food items, as defined in § 271.2, make up more than 50 percent of food sales, shall normally be considered to have food business of a nature and extent which will further the purposes of the program.

(2) *The volume of coupon business which FNS may reasonably expect the firm to do.* FNS may consider such factors as the location of a store in evaluating the ability of an applicant firm to attract food stamp business.

(3) *The business integrity and reputation of the applicant.* FNS may consider:

(i) Criminal conviction records reflecting on the honesty or integrity of officers or managers of the applicant firm;

(ii) Official records of removal from other Federal, State, or local programs;

(iii) Judicial determinations in civil litigation adversely reflecting on the integrity of officers or managers of the applicant firm;

(iv) Evidence of an attempt to circumvent a period of disqualification from the Food Stamp Program for violations of the Food Stamp Act and the provisions of this part;

(v) Evidence of prior fraudulent behavior of officers, managers of employees of the applicant firm; and

(vi) Any other evidence reflecting on the business integrity and reputation of the applicant.

(4) *Other factors.* Any other factors which FNS considers pertinent to the application under consideration.

(c) *Wholesalers.* A wholesale food concern may be authorized if it meets the requirements of paragraphs (a) and (b) of this section. In addition, a wholesale food concern may be authorized only if an authorized retail food store depends on that concern as a coupon redemption outlet. In addition, no firm may be authorized to accept and redeem coupons both as a retail food store and a wholesale food concern at the same time, nor may a firm be authorized as a wholesale food concern if its owner or owners also own a firm which is authorized as a retail food store.

(d) *Meal Services.* A meal delivery service or communal dining facility desiring to prepare and serve meals to households eligible under § 271.3(a) (2) and (3), in addition to meeting the requirements of paragraphs (a) and (b) of this section, must establish that:

(1) It is recognized as a tax exempt organization by the Internal Revenue Service; or

(2) It is a private establishment operating under a contract with a State or local agency to prepare and serve (or deliver) meals to elderly persons (and, in the case of meal delivery services, to elderly persons, or handicapped persons, or both) and their spouses, at concessional prices.

(e) *Treatment programs.* Drug addict or alcoholic treatment and rehabilitation programs wishing to prepare and serve meals to households eligible under § 271.3(a) (2) must, in addition to meeting requirements of paragraphs (a), (b), and (d)(1) of this section, be certified by the State agency or agencies designated by the Governor as responsible for the State's programs for alcoholics and drug addicts under Public Law 91-616, "Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" And Public Law 92-555, "Drug Abuse Office and Treatment Act of 1972," as providing treatment that can lead to the rehabilitation of drug addicts or alcoholics. In addition, the certification must show that the treatment program meets the standards required of treatment programs under the supervision of the State agency or agencies designated by the Governor as responsible for the State's programs for alcoholics and drug addicts. Approval to participate is automatically canceled at any time that a program loses its certification from the State agency or agencies.

(f) *Authorization card.* Upon approval, FNS shall issue a nontransferable authorization card to the firm. The authorization card shall be retained by the firm until superseded, surrendered, or revoked as provided in this part.

(g) *Denying authorization.* FNS shall deny the application of any firm if it determines that:

(1) The firm does not qualify for participation in the program as speci-

V 43 — 85 MY 2 78 UMI

fied in paragraphs (b), (c), (d), and (e) of this section; or

(2) The firm has failed to pay in full any civil money penalty under § 278.6 or any fiscal claim assessed against the firm under § 278.7 FNS shall issue a notice to the firm by certified mail or personal service of any authorization denial and shall advise the firm that it may request review of that determination.

(h) *Withdrawing authorization.* FNS shall withdraw the authorization of any firm authorized to participate in the Program if it determines that the firm's continued participation will not further the purposes of the Program. FNS shall issue a notice to the firm by certified mail or personal service to inform the firm of the determination and of the review procedure. FNS shall remove the firm from the Program if the firm does not request review within the period specified in § 279.5.

(i) *Updating information.* FNS may require, from time to time, but not more than once each Federal fiscal year, a firm to update any or all of the information on the original application form. Failure to provide this information may result in the withdrawal of the firm's approval to participate in the Program.

(j) *Applications containing false information.* The filing of any application containing false or misleading information may result in the denial or withdrawal of approval to participate in the Program and may subject the firm and persons responsible to civil or criminal action.

(k) *Administrative review.* Any withdrawal or denial of authorization to participate in the program shall be subject to administrative review under § 278.8.

(l) *Safeguarding privacy.* The contents of applications or other information furnished by firms, including information on their gross sales and food sales volumes and their redemptions of coupons, may not be used or disclosed to anyone except for purposes directly connected with the administration and enforcement of the Food Stamp Act and these regulations.

§ 278.2 Participation of retail food stores.

(a) *Official Food List.* Authorized retail food stores shall post in the store the "Official Food List" issued by FNS.

(b) *Use of coupons.* Coupons shall be accepted by an authorized retail food store only in exchange for eligible food. Coupons may not be accepted in exchange for cash, except when cash is returned as change in a transaction in which coupons were accepted in payment for eligible food, under paragraph (e) of this section. Coupons may not be accepted in payment of interest on loans, or for any other nonfood use.

(c) *Equal treatment for coupon customers.* Coupons shall be accepted for eligible foods at the same prices and on the same terms and conditions applicable to cash purchases of the same foods at the same store. However, nothing in this part may be construed as authorizing FNS to specify the prices at which retail food stores may sell food. No retail food store may single out coupon users for special treatment in any way.

(d) *Accepting coupons.* No authorized retail food store may accept coupons marked "paid," "canceled," or "specimen," coupons bearing the name of any bank, or coupons of other than the 1-dollar denomination which have been detached from the coupon books prior to the time of purchase or delivery of eligible food unless the detached coupons are accompanied by the coupon books which bear the same serial numbers that appear on the detached coupons. It is the right of the household member or the authorized representative to detach the coupons from the book.

(e) *Making change.* An authorized retail food store shall use, for the purpose of making change, uncanceled and unmarked 1-dollar coupons which were previously accepted for eligible foods. If change in an amount of less than 1 dollar is required, the eligible household shall receive the change in cash. At no time may cash change in excess of 99 cents be returned in a coupon transaction. An authorized retailed may not engage in a series of coupon transactions of less than $1 the purpose of which is to provide the same food stamp customer an amount of cash change greater than the maximum 99 cents cash change allowed in one transaction.

(f) *Accepting coupons before delivery.* Food retailers may not accept coupons before delivering the food, retain custody of any unspent coupons, or in any way prevent an eligible household from using coupons in making purchases from other authorized firms. However, a nonprofit cooperative food purchasing venture may accept coupons from a member of the cooperative at the time the member places a food order. The food ordered must be made available to the member within 10 days from the day the cooperative receives the member's coupons.

(g) *Paying credit accounts.* Coupons may not be accepted by an authorized retail food store in payment for any eligible food sold to a household on credit.

(h) *Redeeming coupons.* Authorized retail food stores may exchange coupons in accordance with this part for face value, upon presentation through the banking system or through a wholesale food concern authorized to accept coupons from that retailer. Authorized drug addict and alcoholic treatment and rehabilitation programs may present coupons for redemption only through authorized retail stores or wholesale food concerns. Authorized drug addict and alcoholic treatment and rehabilitation programs may not present coupons directly to a bank for redemption.

(i) *Identifying coupon users.* Coupons may not knowingly be accepted from persons who have no right to possession of coupons for use as prescribed in this part. If a food retailer has any cause to believe that a person presenting coupons has no right to use the coupons, the food retailer should request the person to show the ID card of the household to establish the right of that person to use the coupons.

(j) *Checking meal delivery service recipients.* A nonprofit meal delivery service shall require the recipient of a delivered meal to show the marked ID card establishing the recipient's right to use coupons for that service the first time that the recipient offers coupons in payment for the service, and shall request the marked ID card at any time the nonprofit meal delivery service has cause to question the continued eligibility of the recipient to use coupons for delivered meals.

(k) *Checking hunting and fishing equipment users.* Authorized Alaskan retailers shall require coupon customers wanting to purchase hunting and fishing equipment with coupons to show their ID cards to determine that they live in an area designated by FNS as one in which persons are dependent upon hunting and fishing for subsistence.

§ 278.3 Participation of wholesale food concerns.

(a) *Accepting coupons.* A wholesale food concern may redeem endorsed coupons from an authorized retail food store or authorized drug addict or alcoholic treatment program, if the coupons are accompanied by a properly filled-out signed redemption certificate, and are not marked "paid," "canceled," or "specimen."

(b) *Accepting legally obtained coupons.* No authorized wholesale food concern may accept coupons if the wholesaler knows or has reasonable cause to believe that the coupons were not legally obtained for eligible food.

(c) *Redeeming coupons.* An authorized wholesale food concern may redeem coupons, properly accepted from retailers, through the banking system, upon presentatioin of the coupons with:

(1) The authorized retail food store's properly filled-out and signed redemption certificate for the coupons; and

(2) The authorized wholesale food concern's properly filled-out and signed redemption certificate.

(d) *Handling retailer redemption certificates.* No authorized wholesale food concern may alter, prepare, or complete an authorized retail food store's redemption certificate.

§ 278.4 Procedure for redeeming coupons.

(a) *Coupons accepted without authorization.* Coupons accepted by a retail food store or a wholesale food concern before the receipt by the firm of an authorization card from FNS may not be presented for redemption unless the FNS Officer In Charge has approved the redemption under § 278.7(b). Burned or mutilated coupons shall be presented for redemption to the FNS Officer In Charge as provided in § 278.7(c).

(b) *Endorsing coupons.* Each authorized retail food store or authorized wholesale food concern shall mark its authorization number or name on each coupon before it presents the coupons for redemption.

(c) *Using redemption certificates.* Authorized firms will be provided by FNS with redemption certificates which the firms, except for drug addict and alcholic treatment and rehabilitation programs, shall use in presenting coupons to commercial banks for credit or for cash. Authorized retail food stores, including meal services, may also use the certificates in presenting coupons to authorized wholesale food concerns for redemption.

§ 278.5 Participation of banks.

(a) *Accepting coupons.* Banks may redeem coupons only from authorized retail food stores, meal services, and wholesale food concerns in accordance with this part and the instructions of the Federal Reserve Banks. Coupons submitted to banks for credit or for cash must be properly endorsed in accordance with § 278.4 and shall be accompanied by a properly filled-out and signed redemption certificate. Banks may require persons presenting coupons for redemption to show their authorization cards. Redemption certificates accepted by receiving banks shall be forwarded at least once a week to:

Minneapolis ADP Field Center, Food and Nutrition Service, USDA, 3930 West 65th Street, Minneapolis, Minn. 55435.

Coupons redeemed must be canceled by or for the first bank receiving the coupons by indelibly marking "paid" or "canceled" together with the name of the bank, or its routing symbol transit number, on each coupon. A portion of a coupon consisting of less than three-fifths of a whole coupon may not be redeemed by banks. Banks which are members of the Federal Reserve System, nonmember clearing banks, and nonmember banks which have arranged with a Federal Reserve Bank to deposit coupons for credit to the account of a member bank on the books of the Federal Reserve Bank may forward canceled coupons directly to the Federal Reserve Banks. Other banks may forward canceled coupons through ordinary collection channels.

(b) *Role of Federal Reserve Banks.* Federal Reserve Banks, acting as fiscal agents of the United States, will receive canceled coupons for collection as cash items from armed forces installations, member banks of the Federal Reserve System, nonmember clearing banks, and nonmember banks which have arranged with a Federal Reserve Bank to deposit coupons for credit to the account of a member bank on the books of the Federal Reserve Bank, and will charge those items to the general account of the Treasurer of the United States.

(c) *FNS liability for loss in transit.* (1) FNS shall be liable for losses of shipments of canceled coupons while the transit to Federal Reserve or correspondent banks, except that:

(i) Coupons are not in transit while in the custody of the transmitting bank, the Federal Reserve, the correspondent bank, or their employees.

(ii) The bank must be unable to recover the loss from the carrier, and when there is a partial loss, there must be evidence that the package was tampered with or damaged in transit. The Federal Reserve and correspondent bank shall record the condition of packages which on receipt appear to have been tampered with or damaged in transit.

(iii) The Federal Reserve or correspondent bank must provide a statement that the shipment or part of the shipment was not received. In the event of a partial loss, this statement shall specify the condition of the package upon receipt and state whether it appeared to have been tampered with or damaged in transit.

(2) The commercial bank shall give a prompt written report of loss or damage to the post office, or other carrier.

(3) Commercial banks shall submit the following documents to FNS in support of any claim for payment for coupons lost in transit:

(i) A copy of the notification of loss to the post office or other carrier;

(ii) An affidavit detailing the facts and the bank's procedures for making the shipment, the expected recovery from the carrier, and for partial losses, the condition of the package upon receipt and the basis for asserting whether it appeared to have been tampered with or damaged in transit;

(iii) A statement from the Federal Reserve or correspondent bank that the shipment or part of the shipment was not received. In the event of a partial loss, this statement shall state the basis for asserting whether the loss resulted from the package being tampered with or damaged in transit;

(iv) A copy of the cash letter which transmitted the shipment.

(4) FNS will obtain copies of the redemption certificates corresponding to claims.

(d) *FNS use of coupons to detect violations.* Regardless of any other provision in these regulations, coupons may be issued to, purchased by, or redeemed by persons authorized by FNS to use those coupons in examining and inspecting program operations, and for other purposes determined by FNS to be required for proper administration of the Program. Coupons which have been so issued and used, as well as any coupons which have been issued under paragraph (f) of this section, or which FNS believes may have been issued, transferred, negotiated, used, or received in violation of this subchapter or of any applicable statute, shall at the request of FNS and on issuance of a receipt for them by that person, be turned over to FNS by the bank receiving the coupons, or by any other person to whom the request is addressed, together with any certificate(s) of redemption accompanying the coupons. Any coupons so requested shall not after the request be eligible for redemption through Federal Reserve Banks or other collection channels.

However, FNS may redeem the coupons from any bank or person by payment of the face amount of the coupons upon determination by FNS that this direct redemption of coupons is warranted. FNS shall determine the proper disposition of any coupons held by FNS on completion of the examination or inspection in which the coupons were used. Claims or demands for unredeemed coupons surrended to FNS may be mailed to the local FNS Field Office for the project area involved.

(e) *Selling coupons to stores for internal checks.* FNS may sell coupons at face value to any authorized retail food store which wishes to use coupons to conduct internal checks of coupon transactions. The retail food store must submit a written request to FNS which shall include a certification that the store recognizes that its use of coupons will not affect FNS action to enforce program regulations and that the requested coupons will be used only for internal checks of the store's employees and only to uncover sales of items other than eligible foods. The request shall also include the name of the city or county in which the stores to be checked through the use of the requested coupons are located and the name and address of any outside agency with which the retail food store has or will have a contract to conduct checks of the store's employees using coupons. The request shall be directed to the Federal Operations Division, FNS, U.S. Department of Agriculture, Washington, D.C. 20250, and shall be

V 43 | 85 MY 2 78 UMI

accompanied by a check or money order made payable to the Food and Nutrition Service to cover the face value cost of the coupons requested. Coupons bought by retail food stores for use in internal checks may be later redeemed for full value in accordance with § 278.4, and in redeeming those coupons, retail food stores are authorized to make the certification required for redemption.

(f) *Continued participation of households under investigation.* Upon the written request of Federal, State, or local government agencies which have authority to investigate, and are investigating, suspected violations of Federal or State statutes concerning the enforcement of the Food Stamp Act or the regulations, the State agency may allow ineligible households to continue program participation. The State agency may allow the households to continue participation in the program until the earlier of (1) expiration of the period of 90 days after the request is received or any longer period which FNS, upon request of the State agency, may approve in a particular case, or (2) receipt of notification from the investigative agency that participation may be terminated or that the investigation has been completed. Regardless of any other provision of these regulations, FNS may not hold the State agency liable for the value of any coupons issued to households under this paragraph.

§ 278.6 Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.

(a) *Authority to disqualify or subject to a civil money penalty.* FNS may disqualify any authorized retail food store or authorized wholesale food concern from further participation in the program for a reasonable period of time, not to exceed 3 years, as FNS may determine, if the firm fails to comply with the Food Stamp Act or this part. Any firm which has been disqualified and which wishes to be reinstated at the end of the period of disqualification or at any later time shall file a new application so that FNS may determine whether reinstatement is appropriate. The application may be filed starting 10 days before the end of the period of disqualification. FNS may, in lieu of a disqualification, subject the firm to a civil money penalty of up to $5,000 for each violation if FNS determines that a disqualification would cause hardship to participating households.

(b) *Charge letter.* Any firm considered for disqualification or imposition of a civil money penalty under paragraph (a) of this section shall have full opportunity to submit to FNS information, explanation, or evidence concerning any instances of noncompliance before FNS makes a final administrative determination. The FNS Regional Office shall send the firm a letter of charges before the determination. The letter shall specify the violations or actions which FNS believes constitute a basis for disqualification or imposition of a civil money penalty. The letter shall inform the firm that it may respond either orally or in writing to the charges contained in the letter within 10 days of receiving the letter. The firm's response shall set forth a statement of evidence, information, or explanation concerning the specified violations or acts. The firm shall make its response, if any, to the Officer In Charge of the FNS Field Office which has responsibility for the project area in which the firm is located.

(c) *Review of evidence.* The letter of charges, the response, and any other information available to FNS shall be reviewed and considered by the appropriate FNS Regional Office, which shall then issue the determination.

(d) *Basis for determination.* The FNS Regional Office making a disqualification or penalty determination shall consider: (1) the nature and scope of the violations committed by personnel of the firm, (2) any prior action taken by FNS to warn the firm about the possibility that violations are occurring, and (3) any other evidence that shows the firm's intent to violate the regualtions.

(e) *Penalties.* FNS shall take action as follows against any firm determined to have violated the Act or regulations. The FNS Regional Office shall:

(1) Disqualify the firm for 3 years if:

(i) The firm has engaged in fraudulent schemes to illegally acquire or redeem large amounts of couponis; or

(ii) Personnel of the firm have committed flagrant violations of this part, such as buying large amounts of coupons or trafficking in ATP cards, which have resulted in major diversions of food stamp funds from their intended purpose.

(2) Disqualify the firm for 1 year if: (i) Personnel of the firm have bought coupons at a discount,

(ii) Personnel of the firm have sold expensive or conspicuous nonfood items, cartons of cigarettes, or alcoholic beverages in exchange for coupons, or

(iii) The firm's redemptions for a specified period of time have exceeded its food sales for the same period of time.

(3) Disqualify the firm for 6 months if: (i) Personnel of the firm have committed violations such as the sale of common nonfood items in the amounts which are normally found in a shopping basket, and

(ii) The evidence shows that the violations are encouraged by the firm.

(4) Disqualify the firm for 90 days if management personnel of the firm have committed violations such as described in paragraph (3)(i) of this subsection, and there is no indication that FNS has specifically warned the firm about the possibility that violations are occurring and of the possible consequences of violating the regulations.

(5) Disqualify the firm for 60 days if the evidence shows that violations such as those described in paragraph (e)(3) (i) of this section occurred, but that the violations resulted from carelessness or poor supervision by the firm's management.

(6) Disqualify the firm for 30 days if the evidence shows that: (i) Violations such as those described in paragraph (e)(3) (i) of this section occurred as a result of carelessness or poor supervision by the firm's management, but FNS has not specifically warned the firm about the possibility that violations are occurring and of the possible consequences of violating the regulations, or

(ii) The violations are limited in nature and scope, and FNS has made a specific attempt to warn the firm that violations may be occurring and of the possible consequences of violating the regulations.

(7) Send the firm a warning letter if violations occurred, but the evidence of violations is too limited to warrant a disqualification.

(f) *Previous penalties.* The FNS Regional Office may assign a penalty that is more severe than the penalty normally warranted by the evidence of violations if the firm has been previously disqualified or has been previously assigned a civil money penalty.

(g) *Criteria for civil money penalty.* FNS may impose a civil money penalty only when the firm subject to a disqualification is selling a substantial variety of staple food items, and there is no other authorized retail food store in the area selling as large a variety of staple food items at comparable prices.

(h) *Amount of civil money penalty.* FNS shall determine the amount of the civil money penalty as follows:

(1) Determine the firm's average monthly redemptions of coupons for the most recent 12-month period;

(2) Multiply the average monthly redemption figure by 5 percent to represent the loss of profits that would result from the loss of coupon business and related cash business;

(3) Multiply the product arrived at in subparagraph (2) by the number of months for which the firm would have been disqualified under paragraph (e) of this section. The civil money penalty may not exceed $5,000 times the number of violations.

(i) *Notifying the firm of civil money penalty.* FNS shall inform the firm in writing that it has 15 days in which to pay the fine or notify the Regional Office in writing of its intent to pay in installments specified by the FNS Regional Office. In any event, the fine must by paid in full by the end of the period for which the firm would have been disqualified. FNS shall disqualify the firm for:

(1) The period determined to be appropriate under paragraph (e) of this section if the firm refuses to pay the fine; or

(2) A period corresponding to the unpaid part of the fine, if the firm does not pay the fine in full by the end of the period determined.

(j) *Review of determination.* The determination of the FNS Regional Office shall be final and not subject to further administrative or judicial review unless a written request for review is filed within the period stated in § 279.5.

(k) *Delivery of notice.* The delivery by certified mail or personal service of any notice required of FNS by this part will constitute notice to the addressee of its contents.

§ 278.7 Determination and disposition of claims—retail food stores and wholesale food concerns.

(a) *Claims against violators.* FNS may establish a claim against an authorized firm which has accepted coupons in violation of the Food Stamp Act or of this part. If a firm fails to pay the claim, FNS may collect the claim by offset against the amounts due the firm on redemption of other coupons, or deny an application for reauthorization by a firm which has been disqualified and has failed to pay a claim.

(b) *Coupons accepted without authorization.* (1) The FNS Officer In Charge may approve the redemption under § 278.4 of coupons accepted by firms before the receipt of an authorization card from FNS if the following conditions exist:

(i) The coupons were received in accordance with the requirements of this part governing acceptance of coupons except the requirement that the firm be authorized before acceptance;

(ii) The coupons were accepted by the firm in good faith, and without intent to circumvent this part; and

(iii) The firm receives authorization to participate in the program.

(2) Firms seeking approval to redeem coupons accepted without authorization shall present a written application for approval to the local FNS Field Office. This application shall be accompanied by a written statement signed by the firm of all the facts about the acceptance of the coupons. The statement shall also include a certification that the coupons were accepted in good faith, and without any intent to circumvent this part.

(c) *Burned or mutilated coupons.* FNS may redeem burned or mutilated coupons only to the extent that the Bureau of Engraving and Printing of the United States Treasury Department can determine the value of the coupons. The firm presenting burned or mutilated coupons for redemption shall submit the coupons to the local FNS Field Office with a properly filled-out redemption certificate. In the section of the redemption certificate for entering the amount of coupons to be redeemed, an estimate of the value of the burned or mutilated coupons submitted for redemption shall be entered if the exact value of the coupons is unknown. The phrase "Deputy Administrator for Fiscal Management, FNS, USDA," should be entered in the section of the redemption certificate for entering the name and address of the bank or wholesaler.

(d) *Old series coupons.* FNS shall redeem the old series food coupons issued in 50-cents, 2-dollar, and 5-dollar denominations when they are presented for redemption. Firms presenting the coupons for redemption shall submit the coupons to the local FNS Field Office with a properly completed redemption certificate and a written statement, signed by a representative of the firm, detailing the circumstances of the acceptance of the coupons.

(e) *Denials of claims.* If a claim under the provisions of this section is denied in whole or in part, notification of this action shall be sent to the firm by certified mail or personal service. If the firm is aggrieved by this action, it may seek administrative review as provided in § 278.8.

(f) *Lost or stolen coupons.* FNS may not be held liable for claims from retail food stores, meal services, or wholesale food concerns for lost or stolen coupons.

§ 278.8 Administrative review—retail food stores and wholesale food concerns.

(a) *Requesting review.* A food retailer or food wholesaler aggrieved by administrative action under §§ 278.1, 278.6, or 278.7 may, within the period stated in § 279.5, file a written request for review of the administrative action with the Food Stamp Review Officer. On receipt of the request for review, the questioned administrative action shall be stayed pending disposition of the request for review by the Food Stamp Review Officer.

(b) *Addressing the request.* The request for review shall be filed with the Director, Administrative Review Staff, FNS, U.S. Department of Agriculture, Washington, D.C. 20250.

(c) *Review procedure.* The procedure for food stamp reviews is published in Part 279 and is available upon request from the Director, Administrative Review Staff.

7. A new Part 279 contains the redesignated Part 273, and is revised to read as follows:

PART 279—ADMINISTRATIVE AND JUDICIAL REVIEW—FOOD RETAILERS AND FOOD WHOLESALERS

Subpart A—Administrative Review—General

Sec.
279.1 Scope and purpose.
279.2 Food stamp review officer.
279.3 Authority and jurisdiction.
279.4 Rules of procedure.

Subpart B—Rules of Procedure

279.5 Manner of filing requests for review.
279.6 Contents of requests for review.
297.7 Action upon receipt of a request for review.
279.8 Determination of the food stamp review officer.
279.9 Legal advice and extensions of time.

Subpart C—Judicial Review

279.10 Judicial review.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2001-2027).

Subpart A—Administrative Review—General

§ 279.1 Scope and purpose.

Subpart A sets forth the procedure for the designation of the Food Stamp Review Officers and the authority and jurisdiction of those officers. Subpart B states the rules of procedure to be followed in the filing and disposition of the requests for review provided for in § 278.8. Subpart C concerns the rights of food retailers and food wholesalers to judicial review of the final determinations of the Food Stamp Review Officer.

§ 279.2 Food stamp review officer.

(a) *Designation of Review Officers.* The Administrator, FNS, shall designate one or more person to act as Food Stamp Review Officers.

(b) *Assigning cases to Review Officers.* The officers shall serve for periods which the Administrator, FNS, shall determine. Changes in designations and additional designations may be made from time to time at the discretion of the Administrator, FNS. When more than one Food Stamp Review Officer has been designated, requests for review will be assigned for handling to individual Food Stamp Review Officers by a person designated by the Administrator, FNS. The names of the Food Stamp Review Officers shall be on file in the Office of the Administrator, FNS.

§ 279.3 Authority and jurisdiction.

(a) *Jurisdiction.* A Food Stamp Review Officer shall act for the Department on requests for review filed by firms aggrieved by any of the following actions:

(1) Denial of an application to participate in the program under § 278.1

(2) Disqualification from participation in the program or imposition of a civil money penalty under § 278.6; or

(3) Denial of all or any part of any claim under § 278.7.

V 4 3 — 8 5

(b) *Authority.* The determination of the Food Stamp Review Officer shall be the final administrative determination of the Department, subject, however, to judicial review under section 14 of the Food Stamp Act and Subpart C of this part.

§ 279.4 Rules of procedures.

Rules of procedures for the orderly filing and disposition of requests for review of firms submitted in accordance with § 279.5 are issued in Subpart B of this part. The Administrator, FNS, may later issue amendments to any rules of procedure which are appropriate.

Subpart B—Rules of Procedure

§ 279.5 Manner of filing requests for review.

(a) *Addressing requests for review.* Requests for review submitted by firms shall be mailed to or filed with "Director, Administrative Review Staff, FNS, U.S. Department of Agriculture, Washington, D.C. 20250."

(b) *Content of requests.* Requests for review shall be in writing and shall state the name and business address of the firm involved, and the name, address and position with the firm of the person who signed the request. The request shall be signed by the owner of the firm, and officer or partner of the firm, or by counsel, and need not be under oath.

(c) *Time limit for requesting review.* A request for review shall be filed with the Director, Administrative Review Staff, within ten days of the date of delivery of the notice of the action for which review is requested. For purposes of determining whether a request was timely:

(1) The filing date shall be the postmark date of the request, or equivalent if the written request is filed by a means other than mail;

(2) In computing the ten day period, the day of delivery of the notice of the action for which review is requested may not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday. In that case, the period runs until the end of the next day which is not a Saturday, a Sunday, or a legal holiday. As used in this paragraph, "legal holiday" includes New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, Christmas Day, and any other day deignated as a holiday by the President or the Congress of the United States.

§ 279.6 Content of request for review.

(a) *Identifying the request.* Requests for review shall clearly identify the administrative action from which the review is requested. This identification shall include the date of the letter or other written communication notifying the firm of the administrative action, the name and title of the person who signed the letter or other communication, and whether the action under appeal concerns a denial of an application or a withdrawal of authorization to participate, a disqualification from further participation, or a denial of all or any part of a claim.

(b) *Supporting the request.* The request shall include information in support of the request showing the grounds on which review is being sought, or shall state that supporting information will be filed in writing at a later date. In the latter case the Food Stamp Review Officer shall notify the firm of the date by which the information must be filed. The firm requesting review may ask for an opportunity to appear before the Food Stamp Review Officer in person. However, any information submitted in person shall, if directed by the Food Stamp Review Officer, be put in writing by the firm and filed with the Food Stamp Review Officer within a period which the Review Officer shall specify.

§ 279.7 Action upon receipt of a request for review.

(a) *Holding action.* Upon receipt of a request for review of a disqualification action or of a withdrawal of authorization to participate, the Food Stamp Review Officer shall notify the appropriate FNS Regional Office, in writing, of the action under review and shall direct that the administrative action shall be held in abeyance until the Food Stamp Review Officer has made a determination. Upon receipt of a request for review of a denial of application to participate in the program, or of a denial of a claim, the Food Stamp Review Officer shall notify the appropriate FNS Regional Office, in writing, of the action under review and shall direct that the firm shall not be approved for participation or paid any part of the disputed claim until the Food Stamp Review Officer has made a determination. In any case, notice to the appropriate FNS Regional Office shall be accompanied by a copy of the request filed by the firm.

(b) *Filing supporting information.* If the request filed by the firm includes a request for an opportunity to file written information in support of its position at a later date, the Food Stamp Review Officer shall promptly notify the firm of the date by which the information shall be filed. If the firm fails to file any information in support of its position by the designated date, the information submitted with the original request shall be considered to be the only information submitted by the firm. In that case, if no information in support of the firm's position was submitted with the original request, the action of the appropriate FNS Regional Office shall be final.

(c) *Failure to meet with Review Officer.* If the firm filing the request for review asks to appear before the Food Stamp Review Officer in person, the Review Officer shall promptly notify the firm of the date, time and place set for the appearance. If the firm fails to appear before the Food Stamp Review Officer as specified, any written information timely submitted in accordance with this section shall be considered to be the only information submitted by the firm.

(d) *Basis for Regional Office determination.* The Food Stamp Review Officer shall require the appropriate FNS Regional Office to promptly submit, in writing, all information which was the basis for the administrative action for which the review has been requested.

§ 279.8 Determination of the food stamp review officer.

(a) *Basis for Review Officer determination.* The Food Stamp Review Officer shall make a determination based upon:

(1) the information submitted by the FNS Regional Office;

(2) Information submitted by the firm in support of its position; and

(3) Any additional information, in writing, obtained by the Review Officer from any other person having relevant information.

(b) *Review of denial of application or withdrawal of approval.* In the case of a request for review of a denial of an application or withdrawal of approval to participate in the program, the determination of the Food Stamp Review Officer shall sustain the action under review or shall direct that the firm be approved for participation.

(c) *Review of disqualification or civil money penalty.* In the case of a request for review of action disqualifying a firm from participation in the program or assessing a civil money penalty against the firm, the determination of the Food Stamp Review Officer shall sustain the action under review or specify a shorter period of disqualification or a reduced civil money penalty, direct that an official warning letter be issued to the firm in lieu of any period of disqualification, or direct that no administrative action be taken. The Food Stamp Review Officer may change a disqualification of a firm selling a substantial variety of staple foods to a civil money penalty if the Review Officer receives information that the disqualification would cause a hardship to participating households because there are no other firms in the area selling as large a variety of staple food items at comparable prices, and this information was not available to the Regional Office when the Region Office made its determination to disqualify the firm. In such a case, the Food Stamp Review Officer shall provide the information to the Regional Office, which shall report to the Food Stamp Review Officer whether the new information warrants a civil money penalty in lieu of disqualification. If the Food Stamp Review Officer determines that a civil money penalty in lieu of a disqualification is warranted, the Review Officer shall determine the amount of the penalty in accordance with § 278.6.

(d) *Review of denial of claim.* In the case of a request for review of a denial of all or part of a claim of a firm, the determination of the Food Stamp Review Officer shall sustain the action under review or shall specify the amount of the claim to be paid by FNS.

(e) *Notice of Review Officer determination.* The Food Stamp Review Officer shall notify the firm of the determination by certified mail. The notification shall be sent to the representative of the firm who filed the request for review.

(f) *Notifying the Regional Office.* The Food Stamp Review Officer shall send a copy of the notification to the firm to the appropriate FNS Regional Office, which shall take any action which may be necessary to comply with the determination of the Review Officer.

(g) *Effective date.* The determination of the Food Stamp Review Officer shall take effect 15 days after the date of delivery of the determination to the firm.

§ 279.9 Legal advice and extensions of time.

(a) *Advice from Office of the General Counsel.* If any request for review involves any doubtful questions of law, the Food Stamp Review Officer shall obtain the advice of the Department's Office of the General Counsel.

(b) *Extensions of time.* Upon timely written request to the Food Stamp Review Officer by the firm requesting the review, the Food Stamp Review Officer may grant extensions of time if, in the Review Officer's discretion, additional time is required for the firm to fully present information in support of its positions. However, no extensions may be made in the time allowed for the filing of a request for review.

Subpart C—Judicial Review

§ 279.10 Judicial review.

(a) *Filing for judicial review.* A firm aggrieved by the determination of the Food Stamp Review Officer may obtain judicial review of the determination by filing a complaint against the United States in the U.S. District Court for the district in which the owner resides or its engaged in business, or in any court of record of the State having competent jurisdiction. The complaint must be filed within 30 days after the date of delivery or service upon the firm of the notice of determination of the Food Stamp Review Officer in accordance with § 279.8(e); otherwise the determination shall be final.

(b) *Summons and complaints.* Service of the summons and complaint in any such action shall be made in accordance with the Rules of Civil Procedure for the U.S. District Courts. The copy of the summons and complaint required by the Rules to be served on the officer or agency whose order is being attacked shall be sent by registered or certificated mail to the person in charge of the applicant Regional Office of FNS listed in § 271.6.

(c) *Trial de novo.* The suit in the U.S. District Court or in the State court, as the case may be, shall be a trial de novo by the court in which the court shall determine the validity of the questioned administrative action. If the court determines that the administrative action is invalid, it shall enter a judgment or order which it determines is in accordance with the law and the evidence.

(d) *Stay of action.* Pending the judicial review, or any appeal from the judicial review, the administrative action under review shall remain in force, unless the firm makes application to the court and, after a hearing on the action showing irreparable injury, the court temporarily stays the administrative action under review pending disposition of the de novo trial or an appeal from the trial.

8. A new Part 280 is added, redesignated from Part 274, and reserved. Former Part 274 remains in force and effect. The title of the new Part 280 reads as follows:

PART 280—EMERGENCY FOOD ASSISTANCE FOR VICTIMS OF DISASTERS

(Reserved. Part 274 of the current regulations remains in force and effect.)

9. A new Part 281 is added and reserved. The title of the new Part 281 reads as follows:

PART 281—DESIGNATION OF INDIAN TRIBES AS STATE AGENCIES

(Reserved)

10. A new Part 282 is added and reads as follows:

PART 282—DEMONSTRATION, RESEARCH, AND EVALUATION PROJECTS

Sec.
282.1 Legislative authority.
282.2 Project initiation.
282.3 Eligibility.
282.4 Approval of proposals.
282.5 Pre-operational rulemaking procedures for demonstration projects.
282.6 Federal financial participation.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 282.1 Legislative authority.

(a) *Demonstration projects.* Demonstration projects are those authorized by section 17(b)(1) of the Act which states in part:

> The Secretary is authorized to conduct on a trial basis, in one or more areas of the United States, pilot or experimental projects [hereafter called demonstration projects] designed to test program changes that might increase the efficiency of the Food Stamp Program and improve the delivery of food stamp benefits to eligible households.

The Secretary is further authorized to waive all or part of the requirements of the Act and implementing regulations to the degree necessary to conduct such projects, except that no project may be undertaken which would lower or further restrict the established income and resource standards or benefit levels.

(b) *Research projects.* Research projects are those authorized by section 17(a) of the Act which states:

> The Secretary may, by way of making contracts with or grants to public or private organizations or agencies, undertake research that will help improve the administration and effectiveness of the Food Stamp Program in delivering nutrition related benefits.

(c) *Evaluation projects.* Evaluation projects are those authorized by section 17(c) of the Act which states in part:

> The Secretary shall develop and implement measures for evaluating, on an annual or more frequent basis, the effectiveness of the Food Stamp Program in achieving its stated objectives.

§ 282.2 Project initiation.

The Secretary shall determine those areas of program operations which require demonstration, research or evaluation efforts. The Secretary shall, as appropriate, seek proposals for specific types of demonstration, research, and evaluation projects through either publication of a Notice of Intent in the FEDERAL REGISTER or in accordance with procedures prescribed in the Federal Procurement Regulations (41 CFR, Ch. 1).

§ 282.3 Eligibility.

States or public or other nonprofit agencies or organizations or individuals are eligible for grants. States or public or private agencies or organizations or individuals are eligible for contracts.

M Y 2 — 7 8

V 4 3 | 8 5

§ 282.4 Approval of proposals.

(a) *Federal procedures.* (1) Proposals for demonstration, research or evaluation projects shall be reviewed by a panel consisting of appropriate FNS and Departmental representatives.

(2) Representatives from other Departments and agencies may be invited to participate in proposal review where proposed projects could affect their programs.

(3) Proposals shall be ranked based on the criteria established in paragraph (b) of this section.

(b) *Approval criteria.* (1) Proposals shall be reviewed for responsiveness to the specific requirements contained in the Notice of Intent or Request for Proposal.

(2) In addition, proposals will be evaluated according to the following general criteria:

(i) The conceptual development and clarity of measurable objectives.

(ii) Probable effectiveness of the proposal to achieve the project objectives based on:

(A) A complete description of the purpose; hypotheses; demonstration, research or evaluation design; and plans for implementation;

(B) The adequacy of the work plan, indicating tasks, scheduling and methodology; and

(C) A technical evaluation plan consistent with the objectives stated.

(iii) The capability of the applicant to conduct the project based on:

(A) A description of the qualifications of staff;

(B) Availability of necessary facilities, staff, and other resources;

(C) Administrative and supervisory capacity; and

(D) Knowledge of or previous experience in conducting demonstration, research or evaluation projects.

(iv) The projected cost of the project.

(v) For demonstration projects, potential benefits in relation to projected costs and potential nationwide application.

(vi) The relationship of the proposal to other similar demonstration, research or evaluation efforts.

§ 282.5 Pre-operational rulemaking procedures for demonstration projects.

Prior to the initiation of a demonstration project FNS shall publish proposed regulations in the FEDERAL REGISTER, if the project will likely have significant impact on the public. The regulations shall set forth the specific operational procedures for the demonstration project and the provisions of the Act and regulations which shall be waived. All public comments shall be considered and final regulations published prior to actual project operation.

§ 282.6 Federal financial participation.

(a) *Level of funding.* (1) *Grant awards.* FNS shall pay all costs up to the level established in the grant award. When a demonstration project involves an area of on-going State agency administrative responsibility, as established in § 271.4(a), FNS may pay up to 100 percent only of those administrative costs which exceed those usual and customary to program operations.

(2) *Contracts.* FNS shall pay all costs as established in the terms and conditions of the contract.

(b) *Limitations.* Federal financial participation shall be available to demonstration, research and evaluation projects only for:

(1) Those activities and projects awarded by FNS. Funds shall not be transferred from one project to another;

(2) Those costs specified in the grant or contract up to the amount approved in the grant or contract; and

(3) Costs incurred during the project, as established in the grant or contract. Time extensions of the project may be granted where sufficient justification has been submitted to and approved by FNS.

NOTE.—The Food and Nutrition Service has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107 and certifies that an Economic Impact Statement has been prepared.

TREASURY TAX AND LOAN ACCOUNTS

V 4 3 — 8 5
M Y 2 7 8
UMI

[4810-40]

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE; DEPARTMENT OF TREASURY

TREASURY TAX AND LOAN ACCOUNTS

Final Rule and Interim Rule

AGENCY: Fiscal Service, Department of the Treasury.

ACTION: Final rule and interim rule.

SUMMARY: The Treasury Department is amending its regulations to implement the investment provisions of Pub. L. 95-147 of October 28, 1977. The intent of that law is to permit the Treasury to earn interest by the investment of its operating cash balances and, at the same time, pay fees for certain services which have not heretofore been compensable. The law and these regulations also make certain savings and loan associations and credit unions eligible to participate in the Treasury tax and loan account system. Previously, only incorporated banks and trust companies were eligible. The interim regulations contain the standards for review of State-sponsored insurance arrangements. Such review will be made in order to determine if particular insurance arrangements are adequate to justify reduction of the amounts of collateral security required of a depositary to secure the balance in its Treasury tax and loan account.

EFFECTIVE DATES: The provisions of both the final and interim rules are effective July 6, 1978, provided the Congress has appropriated funds to cover the payment of fees for services rendered as provided in these regulations. If the Congress does not appropriate funds for fee payments by June 16, 1978, a notice will be published in the FEDERAL REGISTER postponing the effective date.

FOR FURTHER INFORMATION CONTACT:

Mr. John Kilcoyne, Assistant Fiscal Assistant Secretary (Banking), Office of the Fiscal Assistant Secretary, Department of the Treasury, Washington, D.C. 20220, 202-566-2849. Additionally, financial institutions having questions as to operating procedures may direct such questions to the Federal Reserve Bank or Branch serving the geographical area in which the institution is located.

SUPPLEMENTARY INFORMATION: Notice of proposed rulemaking was published in the FEDERAL REGISTER on December 9, 1977 (42 FR 62308), (a) to revise regulations: 31 CFR part 203, Special Depositaries of Public Money, and 31 CFR part 214, Depositaries for Federal Taxes; and (b) to amend: 31 CFR part 317, Regulations Governing Agencies for Issue of U.S. Savings Bonds of Series E and U.S. Savings Notes, and 31 CFR part 321, Payments by Banks and Other Financial Institutions of U.S. Savings Bonds and U.S. Savings Notes (Freedom Shares).

A public hearing was held on January 12, 1978, during which testimony was given by trade associations representing banks and savings and loan associations and by individual financial institutions. In addition, 106 written responses were received during the comment period which ended on January 19, 1978. The Treasury wishes to express its appreciation to all who provided their views.

Many of the comments received are similar in nature and have been grouped into categories by subject matter. The Department's responses to the substantive public comments received appear below. Numerous minor changes have been made in the regulations some of which are editorial in nature while others are in response to public comment and will not be discussed herein.

COMMENTS RECEIVED AND TREASURY RESPONSES

I. 31 CFR PARTS 203 AND 214

INTEREST RATE

(a) *Rate of interest.* Section 203.14 of the proposed rules stated that the rate of interest to be used in connection with the Note Option and the Remittance Option would be a "* * * weighted average rate of repurchase agreements with a one-day maturity in U.S. Government securities, which are transacted in a national money market by a sample of money center banks and non-bank primary dealers in Government securities."

Many respondents took issue with the proposed rate of interest for a wide variety of reasons. The most significant negative factors cited were: (1) the high degree of instability in the spread between the proposed rate and the Federal funds rate, (2) a general uncertainty about the pattern of fluctuations in the proposed rate over time under all money market conditions, and (3) the general unfamiliarity of the banking and thrift industry with the proposed rate.

Upon reconsideration, the Treasury is of the view that a rate of interest which is equivalent to the Federal funds rate, less a fixed spread of 25 basis points (1/4 of 1 percent), would be a more appropriate rate. A rate of interest based upon this formula satisfies the prerequisites the Treasury had established from its own perspective for an earning rate on its investments in obligations of depositaries while at the same time introducing the elements of stability and relative certainty for depositaries.

Accordingly, the proposed § 203.14, now § 203.13, has been amended.

NOTE.—Several of the sections of the proposed 31 CFR part 203 have been renumbered due to the deletion of the Maximum Balances provisions appearing as proposed § 203.4.

(b) *Use of a retroactive rate.* Several financial institutions recommended that the rate of interest applicable to note balances during a given period of time be based upon a market rate which prevailed during a prior specified period. The intent of such recommendation was that the rate to be applied would be known in advance.

The adoption of this suggestion would sever the relationship for depositaries between the cost of Treasury funds held and the earning value of such funds. At times when money market rates move sharply up or down, while at the same time the amount of note balances moves in the opposite direction, depositaries could sustain substantial losses or gains thereby injecting a highly speculative element which the Treasury and, no doubt, most depositaries could consider to be undesirable. The Treasury is, therefore, retaining the concept under which the rate of interest on the notes is based upon market rates during the same period.

COLLATERAL

Many comments were received on specific, and general, issues involving the pledge of collateral for Treasury tax and loan account balances an for note balances. These comments have been categorized as follows:

(a) *Availability of collateral.* Several respondents, particularly large money center banks, expressed concern about their capacity to pledge collateral in amounts sufficient to cover balances in their note accounts during periods when Treasury operating cash is at peak levels. At this time the Treasury is not able to quantify the scarcity of collateral and is, therefore, developing additional data to determine the extent of the problem. At the same time, the Treasury is considering what action it can take to expand categories of eligible collateral. Treasury considerations involve an analysis of what assets financial institutions hold in significant amounts that would meet the basic requirements Treasury feels good collateral should have. If it is decided eligible collateral should be broadened, an amendment to part 203 will be issued.

(b) *Need for collateral.* Two respondents suggested that the requirements for collateral security be eliminated, and another suggested that collateral

requirements be established at less than 100 percent of a depositary's liability to the Treasury.

Pub. L. 95-147 provides that investments by the Treasury in obligations or depositaries maintaining Treasury tax and loan accounts shall be secured by a pledge of collateral acceptable to the Treasury as security for tax and loan accounts. While the statute allows wide discretion to the Secretary as to the particular type of collateral that may be required, the Department is of the opinion that there is substantial doubt whether, under the present law, the Secretary has the authority to eliminate altogether the requirement that collateral security be pledged. Furthermore, even if there were no such doubt, the Department is of the opinion that a number of other considerations make it unwise to eliminate or reduce the collateral requirements for Treasury tax and loan accounts.

(c) *Conventional mortgages as eligible collateral.* The suggestion was made to include conventional residential mortgages among the categories of collateral eligible to secure tax and loan funds.

The Treasury has carefully considered this suggestion and has concluded that conventional residential mortgages do not, at this time, meet the standards of liquidity that are required of eligible collateral. The secondary market for conventional residential mortgages is not sufficiently developed to provide the degree of liquidity required.

(d) *Custodians of collateral.* Comments were received indicating that § 203.16(c) of the proposed regulations is not clear as to what custodian arrangements will be permitted or that custodian arrangements will be uniform among all the Federal Reserve Districts.

The acceptable type of custodian arrangement involves the designation of a custodian by the Federal Reserve Bank of the District in which the depositary pledging the collateral is located, and the issue by that custodian to the Federal Reserve Bank of a receipt indicating that it holds, subject to the order of the Federal Reserve Bank, collateral pledged by the depositary. Federal Reserve Banks will be expected to exercise judgment in the approval of custodians and in establishing limits on the amounts of collateral a given custodian may hold. Additionally, for those categories of collateral requiring detailed analysis of attached documents or resolution of legal questions, Federal Reserve Banks may require that the pledge of such collateral be made directly with the Federal Reserve Bank. Other than for securities involving these judgments, custodian arrangements will be in effect in all Federal Reserve Districts under similar conditions.

(e) *Federal Home Loan Banks as custodians of collateral.* Representatives of the savings and loan industry suggested that regional Federal Home Loan Banks be permitted to act as custodians of the collateral to be pledged by savings and loan associations.

The Treasury favors such an arrangement, and the Federal Reserve Banks may designate Federal Home Loan Banks as custodians subject to, of course, the development of mutually acceptable custodian arrangements.

(f) *Uniformity among Federal Reserve Banks in accepting eligible collateral.* One financial institution asked if all Federal Reserve Banks will accept any of the classes of collateral that are eligible for pledging.

The ability of Federal Reserve Banks to accept the various classes of eligible collateral may be limited by such considerations as vault capacity. Because of such limitations, the use of third-party custodian receipts may be fostered wherever appropriate. Also, the Treasury will expect Federal Reserve Banks to work with depositaries in their Districts to reduce the pledge of those types of collateral requiring large amounts of vault space and substantial servicing costs when depositaries have adequate eligible collateral in their portfolios of types with lesser space and servicing requirements.

(g) *IRS views concerning interest paid deductions under section 265(2) of the Internal Revenue Code for carrying tax exempt municipals pledged to collateralize borrowed funds (i.e., TT&L Note Balance).* A number of respondents indicated that historically, the Internal Revenue Service has attempted to deny interest-paid deductions under section 265(2) of the Internal Revenue Code whenever there appeared to be some relationship between the funds borrowed and the carrying of tax exempt obligations. The respondents requested the Treasury (Fiscal Service) to seek a ruling of the Internal Revenue Service to ensure that the election of the note option is not inhibited by a Section 265(2) tax problem. The Fiscal Service has made such a request of the Internal Revenue Service. The Internal Revenue Service has concluded that section 265(2) of the Internal Revenue Code would not apply to disallow interest deductions in connection with the investment by the Treasury in obligation of Treasury tax and loan depositaries notwithstanding the fact that the note accounts are collateralized by tax exempt securities. The Internal Revenue Service is proposing to amend Rev. Proc. 70-20 in a manner consistent with the foregoing.

(h) *Operations of the TT&L System upon implementation.* If at the beginning of the new program there is still a concern about the over-all adequacy of collateral, the Treasury may use moderation in reducing its balances at Federal Reserve Banks and increasing its investments in obligations of depositaries.

MAXIMUM BALANCES

(a) *Maximum note balances.* Several suggestions were made to the effect that depositaries should be permitted to set a maximum limitation on their note balances so that any additions to the notes in excess of that limitation would be withdrawn immediately by the Federal Reserve Bank upon receipt of advices of credit creating the excess.

The Treasury favors the adoption of this suggestion and the Federal Reserve Banks have been asked to alter their administrative procedurs to provide for the establishment of such maximum balances. The Federal Reserve System has advised that all Reserve Banks will not be able to complete such changes before the effective date of the investment program inasmuch as this capability is a recent change which was introduced during the proposed rulemaking period. As each Reserve Bank completes its changes, it will notify depositaries in its District and give each depositary an opportunity to set a maximim balance. It is expected that all Reserve Banks will have completed the necessary changes within 6 months after the date of publication of the final regulations.

(b) *Imposition of maximum balances by Federal Reserve Banks.* Several respondents questioned the proposed § 203.4, which provides that each Reserve Bank may establish a maximum balance for the tax and loan or note account of any depositary in its District. The questions were based upon lack of specifics as to the circumstances under which such maximum would be established and the concern that the application of the section woud not be uniform among the Federal Reserve Districts.

The wording of § 203.4 as proposed was similar to the wording of § 203.3 of existing regulations which have been in effect since 1967. Prior to 1967, the regulations limited a depositary's maximum balance to a specified percentage of its capital or deposits. Section 203.3 has not been invoked since 1967 and we agree the comparable section of the proposed regulations, § 203.4, should be deleted. Collateral pledged by the depositary limits the funds that a depositary may hold and, as indicated above, depositaries will be permitted to establish self-imposed ceilings on the amount of Treasury funds held. Section 203.4 has, therefore, been eliminated from the final rules.

DIRECT INVESTMENTS

Several comments were made that the regulations should specifically

V 43 — 85 MY 2 78 UMI

state which Note Option depositaries would receive funds directly from the Treasury as described in § 203.10(b)(2).

The number of depositaries which will receive direct investments will necessarily be limited by the capacity of Federal Reserve Banks to communicate daily by telephone with each of such depositaries in order to: (1) inform the depositary of the amounts being directly invested with the depositary, and (2) to call funds from the depositary to replenish Treasury balances at Federal Reserve Banks.

Initially, the direct investments will be made only with those Class "C" depositaries willing to participate. Eventually, however, the Treasury may expand the number of participating depositaries to include 100 or so other Note Option depositaries having the largest capacity to receive direct investments. Capacity is defined as the amount of collateral the depositary is willing and able to pledge, less its note balance as generated by credits to its tax and loan account. The establishment of precise procedures for making direct investments is being deferred until the adequacy of collateral has been more clearly determined.

CALLS AND CALL PROCEDURES

(a) *Make calls on a regular basis and provide advance notice.* Several respondents objected to the proposed § 203.10(c) which states "• • • the amount of the note will be payable on demand without previous notice." Suggestions were made to the effect that the withdrawal of funds be made on a regularized basis and that calls be announced a specified number of days in advance of the date of withdrawal. Treasury expects that the timing and amount of the calls against note balances will evidence a regular pattern, reflecting the intramonthly and monthly seasonal patterns to which the Treasury's cash flows are subject. Thus, larger percentages of note balances will be called earlier in the month than later; and, therefore, note balances will tend to increase in the latter half of most months. It is believed that depositaries will, within a relatively short period, recognize a regular pattern of call actions.

As to whether advance notice of calls can be provided, it is expected that calls against class "A" and class "B" depositaries will normally be made for definite amounts for payment on a definite day in the future. However, the Treasury cannot guarantee that circumstances will not arise which will require calls for immediate payment of note balances from class "A" and class "B" depositaries in order to adequately fund Treasury balances at Federal Reserve Banks. To the extent feasible, advance notice will be given of the periods during which the regular pattern of calls might be varied.

(b) *Announce calls earlier in the day.* Several respondents suggested that the calls on class "C" depositaries should be announced earlier in the day. It is very unlikely that the procedures involved in determining the Treasury's daily cash needs, the time required for consultation with the Federal Reserve's Open Market Committee staff, and the process of communicating the call to class "C" depositaries, can be accelerated enough to allow an earlier announcement of a call action.

(c) *Wednesday calls.* Several respondents suggested that the Wednesday calls on class "C" depositaries be made not later than 10 a.m. The problems involved are the same as those mentioned in (b) above. Treasury recognizes the particular problems faced by member banks on Wednesdays due to reserve settlement requirements and, to the extent feasible, will, in consultation with the Federal Reserve Open Market Committee staff, indicate in advance the probable calls payable on Wednesdays.

(d) *Effecting withdrawals through reserve accounts.* Some respondents questioned the provisions of the rules which require that withdrawals are to be effected through the reserve account of the depositary or the reserve account of a member bank correspondent. Some suggested such alternatives as the wiring of Federal funds upon receipt of a call notice.

For many years, banks which were not members of the Federal Reserve System have been required to arrange for the payment of calls on the payment dates specified in the calls by a charge to the reserve account of a member bank correspondent so as not to put the Treasury in the position of waiting for the funds to be made available for its use. The Treasury must have the capability of withdrawing and using its operating cash when it is needed. Alternatives which require communications from the depositary in order to effect the withdrawal or place the depositary in the position of controlling the time of release of the funds are not acceptable.

(e) *Effecting calls for the withdrawal of funds from savings and loan associations through their accounts with Federal Home Loan Banks.* Several respondents suggested that withdrawal of funds from savings and loan associations be made through their accounts maintained with their respective Federal Home Loan Banks. If the savings and loan associations and the Federal Home Loan Banks can establish a procedure whereby the Treasury would have as immediate access to funds called as would be the case if charges were made to a member bank's account at a Federal Reserve Bank, then the Treasury would be agreeable to such a procedure.

NOTE OPTION

Certain characteristics of the Note Option elicited questions or responses as follows:

(a) *Characterization of the Note Option as a "purchase" of funds from the Treasury (§ 203.2(g) and § 203.10(a) and (b)(2)).* Section 203.2(g) of the proposed rules defined the Note Option to mean the "• • • choice available to depositaries under which a tax and loan depositary credits deposits to its Treasury Tax and loan account, *purchases funds* from the Treasury in the amount of such deposits to be evidenced by open-ended interest-bearing notes." [Emphasis added.] Two trade associations and a number of banking institutions requested that the word "purchases" be replaced by the word "retain" or "retains."

The Treasury is persuaded that the use of the term "purchases" may not have universal application. Accordingly, proposed § 203.2(g) has been modified to describe additions to a depositary's note account as additions to Treasury's investments in obligations of the depositary. A conforming change has been made to proposed § 203.10(a) and § 203.10(b)(2) (now § 203.9(a) and § 203.9(c)(2)).

(b) *Elimination of Tax and Loan Accounts.* One respondent suggested that in lieu of requiring funds to be placed in the tax and loan account for one day, depositaries be required to purchase funds from the Treasury on the day the tax and loan deposits are credited so that the "note" is created on that day. The purpose of the suggestion was to alleviate a potential problem under State law for some State-chartered thrift institutions in being able to function the tax and loan account. Another element of the suggestion was that no interest would be due on the note for the day of the deposit.

The Treasury feels that the adoption of the suggestion would not accurately describe the Treasury/depositary relationship, particularly for Remittance Option depositaries, and that it would not, therefore, be reasonable to adopt the suggestion.

DELIVERY REQUIREMENTS

(a) *Delivery requirements for Remittance Option—Class 2 Depositaries (§ 203.11(b)(2)(i)).* One respondent suggested that the wording of proposed § 203.11(b)(2)(i), which permitted a Remittance Option—Class 2 depositary to "• • • forward its advices of credit to the Federal Reserve Bank of the district via the most expeditious means available" created too strict a standard. The respondent stated that the section implies, for example, that if light aircraft were available, other means such as the U.S. mail would not be acceptable. The Treasury considers the use of the U.S. Postal Service to be an acceptable means of delivery for Remittance Option—Class 2 depositaries. Accordingly, § 203.10(b)(2)(i) of the final rule reads, in part, as follows: "• • • via an available expeditious means, which includes the U.S. Postal Service."

(b) *Delivery requirements for Note Option banks.* The Treasury inadvertently omitted a subsection entitled "Delivery" from § 203.10 of the proposed rules. Such subsection is included as § 203.9(b). The subsequent subsections are relettered accordingly.

(c) *Delivery requirements for Remittance Option—Class 1 depositaries.* Many respondents took issue with the delivery requirements for Class 1 depositaries stated at § 203.11(b)(1)(i) of the proposed rule. The rule requires a Remittance Option—Class 1 depositary to "• • • establish procedures to ensure the delivery of its advices of credit at the Federal Reserve Bank of the District prior to the Federal Reserve Bank's cut-off time for processing such credits the next business day after the date of credit. • • •" Some, citing their own experience with the U.S. Postal Service, stated that timely delivery at the Federal Reserve Bank would not be possible if they were to use the mail service. Many of the respondents suggested as a solution that timeliness be based upon the postmark of the remittance under the theory that if a postmark were timely, no penalty would be assessed.

The Treasury had given a great deal of thought to the delivery requirements of the Remittance Option—Class 1 depositaries before issuing the proposed rules. It was concluded that in order for the system to function properly, and in order to maintain equity within the system, it was necessary to limit the interest-free time to one business day. Otherwise, depositaries electing the Note Option would be required to pay interest as of the first business day after receipt of a deposit while a Remittance Option—Class 1 depositary could benefit from two, three or more interest-free days merely by using the mails. If the use of postmarks were permitted, the Note Option would not be selected in numbers to make the tax and loan system work.

There are certain options that may be available to depositaries to reasonably assure next day delivery of advices of credit to the Federal Reserve Bank of the District. These include the following:

(a) At any depositary location where the Federal Reserve Bank delivers checks by courier, depositaries can, at their discretion, arrange with such couriers to deliver advices of credit on their return trips to the Federal Reserve Bank.

(b) Federal Reserve Banks of the Districts may, at their discretion, permit Regional Check Processing Centers (RCPC's) within the Districts to serve as pick-up or trans-shipping points for the tax and loan system.

(c) All Federal Reserve Banks will permit Federal Reserve Branches not now serving as points of pick-up for tax and loan account advices of credit to do so under the investment program from Remittance Option—Class 1 depositaries.

(d) Any depositary may utilize the services of a correspondent in a Federal Reserve Bank or Branch city to prepare advices of credit and deliver such advices to the reserve bank or branch on its behalf. This would involve supplying the correspondent with blank originals of its advices of credit forms and communicating the amount to be entered by phone or wire.

FEES

Numerous comments were received concerning the fee of 50 cents for each Federal tax deposit form forwarded by the depositary and processed by the Internal Revenue Service Center covering the administration of the Treasury tax and loan account as well as the handling of Federal tax deposits. The comments are summarized as follows:

(a) It is unreasonable to base 1978 fees on a survey using 1972-1973 data which have not been adjusted for inflation.

(b) No indication has been given of the method used to determine the initial fee structure for compensable services.

(c) The final regulations should state the criteria for the establishment of fees and when such fees are to be reviewed to ensure they remain current.

Other comments received indicated that the proposed payments are adequate.

The schedule of fee payments is based on the findings presented in a Report of a Study of Tax and Loan Accounts, dated June 1974. The conclusions of that Report are based upon a survey of approximately 600 commercial banks specifically selected as representative of all depositaries in the Treasury tax and loan system. The fees as determined in that study are being adopted initially because they represent the product of the best and most comprehensive study on the subject available at this time. The methodology, rationale, and findings of the study are presented in detail in that Report. The findings of the study were publicly disclosed in that a copy of the Report was distributed during July 1974 to each of the tax and loan depositaries at the time.

The Treasury recognizes the deficiencies of that Report and is proceeding to restudy the Federal tax deposit per item fee as follows:

(a) Treasury staff will complete the review now underway of procedures involved in processing Federal tax deposits in financial institutions and establishing one or more models for efficient handling. The number of model systems will depend on the need to provide different systems for different categories of institutions. For example, it might be necessary to have significantly different procedures for an institution doing business at one location as compared to an institution with branches or offices spread over a wide geographical area.

The model systems will be reviewed with trade associations of the several classes of financial institutions functioning as depositaries in order to (a) determine if there are any reasons why the proposed systems are not workable, and (b) receive any suggestions for improvement.

(b) Once the model systems have been detailed, the Treasury will commission an independent study to determine the cost involved in operating the systems. The goal of the study will be to determine the unit cost for processing Federal tax deposits and to establish fees based upon costs and reasonable profit. If clear, simple guidelines for applying different fees for different institutions can be established, a multiple fee schedule may be created. If not, a unitary fee will be established based upon average costs.

(c) The fee schedule established as a result of the study will be reviewed from time to time for appropriate adjustment, taking into consideration changes in the depositaries' costs and any changes in regulations effecting the procedures followed by depositaries in processing Federal tax deposits.

COMPENSATION FOR OTHER SERVICES PROVIDED BY FINANCIAL INSTITUTIONS

Several comments were made that the schedule of fees does not cover other types of services that financial institutions provide for the Government. Specific services mentioned include the reporting of interest and dividends to the Internal Revenue Service on Form 1099, the cashing of Government checks, and the custody and sale of food stamps. The Treasury's analyses and conclusions regarding each of these services, and others not mentioned in the comments received, but performed by commercial banks are discussed in detail in the "Report on a Study of Treasury Tax and Loan Accounts" dated June 1974.

POSITIONS OF BANKING REGULATORS

(a) *Comptroller of the Currency.* Several of the respondents inquired as to whether the note balances retained by national banks under the Note Option will be included in computing the limitation on bank indebtedness under 12 U.S.C. 82. The Comptroller of the Currency has indicated that the notes will not be subject to the aggregate indebtedness limitation of 12 U.S.C. 82.

V 43 | 85 MY 2 78 UMI

(b) *Federal Reserve Board.* Numerous respondents questioned whether the note balances will be subject to reserve requirements. As indicated in the preamble to the proposed rules, at the present time, regulations of the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation define "deposits" as including promissory notes and other obligations of banks not specifically exempted. The Treasury has been advised that the Board of Governors of the Federal Reserve System has taken formal action to exempt notes issued by banks to the Treasury from the definition of deposits. There appears today, or will appear in the next few days, in the FEDERAL REGISTER notice of the Federal Reserve Board's final rulemaking effecting this change. The action of the Board of Governors of the Federal Reserve System exempts notes issued by member banks to the Treasury from the provisions of Regulations D and Q.

(c) *Federal Deposit Insurance Corporation.* The Board of Directors of the Federal Deposit Insurance Corporation has amended FDIC's interest rate regulations (12 CFR Part 329) so as to exempt from rate restrictions generally, an insured nonmember bank's liability on its promissory notes that evidence a short-term purchase of funds from the U.S. Treasury. The FDIC's amendments to its interest rate regulations were published on page 9789 of the FEDERAL REGISTER of March 10, 1978 (43 FR 9789).

REQUIREMENTS FOR DESIGNATION

Several of the respondents commenting on behalf of thrift institutions took issue with the wording of the proposed § 203.3(b)(1)(ii) which required a financial institution to have under its charter and regulations issued by its chartering authority either general or specific authority permitting the maintenance of the tax and loan account as a demand account in order to be eligible for designation.

The Department's paramount concern is its ability to draw on its operating cash accounts as needed to meet disbursing needs. The Treasury considers it essential for funds on deposit in tax and loan accounts or invested in note accounts to be subject to withdrawals which are payable immediately (i.e., on demand) without previous notice. Thus Treasury's basic concern is to be assured that all financial institutions, including the thrift institutions, possess the *authority* to function these accounts under the condition stated above.

Another respondent indicated that the use of the word "demand account" is imprecise in that several quite different legal meanings have been attached to that term. In view of the comments received, § 203.3(b)(1)(ii) is amended to require only "general or specific authority permitting the maintenance of the tax and loan account as an account the balance in which is payable on demand without previous notice of intended withdrawal."

Several of the respondents indicated that currently certain State-chartered thrift institutions may not be authorized under State law to maintain tax and loan accounts. Some of the same respondents further stated that in their opinion the Federal law (Pub. L. 95-147) superseded State law and carried with it the extension of any authority necessary for both Federally and State-chartered institutions to be tax and loan depositaries. Neither Pub. L. 95-147 nor its legislative history specifically address the matter of Federal preemption. The question is one which the courts will ultimately have to resolve. Treasury takes no final position on the issue at this time, however, the final rule is premised on no Federal preemption.

INSURANCE PROVISIONS

One respondent representing the credit union industry requested that the regulations expressively describe the standards of review for account insurance to be undertaken by the Secretary of the Treasury. Accordingly, the Secretary's regulations concerning the adequacy of insurance arrangements are issued at 31 CFR Part 226.

Such regulations are published here as interim rules in order to avoid delay in implementing the revised Treasury tax and loan program.

The Department is of the view that, because the interim regulations set standards for programs of insurance which cover depositaries' tax and loan accounts, and thereby affect the amounts of collateral which such depositaries are required to pledge to secure public funds in such accounts, they involve a matter relating to "public property" within the meaning of 5 U.S.C. 553(a)(2). In addition, it is believed that the interim regulations involve a matter relating to "contracts," as that term is used in 5 U.S.C. 553(a)(2). Each Treasury Tax and Loan Depositary enters into a depositary contract as stated at § 203.6 and § 214.4.

Consequently, it has been determined that the regulations are not subject to the rulemaking requirements, including notice of proposed rulemaking, which are contained in 5 U.S.C. 553. Nevertheless, in accordance with 5 U.S.C. 553, interested persons may submit written comments, suggestions, data or arguments to Mr. John Kilcoyne, Assistant Fiscal Assistant Secretary (Banking), Office of the Fiscal Assistant Secretary, Department of the Treasury, Washington, D.C. 20220, 202-566-2849. Material thus submitted will be evaluated and acted upon in the same manner as if these interim regulations were a proposal. However, the interim regulations shall become effective as specified in the "EFFECTIVE DATE" section of this preamble and shall remain in effect until such time as changes are made.

THE ABSORPTION OF FLOAT BY DEPOSITARIES

Several of the respondents commented upon § 214.6(a)(1) by which depositaries are required to accept from a taxpayer "• • • a check or draft drawn on and to the order of the depositary • • •." That section further states that "• • • A depositary may at its discretion accept a check drawn on another financial institution, but it does so purely on a voluntary basis and absorbs for its own account any float involved." The substance of such comments was to request the Treasury to make allowances for uncollected funds in the accounts after the first business day after deposit.

As a matter of policy, the Treasury does not recognize uncollected funds in the tax and loan system. That policy and the provisions of 31 CFR Part 214 implementing that policy are not new to the regulations in question, but have been in effect for more than 25 years. The Treasury has concluded that the policy of not making allowances for uncollected funds in the tax and loan account system should remain in effect.

EXTEND THE INTEREST-FREE PERIOD TO MORE THAN ONE BUSINESS DAY

Several respondents suggested for a variety of reasons that interest and late fees not be imposed until the second or third business day after deposit. The Treasury has concluded that any extension of the interest-free period beyond the one business day already provided would not be in the best interest of the Federal government or the tax and loan system.

TIMING OF CHANGES IN OPTIONS

The wording of § 203.13 of the proposed rules and paragraph No. 4 of the Synopsis of the Manual of Instructions and Procedures for Treasury Tax and Loan Depositaries is not explicit as to when a requested change in options will become effective. Accordingly, the wording of that section of the Procedural Instructions concerned with changes in options has been revised to include the following:

> A depositary may change from one option to another after due notice to the Federal Reserve Bank of the District. A change in option will become effective as of the first day of the next reporting cycle following receipt of such notice provided that notice is received by the Federal Reserve Bank of the District not later than the 20th of any month.

A number of respondents expressed the desire for changes in options to be permitted on a daily or a weekly basis. For reasons of an operational and an administrative nature, all changes in options will be effected only as of the first day of a reporting cycle.

TERMINATION OF CONTRACT NOTICE

Proposed § 203.17(b) and § 214.5(b) stated that a depositary may terminate its contract by submitting a notice, in writing, to the Federal Reserve Bank of the District 30 days before the date of the intended termination. Proposed § 203.17(a) and § 214.5(a) stated that the Secretary of the Treasury may terminate the contract of a Treasury tax and loan depositary at any time upon notice to that effect to that depositary. Upon reconsideration, the Treasury is of the view that the 30-day advance notice stated in § 203.17(b) and § 214.5(b) should be deleted. Accordingly, § 203.16(b) and § 214.5(b) do not require a 30-day advance notice by the depositary.

MANUAL OF INSTRUCTIONS AND PROCEDURES FOR TREASURY TAX AND LOAN DEPOSITARIES

Several respondents expressed the desire to review the Manual before it is published in final form.

In view of the relatively short time period remaining before the effective date of the investment program, the Treasury is issuing at this time through the Federal Reserve Banks a final version of the "Procedural Instructions for Treasury Tax and Loan Depositaries" (previously referred to as "Manual of Instructions and Procedures for Treasury Tax and Loan Depositaries"), with the understanding that the depositaries are free to comment on the provisions of that Procedural Instruction at any time.

SUGGESTION TO ESTABLISH AN ARRANGEMENT WHEREBY THE TAX DEPOSITS OF A REMITTANCE OPTION DEPOSITARY ARE ADDED DIRECTLY TO THE NOTE ACCOUNT OF A CORRESPONDENT DEPOSITARY

One respondent suggested that in view of the potentially large number of depositaries that would be electing the Remittance Option, the Treasury should give consideration to a tri-party arrangement involving (a) the Federal Reserve Bank, (b) a Note Option depositary bank serving as a correspondent for the Remittance Option depositary, and (c) the remittance Option depositary. Under the suggested arrangement, the Note Option depositary bank serving as correspondent for the Remittance Option depositary would, in effect, add to its note amounts which otherwise would be withdrawn from the Remittance Option correspondents. In other words, the Federal Reserve Bank, instead of withdrawing funds representing tax deposits received by a Remittance Option depositary would add those amounts to the note of the correspondent bank.

The treasury believes the suggestion has merit and may be beneficial in several respects. In particular, it offers an alternative to depositaries wishing to participate as Remittance Option—Class 1 depositaries and precluded from doing so because of the prescribed delivery requirements. The Treasury is actively studying the suggestion. Adoption of the suggestion would also give the Treasury better control of increases in the Federal Reserve Bank balance which is one of the objectives of the new system.

If it is decided to adopt the suggestion, the decision will be reflected in the FEDERAL REGISTER. Sufficient lead time will be required to permit programming changes by the Federal Reserve Banks.

SEASONAL BORROWING BY MEMBER BANKS OF THE FEDERAL RESERVE SYSTEM

One respondent representing the banking industry suggested that Federal Reserve Regulation 'A' should indicate that country banks borrowing seasonally at the discount window may simultaneously "sell" Note Option funds in the Federal funds market. This issue has been referred to the Federal Reserve Board and is under consideration by that Agency.

REGULATIONS COVERING FEES FOR ISSUING AND REDEEMING SAVINGS BONDS

II. 31 CFR PARTS 317 AND 321

DISCUSSION OF MAJOR COMMENTS

GENERAL STATEMENT

Financial institutions and others act as agents for the issue and payment of savings bonds under the provisions of application-agreements they execute and certificates of qualification issued by the Federal Reserve Banks, acting as fiscal agents of the United States, and subject to the applicable regulations governing such agents. The compensation to be paid to agents applies solely to the specific issuing and paying functions they perform under the terms of their agreements and the regulations. The regulations that govern issuing agents are set out in Department of the Treasury Circular, Public Debt Series No. 4-67 (31 CFR Part 317). The regulations that govern paying agents are set out in Department of the Treasury Circular No. 750 (31 CFR Part 321). The fee schedules will be incorporated into each of these circulars.

SAVINGS BOND REMITTANCE PROCEDURES

31 CFR, Part 203 contemplates that the interest and penalty provisions of the investment program will apply both to tax and loan deposits representing tax receipts and tax and loan deposits representing savings bond sales proceeds. However, as an interim measure, to facilitate implementation of the investment program, remittances of savings bond sales proceeds by credit to tax and loan accounts will initially be functioned as follows:

Note Option depositaries. The amount of credits covering savings bond sales proceeds will be added to notes as of the dates of processing of the credit advices by the Federal Reserve Banks.

Remittance Option—Class 1 depositaries. Penalty provisions will not be applied to savings bond sales proceeds remittances.

Remittance Option—Class 2 depositaries. For purposes of computing the analysis credit, the amount of credits covering savings bond sales proceeds will be added to the balances in the depositaries' tax and loan accounts as of the dates of processing by the Federal Reserve Banks.

About three months after implementation of the investment program, the Treasury will prescribe definitive procedures under which credit advices for savings bond sales proceeds will be handled on the same basis as credit advices for tax deposits. Before the definitive procedures are put into effect, a notice of their effective date will be published in the FEDERAL REGISTER and depositaries will be notified through the Federal Reserve Bank of the District.

ADEQUACY OF FEE SCHEDULE

A number of the organizations commented that the proposed fees for issuing and redeeming savings bonds were generally too low. Others specifically referred to the redemption fee and the over-the-counter issue fee as being too low. Reasons usually given for questioning the fee schedule were that (1) it was based on outdated data and did not consider the impact of inflation on salary and other processing costs, and (2) the compensable activities were to narrowly defined and did not consider costs of counseling time, postage, record-keeping, accounting and liability for stock.

The fees for over-the-counter issues and for redemptions were based essentially on a research study conducted in 1974. The fees for payroll issues were based essentially on the alternative costs of such issues by Federal agencies and Federal Reserve Banks.

The issue fees relate strictly to costs associated with obtaining and controlling bond stock and inscribing and delivering bonds to purchasers, exclusive of postage which is paid by the Treasury.

Counseling services relating to savings bonds, like counseling on other financial matters, have traditionally been provided to customers by financial institutions without compensation. These services are viewed essentially as customer services. Their value to the Savings Bond Program is clear-

V 4 3 1 8 5

ly recognized and appreciated. However, services outside the issuing and paying agency regulations are not compensable; in addition, there is no practical way of measuring the services provided by individual institutions as the basis for establishing a standard fee.

In response to the comments mentioned above, a review of the fee schedule will be undertaken. It is necessary, however, to initiate the fee program on the basis of the proposed schedule to avoid further substantial delays in implementation. Funds for the payment of fees must be obtained through the appropriation process, and a funding request based on the original schedule has been submitted to and is under consideration by the Congress.

COMPENSATION FOR REISSUE TRANSACTIONS

Several respondents commented that agents should be compensated for handling reissue cases, which must be forwarded to the Federal Reserve Bank for processing.

Servicing applications for reissue is not one of the functions covered by the issuing and paying agent agreements referred to above. Historically, the Treasury has viewed such services as being within the scope of customer services provided by the institution. This is the principal reason no provision has been made to pay a fee for such services. A further reason is the difficulty in administering such a fee, inasmuch as Treasury would have no means of determining how much assistance, if any, had been provided by a financial institution on a reissue case.

COMPENSATION FOR EXCHANGE TRANSACTIONS

It was also suggested that agents should be compensated for handling exchanges of Series E for Series H bonds. In these transactins, all of the Series H bonds are issued by Federal Reserve Banks or the Treasury. However, the regulations governing such exchanges provide that paying agents may elect to redeem the Series E bonds and send the exchange application (Form PD 3253) to a Federal Reserve Bank for issue of the Series H bonds. If the transaction is handled in this manner, the agent receives a fee for each Series E bond that is redeemed. If the agent does not redeem the bonds, the entire transaction is forwarded to a Federal Reserve Bank and no fee is paid.

It is recognized that in a limited number of cases agents are not authorized to redeem Series E bonds submitted for exchange because of evidentiary requirements. A review will be made to determine whether it is feasible to amend the regulations to provide procedures under which agents might qualify for fees in handling these cases.

MISCELLANEOUS PROVISIONS FOR FEE CHARGES

Other proposals concerning fees included establishing regional fee schedules; basing fees on the percentage of dollar amounts handled in addition to per item fees; reexamining the fee difference between manual and computerized handling of payroll issues to provide more incentive to automate; and, compensating agents for the verification of the issuance of bonds later reported missing.

Regional fee schedules would create difficult administrative problems.

There appears to be no justification for basing a fee on dollar amounts, as well as item charges. Paying agents incur no risk of liability for erroneous payments if they follow the Treasury's identification guidelines (Form PD 3900).

The spread between the fees for bonds inscribed by computers and by other means recognized a cost differential between the two processing methods. This appeared to be equitable, although it might conceivable operate as a disincentive to the further automation of payroll issues. Decisions to automate are typically made on the basis of equipment availability, operational priorities and considerations of space, personnel and productivity. It is estimated that about half of the payroll issues by financial institutions are computer-inscribed. The number of issues that would be automated if the 10 cent fee per bond was raised is a matter of conjecture, as many of the payroll accounts are too small to justify automation, or the agent may not have access to a computer. In the subsequent review of the fee schedule, however, this matter will be further considered.

The verification by issuing agents of their issuance of bonds reported lost or stolen is limited to bonds not received by owners. Claims cases involving loss or theft after receipt are not referred to the issuing agents for verification. The number of non-receipt cases is about 10,000 a year. About half of all bonds are issued by financial institutions, so the number of referrals to an individual agent should be minimal. No fee for this service appears to be warranted, but the Treasury will review its procedures to determine whether the cases requiring referral to agents can be further reduced.

REVIEW OF FEE SCHEDULE

As mentioned, various respondents expressed the opinion that the Treasury study made in 1974, on which the fee schedule is largely based, has been outdated by inflation and that the study should be updated or a new study conducted.

Various proposals were made concerning the method to be used in conducting such a study. It was suggested that a new study consider the fully allocated costs of each functional and procedural element of issuing, redeeming and otherwise handling bonds; that the regulations provide for a periodic review of the fee schedule and the scope of compensable services; and that the regulations express the standards for establishing fees and the criteria for evaluating readjustments.

The Treasury recognizes the desirability of reexamining the adequacy of the fee schedule and will initiate such a review promptly. The review will include a reexamination of some of the proposals discussed elsewhere in this response. Provisions for the regular review of the schedule should be a part of any plan that is developed. It should be recognized, however, that any review will deal primarily with over-the-counter issues and redemptions. Fees for payroll issues will be governed largely by the alternative costs of such issues by Federal agencies and Federal Reserve Banks.

There is no assurance that savings bond fees can (or should) be based purely on costs. It may be necessary or advisable to establish fees for issuing and redeeming bonds that financial institutions would be free to accept or reject. In their comments on the schedule, agents reported costs as high as $2.66 for issuing bonds and $1.50 for redeeming bonds. The issue of a bond purchased for $18.75 does not justify fees of these amounts. Moreover, the question of recompense must be considered in the context of the effect on the Savings Bond Program as a whole.

The Treasury cannot implement changes in the fee schedule without first seeking Congressional approval through the regular appropriation process.

Any changes, including an explanation of their basis, will be published as revisions of the regulations.

CREDITS AND CHARGES TO TAX AND LOAN ACCOUNTS

Two respondents questioned the statement in the regulations that funds would be deposited into the tax and loan accounts in accordance with the instructions of the Federal Reserve Bank of the District. Both felt that instructions should be uniform throughout the country. Another respondent felt that if funds collected from the issuance of savings bonds are to be placed in interest-bearing tax and loan accounts, funds used to redeem bonds should be disbursed from those accounts.

The rules for depositing savings bond sale proceeds in tax and loan accounts are uniform. Instructions to issuing and paying agents are customarily issued by the qualifying Federal Reserve Banks, and the practice includes such activities as crediting sales proceeds. Except for minor local variations, the instructions issued by each Reserve Bank are standard.

The disbursement of tax and loan funds by depositaries in payment of savings bonds and notes would not be feasible because of the control and accounting problems such a procedure would create.

CHARGES TO CUSTOMERS

Questions were also raised about the collection of fees from customers.

No fee may be imposed by agents on bondowners for the redemption of bonds or on purchasers for the issue of bonds over-the-counter or through bond-a-month plans.

In the case of payroll issues by financial institutions for customers which operate payroll savings plans, the Department recognizes that the parties have often entered into compensatory arrangements, particularly when the bond issuance function is an interrelated part of a package of varied financial services, or when the issuing agent must perform preparatory work prior to inscribing the bonds.

The regulations prohibit the acceptance of dual compensation for obtaining and controlling bond stock and inscribing and delivering bonds. However, the regulations do not prohibit financial institutions from electing to continue compensatory arrangements with customers, in lieu of accepting a fee from the Treasury for bond issuance functions; nor do they prohibit such institutions from obtaining supplemental compensation for services not immediately concerned with inscribing and delivering bonds, such as converting data from hard copy to magnetic tape for bond inscription purposes.

PAYMENT OF FEES

One respondent indicated that the regulations did not address the way in which fees will be paid and stated that the reserve account should be used for fee payment, as well as penalty charges.

Given the diversity of issuing and paying agents, fees will be paid by checks issued quarterly by the Division of Disbursement, Bureau of Government Financial Operations, on the basis of data prepared by the Bureau of the Public Debt. Each agent eligible for a fee has been furnished with a pamphlet that explains, among other things, the calculation and payment of fees.

* * * * * *

In consideration of all of the foregoing, 31 CFR Chapter II is amended as follows:

PART 203—TREASURY TAX AND LOAN DEPOSITARIES

1. 31 CFR Part 203 (Department Circular No. 92) is revised to read as follows:

Subpart A—General Information

Sec.
203.1 Scope of regulations.
203.2 Definitions.
203.3 Designation of financial institutions as Treasury tax and loan depositaries.
203.4 Sources of deposit.
203.5 Directives regarding credits (deposits) to Treasury tax and loan accounts.
203.6 Parties to the Contract.
203.7 Obligations of the depositary.

Subpart B—Options

203.8 General requirement.
203.9 Note Option.
203.10 Remittance Option.
203.11 Election of option by previously authorized depositaries.
203.12 Change of options.

Subpart C—Interest and Compensation

203.13 Rate of interest.
203.14 Compensation for services rendered.

Subpart D—Collateral Security

203.15 Collateral security requirements.

Subpart E—Miscellaneous Provisions

203.16 Termination of contract.
203.17 Implementing instructions.
203.18 Effective date.

AUTHORITY: Sec. 8, Act of Sept. 24, 1917, Chapter 56, 40 Stat. 291, as amended (31 U.S.C. 771); Sec. 6302(c), Internal Revenue Code of 1954; and Secs. 1, 2, and 3, Pub. L. 95-147, 91 Stat. 1227 (31 U.S.C. 1038); unless otherwise noted.

Subpart A—General Information

§ 203.1 Scope of regulations.

The regulations in this part govern the designation of Treasury tax and loan depositaries and their contract with the Treasury Department to maintain and administer separate accounts to be known as Treasury tax and loan accounts in which funds representing payments for certain United States obligations and payments of Federal taxes are credited.

§ 203.2 Definitions.

As used in this part:

(a) "Advices of credit" means those Treasury forms, which are supplied to tax and loan depositaries to be used in supporting credits to Treasury tax and loan accounts.

(b) "Business day" means any day on which the Federal Reserve Bank of the district is open to the public.

(c) "Election of Option form" means a document, preprinted and supplied by the Federal Reserve Bank of each district, on which a tax and loan depositary indicates the option under which it will administer its Treasury tax and loan account after the effective date of this Part.

(d) "Federal funds rate" means the weekly Federal funds rate as published in the Federal Reserve Bulletin in Table A-27 entitled "Interest Rates, Money and Capital Markets".

(e) "Federal Reserve Bank of the district" means the Federal Reserve Bank which services the geographical area in which the tax and loan depositary is located. Tax and loan depositaries located in Puerto Rico, the Virgin Islands, and the Panama Canal Zone are included in the Second Federal Reserve District.

(f) "Federal tax deposit form" means a preinscribed form supplied to a taxpayer by the Treasury Department to accompany deposits of Federal taxes.

(g) "Federal taxes" means those Federal taxes specified by the Secretary of the Treasury or the Secretary's delegate as eligible for payment through the procedure prescribed in this part and Part 214.

(h) "Note Option" means that choice available to a tax and loan depositary under which funds debited to its Treasury tax and loan account are added by the Treasury to its investments in obligations of the depositary. The amount of such investments will be evidenced by an open-ended interest-bearing note maintained at the Federal Reserve Bank of the district.

(i) "Recognized Insurance Coverage" means the insurance provided by the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Share Insurance Fund, and the insurance provided by insurance organizations specifically qualified by the Secretary of the Treasury pursuant to 31 CFR Part 226.

(j) "Remittance Option" means that choice available to a tax and loan depositary under which funds equivalent to the amount of deposits credited by the depositary to its Treasury tax and loan account will be withdrawn by the Federal Reserve Bank immediately upon receipt by the Federal Reserve Bank of the advices of credit supporting such deposits.

(k) "Reporting cycle" means the time period established for reporting and computation purposes. A reporting cycle begins on the first Thursday of each month and ends on the Wednesday preceding the first Thursday of the following month.

(l) "Reserve account" means that account every member of the Federal Reserve System maintains at the Federal Reserve Bank of its district for reserve purposes pursuant to 12 CFR Part 204.

(m) "Special depositary" means a depositary that had been designated under the provisions of 31 CFR Part 203 prior to the effective date of this revision. A depositary thereafter desig-

M Y 2 7 8 UMI

V 4 3 — 8 5
M Y 2
7 8
UMI

nated under this Part shall be known as a Treasury tax and loan depositary.

§ 203.3 Designation of financial institutions as Treasury tax loan depositaries.

(a) *Previously authorized depositaries.* Every special depositary which, at the close of business on July 5, 1978, was authorized to maintain a Treasury tax and loan account is hereby redesignated as a Treasury tax and loan depositary. The agreements under which they were heretofore authorized as Special Depositaries of Public Money are continued in effect without further action, but subject to the provisions of the current Part 203.

(b) *New designations*—(1) *Requirements.*—(i) *Eligible institutions.* The following classes of financial institutions are eligible to be designated as Treasury tax and loan depositaries:

(A) Every incorporated bank and trust company in the United States, Puerto Rico, the Virgin Islands, the Panama Canal Zone, and every United States branch of a foreign banking corporation authorized by the State in which it is located to transact commercial banking business.

(B) Every institution insured by the Federal Savings and Loan Insurance Corporation.

(C) Every credit union insured by the Administrator of the National Credit Union Administration.

(D) Savings and loan, building and loan, homestead associations, and credit unions, created under the laws of any State, the deposits or accounts of which are insured by a State or agency thereof, or by a corporation chartered by a State for the sole purpose of insuring deposits or accounts of such financial institutions.

(ii) *Other requirements.* In order to meet Treasury requirements for designation, each financial institution is required to possess under its charter and regulations issued by its chartering authority either general or specific authority permitting the maintenance of the tax and loan account as an account, the balance in which is payable on demand without previous notice of intended withdrawal. Each financial institution is required to also possess the authority to pledge collateral to secure Treasury tax and loan funds.

(2) *Application procedures.* Any eligible financial institution seeking designation as a Treasury tax and loan depositary and, thereby, the authority to maintain a Treasury tax and loan account shall file with the Federal Reserve Bank of the district an "Offer to Contract and Application" accompanied by a resolution of its board directors authorizing the "Offer to Contract and Application" (both on forms prescribed and available on request from the Federal Reserve Bank).

(3) *Designation.* Each financial institution satisfying the eligibility requirements and the application procedures will receive from the Federal Reserve Bank of the district notification of its specific designation as a Treasury tax and loan depositary. A financial institution is not authorized to maintain a Treasury tax and loan account until it has been designated as a Treasury tax and loan depositary by the Federal Reserve Bank of the district.

§ 203.4 Sources of deposit.

A tax and loan depositary shall credit to its Treasury tax and loan account payments of such Federal taxes as the Secretary of the Treasury may from time to time by regulation authorize to be paid through Treasury tax and loan accounts, and may credit to its Treasury tax and loan account funds representing:

(a) Payments for United States Savings Bonds issued by the tax and loan depositary, in its issuing agent capacity;

(b) Payments for United States Savings Bonds subscribed for through the tax and loan depositary on behalf of its customers, but which may be issued only by Federal Reserve Banks and the United States Treasury Department.

§ 203.5 Directives regarding credits (deposits) to Treasury tax and loan accounts.

(a) Payments for United States Savings Bonds shall be credited in accordance with instructions prescribed by the Federal Reserve Bank of the district.

(b) Federal tax payments shall be credited in accordance with Part 214 of this Chapter and any instructions issued pursuant to that Part.

§ 203.6 Parties to the contract.

A financial institution which is designated as a Treasury tax and loan depositary enters into a depositary contract with the Department of the Treasury. The parties to this contract are the Treasury, acting through the Federal Reserve Banks as Fiscal Agents of the United States, and each financial institution designated under § 203.3. The terms of the contract include all of the provisions of this part.

§ 203.7 Obligations of the depositary.

A Treasury tax and loan depositary shall:

(a) Administer a Treasury tax and loan account in accordance with this Part and any amendments or supplements thereto, and instructions issued pursuant thereto, including the Procedural Instructions for Treasury Tax and Loan Depositaries;

(b) Comply with the requirements of section 202 of Executive Order 11246, entitled "Equal Employment Opportunity" (30 FR 12319) as amended by Executive Order 11375, entitled "Equal Employment Opportunity Clause," which is incorporated herein by reference, and the regulations issued thereunder at 41 CFR Chapter 60, as amended. The Secretary of the Treasury may terminate the contract with a tax and loan depositary for failure to comply with the terms of the contract set forth in this subsection, relating to equal employment opportunity, after following the procedures specified by the U.S. Department of Labor at 41 CFR Part 60-30, as amended.

(c) Comply with the requirements of section 503 of the Rehabilitation Act of 1973, 29 U.S.C. 793, and the regulations issued thereunder at 20 CFR Part 741, which are incorporated herein by reference, requiring Government contractors to take affirmative action to employ qualified handicapped individuals, and

(d) Comply with requirements of section 503 of the Veterans Employment and Readjustment Act of 1972, 38 U.S.C. 2012, Executive Order 11701, and the regulations issued thereunder at 41 CFR Subpart 1-12.11, which are incorporated herein by reference, for the promotion of employment of disabled and Vietnam era veterans.

Subpart B—Options

§ 203.8 General requirement.

A Treasury tax and loan depositary shall administer its Treasury tax and loan account under either the Note Option or the Remittance Option.

§ 203.9 Note Option.

(a) *Additions.* The Treasury will invest funds in obligations of depositaries selecting the Note Option. Such obligations shall be in the form of open-ended notes and additions and reductions will be reflected on the books of the Federal Reserve Bank of the district. A depositary electing the Note Option shall, as of the first business day after crediting deposits to its tax and loan account, debit its tax and loan account in the amount of such deposits and simultaneously credit the note thereby reflecting an increase in like amount in Treasury's investment in obligations of the depositary.

(b) *Delivery.* A depositary administering its tax and loan account under the Note Option shall forward at the close of business each day its advices of credit for that day to the Federal Reserve Bank of the district via the most expeditious means reasonably available including the U.S. Postal Service in instances where more positive delivery systems, in terms of date of delivery, are not being utilized by the depositary for other documents (e.g., checks) being remitted to the Federal Reserve Bank or Branch city.

(c) *Other Additions.* (1) A tax and loan depositary may be given the option of adding directly to its note the amounts of payments made by, or through, it for allotments on tenders and subscriptions for United States securities issued under the Second Liberty Bond Act, 40 Stat. 288, as amended when such method of payment is provided for under the terms of the Treasury's offering circulars. The amounts of payments shall be added to the amount of the note on the dates of settlement.

(2) In addition, other funds from the Treasury's operating cash may be offered from time to time to certain Note Option depositaries. Each such Note Option depositary shall have the opportunity to decide whether it wishes to receive from the Treasury such additional investments in its notes.

(d) *Withdrawals.* The amount of the note shall be payable on demand without previous notice. Calls for payments on the note will be by direction of the Secretary of the Treasury through the Federal Reserve Banks. A depositary shall arrange for the payment of calls on the payment dates specified in the calls by a charge to the reserve account of a depositary or the reserve account of a member bank correspondent.

(e) *Interest.* A note shall bear interest at the rate specified in § 203.13. Such interest is payable monthly by a charge to the reserve account of the depositary or through the reserve account of a member bank correspondent. Specific details about the computation of the amount of interest due, the means of payment, payment dates, Federal Reserve Bank responsibilities, and other related details are described in the Procedural Instructions for Treasury Tax and Loan Depositaries.

(f) *Maximum Balance.* As of the date specified by each Federal Reserve Bank, each depositary selecting the Note Option may establish a maximum balance for its note account by providing notice to that effect in writing to the Federal Reserve Bank of the district. That portion of any advice of credit when posted at the Federal Reserve Bank which would cause the note balance to exceed the amount specified by the depositary will be automatically withdrawn by the Federal Reserve Bank.

§ 203.10 Remittance Option.

(a) *Withdrawals.* For a depositary selecting the Remittance Option, funds equivalent to the amount of deposits credited by a depositary to its Treasury tax and loan account will be withdrawn by the Federal Reserve Bank upon receipt by the Federal Reserve Bank of the advices of credit supporting such deposits. A depositary shall arrange for the payment of withdrawals by an immediate charge to its reserve account or the reserve account of a member bank correspondent.

(b) *Remittance Option Classes.* Depositaries electing this option will be subdivided into Remittance Option Class 1 or Class 2 depending upon the volume of deposits credited to their tax and loan accounts during the previous calendar year, as specified in the Procedural Instructions for Treasury Tax and Loan Depositaries. Each depositary shall be subject to the provisions applicable to the class into which it is placed.

(1) *Remittance Option—Class 1 requirements.*—(i) *Delivery.* A Remittance Option—Class 1 depositary shall establish and maintain procedures to ensure timely delivery of its advices of credit at the Federal Reserve Bank of the district prior to the Federal Reserve Bank's cutoff time for processing such credits the next business day after the date of credit. If a depositary, whose volume of credits is higher than the amount specified in the Procedural Instructions for Treasury Tax and Loan Depositaries, does not arrange to forward its advices of credit so that they regularly arrive at the Federal Reserve Bank prior to the designated cutoff hour, it should elect the Note Option.

(ii) *Late fee.* If an advice of credit does not arrive at the Federal Reserve Bank before the designated cutoff hour for receipt of such advices, a late fee in the form of interest at the rate specified at § 203.13 will be assessed for each day's delay in receipt of such advice. Such late fee assessments will be effected on a monthly basis through a depositary's reserve account or the reserve account of a member bank correspondent. Specific details and procedures are included in the Procedural Instructions for Treasury Tax and Loan Depositaries.

(2) *Remittance Option—Class 2 requirements.*—(i) *Delivery.* A depositary administering its tax and loan account under the Remittance Option—Class 2 shall forward its advices of credit to the Federal Reserve Bank of the district via an available expeditious means, which includes the U.S. Postal Service.

(ii) *Analysis credit.* All tax and loan balances which are in excess of a current day's credits will be subject to an analysis credit, as explained in § 203.14 and the Procedural Instructions for Treasury Tax and Loan Depositaries.

(iii) *Excessive flow.* A depositary may continue as a Class 2 depositary if the rate of flow of deposits it accepts does not exceed the limitation prescribed therefor in the Procedural Instructions for Treasury Tax and Loan Depositaries. If a depositary's flow exceeds that limitation, it shall administer its tax and loan account as a Remittance Option—Class 1, or a Note Option depositary. Specific details and procedures concerning the excessive flow of deposits are described in the Procedural Instructions for Treasury Tax and Loan Depositaries.

§ 203.11 Election of option by previously authorized depositaries.

(a) *General.* A depositary which, as of the close of business on July 5, 1978, was authorized to maintain a tax and loan account and which wishes to administer a tax and loan account under the Note Option or the Remittance Option shall file with the Federal Reserve Bank of the district an Election of Option form signed by an official authorized to act on behalf of the depositary. The depositary will receive from the Federal Reserve Bank notice as to the effective date of that election. Until July 6, 1978, each authorized depositary shall continue to administer its tax and loan account under its authorization prior to that date.

(b) *Depositaries not filing an Election of Option form, yet accepting tax deposits.* A depositary authorized prior to July 6, 1978, to administer a Treasury tax and loan account, but which has not filed an Election of Option form by that date, or having filed that form, has not received from the Federal Reserve Bank prior to that date notice as to the effective date of that election shall on and after July 6, 1978, if it continues to credit deposits to the Treasury tax and loan account by entering such credits, be presumed to have assented to all terms and provisions of this part and to be administering the tax and loan account under the Remittance Option.

(c) *Inactive depositaries.* The authority of a depositary, authorized prior to July 6, 1978, to administer a Treasury tax and loan account, which depositary has not filed an Election of Option form and whose tax and loan account has had no credits for six months after July 6, 1978, will be revoked automatically. Thereafter, to accept deposits for credit to a Treasury tax and loan account, the financial institution shall seek new designation in accordance with § 203.3.

§ 203.12 Change of options.

A depositary is subject to the provisions of the option it has selected until such time as it provides notice to the Federal Reserve Bank requesting a change in option and receives formal notification from the Federal Reserve Bank of the effective date of the change of option. Specific details regarding changes in option are included in the Procedural Instructions for Treasury Tax and Loan Depositaries.

Subpart C—Interest and Compensation

§ 203.13 Rate of interest.

The rate of interest to be used in connection with the Note Option and

V 4 3 — 8 5

the Remittance Option will be equal to the Federal funds rate less twenty-five basis points (i.e., ¼ of 1 percent). Details about the computation are included in the Procedural Instructions for Treasury Tax and Loan Depositaries.

§ 203.14 Compensation for services rendered.

(a) *General.* Depositaries will not be separately compensated for servicing the tax and loan account, but the bookkeeping costs of maintaining that account are considered in establishing the per-item fee for each Federal tax deposit, as prescribed at § 214.6(b) of this chapter.

(b) *Remittance Option—Class 2 depositaries.* Fees payable to Remittance Option—Class 2 depositaries for Federal tax deposits will be reduced by an analysis credit representing the value of the balances in tax and loan accounts in excess of a current day's credits. Specific details regarding the determination of the amount of compensation due are discussed in the Procedural Instructions for Treasury Tax and Loan Depositaries.

Subpart D—Collateral Security

§ 203.15 Collateral security requirements.

(a) *Note Option.* Prior to crediting deposits to its Treasury tax and loan account, a Note Option depositary shall pledge collateral security in accordance with the requirements and valuations of paragraph (d) of this section, to cover 100 percent of the amount of the note balance and the closing balance in its Treasury tax and loan account which exceeds recognized insurance coverage.

(b) *Remittance Option.* Prior to crediting deposits to its Treasury tax and loan account, a Remittance Option depositary shall pledge collateral security in accordance with the requirements and valuations of paragraph (d) of this section in an amount which is sufficient to cover the maximum balance in the tax and loan account at the close of business each day, less recognized insurance coverage.

(c) *Deposit of securities.* Collateral security required under paragraphs (a) and (b) of this section shall be deposited with the Federal Reserve Bank of the district, or with a custodian or custodians within the United States designated by the Federal Reserve Bank, under terms and conditions prescribed by the Federal Reserve Bank.

(d) *Acceptable securities.* Unless otherwise specified by the Secretary of the Treasury, collateral security pledged under this section may be transferable securities of any of the following classes:

(1) Obligations issued or fully insured or guaranteed by the United States or any U.S. Government agency, and obligations of Government-sponsored corporations which under specific statute may be accepted as security for public funds: At face value.

(2) Obligations issued or fully guaranteed by the International Bank for Reconstruction and Development, the Inter-American Development Bank or the Asian Development Bank: At face value.

(3) Obligations partially insured or guaranteed by any U.S. Government agency: At a value equal to the amount of the insurance or guaranty.

(4) Notes representing loans to students in colleges or vocational schools which are insured either by Federal insurance or by a State agency or private nonprofit institution or organization administering a student loan insurance program in accordance with a formal agreement with the Commissioner of Education under the provisions of the Higher Education Act of 1965 or the National Vocational Student Loan Insurance Act of 1965: At face value.

(5) Obligations issued by States of the United States: At 90 percent of face value.

(6) Obligations of Puerto Rico: At 90 percent of face value.

(7) Obligations of counties, cities, and other governmental authorities and instrumentalities which are not in default as to payments on principal or interest: At 80 percent of face value.

(8) Obligations of domestic corporations which may be purchased by banks as investment securities under the limitations established by Federal bank regulatory agencies: At 80 percent of face value.

(9) Commercial and agricultural paper and bankers' acceptances approved by the Federal Reserve Bank of the district and having a maturity at the time of pledge of not to exceed one year: At 90 percent of face value.

(e) *Assignment of securities.* A tax and loan depositary that pledges securities which are not negotiable without its endorsement or assignment may, in lieu of placing its unqualified endorsement on each security, furnish and appropriate resolution and irrevocable power of attorney authorizing the Federal Reserve Bank to assign the securities. The resolution and power of attorney shall conform to such terms and conditions as the Federal Reserve Bank shall prescribe.

Subpart E—Miscellaneous Provisions

§ 203.16 Termination of contract.

(a) *Termination by the Treasury.* The Secretary of the Treasury may terminate the contract of a Treasury tax and loan depositary at any time upon notice to that effect to that depositary effective at a prospective date set forth in the notice.

(b) *Termination by the tax and loan depositary.* A tax and loan depositary may terminate its depositary contract by submitting notice to that effect in writing to the Federal Reserve Bank of the district effective at a prospective date set forth in the notice.

§ 203.17 Implementing instructions.

Each Federal Reserve Bank is authorized to issue implementing instructions consistent with this part, which instructions shall be binding upon tax and loan depositaries located in its district.

§ 203.18 Effective date.

This revision of this part is effective on July 6, 1978.

2. 31 CFR Part 214 (Department Circular No. 1079) is revised to read as follows:

PART 214—DEPOSITARIES FOR FEDERAL TAXES

Sec.
214.1 Scope of regulations.
214.2 Definitions.
214.3 Designation.
214.4 Depositary Contract.
214.5 Termination of contract.
214.6 Deposits of Federal taxes with depositaries.
214.7 Deposits of Federal taxes with Federal Reserve Banks.
214.8 Additional instructions.
214.9 Effective date.

AUTHORITY: Sec. 10, 56 Stat. 356, as amended (12 U.S.C. 265); sec. 15, 38 Stat. 268 (12 U.S.C. 391); sec. 8, 40 Stat. 291, as amended (31 U.S.C. 771); sec. 6302(c), Internal Revenue Code of 1954, as amended; secs. 1, 2 and 3, Pub. L. 95-147, 91 Stat. 1227 (31 U.S.C. 1038).

§ 214.1 Scope of regulations.

The regulations in this revision of this part govern the designation of financial institutions as depositaries for Federal taxes and the handling of deposits of Federal taxes by such depositaries and by Federal Reserve Banks.

§ 214.2 Definitions.

As used in this part:

(a) "Depositary" means a depositary for Federal taxes.

(b) "Federal Reserve Bank of the district" means the Federal Reserve Bank serving the geographical area in which the financial institution is located. For this purpose, depositaries located in Puerto Rico, the Virgin Islands and the Panama Canal Zone are included in the Second Federal Reserve District.

(c) "Federal tax deposit form" means a preinscribed form supplied to a taxpayer by the Treasury Department to accompany deposits of Federal taxes made under the procedure prescribed by this part.

(d) "Federal taxes" means those Federal taxes specified by the Secretary of the Treasury or the Secretary's delegate as eligible for payment through the procedure prescribed by this part.

(e) "Immediate credit item" means a check or other payment instrument for which immediate credit is given in accordance with the check collection schedule of the receiving Federal Reserve Bank or Branch of the district.

(f) "Qualified depositary for Federal taxes" means a previously designated depositary for Federal taxes that, at the close of business July 5, 1978, was qualified by the Federal Reserve Bank of the district under the provisions of the former Part 214 of this chapter.

§ 214.3 Designation.

(a) *Previously designated depositaries.* (1) The designation of each qualified depositary for Federal taxes which, at the close of business on July 5, 1978, was authorized to maintain a Treasury tax and loan account under the provisions of the former Part 203 of this chapter is hereby extended. The agreements under which they were heretofore authorized as Special Depositaries of Public Money are continued in effect without further action, but subject to the provisions of the current Part 203 of this chapter.

(b) *New designations.*—(1) *Eligibility.* Each financial institution designated as a Treasury tax and loan depositary under the provisions of Part 203 of this chapter is eligible for designation as a depositary for Federal taxes.

(2) *Application for designation.* Any eligible financial institution seeking designation as a depositary for Federal taxes shall file with the Federal Reserve Bank of the district an "Offer to Contract and Application" accompanied by a resolution of its Board of Directors authorizing the "Offer to Contract and Application," both on forms preinscribed by and available on request from the Federal Reserve Bank. Any financial institution not already designated as a Treasury tax and loan depositary may make simultaneous application with the Federal Reserve Bank for such designation as provided in § 203.3 of this part.

(3) *Designations.* Each financial institution satisfying the eligibility requirements and the application procedures will receive from the Federal Reserve Bank of the district notification of its specific designation as a depositary for Federal taxes.

§ 214.4 Depositary Contract.

The designation of a depositary under this part creates a contract between the depositary and the Treasury Department, acting through the Federal Reserve Bank as Fiscal Agent of the United States. The terms of this contract include:

(a) All of the provisions of this part except § 214.7.

(b) Any instructions issued pursuant to this part by the Treasury or by Federal Reserve Banks as Fiscal Agents of the United States.

(c) The provisions prescribed in section 202 of Executive Order 11246, entitled "Equal Employment Opportunity" (30 FR 12319) as amended by Executive Order 11375, entitled "Equal Employment Opportunity Clause."

(d) The requirements of section 503 of the Rehabilitation Act of 1973, 29 U.S.C. 793, and the regulations issued thereunder at 20 CFR Part 741, which are incorporated herein by reference, requiring Government contractors to take affirmative action to employ qualified handicapped individuals, except that depositaries which under this Part receive on an annual basis fee payments of less than $2,500 are exempt from compliance with these regulations.

(e) The requirements of section 503 of the Veterans Employment and Readjustment Act of 1972, 38 U.S.C. 2012, Executive Order 11701, and the regulations issued thereunder at 41 CFR Subpart 1-12.11, which are incorporated herein by reference, for the promotion of employment of disabled and Vietnam era veterans, except that depositaries which under this part receive on an annual basis fee payments of less than $10,000 are exempt from compliance with these regulations.

§ 214.5 Termination of contract.

(a) *By Treasury.* The Secretary of the Treasury may terminate the contract with any depositary at any time upon notice to that effect to be effective at a prospective date set forth in the notice.

(b) *By depositary.* A depositary may terminate its depositary contract by submitting a notice to that effect, in writing, to the Federal Reserve Bank of the district effective at a prospective date set forth in the notice.

§ 214.6 Deposits of Federal taxes with depositaries.

(a) *Deposits with depositaries.* A depositary shall, through any of its offices that accept deposits:

(1) Accept from a taxpayer cash, a postal money order drawn to the order of the depositary, or a check or draft drawn on and to the order of the depositary, covering an amount to be deposited as Federal taxes when accompanied by a Federal tax deposit form on which the amount of the deposit has been properly entered in the space provided. A depositary may at its discretion accept a check drawn on another financial institution, but it does so purely on a voluntary basis and absorbs for its own account any float involved.

(2) When requested to do so by a taxpayer who makes a deposit of Federal taxes in cash over the counter, issue a counter receipt.

(3) Regardless of the form of payment, in every instance place in the space provided on the face of each Federal tax deposit form a stamp impression reflecting the date on which the tax deposit was received by the depositary, by reference to which the timeliness of the tax payment will be determined, and the name and location of the depositary.

(4) Credit on the date of receipt all deposits of Federal taxes to the treasury tax and loan account and administer that account pursuant to the provisions of Part 203 of this Chapter.

(5) Forward each day to the Internal Revenue Service Center servicing the geographical area in which the depositary is located, the Federal tax deposit forms for all tax deposits received that day. Each submission of deposit information shall be on the prescribed Treasury form and in the aggregate amount of the Federal tax deposit forms.

(6) Establish, prior to transmittal to the Internal Revenue Service Center, an adequate record of all deposits of Federal taxes so that it will be able to identify deposits in the event tax deposit forms are lost in shipment between it and the Internal Revenue Service Center. For this purpose, a record shall be made of each deposit showing as a minimum the date of deposit, the taxpayer's identifying number, and the amount of the deposit. The depositary's copies of transmittal letters may be used to provide the necessary information if individual deposits are listed separately showing date, taxpayer's identifying number, and amount.

(7) Not accept compensation from taxpayers for accepting deposits of Federal taxes and handling them as required by this section.

(b) *Compensation for services.* The Treasury will compensate depositaries for Federal taxes at a uniform fee of 50 cents for each Federal tax deposit form forwarded by the depositary and processed by the Internal Revenue Service Center. This fee covers the bookkeeping costs of maintaining the Treasury tax and loan account as well as the handling of Federal tax deposits. Fees payable may be reduced by the analysis credits described in § 203.14 of this chapter.

§ 214.7 Deposits of Federal taxes with Federal Reserve Banks.

A Federal Reserve Bank shall, through any of its offices:

(a) Accept a tax deposit directly from a taxpayer when such tax deposit is:

(1) Mailed or delivered by a taxpayer located within that Bank's territorial boundaries; and

(2) In the form of cash, a check drawn to the order of that Bank and considered to be an immediate credit

M Y 2 — 7 8 UMI

V 4 3 — 8 5

item by that Bank, a postal money order drawn to the order of that Bank, or Treasury bills, as authorized in Part 309 of this Chapter, covering an amount to be deposited as Federal taxes; and,

(3) Accompanied by a Federal tax deposit form on which the amount of the tax deposit has been properly entered in the space provided.

(b) When requested to do so by a taxpayer who makes a deposit of Federal taxes in cash over the counter, issue a counter receipt.

(c) When a deposit of Federal taxes is made in accordance with the requirements of paragraph (a) of this section, a Bank shall place in the space provided on the face of each Federal tax deposit form accepted directly from a taxpayer, a stamp impression reflecting the name of the Bank and the date on which the tax deposit was received by the Bank so that the timeliness of the Federal tax payment can be determined. However, if such a deposit is mailed to a Bank, it shall be subject to the "Timely mailing treated as timely filing and paying" clause of section 7502 of the Internal Revenue Code (26 U.S.C. 7502).

(d) When a deposit of Federal taxes is not in accordance with the requirements governing form of payment set forth in paragraph (a) of this section, a Bank shall place in the space provided on the face of each Federal tax deposit form a stamp impression reflecting th name of the Bank and the date on which the proceeds of the accompanying payment instrument are collected by the Bank. This date shall be used for the purpose of determining the timeliness of the Federal tax payment.

§ 214.8 Additional instructions.

Federal Reserve Banks are authorized to issue instructions consistent with these regulations for carrying out the requirements of this part.

§ 214.9 Effective date.

The provisions of this part, as revised, become effective as of July 6, 1978.

PART 317—REGULATIONS GOVERNING AGENCIES FOR ISSUE OF U.S. SAVINGS BONDS OF SERIES E AND U.S. SAVINGS NOTES

3. 31 CFR Part 317 (Department Circular, Public Debt Series No. 4-67) is amended by revising § 317.5 to read as follows:

§ 317.5 Issuance of bonds.

(a) *General.* Issuing agents shall comply with all regulations and instructions issued by the Department of the Treasury or the Federal Reserve Banks concerning the sale, inscription, dating, validation and issue of the bonds, and disposition of the issue records. No issuing agent shall have authority to sell bonds other than as provided in the offering circulars and the governing regulations.[1]

(b) *Fees.* Issuing agents, other than Federal agencies which for the purpose of this section include Government corporations and independent establishments, will be paid for each savings bond issued during a calendar quarter as follows:

70 cents for each bond issued on sale by a financial institution on the basis of an application received over-the-counter or by mail, or under a bond-a-month plan;

30 cents for each bond issued on sale by a financial institution under a payroll plan, if the bond is inscribed by any means other than a computer;

10 cents for each bond issued on sale by a financial institution under a payroll plan, if the bond is inscribed by computer;

10 cents for each bond issued on sale by a non-financial institution; and

5 cents for each bond reissued to effect distribution to a participant in a pension, retirement, savings, vacation or similar plan.

(c) *Basis for payment of fees.* A fee will be paid for each Series E savings bond issue included in transmittals of registration stubs or magnetic tape to the Bureau of the Public Debt for the account of an eligible agent during each calendar quarter, based on the transfer dates assigned to the transmittals by a Federal Reserve Bank.

(d) *No charge to customers.* Financial institutions accepting fees from the Treasury for issuing savings bonds shall not make any charge to customers for the same service.

(e) The provisions of this section, as amended, are effective as of July 6, 1978.

PART 321—PAYMENTS BY BANKS AND OTHER FINANCIAL INSTITUTIONS OF UNITED STATES SAVINGS BONDS AND UNITED STATES SAVINGS NOTES (FREEDOM SHARES)

4. 31 CFR Part 321 (Department Circular No. 750, Second Revision) is amended by revising § 321.5 to read as follows:

• • • • •

Subpart B—Authority To Act

§ 321.5 Paying agent fees and charges.

(a) *Scale or rate and procedures.* Each paying agent shall receive reimbursement at the rate of 30 cents for each bond or note paid hereunder which is received by a Federal Reserve Bank and forwarded for the agent's account to the Department of the Treasury during each calendar quarter.

(b) *No charge to owners.* Paying agents shall not make any charge whatever to owners of savings bonds and savings notes in connection with payments hereunder.

(c) The provisions of this section, as amended, are effective as of July 6, 1978.

5. 31 CFR Chapter II is revised to add a new Part 226 to read as follows:

INTERIM RULE

PART 226—RECOGNITION OF INSURANCE COVERING TREASURY TAX AND LOAN DEPOSITARIES

Sec.
226.1 Scope.
226.2 General.
226.3 Application—termination.
226.4 Adequacy of security—how computed.
226.5 Examinations.
226.6 Financial reports.
226.7 Effective date.

AUTHORITY: Secs. 2 and 3, Pub. L. 95-147, 91 Stat. 1227 (31 U.S.C. 1038).

§ 226.1 Scope.

The regulations in this part apply to insurance covering public money of the United States held by banks, savings banks, savings and loan associations, building and loan associations, homestead associations, or credit unions designated as Treasury tax and loan depositaries under 31 CFR Part 203. Approval of the adequacy of the insurance coverage provided to Treasury tax and loan funds shall be governed by the regulations contained herein, which will be supplemented by guidelines issued by the Treasury and updated from time to time to meet changing conditions in the industry.

§ 226.2 General.

(a) Deposit or account insurance provided by the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the National Credit Union Share Insurance Fund, is hereby recognized. Deposits or accounts which are insured by a State or agency thereof, or by a corporation chartered by a State for the sole purpose of insuring deposits or accounts of financial institutions eligible to be Treasury tax and loan depositaries (hereinafter referred to as Insurance Arrangement), shall be approved as provided herein. Such approval constitutes recognition for the purpose of reducing the amount of collateral required of a tax and loan depositary by the amount of recognized insurance coverage pursuant to 31 CFR 203.15.

(b) Generally, these regulations and their associated guidelines require that an organization providing insurance maintain a corpus of sufficient value and liquidity, and/or that it have sufficient State borrowing authority, in relation to its liabilities and total insured savings (or deposits) to provide adequate security to the Government's deposits and that adequate monitoring of the financial condition of the insured institutions is conducted.

§ 226.3 Application—termination.

(a) Every Insurance Organization applying for recognition as a qualified insurer of financial institutions designated as Treasury tax and loan depositaries shall address a written request to the Assistant Comptroller for Auditing, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226, who will notify the applicant of the data which is necessary to make application. If the Secretary of the Treasury is satisfied that (1) one or more institutions insured by the applicant otherwise meet the Secretary's requirements for designation as a Treasury tax and loan depositary or Federal tax depositary, (2) the insurance provided by the applicant covers public money of the United States, and (3) the insurance coverage provided affords adequate security to the Government's deposits, the Secretary shall recognize the applicant as a qualified insurer of financial institutions designated as Treasury tax and loan depositaries.

(b) If and when the Secretary of the Treasury determines that a qualified insurance organization's financial condition is such that it no longer provides adequate security or that it is not complying with the regulations of this part, the Secretary will notify the Insurance Organization of the facts or conduct which cause him to make such determination, and in those cases where the safety of the Government's funds allows, provide the Insurance Organization with an opportunity to correct the deficiency. When any deficiency has not been corrected to his satisfaction or, where the safety of Government funds makes immediate revocation imperative, the Secretary will revoke the recognition previously granted.

§ 226.4 Adequacy of security—how computed.

(a) In qualifying Insurance Organizations, the Treasury will use a ratio (equity (net worth) of the insurance organization divided by insured accounts or deposits) to determine if the security is adequate. The ratio will be computed as determined by the Treasury, and is required to equal 0.0045 or greater for an Insurance Organization to be recognized (i.e., net worth is required to equal 0.45 of 1 percent of insured accounts or deposits).

(b) If, in the judgment of the Secretary of the Treasury, any of the Insurance Organization's assets which cannot be liquidated promptly or are subject to restriction, encumbrance, or discredit, all or part of the value of such assets may be deducted from equity in making the computation. The Secretary of the Treasury may value the assets and liabilities in his discretion.

(c) An Insurance Organization's unqualified borrowing authority from its sponsoring State will be added to its equity in making the computation because such authority is equivalent to additional capitalization. An Insurance Organization's commercial borrowing authority and its reinsurance will be disregarded in making the computation, because these are not adequate substitutes for undercapitalization.

§ 226.5 Examinations.

(a) Examinations by State regulatory authorities or audits by CPA firms of Insurance Organizations shall be performed in accordance with, and at intervals prescribed by, State regulatory procedures. Copies of the reports shall be submitted to the Treasury.

(b) Examinations by State regulatory authorities or audits by CPA firms of insured financial institutions shall be performed in accordance with, and at intervals prescribed by, State regulatory procedures. In addition, an adequate monitoring system shall be employed to detect those institutions with financial problems.

§ 226.6 Financial reports.

Financial reports of Insurance Organizations shall be submitted to the Treasury at the same intervals they are submitted to State regulatory authorities. However, they need not be submitted more frequently than quarterly but, as a minimum, shall be submitted annually. The Treasury may prescribe the format of such reports.

§ 226.7 Effective date.

The provisions of this part become effective as of July 6, 1978.

• • • • •

The foregoing revisions and/or amendments are effective as of July 6, 1978.

Dated: April 27, 1978.

PAUL H. TAYLOR,
Acting Fiscal Assistant Secretary.

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

SUBCHAPTER B—PERSONNEL

[Dept. Reg. 108.754]

PART 10—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Revised Regulations

AGENCY: Department of State.

ACTION: Final Rule.

SUMMARY: These regulations revise existing standards of conduct and responsibilities for certain employees of the Department of State, the Agency for International Development (AID), and the International Communication Agency (ICA). The revisions are necessary to conform to a change in legislation establishing new dollar ceilings for honorariums. The revisions also are responsive to certain problems of administration, including a reduction in the information required from employees, by providing that employees need not disclose certain types of financial interests. It is the intent of the revisions to provide conformity with the law and more flexibility in administering the regulations.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

For State: Knute E. Malmborg, Assistant Legal Adviser, 202-632-2350; For AID: Pauline G. Johnson, Office of the General Counsel, 202-632-8277; For ICA: C. Normand Poirier, Deputy General Counsel, 202-724-9168.

SUPPLEMENTARY INFORMATION: The following summary highlights the major revisions to Part 10 of Title 22, Code of Federal Regulations.

1. A new § 10.735-217, Requesting Exceptions From Certain Statutory Prohibitions, is added to Subpart B.

2. A new § 10.735.411, Disqualification Procedures, is added to Subpart D.

3. Section 10.735-102(f) is revised to include "in-law relations" in the definition of "Member of an employee's family."

4. Section 10.735-202(d) is revised to provide stricter guidelines for acceptance of gifts, entertainment, and favors by AID employees.

5. In § 10.735.205, paragraphs (c) and (d) are added to provide that certain financial interests are exempted from the prohibitions in 18 U.S.C. 208 (a) and (b)(1) as being too remote or inconsequential to affect the integrity of the services of an employee.

6. Section 10.735-206(c) is revised to conform to the requirements of sec. 413(c), Pub. L. 95-105 (91 Stat. 856; 22 U.S.C. 2693) for employment of Foreign Service spouses.

7. Section 10-735-209 is revised to include as a just financial obligation one imposed by law such as Federal, State, or local taxes.

8. Section 10.735-213(b) is revised to include present or former employees, their spouses and/or members of their families among those for whom an employee may make a personal recommendation in connection with employment.

9. Section 10.735-216(a) is revised to add a prohibition against officers or employees accepting any honorarium in excess of $2,000 or honoraria aggregating more than $25,000 in any calendar year, as required by Pub. L. 94-283, (90 Stat. 494; 2 U.S.C. 441i).

10. A new § 10.735-217 is added to provide a procedure for requesting exceptions from certain statutory prohibitions.

11. Section 10.735-401 is updated to include an amended list of employees required to submit statements of employment and financial interests.

12. Section 10.735-405(e) is revised to provide that an employee need not disclose financial interests described in § 10.735-205(c) which are too remote or too inconsequential to affect the integrity of employees' services.

13. Section 10.735-410 is revised to provide that except for those financial interests excepted from the conflict of interest prohibitions, employees must disqualify themselves from participating in any matter in which they have a financial interest.

14. A new 10.735-411 is added to provide procedures for employees to follow to disqualify themselves from participating in any matter in which they have a financial interest.

Compliance with 5 U.S.C. 553 (80 Stat. 383) as to notice of proposed rulemaking and delayed effective date is unnecessary because the revisions to 22 CFR 10 are beneficial to personnel of the Department of State, the Agency for International Development, and the International Communication Agency, and involve functions of agency management and personnel which are exempt from 5 U.S.C. 553.

This revision to 22 CFR Part 10 was approved by the Civil Service Commission on February 14, 1978.

Dated: March 31, 1978.

BEN H. READ,
Deputy Under Secretary for Management, Department of State.

Dated: April 5, 1978.

KENNETH E. DAWSEY,
Director, Office of Personnel and Training, Agency for International Development.

Dated: April 6, 1978.

ANGIE GARCIA,
Director of Personnel Services, International Communication Agency.

10.735-410 Effect of employees' statements on other requirements.
10.735-411 Disqualification procedures.

AUTHORITY: EO 11222 of May 8, 1965, as amended; 5 CFR 735.104.

Subpart A—General Provisions

§ 10.735-101 Purpose.

The maintenance of the highest standards of honesty, integrity, impartiality, and conduct by Government employees and special Government employees is essential to assure the proper performance of the Government business and the maintenance of confidence by citizens in their Government. The avoidance of misconduct and conflicts of interest on the part of Government employees and special Government employees through informed judgment is indispensable to the maintenance of these standards. To accord with these concepts the regulations in this part prescribe standards of conduct and responsibilities for employees and special Government employees and require statements reporting employment and financial interests.

NOTE.—These regulations are codified in State 3 FAM 620, AID Handbook 24, and ICA MOA V-A 550.

§ 10.735-102 Definitions.

(a) "Agency" means the Department of State (State), the Agency for International Development (AID), and the International Communication Agency (ICA).

(b) "Employee" means an officer or employee at home or abroad, of an agency named in paragraph (a) of this section, but does not include a special Government employee or a member of the Army, Navy, Air Force, Marine Corps, Coast Guard, National Oceanic and Atmospheric Administration, or Public Health Service.

(c) "Executive order" means Executive Order 11222 of May 8, 1965, as amended.

(d) "Person" means an individual, a corporation, a company, an association, a firm, a partnership, a society, a joint stock company, or any other organization or institution.

(e) "Special Government employee" means an officer or employee of an agency who is retained, designated, appointed, or employed to perform, with or without compensation, for not to exceed 130 days during any period of 365 consecutive days, temporary duties either on a full-time or intermittent basis.

(f) "Member of an employee's family" means a spouse, minor child, or other member of an employee's immediate household. For the purpose of these regulations "member of an employee's immediate or in-law household" means those blood relations who are residents of the employee's household.

(g) "Counselor" means the agency's Counselor on Ethical Conduct and Conflicts of Interest.

§ 10.735-103 Interpretation and advisory service.

(a) Counseling services on employee responsibilities and conduct are available in each agency. These services are to be coordinated by a Counselor appointed by the agency head. The Counselors are for State: the Legal Adviser; for AID: The Deputy General Counsel; and for ICA: the General Counsel. The Counselor serves as the agency's designee to the Civil Service Commission on matters covered by the regulations in this part and is responsible for coordination of the agency's counseling services under paragraph (b) of this section and for assuring that counseling and interpretations on questions of conflicts of interest and other matters covered by these sections are available to deputy counselors designated under paragraph (b) of this section.

(b) Each agency head may designate deputy counselors for the agency's employees and special Government employees. Deputy Counselors designated under this section must be qualified and in a position to give authoritative advice and guidance to each employee and special Government employee who seeks advice and guidance on questions of conflicts of interest and on other matters covered by the regulations in this part. A Washington employee or special Government employee should address any inquiries concerning the regulations in this part to the Counselor. At missions abroad the chief of each agency's establishment designates an officer, preferably the legal officer where one is available, to provide counseling services under the guidance of the Counselor; a single officer may serve all agencies. An employee or special Government employee serving abroad should submit inquiries to the officer designated.

(c) Each agency shall periodically notify its employees and special Government employees of the availability of counseling services and how and when these services are available. A new employee or special Government employee shall be notified at the time of entrance on duty.

§ 10.735-104 Applicability to detailed employees.

All the regulations of Subparts A, B, and D of this part are applicable to an employee of another U.S. Government agency who may be serving on detail or assignment, formally or informally, on a reimbursable or nonreimbursable basis through a Participating Agency Service Agreement or otherwise, with an agency named in § 10.735-102(a). However, disciplinary action shall be taken against such an employee only by the employing agency.

§ 10.735-105 Disciplinary action.

A violation of the regulations in this part by an employee or special Government employee may be cause for appropriate disciplinary action, including separation for cause, which may be in addition to any penalty prescribed by law.

Subpart B—Ethical and Other Conduct and Responsibilities of Employees

§ 10.735-201 General.

(a) *Proscribed actions.* An employee shall avoid any action, whether or not specifically prohibited by the regulations in this part, which might result in, or create the appearance of:

(1) Using public office for private gain;

(2) Giving preferential treatment to any person;

(3) Impeding Government efficiency or economy;

(4) Losing independence or impartiality;

(5) Making a Government decision outside official channels; or

(6) Affecting adversely the confidence of the public in the integrity of the Government.

(b) *Applicability to members of families of employees.* A U.S. citizen employee shall take care that certain responsibilities placed on the employee are also observed by members of the employee's family. These are the restrictions in regard to: Acceptance of gifts (§§ 10.735-202 and 10.735-203); economic and financial activities abroad (§ 10.735-206); teaching, lecturing, and writing (§ 10.735-204(c)); participation in activities of private organizations (§ 10.735-211(c)); and political activities abroad (§ 10.735-211(g)).

§ 10.735-202 Gifts, entertainment, and favors.

(a) *Acceptance prohibited.* Except as provided in paragraphs (b), (c), and (d) of this section, an employee shall not solicit or accept, directly or indirectly, any gift, gratuity, favor, entertainment, loan, or any other thing of monetary value, from a person who:

(1) Has, or is seeking to obtain, contractual or other business or financial relations with the employee's agency;

(2) Conducts operations or activities that are regulated by the employee's agency;

V 4 3 — 8 5 M Y 2 7 8 UMI

(3) Has interests that may be substantially affected by the performance or nonperformance of the employee's official duty; or

(4) Appears to be offering the gift with the hope or expectation of obtaining advantage or preferment in dealing with the U.S. Government for any purpose.

(b) *Acceptance permitted.* The provisions of paragraph (a) of this section do not apply to:

(1) Gifts, gratuities, favors, entertainments, loans, or any other thing of monetary value received on account of close family or personal relationships when the circumstances make it clear that it is that relationship rather than the business of the persons concerned which is the motivating factor;

(2) Acceptance of loans from banks or other financial institutions on customary terms to finance proper and usual activities of employees, such as home mortgage loans;

(3) Acceptance of unsolicited advertising or promotional material, such as pens, pencils, note pads, calendars, and other items of nominal intrinsic value;

(4) Acceptance of rates and discounts offered to employees as a class.

(c) *Acceptance permitted for State and ICA employees.* For State and ICA employees the provisions of paragraph (a) of this section do not apply to: Acceptance of food and refreshments of nominal value on infrequent occasions in the ordinary course of a luncheon or dinner meeting or other meeting or on an inspection tour where an employee may properly be in attendance.

(d) *Acceptance permitted for AID employees.* For AID employees the provisions of paragraph (a) of this section do not apply in the following situations:

(1) Acceptance of food, refreshments, or entertainment of nominal value on infrequent occasions offered in the ordinary course of luncheons, dinners, or other meetings and gatherings hosted by foreign governments or agencies and officials thereof, embassies, and international organizations, where the primary purpose of the function is representational or social, rather than the transaction of business. Where the primary purpose of the function is the transaction of business, acceptance is not permitted, except if there is justification and reporting in accordance with paragraph (d)(4) of this section.

(2) Participation in widely attended lunches, dinners, and similar gatherings sponsored by industrial, technical, and professional associations for the discussion of matters of mutual interest to Government and industry.

(3) Acceptance of food, refreshments, or entertainment in the unusual situation where the employee, by virtue of the location of the person, firm, corporation, or other entity, or the regulations governing its dining facilities, finds it inconvenient or impracticable not to accept the offer. Each case of acceptance shall be reported in accordance with the requirement of paragraph (d)(4) of this section. In no other case shall employees accept food, refreshments, or entertainment from private corporations, entities, firms, or individual contractors at occasions which are other than widely attended functions whose purposes are unrelated to Agency business.

(4) In exceptional circumstances where acceptance of food, refreshments, or entertainment is not authorized by paragraphs (d) (1), (2), and (3) of this section, but where, in the judgment of the individual concerned, the Government's interest would be served by such acceptance directly or indirectly from any foreign government, agency, or official thereof or a private person, firm, corporation, or other entity which is engaged or is endeavoring to engage in business transactions of any sort with AID, an employee may accept the offer: *Provided,* That a report of the circumstances, together with the employee's statement as to how the Government's interests were served, will be made within 48 hours to the employee's supervisor, or, if the employee is serving abroad, or on temporary duty abroad, to the Mission Director.

(e) *Gifts to superiors.* An employee shall for a gift to an official superior, make a donation as a gift to an official superior, or accept a gift from an employee receiving less pay than the employee (5 U.S.C. 7351). However, this paragraph does not prohibit a voluntary gift of nominal value or donation in a nominal amount made on a special occasion such as marriage, illness, or retirement.

(f) *Neither this section nor § 10.735-204* precludes an employee from receipt of bona fide reimbursement, unless prohibited by law, for expenses of travel and such other necessary subsistence as is compatible with this part for which no Government payment or reimbursement is made. However, this paragraph does not allow an employee to be reimbursed, or payment to be made on the employee's behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits, nor does it allow an employee to be reimbursed by a person for travel on official business under agency orders when reimbursement is proscribed by Decision B-128527 of the Comptroller General dated March 7, 1967.

§ 10.735-203 Gifts from foreign governments.

An employee shall not accept a gift, present, decoration, or other thing from a foreign government unless authorized by Congress as provided by the Constitution and in 5 U.S.C. 7342, and the regulations promulgated thereunder pursuant to E.O. 11320, 31 FR 15789. These regulations are set forth in Part 3 of this title (as added, 32 FR 6569, Apr. 28, 1967), and in 3 FAM 621.

§ 10.735-204 Outside employment and other activity.

(a) An employee shall not engage in outside employment or other outside activity not compatible with the full and proper discharge of the duties and responsibilities of Government employment. Incompatible activities include but are not limited to:

(1) Acceptance of a fee, compensation, gift, payment of expense, or any other thing of monetary value in circumstances in which acceptance may result in, or create the appearance of, conflicts of interest; or

(2) Outside employment which tends to impair the employee's mental or physical capacity to perform Government duties and responsibilities in an acceptable manner.

(b) An employee shall not receive any salary or anything of monetary value from a private source as compensation for the employee's services to the Government (18 U.S.C. 209).

(c) Employees are encouraged to engage in teaching, lecturing, and writing that is not prohibited by law, the Executive order, this part, or the agency regulations. However, an employee shall not, either for or without compensation, engage in teaching, lecturing, or writing including teaching, lecturing, or writing for the purpose of the special preparation of a person or class of persons for an examination of the Civil Service Commission or Board of Examiners for the Foreign Service, that is dependent on information obtained as a result of Government employment, except when that information has been made available to the general public or will be made available on request or when the agency head gives written authorization for use of nonpublic information on the basis that the use is in the public interest. In addition, an employee who is a Presidential appointee covered by section 401(a) of the Executive order shall not receive compensation or anything of monetary value for any consultation, lecture, discussion, writing, or appearance the subject matter of which is devoted substantially to the responsibilities, programs, or operations of the employee's agency, or which draws substantially on official data or ideas which have not become part of the body of public information. Employees are referred to the detailed rules of their agency with respect to clearance and acceptance of compensation (3 FAM 628; for AID see Handbook 18).

(d) [Reserved]

(e) An employee shall not render any services, whether or not compensated, to any foreign government, state, province, or semigovernmental agency, or municipality of any foreign government, or to any international organization of states. However, this shall not prevent the rendering of such services by employees acting on behalf of the United States. Nor shall this provision prevent the rendering of services to an international organization of states when otherwise consistent with law and when authorized by the appropriate officer. The appropriate officer for State is the Director General and Director of Personnel; for AID the Assistant Administrator for Program and Management Services; and for ICA the Director of Personnel Services.

(f) [Reserved.]

(g) This section does not preclude an employee from:

(1) Participation in the activities of national or State political parties not proscribed by law.

(2) Participation in the affairs of or acceptance of an award for a meritorious public contribution or achievement given by a charitable, religious, professional, social, fraternal, nonprofit educational and recreational, public service, or civic organization.

§ 10.735-205 Financial interests.

(a) An employee shall not: (1) Have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially with the employee's Government duties and responsibilities; or

(2) Engage in, directly or indirectly, a financial transaction as a result of, or primarily relying on, information obtained through Government employment.

(b) This section does not preclude an employee from having a financial interest or engaging in financial transactions to the same extent as a private citizen not employed by the Government so long as it is not prohibited by law or the regulations in this part.

(c) Pursuant to the provision of 18 U.S.C. 208(b) the following described financial interests of an employee are hereby exempted from the requirements of 18 U.S.C. 208(a) and 208(b)(1) as being too remote or too inconsequential to affect the integrity of the services of an employee. The exemption applies to the financial interests held directly by an employee, by the employee's spouse or minor child whether individually or jointly with the employee, or by an employee and any partner or partners as joint assets of the partnership:

(1) Investments in State and local government bonds; and stocks, bonds, or policies in a mutual fund, investment company, bank or insurance company, provided that in the case of a mutual fund, investment company, or bank, the fair value of such stock or bond holding does not exceed one percent of the value of the reported assets of the mutual fund, investment company, or bank. In the case of a mutual fund or investment company, this exemption applies only where the assets of the fund or company are diversified; it does not apply where the fund or company specializes in a particular industry or commodity.

(2) Interest in an investment club or other group organized for the purpose of investing in equity or debt securities: *Provided,* That the fair value of the interest involved does not exceed $10,000 and that the interest does not exceed one-fourth of the total assets of the investment club or group. Where an employee covered by this exemption is a member of a group organized for the purpose of investing in equity or debt securities, the interest of the employee in any enterprise in which the group holds securities shall be based upon the employee's equity share of the holdings of the group in that enterprise.

(3) If an employee, or the employee's spouse or minor child has a present beneficial interest or a vested remainder interest under a trust, the ownership of stocks, bonds, or other corporate securities under the trust will be exempt to the same extent as provided in paragraphs (c)(1) and (2) of this section for the direct ownership of such securities. The ownership of bonds other than corporate bonds, or of shares in a mutual fund or regulated investment company, under the trust will be equally exempt and to the same extent as under paragraphs (c) (1) and (2) of this section.

(4) If an employee is an officer, director, trustee, or employee of an educational institution, or if the employee is negotiating for, or has an arrangement concerning prospective employment with such an institution, a direct financial interest which the institution has in any matter will not itself be exempt, but any financial interest that the institution may have in the matter through its holdings of securities issued by business entities will be exempt: *Provided,* The employee is not serving as a member of the investment committee of the institution or is not otherwise advising it on its investment portfolio.

(5) An employee may continue to participate in a bona fide pension, retirement, group life, health or accident insurance plan, or other employee welfare or benefit plan that is maintained by a business or nonprofit organization by which the employee was formerly employed. Such financial interest in that organization will be exempt, except to the extent that the welfare or benefit plan is a profit-sharing or stock-bonus plan and the employee's financial interest thereunder exceeds $10,000. This exemption extends also to any financial interests that the organization may have in other business activities.

(d) Nothing in this part shall be deemed to prohibit an employee from acting, with or without compensation, as agent or attorney for the employee's parents, spouse, child, or any person for whom, or for any estate for which, the employee is serving as guardian, executor, administrator, trustee, or other personal fiduciary, except in those matters in which the employee has participated personally and substantially as a Government employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, or which are the subject of the employee's official responsibility, as defined in 18 U.S.C. 202(b): *Provided,* The head of the employee's division approves in writing.

§ 10.735-206 Economic and financial activities of employees abroad.

(a) *Prohibitions in any foreign country.* A U.S. citizen employee abroad is specifically prohibited from engaging in the activities listed below in any foreign country.

(1) Speculation in currency exchange.

(2) Transactions at exchange rates differing from local legally available rates, unless such transactions are duly authorized in advance by the agency.

(3) Sales to unauthorized persons (whether at cost or for profit) of currency acquired at preferential rates through diplomatic or other restricted arrangements.

(4) Transactions which entail the use, without official sanction, of the diplomatic pouch.

(5) Transfers of funds on behalf of blocked nationals, or otherwise in violation of U.S. foreign funds and assets control.

(6) Independent and unsanctioned private transactions which involve an employee as an individual in violation of applicable control regulations of foreign governments.

(7) Acting as a intermediary in the transfer of private funds from persons in one country to persons in another country, including the United States.

(8) Permitting use of one's official title in any private business transactions or in advertisements for business purposes.

(b) *Prohibitions in country of assignment.* (1) A U.S. citizen employee shall not transact or be interested in any business or engage for profit in any profession or undertake other gainful employment in any country or countries to which the employee is assigned or detailed in the employee's

V 4 3 — 8 5 M Y 2 7 8 UMI

own name or through the agency of any other person; exceptions may be made with respect to chiefs of mission only in writing by the Deputy Under Secretary for Management and for all other State employees by the appropriate chief of mission; for AID employees by the assistant administrator of the regional bureau or head of the nonregional organization, as appropriate; and for ICA employees by the Director of Personnel Services, or their designees (see 22 U.S.C. 805).

(2) A U.S. citizen employee shall not invest in real estate or mortgages on properties located in the employee's country of assignment. The purchase of a house and land for personal occupancy is not considered a violation of this subparagraph.

(3) A U.S. citizen employee shall not invest money in bonds, shares or stocks of commercial concerns headquartered in the country of assignment or conducting a substantial portion of their business in such country. Such investments, if made prior to knowledge of assignment or detail to such country or countries, may be retained during such assignment or detail when approved in writing by the appropriate official named in subparagraph (1) of this paragraph. If retention is authorized, such stocks, shares, or bonds may not be sold while the employee is assigned or detailed to the country or countries, unless the agency approved the sale in writing.

(4) A U.S. citizen employee shall not sell or dispose of personal property, including automobiles, at prices producing profits to the employee which result primarily from import privileges derived from the employee's official status as an employee of the U.S. Government. Employees of State and ICA are referred to Foreign Affairs Manual Circular 378; for AID see Handbook 23, Attachment 1B.

(c) *Acceptance of employment by members of family abroad.* Family members of Foreign Service personnel may accept gainful employment in a foreign country unless such employment (1) would violate any law of such country or of the U.S.; or (2) could damage the interests of the U.S., as certified in writing to the family member by the Chief of the U.S. Diplomatic Mission in such country. A copy of such certification will be sent to the Family Liaison Office (M/FLO), Department of State. Family members accepting employment abroad should bear in mind that they may not enjoy immunity from judicial process and would be subject to the payment to taxes derived from their nondiplomatic employment.

(d) *Business activities of non-U.S. citizen employees.* A non-U.S citizen employee abroad may engage in outside business activities with the prior approval of the head of the overseas establishment on the basis of the standards expressed in § 10.735-204(a).

§ 10.735-207 Use of Government property.

An employee shall not directly or indirectly use, or allow the use of Government property of any kind, including property leased to the Government, for other than officially approved activities. An employee has a positive duty to protect and conserve Government property, including equipment, supplies, and other property entrusted or issued to the employee.

§ 10.735-208 Misuse of information.

For the purpose of furthering a private interest, an employee shall not, except as provided in § 10.735-204(c) directly or indirectly use, or allow the use of, official information obtained through or in connection with Government employment which has not been made available to the general public.

§ 10.735-209 Indebtedness.

An employee shall pay each just financial obligation in a proper and timely manner, especially one imposed by law such as Federal, State, or local taxes. For the purpose of this section, a "just financial obligation" means one acknowledged by the employee or reduced to judgement by a court or one imposed by law such as Federal, State, or local taxes, and "in a proper and timely manner" means in a manner which the agency determines does not, under the circumstances, reflect adversely on the Government as the employer. In the event of dispute between an employee and an alleged creditor, this section does not require an agency to determine the validity or amount of the disputed debt.

§ 10.735-210 Gambling, betting, and lotteries.

An employee shall not participate, while on Government-owned or leased property or while on duty for the Government, in any gambling activity including the operation of a gambling device, in conducting a lottery or pool, in a game for money or property, or in selling or purchasing a numbers slip or ticket. However, this section does not preclude activities:

(a) Necessitated by an employee's law enforcement duties; or

(b) Under section 3 of Executive Order 10927 and similar agency-approved activities.

§ 10.735-211 Activities relating to private organizations and politics.

(a) *Definition.* For the purpose of this section, the term "private organization" denotes any group of persons or associations organized for any purpose whatever, except an organization established by the Government of the United States, or officially participated in by State, AID, or ICA.

(b) *Participation in activities of employee organizations.* An employee may join or refrain from joining employee organizations or associations without interference, coercion, restraint, or fear of discrimination or reprisal.

(c) *Participation in activities of private organizations.* In participating in the program and activities of any private organization, an employee shall make clear that the employee's agency has no official connection with such organization and does not necessarily sponsor or sanction the viewpoints which it may express.

(d) *Legal restrictions on membership in certain organizations.* An employee shall not have membership in any organization that advocates the overthrow of our constitutional form of Government in the United States, knowing that such organization so advocates (5 U.S.C. 7311, 18 U.S.C. 1918).

(e) *Private organizations concerned with foreign policy or other matters of concern to agencies.* (1) Limitation on participation. When a private organization is concerned primarily with foreign policy or international relations or other matters of concern to an employee's agency, an employee shall limit connection therewith as follows: Unless specifically permitted to do so, the employee may not serve as advisor, officer, director, teacher, sponsor, committee chairman, or in any other official capacity or permit the employee's name to be used on a letterhead, in a publication, in an announcement or news story, or at a public meeting, regardless of whether the employee's official title or connection is mentioned. The provisions of this section are not intented to prohibit the normal and active participation of an employee in professional organizations such as the American Political Science Association, the American Economic Association, the American Foreign Service Association, and similar organizations, since such participation is in the interest of both the employee and the Government. Employees are expected, however, to exercise discretion in such activities and are held personally accountable for any improper use of their relationship with State, AID, and ICA.

(2) Request for special permission. Special permission to assume or continue a connection prohibited by subparagraph (1) of this paragraph may be granted in cases where the public interest will not be adversely affected. To request such permission, or to determine whether the provisions are applicable to a particular case, the employee shall address a memorandum setting forth all of the circumstances to the appropriate officer. The appropriate officer is for State, the Director General and Director of Personnel; for AID, the Senior Personnel Officer under whose jurisdiction the employee serves; and for ICA, the Director of Personnel Services.

(3) Application to senior officers. Because of the prominence resulting from their official positions, chiefs of mission and other senior officers should recognize the particular bearing of the provisions of subparagraph (1) of this paragraph upon their activities. They should restrict association with any organizations involving foreign nations and the United States to simple membership and should not accept even honorary office in such organizations except with the specific prior approval as provided in subparagraph (2) of this paragraph.

(f) *Private organizations not concerned with foreign policy.* When the purpose and program of the organization do not fall primarily within the field of foreign policy or international relations, the employee's activity is limited only to the following extent:

(1) The employee's official title or connection may be used to identify the employee, as in a civic association election, but may not be used on a letterhead, in a publication, or otherwise so as to employ the prestige of the U.S. Government to enhance that of the organization or to imply official sponsorship.

(2) When the employee is a representative of an association consisting of State, AID, or ICA employees, or of a group of such employees, the employee's connection with the agency may be freely used so long as there is no implication of official sponsorship beyond that which may have been officially approved.

(g) *Political activities abroad.* A U.S. citizen employee shall not engage in any form of political activity in any foreign country.

(h) *Activities relating to U.S. politics.* The law (5 U.S.C. 7324, formerly the Hatch Act) provides in summary that it is unlawful for any Federal employee of the executive branch to use the employee's official authority or influence for the purpose of interfering with an election or affecting the result thereof, or to take any active part in political management or in political campaigns. These restrictions do not in any way affect the right of a Federal employee (1) to vote as the employee chooses; (2) to express personal political opinions, except as part of a campaign; (3) to make or refrain from making contributions to political organizations, provided contributions are not made in a Federal building or to another Federal officer or employee (see 18 U.S.C. 602, 603, 607, and 608); (4) to participate in local, nonpartisan activities.

§ 10.735-212 Wearing of uniforms.

(a) An employee of the Foreign Service may not wear any uniform except as may be authorized by law or as a military commander may require civilians to wear in a theater of military operations (22 U.S.C. 803). When an employee is authorized by law or required by a military commander of the United States to wear a uniform, care shall be taken that the uniform is worn only at authorized times and for authorized purposes.

(b) Conventional attire worn by chauffeurs, elevator operators, and other miscellaneous employees are not considered uniforms within the meaning of this section except that, for ICA, MOA VII 917.2b prohibits the purchase from Agency funds of uniforms or any item of personal wearing apparel other than special protective clothing.

§ 10.735-213 Recommendations for employment.

(a) *Making recommendations in official capacity.* In general, an employee shall not, in the employee's official capacity, make any recommendations in connection with the employment of persons unless the position concerned are with the Government of the United States and the recommendations are made in response to an inquiry from a Government official authorized to employ persons or to investigate applicants for employment. A principal officer in answer to a letter of inquiry from outside the U.S. Government concerning a former employee assigned to the post, may state the length of time the person was employed at the post and the fact that the former employee performed duties in a satisfactory manner, if such is the case. Also, an AID Mission Director may provide names of persons or firms from which a cooperating government may select an employee or firm to be used in some phase of the AID program.

(b) *Making personal recommendations.* An employee may make a personal recommendation in connection with the employment of any person, including present or former employees, their spouses and/or members of their families, except for employment in a position of trust or profit under the government of the country to which the employee is accredited or assigned (22 U.S.C. 806(b)): *Provided,* That the employee does not divulge any information concerning the person derived from official sources. When a letter of introduction or recommendation is written by an employee, precautionary measures should be taken to prevent its being construed as official correspondence and used by an unscrupulous individual to impress American or foreign officials. Accordingly, official stationery should not be used for this purpose. The letter may, however, show the recommending employee's status as an employee of the U.S. Government. Every personal letter of recommendation shall contain a statement clearly indicating that the letter constitutes a personal recommendation and is not to be construed as an official recommendation by the Government of the United States.

§ 10.735-214 Transmitting communications and gifts.

(a) *Correspondence.* In corresponding with anyone other than the proper official of the United States with regard to the public affairs of a foreign government, an employee shall use discretion and judgment to ensure that neither the United States nor the employee will be embarrassed or placed in a compromising position (22 U.S.C. 806(a)).

(b) *Communications.* An employee shall not act as an agent for the transmission of communications from private persons or organizations in foreign countries to the President or to Federal, State, or municipal officials in the United States. A chief of mission may, however, accept communications of this nature and forward them to the Department of State for such further action as may be appropriate, whenever the chief of mission determines it to be clearly in the public interest to do so.

(c) *Gifts.* An employee shall not act as an agent for the transmission of gifts from persons or organizations in foreign countries to the President or to Federal, State, or municipal officials of the United States. However, principal officers may, according to regulations prescribed by the President, accept, and forward to the Office of Protocol of the Department of State, gifts made to the United States or to any political subdivision thereof by the Government to which they are accredited or from which they hold exequaturs. Employees shall not, without the approval of the Secretary of State, transmit gifts from persons or organizations in the United States to heads or other officials of foreign states.

§ 10.735-215 General conduct prejudicial to the Government.

(a) An employee shall not engage in criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct, or other conduct prejudicial to the Government.

(b) An employee abroad is also obligated to obey the laws of the country in which the employee is present.

(c) An employee shall observe the requirements of courtesy, consideration, and promptness in dealing with or serving the public.

§ 10.735-216 Miscellaneous statutory provisions.

Each employee shall become acquainted with each statute that re-

V 4 3 1 8 5

lates to the employee's ethical and other conduct as an agency employee of and of the Government.

(a) The attention of employees is directed to the following statutory provisions:

(1) House Concurrent Resolution 175, 85th Congress, 2d session, 72 Stat. B12, the "Code of Ethics for Government Service."

(2) Chapter 11 of Title 18, United States Code, relating to bribery, graft, and conflicts of interest, as appropriate to the employees concerned.

(3) The prohibition against lobbying with appropriated funds (18 U.S.C. 1913).

(4) The prohibitions against disloyalty and striking (5 U.S.C. 7311, 18 U.S.C. 1918).[1]

(5) The prohibitions against (i) the disclosure of classified information (18 U.S.C. 798, 50 U.S.C. 783); and (ii) the disclosure of confidential information (18 U.S.C. 1905).

(6) The provision relating to the habitual use of intoxicants to excess (5 U.S.C. 7352).

(7) The prohibition against the misuse of a Government vehicle (31 U.S.C. 638a(c)).

(8) The prohibition against the misuse of the franking privilege (18 U.S.C. 1719).

(9) The prohibition against the use of deceit in an examination or personnel action in connection with Government employment (18 U.S.C. 1917).

(10) The prohibition against fraud or false statements in a Government matter (18 U.S.C. 1001).

(11) The prohibition against mutilating or destroying a public record (18 U.S.C. 2071).

(12) The prohibition against counterfeiting and forging transportation requests (18 U.S.C. 508).

(13) The prohibition against (i) embezzlement of Government money or property (18 U.S.C. 641); (ii) failing to account for public money (18 U.S.C. 643); and (iii) embezzlement of the money or property of another person in the possession of an employee by reason of the employee's employment (18 U.S.C. 654).

(14) The prohibition against unauthorized use of documents relating to claims from or by the Government (18 U.S.C. 285).

(15) The prohibition against political activities in subchapter III of chapter 73 of title 5, United States Code and 18 U.S.C. 602, 603, 607, and 608.

(16) The prohibition against an employee acting as the agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219).

(17) The prohibition against discrimination because of politics, race, religion, or color (22 U.S.C. 807).

(18) The prohibition against officers or employees accepting any honorarium in excess of $2,000 or honoraria aggregating more than $25,000 in any calendar year (sec. 112, Pub. L. 94-283, 90 Stat. 494 (2 U.S.C. 441i)).

(b) The attention of consular officers is directed to the following statutory provisions:

(1) The provisions relating to the duty to account for fees received (22 U.S.C. secs. 9, 812, 1194), liability for exaction of excessive fees (22 U.S.C. secs. 1182, 1189), and liability for failure to collect proper fees (222 U.S.C. 1190).

(2) The provisions relating to liability for failure to give bond and for embezzlement (22 U.S.C. 1179), liability for embezzlement of fees or effects of American citizens (22 U.S.C. 1198), and liability for falsely certifying as to the ownership of property (22 U.S.C. 1200).

(3) The prohibition against profiting from dealings with discharged seamen (22 U.S.C. 1187).

(4) The provision relating to liability for failure to collect the wages of discharged seamen (46 U.S.C. 683).

§ 10.735-217 Requesting exceptions from certain statutory prohibitions.

(a) Any employee desiring a written advance determination that the prohibitions of 18 U.S.C. 208(a) do not apply will prepare a written request addressed to an appropriate agency official. For purposes of this section, the appropriate agency official is: The Deputy Under Secretary for Management for State, the Administrator for AID, and the Director for ICA. The request will describe the particular matter giving rise to the conflict of interest, the nature and extent of the employee's anticipated participation in the particular matter, and the exact nature and amount of the financial interest related to the particular matter.

(b) The employee will forward the request to the appropriate agency official through the immediate supervisor and the assistant agency head in charge of the organizational agency component to which the employee is assigned, or will be assigned in the case of a new employee. The assistant agency head will forward the written request to the appropriate agency official through the agency's Counselor. The Counselor shall attach a written opinion to the request, prepare a recommended written determination in final form for signature by the appropriate agency official, and shall forward all documents to that official.

(c) The determination of the appropriate agency official will be sent to the employee by the Counselor. If the appropriate agency official grants the requested exception, the original written advance determination will be sent to the employee. A duplicate original shall be retained among the appropriate agency records under the control of the Counselor.

Subpart C—Ethical and Other Conduct and Responsibilities of Special Government Employees

§ 10.735-301 Conflicts of interest.

Special Government employees are subject to the conflicts of interest statutes (18 U.S.C. 202). An explanation of these conflicts of interest statutes their effects upon special Government employees and guidelines for obtaining and utilizing the services of special Government employees are in Appendix C of Chapter 735 of the Federal Personnel Manual. A special Government employee shall not have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with Government duties and responsibilities.

§ 10.735-302 Use of Government employment.

A special Government employee shall not use Government employment for a purpose that is, or gives the appearance of being, motivated by the desire for private gain for the employee or another person, particularly one with whom the employee has family, business, or financial ties.

§ 10.735-303 Use of inside information.

(a) A special Government employee shall not use inside information obtained as a result of Government employment for private gain for the employee or another person either by direct action on the employee's part or by counsel, recommendation, or suggestion to another person, particularly one with whom the employee has family, business, or financial ties. For the purpose of this section, "inside information" means information obtained under Government authority which has not become part of the body of public information.

(b) A special Government employee may engage in teaching, lecturing, or writing that is not prohibited by law, Executive Order 11222 or the restrictions in this part; however, a special Government employee shall not, either for or without compensation, engage in teaching, lecturing, or writing that is dependent on information obtained as a result of his Government employment, except when that information has been made available to the general public or will be made available, or when the head of the agency gives written authorization for the use of nonpublic information on the basis that the use is in the public interest. A special Government employee who wishes to request the agency head to authorize the use of nonpublic information should submit such request through the Counselor. The request should contain complete information concerning the nonpublic information which the employee wishes to disclose and should contain in addition an indication of the intended use of such information and how disclosure of it would be in the public interest.

§ 10.735-304 Coercion.

A special Government employee shall not use Government employment to coerce, or give the appearance of coercing, a person to provide financial benefit to the employee or another person, particularly one with whom the employee has family, business, or financial ties.

§ 10.735-305 Gifts, entertainment, and favors.

(a) Except as provided in paragraph (b) of this section, a special Government employee, while so employed or in connection with Government employment, shall not receive or solicit from a person having business with the employee's agency anything of value as a gift, gratuity, loan, entertainment, or favor for the employee or another person, particularly one with whom the employee has family, business or financial ties.

(b) The exceptions to the prohibition against the acceptance of gifts which have been granted to employees in § 10.735-202 (b), (c), and (d) are also applicable to special Government employees.

(c) A special Government employee shall not accept a gift, present, decoration, or other thing from a foreign government unless authorized by Congress as provided by the Constitution and in 5 U.S.C. 7342, and the regulations promulgated thereunder pursuant to E.O. 11320; 31 FR 15789. These regulations are set forth in Part 3 of this title (as added, 32 FR 6569, April 28, 1967), and in 3 FAM 621.

(d) A special Government employee shall avoid any action, whether or not specifically prohibited by these sections on special Government employees, which might result in, or create the appearance of:

(1) Using public office for private gain;

(2) Giving preferential treatment to any person;

(3) Impeding Government efficiency or economy;

(4) Losing independence or impartiality;

(5) Making a Government decision outside official channels; or

(6) Affecting adversely the confidence of the public in the integrity of the Government.

§ 10.735-306 Miscellaneous statutory provisions.

Each special Government employee shall become acquainted with each statute that relates to the employee's ethical and other conduct as a special Government employee of an agency and of the Government. The attention of special Government employees is directed to the statutes listed in § 10.735-216.

Subpart D—Statements of Employment and Financial Interests

§ 10.735-401 Employees required to submit statements.

The following employees of State, AID, and ICA shall submit statements of employment and financial interests:

(a) All special Government employees including experts or consultants serving on a full-time or intermittent basis, except when waived under § 10.735-402(c).

(b) Employees paid at a level of the Executive Schedule in subchapter II of chapter 53 of title 5, United States Code, except as provided in § 10.735-402(b).

(c) Except as provided in § 10.735-402, employees classified at GS-13, FSO-4, FSR-5, FSS-2, AD-13, FC-5, or above, who are in positions hereby identified either as positions the basic duties of which impose upon the incumbent the responsibility for a Government decision or taking a Government action in regard to:

(1) Contracting or procurement;

(2) Administering or monitoring grants or subsidies;

(3) Regulating or auditing private or other non-Federal enterprise;

(4) Other activities where the decision or action has an economic impact on the interests of any non-Federal enterprise, or as positions which have duties and responsibilities which require the incumbent to report employment and financial interests in order to avoid involvement in a possible conflict of interest situation and carry out the purpose of law, Executive order, and the agency's regulations:

STATE

Director General; of the Foreign Service and the Director of Personnel; Director of the Policy Planning Staff; Inspector General; Director, FSI; Special Assistant to Secretary; Deputy Secretary, Under Secretaries, or Deputy Under Secretary; Deputy Assistant Secretary and others at this level or above; Assistant Legal Adviser for Management; Director, Office of Operations; Office Director; Country Director; Division Chief in Bureau of Economic and Business Affairs, in the Office of Operations, (O/OPR), or in the Office of Foreign Buildings; Executive Director; Deputy Chief of Mission; Principal Officer; Economic Counselor; Commercial Counselor; Administrative Counselor; Civil Air Attache; Petroleum Officer; Minerals Officer; Contracting Specialist; Procurement Specialist; Despatch Agent; Traffic Manager; and Traffic Management Specialist.

ICA

Deputy Director, Associate Directors, Directors and Deputy Directors of Offices or Services, Executive or Special Assistants to the Director; Chief Inspector; Associate Chief Inspector; Commissioner General, Deputy Commissioner General, Staff Director (Advisory Commission), Director of Engineering and Technical Operations; Director of Audio-Visual Procurement and Production; Country Public Affairs Officer, Deputy Country Public Affairs Officer, Public Affairs Counselor, Deputy Public Affairs Counselor, Director or Manager of Regional Service Center, Radio Relay Station, Radio Program Center or Radio Relay Station Construction Site, Administrative Officer or Executive Officer at a post abroad, Administrative Officer, Executive Officer and Business Manager (occupational codes 301, 340, 341, and 1101, or FAS code 200); Contracting Specialist and Procurement Specialist (occupational code 1102, or FAS code 210 and 211); Auditor and Accountant (occupational code 510, or FAS code 207); General Counsel, Deputy General Counsel, or Attorney (occupational code 905, or FAS code 512).

AID

(1) AID/W: Deputy Assistant Administrators, Associate Assistant Administrators, Deputy Associate Assistant Administrators; Heads and Deputy Heads of Offices, Staffs, and Divisions; Desk Officers and Deputy Desk Officers.

(2) Overseas: Mission Directors, Deputy Directors, Assistant Directors, AID Representatives, Aid Affairs Officers, Chairman, Development Assistance Committee; U.S. Representative to Development Assistance Committee; Development Coordination Officer.

(3) Any person serving as chief of an operational branch responsible for housing, loans, guarantees, or other commercial type transactions with the public.

(4) In addition, employees in AID/W or overseas whose positions fall within the following series or position titles (occupational code given in parenthesis): Economist Series (0110); International Cooperation Series (0136); Auditor General (0301.21); Supervisory Housing Development Officer (0301.31); Chief, Housing and Urban Development (0301.35); Contract Compliance Specialist (0301.48); Director for Regional Activities (0340.08); Development Officer (0340.09); Regional Development Officer (0340.10); Executive Officer (0341.01); Deputy Executive Officer (0341.02); Regional Executive Officer (0341.03); Administrative Officer (0341.05); Executive Officer—Administrative Support (0341.15); Executive Officer, Operations (0341.16); Executive Officer, Real Property (0341.18); Executive Officer, Personnel (0341.19); General Services Officer (0342.01); Assistant General Services Officer (0342.03); Assistant General Services Officer, Property and Supply (0342.20); Assistant General Services Officer, Procurement (0342.23); Assistant General Services Officer, Housing (0342.25); Program Officer (0345.01); Deputy Program Officer (0345.02); Food and Agriculture Officer (0401.01); Deputy Food and Agriculture Officer (0401.02); Budget and Accounting Series (0504); Financial Management Series (0505); Accounting Series (0510); Budget Administration Series (0560); General Attor-

[1] The Courts have stricken from the Code any prohibition against assertion of the right to strike on the basis that such an assertion is a protected right under the First Amendment to the Constitution.

V 43 — 85

ney Series (0905); General Business and Industry Series (1101); Contract and Procurement Series (1102); Property Disposal Series (1104); Purchasing Series (1105); Trade Specialist Series (1140); Private Resources Development Series (1150); Financial Analysis Series (1160); General Investigating Series (1810); Criminal Investigating Series (1811); Import Specialist Series (1889); General Supply Series (2001); Supply Program Management Series (2003).

§ 10.735–402 Employees not required to submit statements.

(a) Employees in positions that meet the criteria in paragraph (c) of § 10.735–401 may be excluded from the reporting requirement when the agency head or designee determines that:

(1) The duties of the position are such that the likelihood of the incumbent's involvement in a conflict-of-interest situation is remote;

(2) The duties of the position are at such a level of responsibility that the submission of a statement of employment and financial interests is not necessary because of the degree of supervision and review over incumbent or the inconsequential effect on the integrity of the Government.

(b) a statement of employment and financial interests is not required by the regulations in this part from an agency head, or a full-time member of a committee, board, or commission appointed by the President. These employees are subject to separate reporting requirements under section 401 of Exective Order 11222.

(c) Special Government employees not required to submit statements. An agency head may waive the requirement of this section for the submission of a statement of employment and financial interest in the case of a special Government employee who is not a consultant or an expert when the agency finds that the duties of the position held by that special Government employee are of a nature and at such a level of responsibility that the submission of the statement by the incumbent is not necessary to protect the integrity of the Government. For the purpose of this paragraph, "consultant" and "expert" have the meanings given those terms by Chapter 304 of the Federal Personnel Manual, but do not include a physician, dentist, or allied medical specialist whose services are procured to provide care and service to patients.

§ 10.735–403 Employee's complaint on filing requirement.

Each employee shall have the opportunity for review through agency grievance procedure of the employee's complaint that the employee's position has been improperly included within § 10.735–401 as one requiring the submission of a statement of employment and financial interests. Employees are reminded that they may obtain counseling pursuant to § 10.735–103 prior to filing a complaint.

§ 10.735–404 Time and place of submission, and forms.

(a) An employee or special Government employee shall submit a statement to the Counselor (in the case of a State employee, through the employee's Bureau) no later than:

(1) Ninety days after the effective date of this part if the employee has entered on duty on or before that effective date; or

(2) At least 10 days prior to entrance on duty, if the employee enters on duty after that effective date; except that an employee or special Government employee who enters on duty within 90 days of the effective date of this part may submit such statement within 90 days after entrance on duty.

(b) Only the original of the statement or supplement thereto required by this part shall be submitted. The individual submitting a statement should retain a copy for the individual's own records.

§ 10.735–405 Information required.

(a) *Employees.* Employees' statement of employment and financial interests required by the regulations in this part shall be submitted on the form, "Confidential Statement of Employment and Financial Interests (for use by Government Employees)", Form OF-106, and shall contain all the information therein required.

(b) *Special Government employees.* All special Government employees shall submit statements of employment and financial interest on the form, "Confidential Statement of Employment and Financial Interests (for use by Special Government Employees)", Form OF-107 for State and ICA, Form AID 4-450 for AID, and shall contain all the information therein required.

(c) *Interests of employee's relatives.* The interest of a member of an employee's family is considered to be an interest of the employee. The term "member of an employee's family" is defined in § 10.735-102(f).

(d) *Information not known by employees.* If any information required to be included on a statement of employment and financial interests or supplementary statement, including holdings placed in trust, is not known to the employee but is known to another person, the employee shall request that other person to submit information in the employee's behalf.

(e) *Interests not required to be reported.* An employee need not disclose those financial interests described in § 10.735–205(c) as being too remote or too inconsequential to affect the integrity of employees' services.

(f) *Information not required.* The regulations in this part do not require an employee to submit on a statement of employment and financial interests or supplementary statement any information relating to the employee's connection with, or interest in, a professional society or a charitable, religious, social, fraternal, recreational, public service, civic, or political organization or a similar organization not conducted as a business enterprise. For the purpose of this section, educational and other institutions doing research and development or related work involving grants or money from or contracts with the Government are deemed "business enterprises" and are required to be included in an employee's statement of employment and financial interests.

§ 10.735–406 Submission of position description.

Each Statement of Employment and Financial Interests or annual supplement thereto must be accompanied by a full description of the employee's principal governmental duties. The description should be particularly detailed in regard to those duties which might possibly be an element in a conflict of interest. If the statement indicates that the employee has no outside employment or financial interests, the employee need not submit a description of duties. For a special Government employee, the employing office shall submit the description.

§ 10.735–407 Supplementary statements.

(a) Employees, as defined in paragraphs (b) and (c) of § 10.735–401, shall report changes in, or additions to, the information contained in their statements of employment and financial interests in supplementary statements as of June 30 each year. If no changes or additions occur, a negative report is required.

(b) All special Government employees, as defined in paragraph (a) of § 10.735–401, shall submit a current statement at the time their appointments are extended. A supplementary report indicating any changes in, or additions to the information already submitted will be accepted in lieu of a full submission. If there are no changes or additions, a negative report is required. For AID, no action to extend an appointment will be taken unless such supplementary report is submitted not later than 10 days prior to the expiration of said appointment.

(c) Notwithstanding the filing of reports required by this section, each employee shall at all times avoid acquiring a financial interest that could result, or taking an action that would result, in a violation of the conflicts-of-interest provisions of section 208 of title 18, United States Code, or subpart B of this part.

(d) An employee is also to keep current the employee's description of

principal duties as to changes or additions which might possibly be an element in a conflict of interest. The employing office shall submit descriptions of changes in the principal duties of a special Government employee as they occur.

§ 10.735.408 Review of statements and determination as to conflicts of interest.

(a) On the basis of the Statement of Employment and Financial Interests submitted by each employee or special Government employee, or on the basis of information received from other sources, the Counselor shall determine, in the light of the duties which that employee or special Government employee is or will be performing, whether any conflicts of interest, real or apparent, are indicated. The Counselor shall make this determination based on the applicable statutes, the Executive order, and the applicable regulations of the Civil Service Commission, and of the agency.

(b) Where the Counselor's determination in a particular case is that a conflict of interest, real or apparent, is indicated, the Counselor shall initiate informal discussions with the employee or special Government employee concerned. These discussions shall have as their objectives:

(1) Providing the individual with a full opportunity to explain the conflict or appearance of conflict; and

(2) Arriving at an agreement (acceptable to the Counselor, the individual and the individual's immediate superior) whereby the conflict of interest may be removed or avoided. Such an agreement may include, but is not limited to: (i) Changes in assigned duties; (ii) divestiture of the financial or employment interest creating the conflict or apparent conflict; or (iii) disqualification for a particular assignment.

(c) Where an acceptable agreement cannot be obtained pursuant to paragraph (b) of this section, the Counselor shall present findings and recommendations to the officer designated by the agency head, who shall decide which remedy is most appropriate to remove or correct that conflict or apparent conflict. Remedial action under this paragraph may include disciplinary action, including separation for cause, or any of the actions enumerated in subparagraph (2) of paragraph (b) of this section and shall be effective in accordance with applicable laws, Executive orders, and regulations.

(d) Written summaries of all agreements and decisions arrived at pursuant to paragraph (b) or (c) of this section shall be placed in the Counselor's files. Copies shall also be made available to the employee or special Government employee concerned.

§ 10.735–409 Confidentiality of employees' statements.

An agency shall hold each statement of employment and financial interests, and each supplementary statement, in confidence. To insure this confidentiality only the Counselor and Deputy Counselors are authorized to review and retain the statements. The Counselor and Deputy Counselors are responsible for maintaining the statements in confidence and shall not allow access to, or allow information to be disclosed from, a statement except to carry out the purpose of this part. An agency may not disclose information from a statement except as the Civil Service Commission or the agency head may determine for good cause shown.

§ 10.735–410 Effect of employees' statements on other requirements.

The statements of employment and financial interests and supplementary statements required for employees are in addition to, and not in substitution for, or in derogation of, any similar requirement imposed by law, order, or regulation. The submission of a statement or supplementary statement by an employee does not permit the employee or any other person to participate in a matter in which the employee or the other person's participation is prohibited by law, order, or regulation. Save with respect to those financial interests excepted from the conflict of interest prohibitions of 18 U.S.C. 208(a) pursuant to a written advance determination under § 10.735–217 or exempted by the provisions of § 10.735–205(c), an employee must disqualify himself or herself from participating in any matter in which the employee has a financial interest.

§ 10.735–411 Disqualification procedures.

(a) Where an employee is prohibited from participating in a matter because of a conflicting financial interest that is not exempt under § 10.735–205(c) or has not been specifically excepted by the appropriate agency official pursuant to § 10.735–217 in advance of the employee's participation in the particular matter, the employee shall conduct himself or herself in accordance with the following provisions:

(1) The employee shall promptly disclose the financial interest in such matter to the employee's immediate superior. The superior will thereupon relieve the employee of duty and responsibility in the matter.

(2) In foreign posts, it may be impossible or highly impracticable for an employee, who has a disqualifying financial interest, to assign the matter for official action to anyone other than a subordinate. In this event, the employee must instruct the subordinate to report fully and directly to the immediate superior to whom the employee himself or herself would normally report. The employee must concurrently direct such subordinate to take such action as may be appropriate in the matter, and without thereafter revealing to the disqualified employee in any way any aspect of the particular matter.

(b) Nothing herein precludes the employee from disposing of such disqualifying financial interest, thereby wholly eliminating the conflict of interest. In some circumstances, where the employee may not obtain an exception under § 10.735–217, or may not disqualify himself or herself and refer or assign the matter to another employee, the performance of duty may even require divestiture.

(c) Where a supervisor has reason to believe that a subordinate employee may have a conflicting financial interest, the supervisor should discuss the matter with the employee. If the supervisor finds that a conflict of interest does exist, the supervisor must relieve the subordinate employee of duty and responsibility in the particular matter.

(d) The obligation to avoid conflicts of interest is upon each employee. It is a continuing obligation calling for alert vigilance.

(e) Notwithstanding any other provision of this part to the contrary, if a employee's holdings rise in value above the amount exempted by § 10.735–205(c), then the statutory and regulation prohibitions apply in a conflict of interest situation.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

[Last listing: May 1, 1978]

V 4 3 — 8 6

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 4]

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This order suspends an order provision affecting the regulatory status of fluid milk distributing plants. The suspension was requested by two cooperative associations to continue the association of producers' milk with the order. The suspension is for the period April through August 1978.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202-447-7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of proposed suspension—issued April 10, 1978, published April 17, 1978 (43 FR 16185).

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Middle Atlantic marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (43 FR 16185) concerning a proposed suspension of certain provisions of the order. Interested persons had an opportunity to comment on the proposed suspension in writing. Six cooperatives and a proprietary handler filed comments supporting the suspension. A proprietary handler opposed the suspension.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, the comments received and other available information, it is found and determined that for the months of April through August 1978, the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1004.7(a) the words "not less than 50 percent".

STATEMENT OF CONSIDERATION

The suspension will make inoperative for the period April through August 1978 the provision that at least 50 percent of the receipts of milk at a pool distributing plant be disposed of as Class I milk.

The suspension was requested by Maryland Cooperative Milk Producers Association, Inc., and Lehigh Valley Cooperative Farmers. The suspension is supported by four other cooperative associations and a proprietary handler. A proprietary handler opposed the suspension.

Substantially increased milk production by Middle Atlantic producers is not being matched by Class I sales. This will jeopardize the pooling of some distributing plants during the April through August period. This will occur because less than 50 percent of the receipts at such plants would be disposed of as Class I milk. The suspension will remove this percentage of distribution as a requirement for pooling a distributing plant.

There is every likelihood that milk production for the market will increase in the months ahead, without much prospect that Class I sales will strengthen materially.

Specific instances reflecting general marketing conditions were cited by two cooperative associations and a proprietary handler.

The Maryland Cooperative Milk Producers supplies Class I milk to distributing plants serving the Baltimore segment of the market. The continuing impact of substantially lower Class I sales that resulted when a major customer closed a distributing plant last year will jeopardize the pooling of some of the plants in the coming months of heavy milk production. This will occur because the reserve milk resulting from the reduced Class I sales, and the increased milk production, must be associated with distributing plants for pooling.

The Lehigh Valley Cooperative Farmers distributes fluid milk through its own distributing plant. Increased milk production from its producers will jeopardize the pooling of the plant because Class I sales are not matching the increased production.

Milk deliveries by producers supplying a pool distributing plant operated by a proprietary handler have increased. The handler's Class I sales have decreased, and he anticipates further decline in Class I sales during the period April through August, including those resulting from school closings. Without the suspension, the handler anticipates that his pool distributing plant may shortly fail to qualify for pooling. This would jeopardize the producer status of dairy farmers who have regularly supplied his plant.

A proprietary handler opposed the suspension because one of the cooperatives that proposed it is soliciting additional producers. Apparently, he believes that resulting increased milk volume may be jeopardizing the continued pool status of the cooperative's distributing plant. In his view, the suspension should not be made to accommodate this situation.

Comments that were filed in response to the notice of proposed suspension established that the problem of continued pooling for some distributing plants during the months of April through August is more widespread than the opposing handler indicated. Such problem is attributable primarily to substantially increased milk production for the market that is not being matched by increased Class I sales.

It is concluded that the suspension is necessary to assure that producers who are regular suppliers of milk for the fluid market will continue to have their milk pooled under the order during the period April through August 1978.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that the suspension does not require of persons affected substantial or extensive preparation prior to the effective date, and notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1438—NAVAL STORES

Subpart—1978 Crop Gum Naval Stores Loan Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This rule provides the Commodity Credit Corporation's ("CCC") determinations and regulations concerning a loan program for the 1978-crop gum naval stores, which is authorized by the Agricultural Act of 1949, as amended. The loan program stabilizes market prices and protects producers, processors, and consumers. The program enables producers to obtain price support on 1978-crop gum naval stores.

DATE: Effective May 3, 1978.

ADDRESS: Producer Associations Division, Agricultural Stablilzation and Conservation Service, P.O. Box 2415, U.S. Department of Agriculture, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Roger Cooley ASCS, 202-447-7405.

SUPPLEMENTARY INFORMATION: On February 6, 1978, CCC published a notice in the FEDERAL REGISTER (43 FR 4865) that CCC proposed to make determinations and issue regulations concerning a loan program for 1978-crop gum naval stores. No purchase program was under consideration. All comments received from the American Turpentine Farmers Association and producers were favorable.

Accordingly, the regulations appearing in this subpart, which were published at 42 FR 43961, are revised to read as follows, effective as to 1978-crop gum naval stores. The material previously appearing in this subpart remains in full force and effect as to the crop years to which it was applicable.

Subpart—1978 Gum Naval Stores Loan Program

AUTHORITY: Sec. 4(d), 62 Stat. 1070 (15 U.S.C. 714 b); sec. 5(a), 62 Stat. 1072 (15 U.S.C. 714c), and secs. 301, 401, 63 Stat. 1053, 1054 (7 U.S.C. 1421, 1447).

Subpart—1978 Gum Naval Stores Loan Program

§ 1438.1636 General statement and administration.

CCC will make loans available to producers of gum naval stores during the calendar year 1978 through the American Turpentine Farmers Association (herein referred to as ATFA), under the terms and conditions described in these regulations. The Producer Associations Division, ASCS, will supervise the administration of the program.

§ 1458.1637 Definitions.

(a) "Eligible producer" means, a producer who: (1) Is a member of ATFA in good standing under membership requirements approved by CCC (no producer who is otherwise eligible may be excluded from membership in ATFA), (2) is a participant in the Naval Stores Conservation Program for 1978 or otherwise follows one or more forestry conservation practices established by State and Federal Forestry services, as determined by ATFA, (3) has made satisfactory arrangements to pay an indebtedness to the U.S. Department of Agriculture or any of its agencies, as evidenced by the debt records maintained by the Agricultural Stabilization and Conservation County Committees of the U.S. Department of Agriculture, and (4) has executed, and has not breached his obligations under, the Producer's Marketing Agreement (ATFA Form 1-1978), or any other similar agreement.

(b) "Eligible naval stores" means eligible rosin and rosin content in eligible oleoresin.

(c) "Eligible oleoresin" means oleoresin (1) which was produced in 1978 in the United States by an eligible producer, (2) which is free and clear from all liens and encumberances, (3) the rosin content in which has not been previously pledged for a loan under this or any similar program, and in which the beneficial interest is and always has been in the producer, and (4) which will yield rosin of the grades and quality prescribed in paragraph (d) of this section.

(d) "Eligible rosin" means gum rosin which (1) was processed by the Olustee or similar method from eligible oleorosin, (2) grades "K" or better, (3) is free and clear from all liens and encumbrances, (4) has not previously been pledged for a loan under this or any similar program, and in which the beneficial interest is and always has been in the producer: *Provided,* that, when a producer's eligible oleoresin was commingled in the processing operation with oleoresin produced in the United States by other producers, the rosin tendered for advance by the producer, as representing the processed equivalent of his eligible oleoresin, will be deemed to be, if otherwise eligible, rosin produced by such producer, (5) is packed to a net weight of 517 pounds, in eligible metal drums, (6) is transparent, (7) is free from visible foreign materials and contains no extraneous matter resulting from chemical or other treatment of the rosin, or of the oleoresin or the trees from which it came, and (8) conforms as to softening point to not less than Federal Specifications LLL-R-626b, wit: 158° Fahrenheit (American Society for Testing Materials No. E-28-67). Rosin must be federally graded, inspected and weighted or the weights checked by Federal Inspectors employed or licensed by CCC.

(e) "Eligible metal drums" means drums conforming to the specifications for metal drums approved by CCC, obtainable from and on file in the office of ATFA.

§ 1438.1638 Loan to ATFA.

Under a Loan Agreement, CCC will make a loan to ATFA which will enable ATFA to make loan advances to eligible producers on eligible naval stores. As security for such loan, ATFA will pledge such naval stores to CCC; CCC has the right to establish a maximum aggregate disbursement at any time upon written notice to ATFA, but no such limitation shall apply with respect to naval stores tendered to ATFA by producers prior to such notice. The loan will be in an amount equal to (a) the amount of the loan advances made by ATFA to producers, except that the loan will be made only on full drums of eligible naval stores, (b) the administrative and operating expenses, approved by CCC, incurred by ATFA in making advances available to producers, and in the handling, preservation, and redemption of pledged naval stores, and (c) storage charges or other charges on pledged naval stores up to the time of acquisition of title thereto by CCC. The loan by CCC to ATFA shall bear interest at the rate of six (6) percent per annum or such other rate as may be determined applicable by CCC to 1978 loans.

§ 1438.1639 Advances to producers.

ATFA will make advances to eligible producers on eligible naval stores only when such naval stores have been (a) processed (except where CCC and ATFA determine that unprocessed rosin content in oleoresin may be offered for advance), (b) placed in storage in the custody of an approved warehouseman who has entered into and is fully complying with a Warehouse Agreement (ATFA Form 2-19750) with ATFA, or in the custody of ATFA acting under a Storage Agreement with CCC, and (c) offered for an Advance on a Producer's Offer (ATFA Form 4), the date of which, unless a first offer and dated not later than September 1, 1978, shall be not later than thirty days from the date of delivery of eligible oleoresin to a processor, but in no event later than December 31, 1978, by the producer of the oleoresin, the rosin content of which or processed rosin from which has been so placed in storage. No warehouseman will be authorized to store pledged unprocessed rosin except upon approval by CCC of ATFA's written recommendation therefor and written demonstration by ATFA that there exists an immediate and substantial need for such storage. If there are any liens or encumbrances on the naval stores offered for advance, proper waivers are required on a Lienholder's Waiver and Agreement (ATFA Form 3). All processing charges, including the cost of eligible metal drums for rosin, and storage and other warehouse charges to the date of tender for advance, will be borne by the producer.

§ 1438.1640 Rate of Advance to producers.

ATFA will make advances to eligible producers on eligible rosin or rosin content only, based on the support level of $65.00 per standard barrel (435 lbs. net weight each) of oleoresin (crude pine gum), processed basis. Although no advance is made on turpentine, an allowance is made for the estimated 1978 market value of the turpentine content in a barrel of oleoresin in determining the advance rate for rosin or rosin content. The loan rates on rosin are $21.40 for grade WG, $22.20 for grades X and WW, $21.00 for Grade N, $20.60 for Grade M, and $20.00 for Grade K, per hundred pounds net, packed in eligible metal drums. CCC reserves the right to reduce rosin loan rates if the actual turpentine market price during 1978, when added to such rosin loan rates, results in a support level for crude pine gum in excess of 90 percent of parity. Also, CCC may increase or decrease grade premiums and discounts whenever market conditions warrant. ATFA will make advances to any eligible producer on the basis of the applicable advance rates in effect on the date of the applicable Producer's Offer.

§ 1438.1641 Maturity of loan.

The loan made by CCC to ATFA will be due and payable upon demand.

§ 1438.1642 Redemption by ATFA.

ATFA's right to redeem naval stores pledged by ATFA to CCC shall be subject to the terms and conditions of the Loan Agreement and any amendments thereto. Redemption shall be made upon payment of the redemption cost. The redemption cost will be determined by CCC and will be the amount outstanding under the Loan Agreement, including any unpaid accrued expenses and charges, plus interest applied ratably to the naval stores to be redeemed. Any naval stores redeemed will not be thereafter eligible for loan.

§ 1438.1643 Net gains.

ATFA will disburse in cash on a fair and equitable basis to participating producers all net gains, less cost of disbursement, resulting from ATFA's sale of redeemed naval stores, unless a disposition other than cash disbursement has been approved by CCC. For example, when net gains are insufficient to justify disbursement expense, ATFA may upon request to and approval of CCC, utilize such net gains for and in behalf of all of its producer member.

§ 1438.1644 Right of CCC upon maturity.

Upon maturity and nonpayment of the loan, CCC will take title to any unredeemed naval stores, without a sale thereof, and CCC will have no obligation to pay or account to ATFA for any market value which such naval stores may have in excess of the amount of the loan, plus interest and charges.

§ 1438.11645 Personal liability.

Any fraudulent representation by ATFA or the producer in the program documents will render ATFA or the producer subject to criminal prosecution under applicable law, and personally liable for the amount by which the proceeds received upon the disposition of the naval stores involved are less than the amount of indebtedness incurred by ATFA with respect to such naval stores.

Signed at Washington, D.C., on April 26, 1978.

RAY FITZGERALD,
Executive Vice President,
Commodity Credit Corporation.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

EXPORT AND IMPORT OF NUCLEAR FACILITIES AND MATERIALS

Approval by Comptroller General

AGENCY: U.S. Nuclear Regulatory Commission

ACTION: Final rule. Approval of reporting and record keeping requirements by Comptroller General.

SUMMARY: On February 17, 1978, the Nuclear Regulatory Commission published in the FEDERAL REGISTER a notice of rulemaking, effective May 3, 1978, issuing a new part providing for standards, procedures, and rules of practice for licensing the export and import of utilization facilities, source, byproduct, and special nuclear materials. Conforming changes were made also to other parts of the regulations relating to export and import matters.

The notice included a note as follows:

NOTE.—The Nuclear Regulatory Commission has submitted this rule to the Comptroller General for such reviews as may be appropriate under the Federal Reports Act, as amended, 44 U.S.C. 3512. The date on which the reporting requirement of this rule becomes effective, unless advised to the contrary, accordingly reflects inclusion of the 45-day period which that statute allows for such review (44 U.S.C. 3512 (c)(2).)

The reporting and record keeping requirements set out in the rule have been approved by the U.S. General Accounting Office under number B-180225 (R0 519).

EFFECTIVE DATE: May 3, 1978.

The reporting and record keeping requirements set out in 10 CFR Part 110 which was published in the FEDERAL REGISTER on February 17, 1978 (43 FR 6915) have been approved by the U.S. General Accounting Office under number B-180225 (R0 519) and the effective date of the rule is May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-492-7211

Dated at Bethesda, Md. this 28th day of April 1978.

CHAPTER II—FEDERAL ENERGY ADMINISTRATION [1]

PART 213—OIL IMPORT REGULATIONS

Oil Import Allocations for 1978–1979

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: Presidential Proclamation 3279, as amended, provides for an annually decreasing quantity of oil imports not subject to the license fees otherwise imposed by the Proclamation. For the next allocation period, which begins on May 1, 1978 and ends on April 30, 1979, the quantity of oil which may be imported without being subject to the fee is thirty-five percent of the level which was originally established in 1973. This rulemaking revises the Oil Import Regulations to conform them to the allocation levels established by the Proclamation for the next allocation year.

EFFECTIVE DATE: Date of issuance.

FOR FURTHER INFORMATION CONTACT:

Robert D. R. de Sugny, Office of General Counsel, Department of Energy, Room 5116, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, 202-566-9380.

Robert R. Moore, Office of Oil Imports, Department of Energy, Room 6114, 2000 M Street NW., Washington, D.C. 20461, 202-254-8620.

Gerald P. Emmer, Allocation Regulations, Department of Energy, Room 2304, 2000 M Street NW., Washington, D.C. 20461, 202-254-7200.

SUPPLEMENTARY INFORMATION:

I. Background
II. Comparison With Proposed Rule
III. Evaluation of Comments
IV. Regulation Prescribed

I. Background

Under the Mandatory Oil Import Program established pursuant to Presidential Proclamation No. 3279, as amended, the next allocation period for imports not subject to license fees under section 3(a)(1)(i)-(ii) of the Proclamation will commence on May 1, 1978. Section 8 of the Proclamation provides that for this allocation period the maximum levels of imports subject to allocation and license to which license fees under section 3(a)(1)(i)-(ii) shall not be applicable shall be reduced to thirty-five percent (35%) of the levels established during the calendar year 1973.

II. Comparison With Proposed Rule

On March 24, 1978, the Economic Regulatory Administration of the Department of Energy issued proposed amendments to part 213 of Chapter II, title 10 of the Code of Federal Regulations (43 FR 13386, March 30, 1978), to provide for the commencement of the next allocation period and to reduce the levels of fee-exempt allocations in accordance with Presidential Proclamation 3279, as amended. It was also proposed that one paragraph be added to §§ 213.12(b) and 213.13(b) to provide for the contingency that the aggregates of the individual allocations derived from the formulae might exceed the levels of fee-free allocations permitted by the Proclamation. In such an event the additional paragraphs provided for a pro-rata reduction in each individual allocation. No other substantive changes were proposed.

The proposed rule provided for the submission of written comments and a public hearing which was subsequently cancelled after no requests to speak were received. After an evaluation of these comments it has been determined to adopt the proposal without change.

III. Evaluation of Comments

Of the five comments submitted, only two addressed the specific changes which had been proposed and both comments were favorable. The other comments addressed general issues arising from the Oil Import and Entitlements Programs which were beyond the purview of this rulemaking which merely conforms the Department's regulations to the levels established in Presidential Proclamation 3279 for the next allocation year. The issues raised in the comments continue to be studied by the Department and may result in additional proposed rulemakings in the future. Such issues, however, have no bearing on the proposal at hand.

IV. Regulation Prescribed

After careful consideration of the comments, the Economic Regulatory Administration has decided not to make any changes in the amendment as proposed.

In consideration of the foregoing, part 213 of chapter II, title 10 of the Code of Federal Regulations, is amended as set forth below.

Issued in Washington, D.C., on April 28, 1978.

HAZEL R. ROLLINS,
Deputy Administrator Economic Regulatory Administration.

§ 213.5 [Amended]

1. Section 213.5 is amended in paragraph (a) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "April 29, 1977" and by substituting therefor "April 28, 1978".

§ 213.9 [Amended]

2. Section 213.9 is amended in paragraphs (a) and (b) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the terms "1976" and ".50" and by substituting therefor "1977" and ".35" respectively.

3. Section 213.12 is amended in paragraph (a) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; in paragraph (b) by deleting the terms "1976" and "366" and by substituting therefor "1977" and "365" respectively; and by adding the following at the end of the paragraph (b):

§ 213.12 Allocations; refiners; Districts I-IV and the Virgin Islands.

* * * * *

(b) * * * In the event the individual allocations, as determined by the respective schedules set forth in this paragraph, result, in the aggregate, in a total volume of crude oil which would exceed the total volume permitted to be entered without payment of license fees by the pertinent sections of Presidential Proclamation 3279, as amended, each applicant's allocation shall be reduced by an amount equal to the product of the following two factors: (1) The proportion that each applicant's individual allocation bears to the total volume of imports as determined by the respective schedules; and (2) the amount by which the volume of such total individual allocations exceed the total fee-free volume permitted by the Proclamation.

4. Section 213.13 is amended in paragraph (a) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; in paragraph (b) by deleting the terms "1976" and "366" and by substituting therefor "1977" and "365" respectively; and by adding the following at the end of paragraph (b):

§ 213.13 Allocations; refiners; district V, Guam, and American Samoa.

* * * * *

[1] Editorial Note: Chapter II will be renamed at a future date to reflect that it contains regulations administered by the Economic Regulatory Administration of the Department of Energy.

(b) * * * In the event the individual allocations, as determined by the respective schedules set forth in this paragraph, result, in the aggregate, in a total volume of crude oil which would exceed the total volume permitted to be entered without payment of license fees by the pertinent sections of Presidential Proclamation 3279, as amended, each applicant's allocation shall be reduced by an amount equal to the product of the following two factors: (1) The proportion that each applicant's individual allocation bears to the total volume of imports as determined by the respective schedules; and (2) the amount by which the volume of such total individual allocations exceed the total fee-free volume permitted by the Proclamation.

§ 213.15 [Amended]

5. Section 213.15 is amended in paragraph (d) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "1,450,000 bbl/d" and by substituting therefor "1,015,000 bbl/d".

§ 213.16 [Amended]

6. Section 213.16 is amended in paragraph (a) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; by deleting the terms "10,000" and "3,750" and by substituting therefor "7,000" and "2,625" respectively; and by deleting completely the second sentence.

§ 213.20 [Amended]

7. Section 213.20 is amended in paragraph (a)(2) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "113,611 bbl/d" and by substituting therefor "79,527 bbl/d."

§ 213.21 [Amended]

8. Section 213.21 is amended in paragraph (a)(2) and (b)(2) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; in paragraph (a)(2) by deleting the term "719 bbl/d" and by substituting therefor "503 bbl/d"; and in paragraph (b)(2) by deleting the term "825 bbl/d" and by substituting therefor "577 bbl/d".

§ 213.32 [Amended]

9. Section 213.32 is amended in paragraph (c) by deleting, in the first sentence the term "but subject to supplemental fee"; and in paragraph (d) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "37,800 bbl/d" and by substituting therefor "26,460 bbl/d".

§ 213.35 [Amended]

10. Section 213.33 is amended in paragraph (c) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; by deleting the term "620,000" and by substituting therefore "434,000"; in paragraph (d)(1) by deleting the term ".50" and by substituting therefor "0.35"; in paragraph (d)(2) by deleting the term "July 29, 1977" and by substituting therefor "May 1, 1978"; and by deleting the term "April 30, 1978" and by substituting therefore "April 30, 1979"; in paragraph (f) by deleting the term "August 31, 1977" wherever it appears and by substituting therefor "August 31, 1978"; by deleting the term "May 1, 1976 through April 30, 1977" and by substituting therefor "May 1, 1977 through April 30, 1978"; and by deleting the term "July 1, 1977" and by substituting therefor "July 1, 1978"; and in paragraph (h) by deleting the term "July 28, 1977" and by substituting therefor "April 28, 1978".

§ 213.34 [Amended]

11. Section 213.34 is amended in paragraphs (b) and (e) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "25,000" and by substituting therefor "17,500".

§ 213.36 [Amended]

12. Section 213.36 is amended in paragraph (c) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and by deleting the term "620,000" and by substituting therefore "434,000"; in paragraph (d)(1) by deleting the term ".50" and by substituting therefor ".35"; in paragraph (d)(2) by deleting the term "July 29, 1977" and by substituting therefor "May 1, 1978"; and by deleting the term "April 30, 1978" and by substituting therefor "April 30, 1979"; in paragraph (f) by deleting the term "August 31, 1977" wherever it appears and by substituting therefor "August 31, 1978"; by deleting the term "May 1, 1976 through April 30, 1977" and by substituting therefor "May 1, 1977 through April 30, 1978"; and by deleting "July 1, 1977" and by substituting therefor "July 1, 1978"; and in paragraph (h) by deleting the term "July 28, 1977" and by substituting therefor "April 28, 1978".

§ 213.37 [Amended]

13. Section 213.37 is amended in paragraphs (a) and (c) by deleting the term "May 1, 1977 through April 30, 1978" and by substituting therefor "May 1, 1978 through April 30, 1979"; and in paragraph (a) by deleting the term "16,250" and by substituting therefor "11,375".

Title 15—Commerce and Foreign Trade

CHAPTER III—INDUSTRY AND TRADE ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 379—TECHNICAL DATA

Revision of References Due to Change in Technical Data Regulations

AGENCY: Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

ACTION: Final rule.

SUMMARY: As a result of an amendment to § 379.4, published February 22, 1978 (43 FR 7311-5), paragraph (e) in that Section was relettered as paragraph (f). This rule makes technical amendments in § 379.4 by correcting the references in that Section to paragraph (e), to read paragraph (f).

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4196.

Accordingly, Part 379 of the Export Administration Regulations (15 CFR Part 379) is amended as follows:

1. In the first sentence of § 379.4, "§ 379.4(e)" is amended to read "§ 379.4(f)".

2. In the first sentence of § 379.4(f)(1), "§ 379.4(e)(1)(i) is amended to read "§ 379.4(f)(1)(i)", and "§ 379.4(e)(1)(ii)" is amended to read "§ 379.4(f)(1)(ii)".

3. In the sixth sentence of § 379.4(f)(1), "§ 379.4(e)(1)(i)" is amended to read "§ 379.4(f)(1)(i)".

4. In the first sentence of § 379.4(f)(1)(ii), "§ 379.4(e)(1)" is amended to read "§ 379.4(f)(1)".

5. In the first sentence of § 379.4(f)(2)(i), "§ 379.4(e)(1)" is amended to read "§ 379.4(f)(1)"; "§ 379.4(e)(2)(v)" is amended to read "§ 379.4(f)(2)(v)"; and "§ 379.4(e)(2)" is amended to read "§ 379.4(f)(2)".

6. In the Note following § 379.4(f)(2)(ii)(c), the following amendments are made:

(a) In the first sentence, "§§ 379.4(e)(2)(ii) (b) and (c)" is amended to read "§§ 379.4(f)(2)(ii) (b) and (c)";

V 4 3 1 8 6

(b) In the first sentence of numbered paragraph two, "§ 379.4(e)(2)(ii)(b)" is amended to read "§ 379.4(f)(2)(ii)(b)"; and

(c) In the first sentence of the final paragraph, "§§ 379.4(e)(2)(ii) (b) and (c)" is amended to read "§§ 379.4(f)(2)(ii) (b) and (c)".

7. In the first sentence of § 379.4(f)(2)(iv), "§ 379.4(e)(2)" is amended to read "§ 379.4(f)(2)".

8. In the first sentence of § 379.4(f)(2)(v), "§ 379.4(e)(2)" is amended to read "§ 379.4(f)(2)".

9. In the first sentence of the Note following § 379.4(f)(2)(v)(c), "§§ 379.4(e) (1) or (2)" is amended to read "§§ 379.4(f) (1) or (2)".

10. In § 379.8(a)(3), "§ 379.4(e)" is amended to read "§ 379.4(f)".

(Sec. 4, Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

Dated: April 26, 1978.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

Title 24—Housing and Urban Development

CHAPTER XIII—FEDERAL DISASTER ASSISTANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-495]

PART 2205—FEDERAL DISASTER ASSISTANCE

In-Lieu Contributions; Final Amendments

AGENCY: Federal Disaster Assistance Administration, Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: The final rule amends the regulations pertaining to small project applications (in-lieu contributions) for the repair or restoration of public facilities which were damaged or destroyed in a major disaster. The amendment redesignates certain paragraphs to improve the presentation of the material. These amendments are needed to set forth policies for the easing of final inspection requirements, the adjustment of the level of Federal funding, and the disposition of unused Federal funds.

EFFECTIVE DATE: June 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert J. Adamcik, Public Assistance Office, Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410, 202-634-7835.

SUPPLEMENTARY INFORMATION: On December 23, 1977 the Department published a proposed rule (42 FR 64371) amending Section 419 of the Disaster Relief Act of 1974. During the comment period two commentators submitted the comments which are discussed below.

RETURN OF UNUSED FUNDS

One comment suggested that the last two sentences of § 2205.54(i)(2) be deleted since the cost of recovering the funds would be greater than the amount returned and virtually all expenditures made by applicants are authorized. This is not entirely correct. There are certain types of work such as maintenance and the repair of facilities not damaged in the disaster which are not eligible for reimbursement. The only eligibility requirements for Section 419 Grants are that the funds be spent for an authorized purpose and that they be spent within certain time limitations. FDAA cannot assure that the provisions of the law are being met without imposing these controls. If the funds are not spent within these eligibility constraints, they must be returned. Therefore we do not agree that the last two sentences of § 2205.54(i)(2) should be deleted.

PROJECT LISTING

A comment proposed that the word "listing" in § 2205.54(i)(3) be defined. The listing required by the regulation is developed by the FDAA Regional Director and contains a Summary of the Applicant's approved projects based on the Damage Survey Reports. FDAA does not intend that a standardized form be created or that the State or Applicant need develop an independent form. Each of the FDAA Regional Directors will be furnished with a suggested format for the listing and the States will receive guidance from the appropriate Regional Director. We feel that the listing is adequately described in § 2205.54(i)(3) and no further definition is necessary.

ADJUSTMENTS TO FUNDING AMOUNTS

A comment suggested that a change which would specify that the identification of eligible damage which was overlooked during the initial surveys of a disaster-affected area could be a permissible basis for requesting increased project funding. FDAA does accept Damage Survey Reports on sites which have been overlooked if they are submitted on a timely basis. We intend that the phrase, "omission in defining the approved scope of work," applies to those situations where additional eligible work is identified and therefore, we see no need to change the wording of § 2205.54(i)(4).

ADJUSTMENTS TO FUNDING AMOUNTS

Another comment proposed amending this paragraph to provide for an increase when the actual costs or the low bids on the project exceed the estimated amount. FDAA feels that this is contrary to the law which specifies that the amount of the grant is based on a Federal Estimate. The proposed procedure would require another stage of review and would delay unnecessarily the funding of the grant. Therefore, this suggested change to § 2205.54(i)(4) is not adopted.

A finding of inapplicability with respect to environmental impact has been prepared in accordance with HUD Handbook 1390.1.

Copies of the finding are available for inspection and copying in the Office of the Rules Docket Clerk.

The amendments are adopted without change, as set forth below.

(Sec. 419, Pub. L. 93-288, 88 Stat. 159 (42 U.S.C. 5189), Executive Order 11795 as amended by Executive Order 11910, 39 FR 25939, Delegation of Authority, 39 FR 28227.)

Issued at Washington, D.C., April 20, 1978.

WILLIAM H. WILCOX,
Administrator, Federal Disaster Assistance Administration.

§ 2205.54 [Amended]

Paragraph (h)(1) is redesignated (h).

Paragraphs (h)(1)(i) through (h)(1)(iv) are redesignated as (h)(1) through (h)(4) respectively.

Paragraphs (i), (j) and (k) are redesignated (j), (k) and (l) respectively.

Paragraph (h)(2) is deleted and replaced by paragraph (i)

Paragraph (i) to read as follows:

* * * * *

(i) *Small project applications (in-lieu contributions).* (1) Where the Federal estimate of total cost approved by the Regional Director for reimbursement to the applicant is less than $25,000 under Sections 306, 402, and 403 of the Act, the in-lieu contribution will be based on 100 percent of such approved total estimated cost. Direct Federal assistance, and any assistance requested by an applicant on behalf of a private non-profit organization, shall not be included in determining the amount of the in-lieu contribution under Section 419 of the Act. However, the Regional Director may approve Federal funding under Sections 306, 402, or 403 in any instance where he determines that the circumstances do not justify an in-lieu contribution under Section 419 of the Act.

(2) Funds contributed under this subsection may be expended either to repair, restore, reconstruct or replace certain selected damaged or destroyed public facilities; to construct new public facilities which the applicant determines to be necessary to meet its needs for governmental services and functions in the disaster affected areas; or to undertake the disaster work authorized under Sections 306 and 403 of the Act upon which the Federal estimate of damages is based. Any funds which remain unused after the applicant has exercised the available option shall be returned. The Regional Director shall apply current applicable procedures to issue a Bill for Collection or to recover the funds by the offset of Federal funds to which the State would otherwise be entitled under the Act to assure that all such unexpended funds are returned.

(3) The Regional Director shall furnish the applicant through the Governor's Authorized Representative with a listing of projects which have been approved. This listing shall include a brief description, location and estimate of cost approved for each project. Within 30 days following completion of the work performed under this subsection, the applicant shall complete and return this listing through the Governor's Authorized Representative to the Regional Director covering those originally approved projects and those alternate projects that were completed. This listing shall also include the applicant's certification that all work on the listing has been completed and all funds were expended in accordance with the purpose of Section 419 of the Act and with these regulations. There shall be such final inspection and audit as deemed necessary by the Regional Director to assure that the funds were expended in accordance with the purposes of Section 419 of the Act.

(4) If an applicant subsequently submits a supplement to its project application that would increase the grant under Section 419 of the Act to an amount exceeding $25,000, the entire contribution shall revert to a categorical grant or to a 90 percent contribution under § 2205.54(h) as approved by the Regional Director. The only permissible basis for increasing Federal funding is an error or omission in defining the approved scope of work or in the approved estimated reasonable costs of such work. Federal funding may be reduced where the applicant fails to comply with the applicable laws, regulations, and procedures of the Department, including but not limited to: non-compliance with assurances, illegal contracting methods, duplication of benefits, and non-conformity with applicable codes, specifications and standards.

Title 32—National Defense

CHAPTER XII—DEFENSE LOGISTICS AGENCY

SUBCHAPTER A—DEFENSE LOGISTICS PROCUREMENT REGULATION

[DLAR 4105.1]

REVISION OF REGULATIONS

AGENCY: Defense Logistics Agency.

ACTION: Final.

SUMMARY: The Defense Logistics Procurement Regulations (DLPR) implements the Armed Services Procurement Regulation (ASPR) and other Department of Defense Publications. It establishes procedures and delegations of authority governing the procurement of supplies and services by the Defense Logistics Agency under chapter 137, title 10 of the United States Code or other statutory authority.

DATE: Effective date, January 31, 1978.

ADDRESS: Defense Logistics Agency, Cameron Station, Alexandria, Va. 22314.

FOR FURTHER INFORMATION CONTACT:

Mr. Dean Fogle, 202-274-6431.

J. J. MCALEER, Jr.,
Colonel, U.S.A., Staff Director, Administration.

This subchapter supersedes subchapter A issued in volume 41, No. 43, March 3, 1976.

The provisions of this subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subchapter A, chapter XII of title 32 of the Code of Federal Regulations is revised to read as follows:

Part
1201 General provisions.
1202 Procurement by formal advertising.
1203 Procurement by negotiation.
1204 Special types and methods of procurement.
1205 Interdepartmental and coordinated procurement.
1206 Foreign purchases.
1207 Contract clauses, and solicitation provisions.
1208 Termination of Contracts.
1209 Patents, data, and copyrights.
1210 Bonds, insurance, and indemnification.
1212 Contractor industrial labor relations.
1213 Government property.
1214 Procurement quality assurance.
1215 Contract cost principles and procedures.
1216 Procurement forms.
1217 Extraordinary contractual actions to facilitate the national defense.
1219 Transportation.
1220 Administrative matters.
1221 Procurement management reporting system.
1225 Production surveillance and reporting.
1250 Supplemental procedures.

1201.201-14 Procuring activity.

Subpart C—General Policies

1201.307 Priorities, allocations, and allotments.
1201.307-50 Notice to bidders.
1201.310 Liquidated damages.
1201.314 Disputes and appeals.
1201.318 Contracts conditioned upon the availability of funds.
1201.324 Warranties.
1201.324-50 Warranty actions.
1201.325 Variation in quantity.
1201.325-50 Delivery of excess quantities of $25 or less.
1201.332 Minority business enterprises.
1201.332-5 Minority business enterprise subcontracting program.
1201.350 Changes in procurement processes, techniques or methods.
1201.350-1 General.
1201.350-2 Concept of notification.
1201.350-3 Examples of significant changes.
1201.350-4 Data to support request.
1201.351 Delivery status information on procurements for the international logistics program (ILP).
1201.352 Extended procurment delays.

Subpart D—Procurement Responsibility and Authority

1201.401 Responsibility of each procuring activity.
1201.401-50 Delegation of authority.
1201.401-51 Limited purchasing authority.
1201.402 Authority of contracting officers.
1201.402-50 General responsibilities of contracting officers.
1201.402-51 Procedure for closing contracts with inconsequential amounts undelivered.
1201.403 Requirements to be met before entering into contracts.
1201.403-50 Legal review.
1201.405 Selection, appointment, and termination of appointment of contracting officers.
1201.405-1 Selection.
1201.405-2 Appointment.
1201.405-3 Termination of appointment.
1201.450 Selection, appointment, and termination of appointment of contracting officers' representatives.
1201.451 [Reserved]
1201.452 Review and approval requirements.
1201.452-1 General.
1201 452-2 Actions requiring HQ DLA review and approval prior to award.
1201.452-3 Information to be furnished.
1201.452-4 Release of information.
1201.452-5 Proposed shifts in procurements from a competitive to a noncompetitive basis.
1201.452-6 Post award review.
1201.452-7 Actions approved but not awarded.
1201.452-8 Cancellation requirements.
1201.452-9 Letter contracts.
1201.452-10 Requests for waiver HQ DLA preaward review and approval.
1201.452-11 Confirmation of quantity and technical requirements.
1201.452-12 Report of procuring actions requiring HQ DLA preaward review and approval by the close of fiscal year.
1201.453 Review and approval requirements at the procuring activity.
1201.454 Review and approval requirements for a procurement office not designated as a "procuring activity".

Subpart F—Debarment, Ineligibility, and Suspension

1201.601 Establishment and maintenance of records and lists of firms or individuals debarred, ineligible, or suspended.
1201.601-1 General.
1201.601-3 Joint consolidated list.
1201.601-50 Attempted evasions.
1201.603 Grounds for listing and treatment to be accorded listed concerns.
1201.603-50 Total restrictions.
1201.604 Administrative debarment of firms or individuals (type A).
1201.604-3 Notice of debarment.
1201.605 Suspension of firm or individual.
1201.608 Reporting.
1201.650 Review of past contractual relationships.

Subpart G—Small Business Concerns

1201.702 General policy.
1201.704 Small business officials.
1201.704-50 Counseling activities.
1201.704-51 Participation in industrial assistance events, business opportunity/Federal procurement conferences, procurement clinics, fairs, etc.
1201.705 Cooperation with the Small Business Administration.
1201.706 Set asides.
1201.706-1 General.
1201.706-3 Review, withdrawal, or modification of set-asides or set-aside proposals.
1201.707 Subcontracting with small business concerns.
1201.707-3 Required clauses.

Subpart H—Responsible Prospective Contractors

1201.905 Procedures for Determining responsibility of prospective contractors.
1201.905-1 General.
1201.905-4 Preaward surveys.
1201.905-50 Capability surveys for Workshops for the Blind and Other Severely Handicapped.

Subpart L—Specifications, Plans and Drawings

1201.1203 Availability of specifications, standards, plans and drawings.

Subpart M—Procurement Planning

1201.2100 Procurement planning.
1201.2100-2 Applicability.
1201.2102 Sample format and content of procurement plans.

Subpart N—Industrial Preparedness Production Planning

1201.2205 Existing authority affecting the industrial base.
1201.2206 Applicable procedures.
1201.2206-50 Industrial preparedness planning packages.

Subpart O—Environmental Protection

1201.2302 Administration and enforcement.
1201.2302-3 Compliance responsibilities.
1201.2302-5 Withholding award.

AUTHORITY: The provisions of this subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subpart A—Introduction

§ 1201.101 Purpose of subchapter.

The Defense Logistics Procurement Regulation (DLPR) is issued by the Executive Director, Procurement, HQ DLA by authority of the Director, Defense Logistics Agency (DLA). Armed Services Procurement Regulation (ASPR) and other Department of Defense publications and, pursuant to Subchapter A, Chapter I of this title, establishes for DLA procedures relating to the procurement of supplies and services under the authority of Chapter 137, Title 10 of the United States Code, or other statutory authority.

§ 1201.102 Applicability of subchapter.

(a) This subchapter is applicable to the purchasing function at all DLA activities, but is not applicable to the performance of field contract administration assigned to Defense Contract Administration Services (DCAS).

(b) Whenever revisions to ASPR are published which make coverage in this subchapter obsolete or contradictory to that in ASPR, the provisions in ASPR shall apply.

(c) Whenever DLA Regulations, containing policies and procedures relating to procurement conflict with ASPR or this subchapter, the policies and procedures in ASPR and this subchapter shall govern.

§ 1201.103 Arrangement of subchapter.

§ 1201.103-2 Numbering.

The numbering system in DLPR follows the numbering system in ASPR. Where a section of the DLPR does not implement a particular section but pertains to the general subject matter covered in a particular part of the ASPR, the added section shall be numbered starting with the digits "50" (e.g., in subpart A of part I, this would be § 1201.150). Likewise where the DLPR has material implementing a main ASPR section, but not fitting under the ASPR point numbers and titles, such material is numbered to end in .50, .51, etc., such as 1-110.50, 1-110.51, etc.

§ 1201.103-4 Citation.

The DLPR shall be referred to as the Defense Logistics Procurement Regulation and any paragraph may be cited as DLPR followed by the paragraph number. Thus, this paragraph would be cited as DLPR 1-103.4.

§ 1201.104 Content of subchapter.

§ 1201.104-50 DLPR.

This subchapter contains all Departmental policies, procedures and instructions relating to procurement of supplies and services within the Defense Logistics Agency, except those contained in ASPR and the DLAR or DLAM series of DLA regulations. DLPR does not duplicate or paraphrase ASPR and is issued only to cover delegations of authority, assign responsibilities, and other procedures consonant with § 1-108 of this title which are essential to DLA.

§ 1201.104-51 Procurement letters.

Numbered procurement letters (PROCLTRS) include policy statements of general interest to procurement personnel, re-emphasis of existing policy and information of a temporary nature. They are generally directed to procurement staff levels within the Defense Supply Centers (DSCs) but wider attention within the Procurement Directorates may be directed upon the face of the letter. Procurement letters will normally be cancelled within six months.

§ 1201.104-52 Multiple address letters.

Unnumbered multiple address letters will be issued for one-time requests for comments or reports, announcements of Procurement and Production Directors' Conferences and other meetings, etc. No implementation beyond the action requested is contemplated. They are self-canceling when they have served their purpose.

§ 1201.105 Amendment of subchapter.

Recommendations for revision of ASPR and DLPR shall be submitted, through channels, to the Executive Director, Procurement, Defense Logistics Agency, Cameron Station, Alexandria, Va. 22314, Attn: DLA-PPR.

§ 1201.107 Dissemination and effective date of the subchapter (including appendices, revisions, supplements and manuals).

(a) Heads of Procuring Activities shall insure that copies of the ASPR and DLPR, including revisions, are distributed to all interested activities and individuals.

(b) Compliance with the DLPR, including any revision to the DLPR, shall be permissive effective with the date of issuance thereof (as indicated by the page revision date) and shall be mandatory effective 90 days thereafter, unless otherwise provided in such revision.

§ 1201.108 Departmental procurement instructions and ASPR implementations.

(a) Implementations of ASPR and DLPR may be issued by Heads of Procuring Activities provided they are consistent with § 1-108 of this title. In addition, the Executive Director, Procurement, HQ DLA has delegated this authority to the Commander, Defense Industrial Plant Equipment Center (DIPEC). Implementations shall not duplicate or paraphrase ASPR or DLPR, modify or revise the policy in ASPR or DLPR, or contain deviations to ASPR or DLPR unless authorized by the procedures of § 1-109 of this title and § 1201-109. The format, general plan, and numbering system of implementations shall be the same as ASPR/DLPR.

(b) Heads of Procuring Activities and DIPEC shall furnish the HQ DLA, Attn: DLA-PPR, one copy of each implementing instruction properly referenced to the ASPR or DLPR paragraph to which it pertains.

§ 1201.109 Deviations from this subchapter and Department of Defense publications governing procurement.

§ 1201.109-1 Applicability.

Actions which constitute deviations from ASPR or Department of Defense publications governing procurement as set forth in § 1-109.1 of this title shall also constitute deviations from the provisions of DLPR.

§ 1201.109-2 Deviations affecting one contract or transaction.

Deviations from ASPR, a Department of Defense Directive, or the DLPR which affect only one contract or transaction, will be made only after prior approval by the Executive Director, or Deputy Executive Director, Procurement, HQ DLA.

§ 1201.109-50 Deviations to mandatory clauses.

Prior to requesting an ASPR deviation, one-time or otherwise, the Commander or Deputy Commander shall make a determination on a case-by-case basis whether or not to personally negotiate with contractors who have refused to accept mandatory ASPR clauses in an attempt to obtain contractor acceptance. In those cases where it is determined that the Commander should not personally conduct negotiations, a detailed memorandum setting forth the rationale shall be forwarded with the referral to HQ DLA, Attn: DLA-PP.

§ 1201.109-51 Submission of requests for deviations (Dev).

(a) Requests for authority to deviate from the provisions of ASPR, Department of Defense Directives, or the DLPR will be submitted (in original and four copies) to HQ DLA, Attn: DLA-PPR. Deviation requests shall be in the format of: I. Problem, II. Recommendation, and III. Discussion.

(b) For those deviations which have originated in any DLA field activity, it will be the responsibility of the originator to initiate action for renewal or extension, when appropriate, at least 90 days prior to the expiration date. If no request is received in DLA-PPR, it will be assumed the need for the deviation no longer exists and the deviation will automatically expire.

§ 1201.109-52 Control of deviations.

Separate registers shall be maintained by the Executive Director, Procurement, HQ DLA of the deviations granted from ASPR and DLPR. Each deviation shall be recorded in its appropriate register and shall be assigned a control number as follows: an abbreviation of the regulation involved and the word deviation; fiscal year; and the serial number assigned to the particular deviation; e.g., ASPR Dev. 76-1, DLPR Dev. 76-1. The control number shall be embodied in the document authorizing the deviation and shall be cited in all references to the deviation.

§ 1201.110 Reports of purchases and contracts.

§ 1201.110-50 Advance notification of proposed awards.

(a) Data on all proposed contract awards of $1 million or more shall be submitted to the HQ DLA contract point by telephone at least 48 hours (two full working days) prior to 1,100 hours of the date the Center proposes to make the contract award (excluding those contracts made with the Small Business Administration under authority of Section 8(a) of the Small Business Act). Mandatory orders to be placed with the Federal Prison Industries, the National Industries for the Blind and Agencies for the Severely Handicapped are not included in this reporting requirement. However, nonmandatory orders to be placed with the Industries for the Blind are included. This report will be known as "contract announcement" and will carry Reports Control Symbol DO-LA(AR)1279.

(b) Definitions. (1) Contract awards as used herein include any contractual instrument that obligates funds where the total amount of the contract is $1 million or is expected to reach or exceed $1 million. Requirements contracts that do not obligate funds at the time of award are not "contract awards" for the purpose of this paragraph. Delivery orders in the amount of $1 million or more issued against these requirements contracts are "contract awards." Where a requirements contract does obligate an amount of less than $1 million at the time of award and it is estimated that the cumulative amount of the contract will exceed $1 million such type of requirements contract is a "contract award."

(2) Contractual instrument includes but is not limited to notices of awards, definitive contracts, letter contracts, orders placed against requirements or indefinite delivery type contracts, sup-

MY 3 7 8
UMI

V 4 3 — 8 6

plemental agreements, change orders, provisioning orders, contract modifications, letters of intent, and funding action.

(c) The HQ DLA contact point is DLA-PC, Autovon No. 284-6461.

(d) Data submitted to the HQ DLA contact point shall be verified for accuracy by a responsible DLA field activity official prior to submission to HQ DLA. This data is used to provide information outside the Department of Defense, therefore, accuracy is of paramount importance.

(e) The following data shall be provided (in this sequence) to the HQ DLA contact point:

(1) Name and address of purchasing activity;

(2) Proposed release date;

(3) Contract number;

(4) Amount;

(5) Name and location of proposed contractor (include street address, zip code, and county, size of business, i.e., large or small), and labor surplus area designation;

(6) Item and quantity to be awarded;

(7) Name and location of facility to perform contract, indicating if a division or affiliate of contractor in paragraph (5) of this section, (include street address, zip code, county and labor surplus area designation);

(8) Type of contract, e.g., firm fixed price; fixed price with escalation;

(9) Amount previously obligated (if this announcement is a modification to an existing contract);

(10) Number of concerns solicited and number of concerns submitting bids/proposals;

(11) Using Service;

(12) Name of official in field activity familiar with award;

(13) Information as to any proposed local press release or any local Congresssional interest; and

(14) A statement of whether or not EEO clearance has been obtained.

(f) Awards and release of information on contract awards of $1 million or more shall not be made before the date and time agreed upon by the HQ DLA contact point and the field activity. Any proposed local press release should also be withheld. If for any reason, clearance is not received by HQ DLA, the Defense Supply Center will be notified promptly to withhold award until clearance has been obtained. If following agreement as to date and time of contract award announcement, the award will not be made, the HQ DLA contact point shall be notified by telephone immediately.

§ 1201.150 Administration and interpretation.

The administration and interpretation of DLPR is the responsibility of Executive Director, Procurement, DLA (DLA-P).

§ 1201.151 Procurement and Production Director's Conference.

A Procurement and Production Directors' Conference will be convened on a semi-annual basis or at the call of the Executive Director, Procurement, DLA, under the monitorship of the Programs & Analysis Office (DLA-PA). The conference provides a forum for discussion of current problems, discussion of management improvements, exchange of information on latest developments in the fields of procurement and production, and for other matters, which assist in the development of procurement and production policies and procedures. Attendance at these conferences will comprise as a minimum the Executive Director or Deputy Executive Director, Procurement, (DLA-P/PD), representatives from Headquarters, Procurement and Production Divisions and Offices, and Procurement and Production Directors and/ Deputy Directors from DLA Supply Centers.

Subpart B—Definition of Terms

§ 1201.201 Definitions.

§ 1201.201-14 Procuring activity.

The Executive Director, Procurement, HQ DLA, shall exercise the functions, not otherwise delegated, of Head of Procuring Activity for any DLA Supply Centers or Activities not under an HPA and not designated as "Procuring Activities" pursuant to § 1-201.14 of this title. This includes the: (a) Defense Industrial Plant Equipment Center; (b) Defense Logistics Services Center; (c) Defense Depot Memphis; (d) Defense Depot Ogden; (e) Defense Depot Tracy; and (f) Defense Logistics Agency Administrative Support Center.

Actions required by the Armed Services Procurement Regulation, this subchapter, or other directives involving the functions of the Head of the Procuring Activity not otherwise delegated shall be referred to the HQ DLA, Attn: DLA-PP.

Subpart C—General Policies

§ 1201.307 Priorities, allocations, and allotments.

§ 1201.307-50 Notice to bidders.

The following notice shall be included in a prominent place, with each bid package distributed to industry for procurement action:

SECTION C, INSTRUCTIONS, CONDITIONS AND NOTICES TO OFFERORS/QUOTERS

PRIORITY RATING (DLA 1974 JUL)

Any contract awarded under this solicitation will be assigned a priority rating (DO or DX as applicable) and will include a certification for national defense use under regulations issued by the Department of Commerce in implementation of the Defense Production Act of 1950, as amended. Contractors are required to utilize said rating in obtaining the products, materials and supplies needed to fill their contracts. In the event the contractor is unable to obtain the necessary products, materials and supplies to complete his contract, he shall immediately advise the Defense Contract Administration Services Region (DCASR) or the appropriate Defense Supply Center (DSC) DMS Officer through the cognizant Administrative Contracting Office (ACO) or Procuring Contracting Officer (PCO). The DMS Officer or the DCASR Industrial Specialist will provide necessary assistance or will provide the necessary instructions to complete the Form BDSAF-138, Request for Special Priorities Assistance. The Form BDSAF-138 will be processed through appropriate channels to the Department of Commerce which upon receipt will take action to make the needed supplies available to the applicant.

§ 1201.310 Liquidated damages.

Recommendations concerning the remission of liquidated damages shall be transmitted to HQ DLA, Attn: DLA-G.

§ 1201.314 Disputes and appeals.

(d) All appeals will be presented to the Armed Services Board of Contract Appeals by trial attorneys of the DLA Defense Supply Center involved. Direct communication with the Board is authorized. The charter and rules of the Armed Services Board of Contract Appeals are set forth in Appendix A, ASPR. All official correspondence with the Board will be addressed to the Recorder, Armed Services Board of Contract Appeals, 200 Stonewall Street, Alexandria, Va. 22332. At the time of filing with the Board or receipt by the trial attorney, a copy of each Notice of Appeals, Complaint, Answer, Rule 4 Memorandum (without enclosures), Brief, and Motion for Reconsideration, if any, shall be forwarded to the Counsel, DLA.

(e) In all cases except those to be disposed of under Rule 12, the trial attorney shall forward to the Counsel, DLA, copies of the Trial Memorandum, documents that have been filed under Rule 4 or are to be introduced in evidence at the hearing, and, if not included in the Trial Memorandum, a summary of the testimony of proposed witnesses. This information shall be forwarded ten days prior to date set for the hearing.

(f) If, after review of a Board decision on contracts of his procuring activity, Counsel for the activity is of the opinion that the decision is erroneous, a Motion for Reconsideration should be filed. If the Board denies the motion or sustains its previous decision and a decision by the Comptroller General is desired prior to payment, the request for such a decision shall be forwarded to HQ DLA, ATTN: DLA-G.

M Y 3 — 7 8 UMI

§ 1201.318 Contracts conditioned upon the availability of funds.

It is recognized that there may be instances, other than those described in ASPR 1-318, where it will be necessary to initiate a procurement prior to the availability of funds. In such instances, the action will only be taken after the facts concerning the proposed solicitation are presented to DLA-P for review as to the necessity for such action and the obtaining of the required ASPR deviation permitting use of the provisions set forth in § 7-104.91 of this title.

§ 1201.324 Warranties.

§ 1201.324-50 Warranty actions.

When warranty actions have been initiated under procurement instruments containing warranty clauses in accordance with ASPR 1-324, it is essential all DSCs maintain a record of these warranty actions. This record is necessary to help determine the usefulness of the warranty clause versus the cost of administering the warranty actions. The record will be maintained in a central location on a fiscal year basis. No more than two prior fiscal years will be retained. The record shall contain as a minimum the following information:

(a) Date and reason warranty was invoked;

(b) Contract number;

(c) Contractor;

(d) Dollar value of material covered by warranty;

(e) Disposition of material or other considerations obtained; and

(f) Date warranty action completed.

§ 1201.325 Variation in quantity.

§ 1201.325-50 Delivery of excess quantities of $25 or less

Unless there is a valid reason to the contrary, the clause set forth below shall be included in all contracts, purchase orders and Blanket Purchase Agreements.

DELIVERY OF EXCESS QUANTITIES OF $25 OR LESS (DSA 1972 NOV)

The contractor is responsible for the delivery of each item or sub-item quantity within allowable variations, if any, required by the contract or order. If the contractor delivers and the Government receives quantities of any item or sub-item in excess of the quantity called for by the contract or order (after considering any allowable variation in quantity) and the dollar value of such excess quantity amounts to $25 or less, the excess quantity will be treated as being delivered for the convenience of the contractor; and the Government may retain such excess quantities without compensating the contractor therefor; and the contractor waives all right, title, or interests therein.

§ 1201.332 Minority business enterprise.

§ 1201.332-5 Minority business enterprise subcontracting program.

When the Utilization of Minority Business Enterprises clause in § 1207.104-36(a) is used, and the contract is expected to exceed $500,000, the contracting officer shall make a determination of subcontracting potential on a case-by-case basis. When it is determined that substantial subcontracting possibilities do exist, the clause in § 7-104.36(b) of this title shall be included. If it is determined that substantial subcontracting possibilities do not exist, the procedures in 1-707 shall apply.

§ 1201.350 Changes in procurement processes, techniques or methods.

§ 1201.350-1 General.

Whenever a procuring activity contemplates a significant change in a procurement process, technique or method which may reasonably be expected to have a substantial impact on industry and/or the Government, the activity shall notify promptly HQ DLA, ATTN: DLA-PPR, of the contemplated change and the reasons and basis therefore.

§ 1201.350-2 Concept of notification.

Headquarters DLA requires notification of contemplated changes which are of significant nature prior to initiation of action to accomplish such changes. This prior notification is necessary in order that Headquarters may become conversant with the matter in the event there is any reaction from industry, the Congress, or the using Military Departments. In addition, Headquarters has access to, and knowledge of, information which may not be available at the field level and as such, is in a position to evaluate the significance of the proposed action to the Agency as a whole. Accordingly, it is essential that HQ DLA know what is contemplated before the initiation of a significant change is publicized. This requires that all notifications be submitted as far in advance of public disclosure as possible, in order that HQ DLA clearance may be obtained, and the intended purpose of this requirement be served.

§ 1201.350-3 Examples of significant changes.

Representative types and categories of contemplated changes which are of a significant nature and which necessitate prior notification to HQ DLA are (but not limited to) a change in:

(a) a longstanding inspection requirement or procedure;

(b) the method of providing and/or accounting for Government-furnished property;

(c) a type of contract which constitutes a significant departure from the procurement technique previously utilized;

(d) solicitation techniques and the elements used in evaluation of offers;

(e) the region/area from which procurement of an item has been previously accomplished;

(f) the location of a buying/purchasing office; or

(g) item specification which prompts a major change in manufacturing and/or processing techniques.

§ 1201.350-4 Data to support request.

In order that the impact of a contemplated change in procurement method may be determined, requests for approval of a proposed change in a procurement method should contain the following information:

(a) A description of the present and proposed procurement methods;

(b) A statement of the difficulties encountered in the use of the presented method and/or the improvements foreseen as the result of a change;

(c) A statement as to the degree of impact of the change expected on industry and/or the Government; and

(d) A statement as to the net benefits accruing to the Government as a result of the change.

§ 1201.351 Delivery Status Information on Procurements for the International Logistics Program (ILP).

Contracts and purchase orders awarded in support of requisitions from the Navy International Logistics Control Office, Bayonne, New Jersey, for the ILP shall:

(a) Identify the requirement as a separate contract line item or sub-line item in accordance with § 20-304.2 of this title. If the purchase request does not contain this information, the contracting officer shall contact the originator to obtain the necessary data. The applicable requisition number shall be entered immediately under the line or sub-line item. (ILP requisitions are identified by the letter P or K preceding requisition number).

(b) Provide for the designated contract administration services component to distribute to the Navy International Logistics Control Office, (Bayonne, New Jersey) a copy of any report or document which indicates an anticipated or actual delay in delivery of line or sub-line items for the ILP. Copies of such reports distributed to Navy International Logistics Control Office shall include the requisition number applicable to the line or sub-line item involved and shall be in addition to any other distribution required by the contract or directives applicable to the contract administration services component.

§ 1201.352 Extended procurement delays.

The purchasing office shall immediately notify Supply Operations when

V 43 1986 MY 3 78 UMI

extended delays are anticipated in contract award and, when possible, also advise of the anticipated length of the delay in the proposed delivery schedule.

Subpart D—Procurement Responsibility and Authority

§ 1201.401 Responsibility of each procuring activity.

§ 1201.401-50 Delegation of authority.

Authority conferred upon the Heads of Procuring Activities under any paragraph of DLPR may be delegated with power of redelegation to other officers or civilian officials of DLA, except when specifically limited by law or the provisions of the pertinent DLPR paragraph.

§ 1201.401-51 Limited purchasing authority.

The Commander, Defense Logistics Agency Administrative Support Center is granted limited purchasing authority for the following:

(a) Small Purchase authority, i.e., accomplishment of small purchases ($10,000 or less) as provided for in Part 3, Subpart F of this title and of this subchapter.

(b) The use of a Blanket Purchase Agreement (BPA) without monetary restriction except that each call under a BPA may not exceed $5,000. (§ 3-605 of this title).

(c) Unlimited ordering authority for:

(1) Common use classes of supplies and services under Federal Supply Schedule (FSS) contracts.

(2) Supplies from General Services Administration (GSA) Stores Depot (Part 5, Subpart A of this title).

(3) Repairs and Refinishing Services on GSA and FSS contracts (§ 5-205 of this title).

(4) Prison-made and blind-made supplies (§ 5-400 and § 5-500 of this title).

(5) Printing and related supplies under GPO contracts (§ 5-601 of this title).

§ 1201.402 Authority of contracting officers.

Contracting officers may enter into, amend, modify, and take other action with respect to contracts, provided:

(a) Approval of award has been obtained, if required, and the contract embodies the award as approved;

(b) The contract is written on a standard or an approved form of contract;

(c) The contract is authorized by law and complies with the provisions of ASPR and DLPR with respect to the use of contract clauses and does not contain any clause or involve matters in conflict with the established policy of higher authority;

(d) Compliance has been made with all other requirements of law, the ASPR, the DLPR, and the applicable procuring activity instructions; and

(e) The contract is adequately funded.

§ 1201.402-50 General responsibilities of contracting officers.

(a) Contracting officers are responsible for:

(1) The safeguarding of the interests of the United States in contractual relationships;

(2) Their acts as contracting officers under law and regulations;

(3) Maintaining constant cognizance with respect to contract compliance on the part of the contractor;

(4) Obtaining the necessary legal, technical, and administrative review of the contracts they make; and

(5) Knowing the scope and limitation of their authority.

(b) Contracting officers shall personally sign all contracts and modifications entered into in their name. The Contracting Officer cannot designate anyone to sign for him.

(c) Contracting officers shall be bound in all their actions to exercise reasonable care, skill, and judgment. They must assure themselves that the contract is authorized by law, that funds are available, and of their authority to subject the Government or its property to any risk. Contracting officers shall neither act as nor perform the duties of a contracting officer with respect to any contractual instrument obligating only nonappropriated funds. However, contracting officers may act in an advisory capacity with respect to the aforementioned instruments.

§ 1201.402-51 Procedure for closing contracts with inconsequential amounts undelivered.

The Procuring Contracting Officer (PCO) is authorized on a case-by-case basis to consider a contract completed when an inconsequential amount not falling within the variation in quantity clause remains undelivered or, in the case of brand name subsistence or less than carload lots of perishable subsistence items, the undelivered amount is no longer requested by the using activity, provided all of the following conditions exist:

(1) Payment is provided for on a unit price basis, and the contractor advises that no further deliveries will be made;

(2) Payment is made for the units actually received;

(3) The undelivered portion is inconsequential, or in the case of brand name subsistence or LCL perishable subsistence items, the undelivered amount is no longer required by the using activity, and the cost of executing a supplemental agreement (including, but not limited to taking termination action) is excessive in relation to the benefits to the Government from such action; and

(4) The PCO includes in the file a memorandum stating that no rights of the Government are being waived by this procedure and a termination for default is not unwarranted. The PCO shall execute and distribute a Standard Form 30 (or other unilateral instrument) as an Administrative Change to the contract to deobligate funds. The Change shall indicate that the above criterial have been met and the contract is considered complete, and shall reference the contractor's communication which advised that no further deliveries will be made.

§ 1201.403 Requirements to be met before entering into contracts.

§ 1201.403-50 Legal review.

(a) Legal advice and assistance of assigned legal counsel shall be obtained in the preparation of clauses other than standard clauses which are to be contained in solicitations, and on any questionable legal areas in the preparation and/or execution of contractual documents.

(b) Procuring activities within the Defense Logistics Agency shall issue instructions on the legal review of solicitations and contractual documents issued by their activities.

§ 1201.405 Selection, appointment, and termination of appointment of contracting officers.

The Authority in § 1-405 of this title has been delegated by the Executive Director, Procurement, DLA, (DLA-P) to the Commander of each of the following activities:

(1) Defense Depot Memphis.

(2) Defense Depot Ogden.

(3) Defense Depot Tracy.

(4) Defense Industrial Plant Equipment Center.

(5) Defense Logistics Services Center.

(6) Defense Logistics Agency Administrative Support Center.

§ 1201.405-1 Selection

High qualification standards must be maintained for the appointment of contracting officers. Authority to execute and administer contracts of $100,000 or greater should be given only to civilian personnel of Grade GS-12 or above, and to military personnel with at least three years specialized experience in procurement and three years experience in related fields. Exceptions to these minimum qualifications may be granted on a case-by-case basis by the Head of a Procuring Activity and the Commanders of the activities enumerated in § 1201.405 where exceptional circumstances necessitate appointment of an individual.

§ 1201.405-2 Appointment.

(a) Contracting Officer Appointment Documentation Sheet, DLA Form 581, shall be used to facilitate the documentation of recommendations for appointment. This form shall be completed by the official recommending an individual for appointment. Properly prepared, the form will assist the appointing authority, normally the HPA, in determining whether or not the nominee is qualified for appointment. Also, it will provide HQ DLA a current profile of contracting officers.

(b) One copy of each appointment Documentation Sheet shall be sent to HQ DLA ATTN: DLA-PPR.

§ 1201.405-3 Termination of appointment.

(b) *Revocation.* One copy of each revocation of an appointment shall be sent to HQ DLA, ATTN: DLA-PPR.

§ 1201.450 Selection, appointment, and termination of appointment of contracting officers' representatives.

(a) *Designation.* The selection, appointment, and termination of appointment of Contracting Officers' Representatives (COR) shall be made by the contracting officer. Such appointments shall take into consideration the ability, training, and experience of COR designees and shall assure that designees are appropriately qualified to act as an authorized representative of the contracting officer. The COR designations shall be in writing and shall define the scope and limitations of the authorized representative's authority. Appointment shall be made by letter substantially in the form set forth in (d) of this section. Unless the appointment of a COR contains other provisions for automatic termination, the appointment shall be effective, unless sooner revoked, until the COR is reassigned, or his employment is terminated. Revocation of a COR apppointment may be effected at any time by the appointing authority, or higher authority, or any successor to either. Revocation shall be made by letter reading substantially as shown in (e) of this section.

(b) *Authority.* CORs will be responsible to and under supervision of the contracting officer for those actions delegated by the Contracting Officer and unless specifically prohibited by the terms of the contractual instument involved may, at the discretion of the contracting officer, be empowered to take any and all actions which could be lawfully taken by the contracting officer consistent with the scope and limitations of the appointment. Compliance with the Standards of Conduct prescribed in DOD Directive 5500.7 and DLAR 5500.1 shall be maintained.

(c) *Documentation.* Supplementing the normal supervision of the COR by the contracting officer, the contracting officer shall maintain an "activity" file on each COR. The purpose of this file is to record and maintain the results of periodic reviews of the COR's procurement activities conducted annually by the contracting officer. The contents of the activity file will include but are not limited to:

(1) A copy of the COR's letter of appointment;

(2) Examples of in-depth reviews of the COR's performance with appropriate identification of the work performed including DO's issued; and

(3) Documentation by the contracting officer of the date, substance, and extent of the reviews conducted.

(d) *Sample Form of Suggested Letter for Appointing COR's.*

Subject: Appointment as Contracting Offcer's Representative.

To: (Address to individual, indicating rank or grade, branch, division, activity and location.)

1. Under the authority vested in me by the ————, 1 January 1975 subject: Delegation of Authority, you are hereby designated Contracting Officer's Representative with authority conferred by the Contracting Officer.

2. This order shall be in full force and effect until revoked by me or my successor in the same manner as it is hereby granted, or upon your being transferred from the (include branch, division, activity and location).

/s/ CONTRACTING OFFICER.

(e) *Sample Form of Suggested Letter for Terminating Appointment as Contracting Officer's Representative.*

Subject: Termination of Appointment as Contracting Officer's Representative.

To: (Address to individual, indicating rank or grade, branch, division, activity and location.)

Your appointment as Contracting Officer's Representative contained in letter appointment dated ——, is hereby terminated effective ——.

/s/ CONTRACTING OFFICER.

§ 1201.451 [Reserved]

§ 1201.452 Review and approval requirements.

§ 1201.452-1 General.

Every proposed contractual document and supporting file shall be reviewed by the contracting officer prior to signature of the document and prior to forwarding the file for review by higher authority. The contracting officer is responsible for the completeness and accuracy of the file as well as for the soundness of the contractual action. Each file must contain the applicable information, or cross reference thereto, contemplated by ASPR Supplement No. 2 "Contract File Maintenance, Closeout and Disposition" in sufficient detail to permit reconstruction of all significant actions by a subsequent reviewer without referrals to the individuals who consummated the procurement.

§ 120.452-2 Actions requiring HQ DLA review and approval prior to award.

(a) The actions (the term actions as used herein includes both contracts and contract modifications effecting new procurement) listed below require the review and approval of the Executive Director or Deputy Executive Director, Procurement, HQ DLA, or other DLA official so delegated prior to award. Actions are to be submitted to HQ DLA, ATTN: DLA-PC. For review purposes, the dollar amount of an action shall be the sum of the estimated or actual amount of obligation and the amount of any option included in the action.

(1) All actions other than firm fixed-price or fixed-price with escalation;

(2) All actions providing for special performance incentives;

(3) All actions involving—

(i) Architectural-engineering services;

(ii) Management engineering services;

(iii) Management surveys and studies;

(iv) Personal or professional services, not covered by applicable civilian personnel instructions;

(v) Services for maintenance of or for manufacture in Government-owned, contractor-operated facilities. (Not applicable to the Defense Fuel Supply Center.);

(vi) Services and materials for the repair, maintenance, rehabilitation, alteration or modification of Government installations and utilities of $100,000 or more;

(vii) Proposed lease of Government property for non defense use;

(viii) Acquisition of automatic data processing equipment and software in accordance with DLAR 4710 and;

(ix) Acquisition of facilities.

(4) All actions resulting from an invitation for bids (including Balance of Payments and Small Business Restricted Advertising types) when award is proposed to a sole responsive, responsible bidder, and the total dollar amount of the sole bid items being awarded is $100,000 or more, except subsistence items which, by industry practice, are normally subject to 72 hours or less acceptance time, e.g., coffee, flour, sugar;

(5) All negotiated actions including orders under Basic Ordering Agreements with a value of $100,000 or more, when award is proposed to a sole offeror;

(6) All actions which involve construction of petroleum facilities;

(7) All negotiated actions (excluding actions resulting from Balance of Payments and Small Business Restricted Advertising and actions covering the set-aside portion of a procurement made by formal advertising) in an amount equal to or in excess of:

Defense Logistics Services Center	50,000
DLA Administrative Support Center	10,000

(8) Each exercise of an option, regardless of whether the basic contract was advertised or negotiated, and each order under a basic ordering agreement, when the action is in an amount equal to or in excess of that stated in § 1201.452(a)(7) for the activity concerned;

(9) Each order under an indefinite delivery type contract in which the amount of the order is equal to or in excess of that stated in § 1201.452(a)(7) for the activity concerned, except where the basic contract was approved by HQ DLA.

(10) All actions incorporating the Life Cycle Costing concept.

(b) Orders placed against requirements contracts, other Federal agencies, or the National Industries for the Blind or Agencies for the Severely Handicapped are excluded from these review requirements. Contracts negotiated with the Small Business Administration pursuant to Section 8(a) of the Small Business Act are also excluded.

§ 1201.452-3 Information to be furnished.

The complete contract file of those actions subject to HQ DLA review and approval shall be transmitted for review upon completion of negotiations but prior to award. DLA Form 677, "Request for Contract Review/Approval," signed by the contracting officer and by the Commander, his deputy, or the principal officer responsible for procurement shall be used to request review and approval. The file, including a copy of the current specification covering the basic item(s) or service(s), shall be arranged in accordance with ASPR supplement No. 2 and individual documents numbered and assembled in accordance with DLA Form 678, "File Content List," which shall be attached to DLA Form 677. All documents shall be securely fastened in the file which shall be assembled so as to permit viewing of each document without disassembling the file. A carbon copy of the DLA Form 677 and 678, together with copies of (a) the proposed contract (including the solicitation and all amendments thereto), (b) the review comments of the procuring activity review office, (c) determination and findings, (d) field pricing report, (e) cost/price analysis, (f) prenegotiation briefing memorandum, and (g) price negotiation memorandum shall be furnished for retention by HQ DLA. The purchasing office will be notified immediately by telephone when significant information is missing from the file or the available information is inadequate to permit review. Further review action will be withheld pending receipt of the required information. When a solicitation results in two or more proposed awards, one or more of which requires approval, the quantities, prices and names of proposed awardees shall be submitted with requests for approval and all awards will be withheld pending advice of required approval. Telephonic notification of approval, qualified approval, or disapproval will be furnished immediately with written approval evidenced on the original of DLA Form 677, "Request for Contract Review/Approval," which shall be made part of the contract file.

§ 1201.452-4 Release of information.

Prospective suppliers are not to be advised that awards have been forwarded to HQ DLA for approval.

§ 1201.452-5 Proposed shifts in procurements from a competitive to a noncompetitive basis.

Procurements of $1 million and over where it is proposed to shift from a competitive to a noncompetitive status shall be approved in advance by the Head of the Procuring Activity.

§ 1201.452-6 Post award review.

Selected contracts will be subject to post award review. This review may be accomplished by a request for the contract file or during a visit to the applicable purchasing activity by HQ DLA contract review personnel. The results of these reviews and the results of the reviews accomplished prior to award will be utilized to determine future review levels for the activity involved.

§ 1201.452-7 Actions approved but not awarded.

If for any reason action subject to the requirements of § 1201.452-2 are reviewed and approved and subsequently not awarded, HQ DLA, ATTN: DLA-PC, shall be so advised. A complete explanation of the failure to make the award shall be provided.

§ 1201.452-8 Cancellation requirements.

(a) In order to insure that supply discipline and financial stability are not attained at the expense of sound procurement methods and the responsibility of this Agency to its suppliers, the following review system is in effect:

(1) Each partial or total cancellation of an invitation for bids after opening shall be effected only with the approval of the Head of the Procuring Activity.

(2) Reprocurement of an item within 90 days after cancellation under (1) of this section, where the cancellation was occasioned by a revision of requirements or by funding limitations, shall have prior approval of the Head of the Procuring Activity.

(b) Except as specified in (c) of this section, this procedure shall apply to cancellations for any reason other than failure to obtain coverage or unreasonableness of offered prices.

(c) This procedure shall not apply to procurements of nonstocked items or to procurements originated by a MIPR.

§ 1201.452-9 Letter contracts.

(a) Approval of the Executive Director or Deputy Executive Director, Procurement, HQ DLA, or other HQ DLA offical so delegated is required prior to award of letter contracts when the resulting definitive contracts will be subject to HQ DLA preaward review and approval under any of the criteria set forth in § 1201.452-2(a). Requests for such authority are to be made by the Center Director, Procurement and Production and may be transmitted by electronic means (ATTN: DLA-PC) and shall include, as a minimum:

(1) The facts supporting the requirement for a letter contract (§ 3-108 (b) and (c) of this title):

(i) Why the interests of national defense demand that a contractor be given a binding commitment so that work can be commenced immediately;

(ii) Why negotiation of a definitive contract in sufficient time to meet the procurement need is not possible; and

(iii) The written determination that no other type of contract is suitable.

(2) A determination of the contractor's responsibility in accordance with § 1-904 of this title;

(3) The proposed unit price and total price ceilings for the definitive contract;

(4) The limit of the Government's liability under letter contract;

(5) Any requirement for progress payments, provisional payments, and options for increased quantity;

(6) The proposed definitization schedule which shall include the dates for:

(i) Receipt of the contractor's proposal;

(ii) Commencement of negotiations;

(iii) Completion of negotiations;

(iv) Target date for definitization.

(7) The following additional milestone dates are to be submitted:

(i) Receipt of filed pricing report;

(ii) Receipt of the center price analysis;

(iii) Submission of the definitive contract and supporting file for HQ DLA preaward review and approval.

(b) HQ DLA authorization is required prior to modification of all letter contracts which required HQ DLA authorization when the proposed modification affects the:

(1) Unit price or total price ceilings of the definitive contract;

(2) Limit of the Government's liability under the letter contract;

(3) Definitization date;

(4) Progress or provisional payments as initially proposed;

(5) A copy of the signed letter contract or modification shall be forwarded to HQ DLA, ATTN: DLA-PC, within 1 week after its execution; and

(6) Any anticipated or actual slippage in the definitization schedule or the additional milestones must be reported in writing to DLA-PC. The reasons for the slippage and the revised schedule or milestone dates shall also be provided.

§ 1201.452-10 Requests for waiver of HQ DLA preaward review and approval.

(a) In the event extraordinary circumstances are present and immediate award of a procurement action is required, Directors or Deputy Directors of Procurement and Production may request the waiver of Headquarters' preaward review and approval requirements (see § 1201.452-2). Request for waivers from other than "procuring activities" (see § 1201.201-14) shall be made by the Chief of the Purchasing Office. Requests are to be transmitted to the attention of the Chief, Contract Review Office, HQ DLA (DLA-PC) and, when immediate action is required, request may be telephoned.

(b) The granting of a waiver by the Executive Director or Deputy Executive Director of Procurement, HQ DLA (DLA-PC), does not constitute approval of the award or any deviations from applicable laws and regulations. All actions for which preaward review and approval is waived, shall be forwarder to HQ DLA, ATTN: DLA-PC, for post award review within fourteen (14) days subsequent to award or such other mutually acceptable date.

(c) As a minimum, the following information shall be provided to support waiver requests:

(1) The extraordinary circumstances that require the immediate award of the procurement action (this should include a general chronology of events from receipt of the requirement to submission of the request);

(2) Description of the item (and quantity) being procured;

(3) The solicitation and contract number;

(4) The contractor's name;

(5) The total dollar value of the proposed award;

(6) The extent of competition (if award is proposed to other than the low bidder/offeror, the rationale for not accepting the low bid/offer); and

(7) A statement that the contractor is responsible, preaward survey has been performed or waived by appropriate authority; and that, if required, EEO clearance has been obtained.

§ 1201.452-11 Confirmation of quantity and technical requirements.

Immediately prior to the award of any contract which includes war reserve requirements, the contracting officer shall insure that the cognizant Chiefs of appropriate Divisions within Supply and Technical Operations Directorates (Chiefs of appropriate Branches within Supply and Technical Operations Divisions at DPSC) have confirmed that the quantities therein are still required and that the technical requirements specified are still current and not likely to be changed in the near future. Immediately prior to award shall be construed as that point in time when all required approvals have been obtained and the contract is ready for release to the contractors. With respect to eligible awards consummated as a result of MIPRs, confirmation of quantity and technical requirements shall be effected verbally with the MIPR Liaison/Coordination or item manager levels of the requiring departments. Appropriate documentation shall then be included in the contract file. Procuring activities are encouraged to establish similar procedures for significant awards below $100,000 as may be appropriate for their types of procurements.

§ 1201.452-12 Report of procurement actions requiring headquarters DLA preaward review and approval by the close of the fiscal year (RCS: DLA(A)1720(P)).

(a) Each Defense Supply Center and each activity named in § 1201.201-14 shall submit a list of procurement actions which will require Headquarters DLA pre-award review and approval pursuant to § 1201.452-2 by October 1. The initial report shall be submitted by letter on August 1 and will include only those procurement actions to be forwarded subsequent to August 15. The report will be updated by letters on August 15 and September 1. Telephone updatings are required on each Monday subsequent to September 1 and prior to October 1. Negative reports are required.

(b) The report shall include the following for each procurement:

(1) Contract number, RFP/IFB number or other identification;

(2) Contractor's name;

(3) Dollar value, including the value of any option;

(4) Whether advertised or negotiated;

(5) If negotiated, whether cost or pricing data was obtained; and

(6) Week to be submitted for HQ DLA pre-award review and approval.

(c) The letter reports shall be signed by either the Director/Deputy Director of Procurement and Production of the purchasing activity. With respect to those activities named in § 1201.201-14, the letter reports may be signed by the Chief of the Procurement Office. Telephonic updatings may be made by the Chief of the Contract Review Office of the DSC procuring activities and the Chief of the Procurement Office at the other activities.

§ 1201.453 Review and approval requirements at the procuring activity.

(a) Each DLA procuring activity shall establish and maintain requirements and procedures for review and approval of proposed contractual actions to assure conformance with law, regulations and established policy, and the exercise of good business judgment. The scope and depth of the review will be determined by Heads of Procuring Activities based on workload and available manpower, but as a minimum will encompass a representative number of actions, including sole bids/offers and complex or high dollar value procurements. In addition, randomly selected procurement actions including noncompetitive small purchases will be reviewed after award. A summary record of such post award reviews and the results thereof shall be maintained by the activity.

(b) The Contract Review Office, organized in conformance with DLAM 5810.1, shall perform the review function. The review shall be performed as a full time duty where workload requires one or more people for the review. The person selected as the Chief of the Contract Review Office, in addition to possessing the qualifications set forth for a contracting officer in ASPR and § 1201.405, shall be a strong personality with demonstrated technical proficiency and capability of exercising sound business judgment. Personnel from other areas such as counsel, small business, technical operations, production, etc., may serve in an advisory capacity, as appropriate. Personnel may be rotated at intervals to ameliorate workload problems and to afford the individuals an opportunity to utilize the experience so gained.

§ 1201.454 Review and approval requirements for a procurement office not designated as a "Procuring Activity" (see § 1201.201-14).

The dollar threshold under § 1201.452-2(a)(3)(vi) and (5).

Subpart F—Debarment, Ineligibility, and Suspension

§ 1201.601 Establishment and maintenance of records and lists of firms or individuals debarred, ineligible, or suspended.

§ 1201.601-1 General.

The Counsel, DLA shall maintain the DLA list which will contain only

M Y 3 7 8 UMI

V 4 3 — 8 6

the names of firms and individuals located in the United States, its territories and possessions.

§ 1201.601-3 Joint consolidated list.

The Counsel, DLA shall furnish to the Department of the Army a listing of all additions, deletions, or modifications to the Joint Consolidated List resulting from DLA action.

§ 1201.601-50 Attempted evasions.

In some instances, firms or individuals have attempted to evade the prohibitions contained in ASPR and § 1201.604 and § 1201.605 by change of address or by formation of a new company. In such cases where it can be reasonably established that the suspended or debarred firm or individual has the controlling or active interest in a new company, or that the address is the same as that of the suspended or debarred firm or individuals, a report shall be submitted through channels to the Counsel, DLA.

§ 1201.603 Grounds for listing and treatment to be accorded listed concerns.

§ 1201.603-50 Total restrictions.

If an offer is tendered by a debarred or suspended contractor it shall be received and recorded. When an offer is rejected, the reason shall be stated in the certificate to the General Accounting Office as follows:

The bid of ——— is rejected pursuant to ASPR 1-603.

§ 1201.604 Administrative debarment of firms or individuals (type A).

§ 1201.604-3 Notice of debarment.

Upon the debarment or removal from debarment of a contractor prior to termination of the specified period, the Counsel, DLA shall furnish advice of such action to the contractor, and to the General Services Administration in accordance with ASPR 1-604.3(b).

§ 1201.605 Suspension of firm or individual.

(a) *Payments.* Where suspension is recommended or a contractor is suspended, no payments shall be made without the prior approval of the Counsel, DLA. Upon receipt of a notice of suspension, disbursing officers shall retain all administratively approved vouchers in favor of the contractor pending instructions from the contracting officer. Offices holding or in receipt of proper invoices covering amounts due to suspended contractors shall prepare and administratively approve the necessary vouchers and shall forward the certified vouchers to their assigned disbursing officers, inviting attention to the fact of suspension. This procedure shall be followed whenever any additional or new amounts become due during the period of suspension. When in the opinion of the Head of the Procuring Activity concerned, the circumstances surrounding either the procurement or the suspicion of fraud or criminal conduct are of such a nature as to permit or require complete or partial release of withheld funds due the suspended contractor, a recommendation for such release including a full statement supporting such recommendation shall be made to the Counsel, DLA.

(b) *Terminations.* Negotiations toward settlement of terminated contracts shall cease with the suspension of a contractor. Negotiations must likewise cease with respect to terminated subcontracts either awarded or held by a suspended contractor. All authorizations granted to such a contractor under section VIII, ASPR or Part 1208 of this subchapter shall be revoked immediately.

(c) *Awards.* Bids submitted by suspended contractors shall not be rejected by contracting officers solely because of the suspension but will be received, recorded, and retained in accordance with established procedures. When a suspended contractor is the low bidder or offeror (or, in the case of surplus and salvage sales, the high bidder), and the procuring activity considers it in the interest of the Government to accept the bid or offer, information relating to: (1) The low (or high) bid or offer and the next lowest (or highest) bid or offer; (2) expirations of options and whether such options may be extended; and (3) the desirability or necessity of acceptance of the suspended contractor's bid or offer shall be reported together with recommended action in the same manner as set forth in ASPR 1-608 for a determination as to the placement of any awards with the suspended contractor.

(d) *Inquires.* Inquiries by procuring activities concerning the status of reported cases shall be transmitted in triplicate to the Counsel, DLA.

§ 1201.608 Reporting.

Heads of Procuring Activities shall submit the reports described in ASPR 1-608, which shall be designated "For Official Use Only" unless the details included warrant a security classification.

§ 1201.650 Review of past contractual relationships.

When the name of a concern has been added to the consolidated listing in ASPR 1-601, or a report is submitted requesting suspension or debarment, a review shall also be made of contractual relationships with the company and its affiliates for the previous 2 years, or longer if considered necessary to determine whether the Government may have any basis for recovery of damages, or payments from the contractor.

Subpart G—Small Business Concerns

§ 1201.702 General policy.

(a) The Small Business program shall be conducted as an integral element in the DLA mission to achieve effective and efficient military supply.

(b) A continuing effort shall be made to stimulate the maximum qualified competition for DLA contracts, with special emphasis directed toward promoting that of small business firms. Contracting personnel should prepare all solicitations so as to preclude insertion of provisions that may limit competition from small business firms.

(c) Procurement officials and Small Business Specialists shall take all possible and reasonable actions to inform small business firms of subcontracting opportunities being offered by prime contractors.

§ 1201.704 Small business officials.

§ 1201.704-50 Counseling activities.

(a) This subpart covers the general objectives of counseling and provides guidance to the Small Business Specialist in the conduct of his counseling activities. It also covers the materials that may be used in counseling practice.

(b) Each Small Business Specialist shall develop a personalized approach to, and pattern for, his counseling activities, to include the following concepts:

(1) The basic attitude toward counseling must be that of "service" to the businessman. Each DLA Small Business Specialist is a counselor for all DLA centers. Under no circumstances is an inquiry to be handled casually in an endeavor to dispose of the problem with the least amount of effort, nor should an inquirer be told to get in touch with another DSC. When a Small Business Specialist determines that an inquirer's problem can best be handled in another DSC he should make the necessary contact, introduction, and appointment. To the maximum extent possible, the same approach should be taken when the inquirer's problem must be handled by another element of the Department of Defense or by another Government agency. In short, industry inquires shall, whenever possible, be handled on a "one-stop-service" basis.

(2) The major objective of counseling is to attract the maximum number of qualified competitors for DLA contracts.

(3) A supporting objective of counseling is to provide as complete as possible service to all inquiries. Whether or not a businessman is found to be a potential bidder for DLA contracts, efforts shall be made to identify for him other Government agencies which might be interested in what he has to offer.

(c) In counseling, the primary role of the Small Business Specialist is to assist a businessman in his attempt to do business with DLA and, secondarily, with other elements of the United States Government. The Small Business Specialist, however, must not attempt to interpret invitations for bid, requests for proposals, specifications, or related documents. If the need for such interpretation becomes evident, the Small Business Specialist shall arrange an interview for the businessman with the appropriate contracting officer or his designee.

(d) The Small Business Specialist shall maintain adequate stocks of all Government publications designed to assist the operator of a small business in his approach to selling to DLA and to other elements of the United States Government. The Specialists must have available for reference the cataloging handbooks, Federal Supply Classifications, regulations, and directories necessary to provide adequate information to inquiring businessmen.

(e) The HQ DLA Small Business Advisor shall serve as a focal point for arranging for the initial distribution and replenishment stockage of those publications made available by Government agencies; and shall assist, if requested, in arranging for replenishment of these documents.

(f) Centers are urged to develop pamphlets and brochures describing the opportunities for businessmen which they provide. When these documents are published, provisions shall be made to supply the HQ DLA Small Business Specialists in the other supply centers and the HQ DLA Small Business and Economic Utilization Advisor with an initial stock of 50 copies. The initial distribution shall be accompanied by instructions for replenishment. The provision of copies for the HQ DLA Special Assistant for Public Affairs should be coordinated with the local Public Affairs Office.

§ 1201.704-51 Participation in industrial assistance events, business opportunity/Federal procurement conferences, procurement clinics, fairs, etc.

(a) The office of the HQ DLA Small Business and Economic Utilization Advisor will act as the overall coordinator for DLA participation in industrial assistance events (IAEs) and other business opportunity conferences. All events will be coordinated with the Office of the Special Assistance for Public Affairs, HQ DLA.

(b) Requests for DLA participation in events being sponsored by Federal or local Governments, or Chambers of Commerce involving more than the local DLA office will be coordinated with the DLA Advisor's office. For local events involving the local activity only, reports as to the type and kind of Agency participation will be provided to the Advisor's office or as soon as practicable after the event is held.

(c) For Business Opportunity/Federal Procurement conferences sponsored by Congressional offices, with DLA participation requested by the Office of the Director, Defense, Research and Engineering (ODDR & E), OSD, the office of the HQ DLA Small Business and Economic Utilization Advisor will coordinate the Agency's participation requesting assistance and participation by appropriate DLA field activities. Participation in these events will be conducted as directed by the DLA Advisor's office.

(d) To the maximum extent practicable, each DSC shall, as requested, participate in IAEs, and shall budget, on a yearly basis, funds necessary to cover travel costs for these events. On the basis of past experience, this would involve approximately seven trips per year. These include procurement clinics, small business/federal procurement conferences, expositions, and similar activities designed to increase the competition of qualified small business and other firms for DLA and other Government activity contracts.

(e) Participation in these events shall consist primarily of attendance by small business specialists and procurement personnel for the purpose of counseling and advising businessmen on how they may do business with DLA. Exhibits of DLA items, talks by DLA officials, and the showing of relevant DLA films may be included when appropriate. Whenever the DLA Advisor is the DOD Coordinator of the event, the DSC Specialist will be requested to conduct the seminar on "How To Prepare Bids."

(f) The type of participation by each DSC shall be as directed by the DLA Small Business and Economic Utilization Advisor and should reflect the extent to which the businessmen attending the event may be potential sources of supply for DLA. Efforts should be made to announce procurements and items of interest to these businessmen in time to permit appropriate counseling at the event.

(g) Individual supply centers may also develop and sponsor industrial assistance events oriented exclusively to the individual procurement programs. Planning for such events should be effected in close coordination with the office of the HQ DLA Small Business and Economic Utilization Advisor and the Center and the HQ DLA Special Assistant for Public Affairs.

§ 1201.705 Cooperation with the Small Business Administration.

§ 1201.705-4 Certificates of Competency.

(a) When a small business is determined nonresponsible because of lack of capacity or credit, but it is determined under the authority of ASPR 1-705.4(c)(iv) that the expediency of the requirement precludes referral to the Small Business Administration (SBA) for Certificate of Competency (COC) action, award to the next lowest responsible bidder must be made within the 15 working day period established in ASPR 1-705.4(c) for SBA COC action. If such award cannot be made in this period, SBA should be given an opportunity to consider the issuance of the Certificate of Competency. All efforts should be made through proper procurement planning to provide sufficient time for COC action by SBA, should such action become necessary. This includes: (1) The issuance of procurement requests at a time early enough to allow sufficient time for orderly procurement, (2) the earliest possible request for pre-award survey, (3) the handling of COC referrals by telephone where appropriate and (4) expeditious follow-up of COC referrals.

(b) When the urgency situation contemplated by ASPR 1.705.4(c)(iv) clearly exists, the requiring activity shall fully document the urgency involved, indicating exact dates, quantities, usage data, etc. these determinations shall be coordinated with the Small Business Specialist and approved in accordance with ASPR 1-705.4 before the low small business bid is bypassed and award made to a higher bidder.

(c) ASPR 1-705.4(c)(vi) requires that when a contracting officer makes a determination that a small business concern is not responsible for reasons other than deficiencies in capacity or credit, his decision must be supported by substantial evidence documented in the contract file. When such a determination is made, the documentation shall be reviewed to assure that the evidence presented substantiates the decision as to the concern's lack of integrity, business ethics or persistent failure to apply the necessary tenacity and perseverance to do an acceptable job. For DSCs, this review shall be made by the HPA, or his designee. For other purchasing activities, the review shall be made by the Activity Commander or his designee. In addition, for each case where a determination is made under ASPR 1-705.4(c)(vi), a copy of all pertinent information, including supporting documents, shall be forwarded to HQ DLA, ATTN: DLA-PS, for informational purposes.

(d) Contracts involving a contractor to whom a COC was issued by SBA, or to whom loans were made with SBA

M Y 3 — 7 8
UMI

V 4 3 — 8 6

participation, shall not be terminated for default without prior approval by the HPA.

(e) ASPR 1-705.4(f)(iii) provides that in cases where the Contracting Officer requires the issuance of a COC by SBA as a prerequisite to contract award, approval of such action will be obtained at a level above the Contracting Officer. For those cases where this situation exists, Contracting Officers will obtain approval from the Director, Procurement and Production prior to informing the SBA Field Office that a certificate must be issued.

§ 1201.705-5 Contracting with the Small Business Administration.

(a) *Authority.* (1) Single Point of Contact Between SBA and DSC. The Small Business/Labor Surplus Area Specialist (hereafter referred to as Specialist) of the purchasing office is designated as the initial and primary point of contact for all inquiries associated with this program. To the extent requested by a prospective section 8(a) subcontractor, or by an SBA representative on its behalf, the Specialist will take appropriate action to set up meetings or discussions which may be required with technical, supply, and procurement personnel.

(2) The Specialist is hereby authorized to perform the duties of the DLA Advisor as set forth in ASPR 1-705.5. This includes authority to receive requests for a commitment to support SBA approved plans, authority to issue commitments to the SBA in support of firms in the 8(a) Business Development Program and authority to grant approval to proceed with the negotiation of proposed section 8(a) contracts. Direct communication between the Specialist and all SBA offices is authorized and encouraged.

(b) *Policy.* (2) *Business development expense (BDE.)* By agreement with SBA, the SBA will generally provide the DOD an order for BDE in advance of the placing of a prime contract with SBA. The amount to be covered by the order is determined in advance of contract award by a comparison of the total price negotiated with SBA and the subcontractor (in accordance with existing procedures in ASPR 1-705.5) with the current fair market price developed in accordance with ASPR 1-705.5 (b)(2) and (c)(1)(L) as agreed with SBA. The prime contract price placed by DOD with that Agency will include those expenses as a part of the cost of the items ordered and will not be separately identified in the contract. DOD funds, which will include the anticipated reimbursement from SBA, will be cited on the contract. Upon award of the contract, SBA will be billed against their reimbursement order under procedures set by the Comptroller, HQ DLA.

(3) *Contract assistance.* Requests for technical and/or management assistance which are in excess of DSC or DCAS capability and resources shall be referred to DLA-PS or DLA-AS as appropriate. Through agreement between HQ DLA and SBA, technical and management assistance teams can, under certain circumstances, be made available to augment assistance provided by the PCO and/or ACO.

(4) *Identification of items and requirements for section 8(a) contracting.*

(i) In addition to responding to SBA requests for potential requirements to support an approved business plan of a disadvantaged firm in accordance with ASPR 1-705.5(c) (1) and (2), and paragraph (c) of this section, it is the policy of DLA to identify other requirements which are considered by the procuring activity as suitable for placement with SBA under the section 8(a) contract program.

(ii) Contracting Officers will consider the section 8(a) contract program as a possible method of satisfying all new requirements being processed for procurement action. Special attention will be given to those commodities and services which are anticipated to be recurring requirements and for which there is a limited number of prospective small business sources. Production and technical operations personnel should participate in this review when appropriate.

(iii) Whenever a current requirement is identified as a possible candidate for accomplishment under the section 8(a) contract program, the following actions will be taken:

(A) Where the "desired" or "required" delivery criteria permits section 8(a) consideration, the requirement shall be referred in writing to the Director, Office of Business Development, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, for national-buy items and the appropriate SBA regional office for local-buy items. The SBA Procurement Center Representative (PCR) assigned to the purchasing office shall be informed in every case by copy of the written offer. A reasonable due date for a reply from SBA shall be established, and will be stated in the offering letter. If no response is received from the SBA by the due date, the requirement may be withdrawn or the time extended at the option of the purchasing office.

(B) Where delivery criteria requires immediate procurement action, the appropriate SBA office, as outlined in § 1201.705-5, shall be notified in writing that future requirements may be made available for section 8(a) contracting. Such notification should include an estimate of future requirements and of the probable date when the next procurement action will be initiated. In addition, the Materiel Manager will be requested to flag the item for processing as outlined in (iv) of this section.

(C) A copy of notifications submitted to SBA in accordance with § 1201.705-5(b)(4)(i) of this section shall be furnished to DLA-PS.

(iv) The Materiel Manager will maintain a method for flagging those items identified by SBA as being currently procured under this program and will insure that the Specialist is notified of any planned procurements of those items so flagged at the earliest possible date; i.e., after the determination of a firm requirement, and, if possible, prior to the preparation of a purchase request.

(c) *Procedures.* (1) *Supplies, services, and research and development.*

(i) The SBA has been requested to submit requests for requirements to support approved business plans directly to the Specialist of the DLA activity responsible for the procurement and management of the commodities required with an information copy to DLA-PS.

(ii) Every effort will be made to support the SBA request with the specific commodities solicited or with appropriate substitute items. Such reviews will be coordinated with the Supply, Technical, Production, and Procurement staffs, as appropriate, for concurrence and procurement planning.

(iii)(A) Within 30 days of the receipt of the request, SBA will be notified of the extent of support that can be provided, indicating the date requirements will be available and reserved for section 8(a) contracting, and milestone dates for solicitation, completion of negotiations and contract award. This notification represents a firm DLA commitment to the extent outlined in ASPR 1-705.5(c)(1)(C). Information copies of this notification will be provided to DLA-PS. In the event the purchasing office is unable to support the SBA request with the item requested and no substitute items can be offered, complete data in support of the purchasing office position is to be forwarded by the Sepcialist to DLA-PS for further action with SBA.

(B) Concurrent with the commitment notification to the SBA, the purchasing office will develop a procurement plan to assure prompt solicitation, negotiation and contract execution.

(*1*) ASPR 1-2100 advance procurement planning and § 1201.2102, will be used as guidelines for developing procurement plans. Planning shall include projected requirements for follow-on contracts for the length of the nominated subcontractor's approved business plan, so as to preclude, if possible, a break in production.

(*2*) Realistic milestones shall be established to assure timely procurement actions. When it becomes apparent that established milestones will not be met, problems causing potential slippage shall be identified and examined. Problems not resolved locally shall be expeditiously elevated to DLA-PS by the Specialist.

(*3*) Should the DLA procuring contracting officer need to retain approval authority on subcontract requests in special instances (e.g., health and safety items involving the QPL, etc.), a clause similar to the provisions below may be incorporated into the contract awarded to SBA.

Subcontracting for Contracts Awarded Pursuant to section 8(a), Small Business Act (DLA 1973 Oct). The subcontractor shall not further subcontract the manufacture/performance of any of the supplies or services required under this contract without prior written approval of the cognizant DLA procuring contracting officer.

The prohibition against further subcontracting is intended to apply only to that part of the work required by the contract, and represented to be performed by the SBA subcontractor. The subcontractor should not be precluded from purchasing raw materials, or other items, which, in accordance with industry practice, are normally purchased/subcontracted. This clause may be revised/modified as necessary to comply with the intent of this paragraph, and should be limited to special programs.

(*4*) Companies nominated to receive contracts awarded under section 8(a) of the Small Business Act have the same problems as established contractors, and in some instances may have even greater problems. Accordingly, DLA contracting officers must take particular care to include an appropriate economic price adjustment provision in section 8(a) contracts when the circumstances so warrant. Borderline cases should be resolved in favor of including an adjustment provision. In addition, pricing arrangements included in section 8(a) contracts (i.e. price adjustment provisions) shall be at least equal to those which would normally be included in contracts for like or similar items placed with regular commercial sources.

(*5*) ASPR section 1, part 19, stipulates that the requirement for first article testing and approval may be included in contracts as appropriate. Extensive use of this requirement will assist section 8(a) contractors in providing supplies conforming to specification requirements.

(*6*) When circumstances arise indicating a need to withdraw requirements previously committed for section 8(a) contracting, the purchasing office will seek SBA agreement for such withdrawal. If the SBA does not agree with such withdrawal, complete data supporting such proposed withdrawal shall be provided to the DLA Advisor's office for review and decision concerning the proposed withdrawal.

(vii) Review and approval of section 8(a) contracts have been delegated to DLA field procuring activities. Such review and approval actions shall be accomplished in accordance with § 1201.453.

(viii) The purchasing office will assure that follow-on section 8(a) contract support will be provided for that period of time reflected in the SBA approved business plan. To avoid the possibility of costly breaks in production, a supplemental procurement plan shall be established for each section 8(a) contract awarded to assure that additional follow-on requirements are made available as needed. A new SBA letter requesting the reservation of these follow-on requirements shall be requested by the Specialist and obtained from SBA at least 60 days prior to the day a follow-on contract is required to avoid a break in production. Milestones for accomplishment of the follow-on award will be established and followed. Where there is an indication that slippage might occur which will endanger meeting established milestones, DLA-PS, and the cognizant SBA regional office, will be immediately notified for resolution of the problem.

(ix) *Contract administration.* (A) ASPR section 1, part 18, stipulates that post-award orientation conferences with contractors be initiated to assure a clear understanding of the scope of the contract, the technical reqirements, and the rights and obligations of the parties. In the case of section 8(a) contractors, the contracting officer, or technical represenative of the purchasing office, should in all cases initiate a request for such a conference to assure that all matters requiring clarification or resolution are considered and contractual requirements are explained. Specific attention will be given to the requirements of statutes, executive orders, regulations and determinations establishing labor provisions and standards of the contract.

(B) Early notification to the SBA of deficiencies in contract performance by a section 8(a) firm is particularly important in the administration of 8(a) contracts.

(C) Whenever the subcontractor encounters problems which could jeopardize performance, DLA-PS and the cognizant SBA regional office shall be notified. The contracting officer or his authorized representative shall provide all reasonable assistance to the subcontractor to correct deficiencies which may arise.

(D) DLA-PS and the SBA regional office shall be notified at least ten days prior to the initiation of any adverse action against any SBA subcontractor.

(x) A copy of each section 8(a) contract, excluding general provisions, shall be mailed to DLA-PS within 10 days after date of award.

(xi) Appropriate clearance should be requested as early as possible on 8(a) contracts subject to the Equal Opportunity Clause to preclude delays in awards.

(2) *Construction.* The authorities, procedures and guidelines established in § 1201.705-5(c)(1) are equally applicable to DLA section 8(a) contract program covering construction procurements.

§ 1201.706 Set-asides.

§ 1201.706-1 General.

(b) ASPR 1-704.3(b)(iii) provides that Small Business Specialists shall, prior to issuance of solicitations or contract modifications in excess of $2,500, determine that small business concerns will receive adequate consideration including initiation of set-asides. This portion of ASPR also provides that set-aside determinations may be made jointly with PCOs or may be in the form of recommendations to them. Within DLA, PCOs shall assume primary responsibility for initiation of set-aside actions. The Small Business Specialists' responsibilities with respect to examining procurements for potential set-asides are to review actions proposed by PCOs taking into consideration the varied judgment factors involved, and to assist in resolving problems and overcoming impediments noted in connection with the establishment of set-asides. The review of all procurements over $10,000 and all class set-asides shall be accomplished by use of DLA Form 1360, Record of Set-Aside Action (see § 1216.854). As indicated on the form, its use is optional for procurements valued from $2,500 to $10,000. If the DLA Form 1360 is not used for this category of procurement, a local form shall be used.

§ 1201.706-3 Review, withdrawal, or modification of set-asides or set-aside proposals.

(e) Regarding the small business set-aside appeal procedures provided to the SBA Procurement Center Representative, ASPR 1-706.3(e) provides that appeals shall be made to the Chief of the Purchasing Office. Within DLA, in the event the decision of the Chief of the Purchasing Office would approve the action of the contracting officer, the appeal shall be elevated to the Center or Depot Commander for final decision. If the Commander's decision also approves the action of the contracting officer, the SBA representative shall be advised and may proceed with further appeal actions as prescribed in ASPR 1.706.3(e).

M Y 3 — 7 8 UMI

V 4 3 1 8 6

§ 1201.707 Subcontracting with small business concerns.

§ 1201.707-3 Required clauses.

(a) When the provisions of ASPR 1-707.3(b) are applicable, the contracting officer shall make a determination of subcontracting potential on a case-by-case basis. Those cases where it is determined that the clause in ASPR 7-104.14(b) will not be included because of substantial subcontracting possibilities do not exist, should be coordinated with and concurrence obtained from the activity Small Business and Economic Utilization Specialist and, where available, the Small Business Administration (SBA) Procurement Center Representative (PCR), before the procurement action is released.

(b) If it is determined that all procurements for a particular product or service will not include the clause in ASPR 7-104.14(b), the determination and supporting data shall be coordinated with and concurrence obtained from the activity Small Business and Economic Utilization Specialist and the SBA PCR. Prior to the application of the determination to an actual procurement, a copy of such blanket determination, with supporting data, shall be furnished to HQ DLA, ATTN: DLA-PS, for coordination with SBA.

Subpart I—Responsible Prospective Contractors

§ 1201.905 Procedures for determining responsibility of prospective contractors.

§ 1201.905-1 General.

When the contracting officer makes a determination regarding the prospective contractor's responsibility that is contrary to that recommended in the preaward survey report, the reason for not following the preaward survey report recommendation shall be included in the contract file. In each instance wherein the preaward survey report recommendation is not followed, the case must be reviewed and concurred in at a level no lower than the Director of Procurement and Production. Procuring contracting officers shall advise the DCAS office performing the preaward survey as to the reason for not following the DCAS preaward survey recommendation.

§ 1201.905-4 Pre-award surveys.

(a) Preaward surveys shall be accomplished in accordance with ASPR 1-905.4, ASPR appendix F 200.1524, ASPR appendix K, and DLAM 4100.2, section VIII.

(b) A preaward survey shall be requested only when an award is contemplated to a firm from which a bid or proposal has been received. Concurrent requests for preaward surveys on the same procurement will not be made except in emergency situations and/or when multiple awards are contemplated.

(c) Preaward surveys on sole source suppliers shall be limited to partial surveys. Factors requested for investigation shall be those that actually affect the contract, such as production backlog, financial, and quality.

(d) A preaward survey shall be made unless there is current quality, production and financial information available to waive the requirement. Even if the prospective contractor is currently producing or has successfully performed under a recent contract (within 1 year) and is being considered for an award of a similar undertaking, i.e., similar item and similar size contract, a partial survey may be required to determine current financial capability and capacity. However, if the same contractor is being considered for a much larger contract or a contract involving a fundamentally different undertaking, a complete or partial survey, as indicated by the circumstances, shall be requested. If the prospective contractor is newly entering into the manufacture of the goods sought by the Government or has no recent history of performance of a similar undertaking, a complete survey shall be requested.

(e) When limited information is required such as capacity and financial data, under the circumstances outlined in paragraphs (c) and (d) of this section, information can often be obtained through telephonic contact with the preaward monitor at the cognizant CAO, precluding the administrative effort associated with a partial preaward survey request.

(f) When a decision is made not to request a preaward survey, an explanatory memorandum will be included in the contract file establishing the contracting officer's decision to waive the preaward survey on proposed awards of $100,000 and over.

(g) Quality Assurance Division personnel shall assist in the determination to request or waive preaward surveys, evaluate QA portions of preaward survey reports, and participate in preaward surveys when the contract will be for a complex item, the potential contractor has a poor quality history or when requested by DLA.

§ 1201.905-50 Capability surveys for workshops for the blind and other severely handicapped.

(a) The purchasing office, upon request from the Committee for Purchase from the Blind and Other Severely Handicapped, shall request a capability survey to determine the capability of the Workshop(s) to produce specific items being considered for addition to the Procurement List.

(b) The purchasing office, when requesting a capability survey, shall make the request on DD Form 1524, Pre-Award Survey of Offeror—General. The purchasing office should emphasize factors concerned primarily with production capabilities (e.g., Factors 1, 2, 3, 5, 7, and 13 listed in Section III, DD Form 1524). The financial capability and accounting system factors will be excluded. When a capability survey is being requested, Section III, Remarks, DD Form 1524, shall clearly indicate the request is for a "Capability Survey" only.

(c) The purchasing office shall forward requests for capability surveys to the appropriate office, in accordance with ASPR K-201(c). The purchasing office shall furnish a copy of the completed survey to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped.

(d) Capability surveys will be executed by the cognizant contract administration office in accordance with DLAM 8300.1, Section 3-1100.

Subpart L—Specifications, Plans and Drawings

§ 1201.1203 Availability of specifications, standards, plans and drawings.

The following modifications shall be made to the "Availability of Specifications and Standards" provision referenced in ASPR 1-1203.2(a):

(a) Renumber paragraph (b) to (c).

(b) Insert new paragraph (b):

(b) The minimum processing time required by the U.S. Naval Publications and Forms Center for mailing requested documents is seven (7) days after receipt of written requests and two (2) working days after receipt of telephone requests.

Subpart M—Procurement Planning

§ 1201.2100 Procurement planning.

§ 1201.2100-2 Applicability.

Procurement Plans will be required for all procurements other than those effected under ASPR section III, part 6. Procurement Planning will (a) be initiated at the time the Purchase Request is received by the Buyer (b) be prepared substantially in accordance with the sample format shown in § 1201.2102 and (c) be approved at a level higher than the Buyer, the approval level to be established by each DSC.

§ 1201.2102 Sample format and content of procurement plans.

Subpart N—Industrial Preparedness Production Planning

§ 1201.2205 Existing authority affecting the industrial base.

(a) (1) (i) As part of the Industrial Preparedness Planning (IPP) Program, ASPR 3-216 authorizes the negotiation of contracts for selected supplies with certain planned producers. Negotiation is limited to those producers who have in effect, or those offerors who will agree to execute a DD Form 1519 (Production Planning Schedule). Though not legally binding on the parties, this document signifies the Government's intention when authorized to convert such planned mobilization production schedules to contracts in order to minimize material shortages during national emergencies.

(ii) Pursuant to 10 U.S.C. 2304(a)(1), as implemented by ASPR 3-201, the Secretary of Defense may authorize IPP contract negotiation. In such event, the Chief, DLA-PR, shall notify the Defense Supply Centers to issue Standard Letter contracts (§ 1207.850) in accordance with their emergency procurement plans to all producers having a current DD Form 1519 in effect. The Letter Contract will require the recipient to commence production immediately. Thereafter, the parties shall negotiate a definite contract in accordance with the Letter Contract's definitization schedule.

§ 1201.2206 Applicable procedures.

§ 1201.2206-50 Industrial preparedness planning packages.

(a) *General.* (1) The principal objective of IPP is not the completion of planning, but rather its final implementation. The implementation of plans for emergency procurement will depend on the degree of mobilization.

(2) DSCs shall develop and maintain the IPP packages for use during mobilization. IPP elements at the DSCs should maintain close coordination with procurement elements to ensure that contracting officers and other procurement personnel are familiar with the objectives of the program, and are aware of the existence of mobilization procurement plans.

(b) *Composition of the Package.* The IPP packages shall be established and maintained for all planned items. The package should include the Industrial Preparedness Plans (DLA Forms 1344 and 1345) and Standard Letter Contract.

(c) *Industrial Preparedness Plan.* (1) Industrial Preparedness Plans shall be established and maintained for planned items. The plan shall consist of information for the operation of DLA field activities, progress and status information for HQ DLA, ATTN: DLA-PR; and the necessary information required for an alternate to perform under emergency conditions.

(2) Continuous review shall be made to ensure inclusion of current data regarding requirements, planned producers, and production schedules. DSCs shall update or revise the plan at least yearly, or more frequently as changes warrant. Recipients of this plan shall be provided revised editions as appropriate.

(3) The IPP shall contain mobilization requirements and production data and shall reflect the specific planned procedures, their phased production schedules and other information relating to these schedules. Where plans are developed for several or many similar items, consideration should be given to grouping the data for such items into one plan. This will consist of consolidating the requirements for

M Y 3 7 8 UMI

V 43 | 86
MY 3 78
UMI

all the items and the production for all the items scheduled with each planned producer. Normally, only unclassified data will be included in this plan. In the event a DSC desires to include classified data, HQ DLA, ATTN: DLA-PR, shall be advised of the necessity of such data prior to its inclusion.

(4) DLA Form 1345, Industrial Preparedness Plan, and DLA Form 1344, Planned Producers and Schedules, have been developed for use by all DSC's.

(d) *Standard Letter Contract (IPP).* (1) The basic IPP implementing document shall be the Letter Contract (7-850). DSC's shall prepare the Letter Contracts as data becomes available and decisions made as to selected sources of supply and production schedules.

(2) DD Forms 1519 are informal production agreements not legally binding on either the Government or planned producers. These documents indicate the Government's intention to convert planned mobilization production schedules to contracts by negotiating on a selective basis as may be required to minimize material shortage during a limited war. Therefore, an additional procedural step is necessary to authorize the contractor to initiate his planned production.

(3) The authority for negotiating procurement in the event of a national emergency is 10 U.S.C. 2304(a)(1) cited in ASPR 3-201. Upon receipt of advice from the Secretary of Defense that expanded use of negotiated procurement under a national emergency is authorized, the Chief, DLA-PR, will notify DSC's to implement their emergency plans. The document to do this is the Letter Contract.

(4) Adequate cross-reference should be included to identify producers who are scheduled to produce more than one item. In such cases, only one Letter Contract should be furnished to the producer, listing all the items scheduled for production.

(5) Attachments such as specification, should be readily available to be included with the contract mailed to the producer. A letter, explaining the implementation procedure, shall be forwarded to each planned producer upon completion of planning to ensure that manufacturers are aware of this procedure.

(e) *Implementation of Plans.* (1) Plans shall be implemented only to the degree necessary to support a specific emergency. Full implementation of plans for mobilization procurement and release of Letter Contracts for planned items are contemplated under *full* mobilization.

(2) Under partial mobilization where the use of full Approved Force Level is not required, the DOD policy will be to acquire military support with minimum impact on commercial production. The need for imposing economic controls on the civilian segment of the nation will depend on the ability to obtain the required military suppliers without disturbing the civilian economy.

(f) *Alternate Files Maintenance.* (1) Copies of each IPP package shall be furnished to HQ DLA, ATTN: DLA-PRS; to the Alternate Files, Emergency Relocation Site; to the DLA Central File Repository; and to the Procurement Files at the Alternate National Military Command Center (ANMCC). Appropriate mailing addresses can be found in the DLA Field Activity War and Emergency Support Plan (FAWESP) by July 15 of each year. Since the prime objective of IPP is implementation, DSC's should ensure that these files are kept current. HQ DLA (DLA-PR) will annually inspect these files to ensure that they are being properly maintained for use in an emergency.

(2) DSC's should also furnish a copy of each items specification/drawing to the Alternate File, Emergency Relocation Site (ERS). Address for this file is contained in the War Emergency Support Plan (WESP).

Subpart O—Environmental Protection

§ 1201.2302 Administration and enforcement.

§ 1201.2302-3 Compliance responsibilities.

The procuring contracting officer shall report violations of the clean air or water standards which come to his attention in the performance of his regular duties to HQ, DLA, ATTN: DLA-PPR.

§ 1201.2302-5 Withholding award.

(a) If, pursuant to the certification in ASPR 7-2003.71, the successful offeror informs the contracting officer that the facility he proposes to use is being considered for inclusion in the EPA list of Violating Facilities, the contracting officer shall provide the following information telephonically to DLA-PPR (AUTOVON 284-6431). Written confirmation will be requested if needed:

(1) Solicitation number;

(2) Product or service being procured;

(3) Quantity and dollar amount of proposed contract;

(4) Name and address of proposed awardee;

(5) Address and owner of facility being considered for listing by EPA;

(6) Date of communication from EPA; and

(7) Basis for proposed inclusion in the EPA list of Violating Facilities.

(b) In the event that EPA requests a fifteen day delay in award, and such delay would be prejudicial to the Government's interest, as stated in ASPR 1-2302.5, the contracting officer shall execute a Determination and Findings (D&F) to that effect. Upon approval of the D&F by the Chief of the Purchasing Office, DLA-PPR shall be notified, and will inform EPA of the decision to proceed with award.

PART 1202—PROCUREMENT BY FORMAL ADVERTISING

Subpart A—Use of Formal Advertising

Sec.
1202.104 Types of Contracts.

Subpart B—Solicitation of Bids.

1202.201 Preparation of Invitation for Bids.
1202.201-50 Right to Apply FOB Origin Offer.
1202.203 Methods of Soliciting Bids.
1202.203-50 Other Distribution.
1202.205 Bidders Mailing Lists.
1202.205-2 Removal of Names from Bidders Mailing Lists.
1202.205-4 Excessively Long Bidders Mailing Lists.
1202.205-6 Pre-Invitation Notices.

Subpart C—Submission of Bids.

1202.303 Late Bids, Modifications of Bids or Withdrawals of Bids.
1202.303-5 Hand-carried Bids.

Subpart D—Opening of Bids and Award of Contract.

1202.404 Rejection of Bids.
1202.404-1 Cancellation of Solicitation.
1202.406 Mistakes in Bids.
1202.406-3 Other Mistakes.
1202.406-4 Disclosure of Mistakes After Award.
1202.406-50 Actions Referred to Higher Authority.
1202.407 Award.
1202.407-1 General.
1202.407-3 Discounts.
1202.407-6 Equal Low Bids.
1202.407-8 Protests Against Award.
1202.407-50 Other Factors to be Considered in Determining Price Reasonableness.
1202.408 Information to Bidders.
1202.408-1 Unclassified Awards.
1202.450 Requests for Decision by the Comptroller General.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subpart A—Use of Formal Advertising

§ 1202.104 Types of contracts. For economic price adjustment policy applicable to formally advertised procurements (see § 1203.404-3).

Subpart B—Solicitation of Bids

§ 1202.201 Preparation of invitation for bids.

§ 1202.201-50 right to apply FOB Origin offer.

SECTION D, EVALUATION FACTOR FOR AWARD

(i) A provision substantially as below may be included in invitations for bids when appropriate. The intent of the provision is to permit the Government to award FOB origin offers that otherwise could not be covered in a formally advertised procurement. Example—items 1 and 2 are for the same product, but different item numbers are used because of the different destinations. FOB origin offers are permitted. Bidders A and B bid FOB origin on item 1. No bids are received on item 2. Item 1 is awarded to Bidder A. Under present conditions, item 2 would have to be resolicited. With the below provision, and provided the bidder had not specified otherwise, the Bidder B offer could be applied against item 2. Assuming Bidder B's price was reasonable, item 2 could be awarded to Bidder B and the need for a resolicitation negated.

Right to Apply FOB Origin Offer. Unless otherwise specified by the Bidder, the Government may apply an FOB origin offer against any FOB origin item or subitem for the same product or supplies.

§ 1202.203 Methods of soliciting bids.

§ 1202.203-50 Other Distribution.

One information copy of each invitation for bids involving the production testing of items will be forwarded at time of issue to HQ DLA, ATTN: DLA-PR, and DLA-SER in accordance with DLAR 4125.1.

§ 1202.205 Bidders mailing lists.

§ 1202.205-2 Removal of names from bidders mailing lists.

Bidders mailing lists shall be reviewed and inactive suppliers removed.

§ 1202.205-4 Excessively long bidders mailing lists.

(b) *Rotation of Lists.* Mailing lists may be rotated or pre-invitation notices issued where there are a substantial number of solicitations and bidders lists which are used repetitively.

§ 1202.205-6 Pre-invitation notices.

Pre-Invitation notices may be used (a) to determine competitive interest, or (b) to avoid the reproduction and mailing of unnecessary quantities of solicitations.

Subpart C—Submission of Bids

§ 1202.203 Late bids, modifications of bids or withdrawal of bids.

§ 1202.303-5 Hand-Carried Bids.

Suppliers shall be notified that it is a responsibility of the bidder to place his bid in the bid depository if a bid is hand-carried. Each DLA activity shall establish procedures to ensure that Government personnel do not handle, stamp, or mark the bid envelopes prior to placement of the bids in the depository by the supplier.

Subpart D—Opening of Bids and Award of Contract

§ 1202.404 Rejection of Bids.

§ 1202.404-1 Cancellation of solicitation.

Determination to cancel invitations for bids made pursuant to ASPR 2-404.1 shall be in writing and shall describe the items solicited, quantities, number of bids received, prices, a discussion of the basis for cancelling and explanation of why it is a compelling reason.

§ 1202.406 Mistakes in bids.

§ 1202.406-3 Other mistakes.

Authority to make the determinations set forth in ASPR 2-406.3(a)(1) is delegated to Counsel at DLA procuring activities and purchasing offices without power of redelegation. Requests for the determinations required by ASPR 2-406.3(a) (2), (3), and (4) will be forwarded through Heads of Procuring Activities to the Counsel, DLA.

§ 1202.406-4 Disclosure of mistakes after award.

A copy of the determination and finding will be attached to all copies of the contract modification and a copy of the modification will be forwarded to the Counsel, DLA, when executed.

§ 1202.406-50 Actions referred to higher authority.

Mistakes in bids requiring action by higher authority or mistakes in bids in which the HPA desires that the determinations be made by higher authority shall be forwarded to the Counsel, DLA.

§ 1202.407 Award.

§ 1202.407-1 General.

It is particularly important that copies of the award document furnished for contract administration and finance purposes include detailed information as to acceptable additions or changes made by a bidder in the bid. The award document shall include the following data to the extent applicable:

(a) A list of the items or lots accepted with the quantity, unit price, and total price of each item;

(b) An indication of the extent to which award is made on the basis of f.o.b. destination or f.o.b. origin;

(c) Any discount offered by the successful bidder, whether or not such discount was considered in the evaluation of bids;

(d) When the invitation for bids authorizes bids on the basis of brand name or equal the brand, model, part number, and any other identifying characteristics of the item to be furnished by the successful supplier;

(e) The place of manufacture of the supplies or the performance of services awarded and the name of the supplier, when different from that of the contractor;

(f) The place of inspection and acceptance and the name of the activity authorized to effect inspection and acceptance on behalf of the Government;

(g) When the invitation for bids includes the requirement for minimum size of shipments or guaranteed maximum shipping weights (and dimensions, if applicable), and award is made f.o.b. origin, a clause as follows:

NOTE TO ADMINISTRATIVE CONTRACTING OFFICER

This award has been made on the basis of Guaranteed Maximum Shipping Weights or dimensions, and/or Minimum Size of Shipments as specified. Take action in accordance with DLAM 8105.1, Sec. 19-210, if it becomes evident that the guaranteed maximum shipping weights or dimensions will be exceeded, or if the contractor tenders delivery of less than the minimum size shipments specified, in order that action may be taken to adjust the contract price.

(h) The time of delivery;

(i) The place of delivery;

(j) The place for the submission of invoices and payment;

(k) A statement that the award confirms a notice of award;

(l) A statement that the progress payment clause is a part of the contract; and

(m) A provision for advance payments.

§ 1202.407-3 Discounts.

The clause in ASPR 7-2003.35 shall be included in all invitations for bids, using the minimum periods of 20 calendar days where delivery and acceptance are at point of origin and 30 days where delivery and acceptance are at destination, except for subsistence items for which DPSC retains the payment function which, by industry practice, the discount period is 10 calendar days.

§ 1202.407-6 Equal low bids. (See also ASPR 1-111).

Whenever identical or equal bids are received pursuant to formal advertising and, in the opinion of the contracting officers, are indicative of collusive bidding, follow-the-leader pricing, related low bids, division of business, uniform estimating systems, or other practices designed to eliminate competition or to restrain trade, a report of the facts and pertinent information available which might tend to establish possible violation of the antitrust laws shall be forwarded to the Counsel, DLA.

§ 1202.407-8 Protests against award.

(a) *Protests Before Award.* (1) When it is known that a protest against the

V 43 86

making of award has been made to a higher Headquarters or to the Comptroller General, no award shall be made until the matter is resolved unless the determination required by ASPR 2-407.8(b)(3) has been made by the contracting officer and approved by the Executive Director, Procurement, DLA, after coordination with the Counsel, DLA. The Counsel, DLA, shall be responsible for obtaining the views of the Comptroller General in such cases in accordance with ASPR 2-407.8(b)(2).

(i) Requests for approval of the contracting officer's determination must include the following information:

(A) If the contracting officer's report has not been submitted to HQ DLA, a summary of the protest and the facts bearing on it;

(B) The name of the proposed awardee;

(C) The proposed award price and quantity;

(D) A statement as to fair and reasonable price;

(E) A statement as to whether the proposed award is to the low offeror;

(F) If the proposal awardee is not low, the reason award will be made to other than the low offeror; and

(G) A statement that award will be made immediately upon receipt of the requisite approval.

(ii) The determination itself must contain a full justification for proceeding with award. For example, a request based on urgency (ASPR 2-407.8(b)(3)(i)) shall include:

(A) The current supply status of the item;

(B) The procurement leadtime;

(C) If the procurement is for stock, the estimated monthly demand;

(D) An explanation of why the time cannot be temporarily foregone by requiring activities; and

(E) A discussion of the feasibility of temporarily filling the requirement by means of local purchase.

(iii) As another example, a request based on an expiring offer (ASPR 2-407.8(b)(3)(iii)) shall include:

(A) The price of the expiring offer;

(B) The price(s) of the next offeror(s) in line for award;

(C) The date of the most recent request to the offeror to extend his offer; and

(D) The offeror's response to the most recent request to extend.

The above examples are not the only situations in which award could be made, but are provided to show the degree of thoroughness required in documenting the justification for proceeding with award.

(2) Reports on protests submitted for final resolution to a level of authority above the Head of a Procuring Activity shall be forwarded in triplicate to the Counsel, DLA. Reports on such protests shall include the following information:

A signed statement from the person making the protest setting forth the facts on which the protest is based and any additional supporting evidence;

A signed statement when relevant, from other persons or bidders affected by or involved in the protest, setting forth the protest, setting forth the facts with respect to their position in the matter and any additional supporting evidence;

A copy of the bid submitted by the protesting bidder, and a copy of the bid of the bidder who is being considered for award, or whose bid is being protested;

A copy of the invitation for bids including, where practicable, pertinent specifications relevant to the protest;

A copy of the abstract of bids;

Any other documents which are relevant to the protest; and

A statement signed by the contracting officer setting forth his findings, actions and recommendations in the matter together with any additional evidence or information deemed necessary in determining the validity of the protest. If the award was made pending resolution of the protest, the contracting officer's statement will include the determination prescribed in ASPR 2-407.8(b)(3).

(c) *Protests After Award.* Where a protest is received after the award of the contract the following action will be taken:

(1) Where it reasonably appears that the award may be held invalid, and a delay in receiving the supplies or services is not prejudicial to the Government's interest, the contracting officer should seek a mutual agreement with the successful bidder to "stop work" on a no-cost basis.

(2) If the contractor refuses to enter into such a mutual agreement, the Head of the Procuring Activity may direct the contracting officer to issue a "stop work" order unless the Head of the Procuring Activity determines that receipt of the supplies or services is so urgent that such an order would be prejudicial to the interest of the Government.

(3) Where guidance from higher authority on the withholding of contractor performance is necessary the matter will be submitted to the Counsel, DLA.

(4) Where it is known by the purchasing activity that a protest after award has been lodged directly with the Comptroller General, the documents required by (b) above will be forwarded to the Counsel, DLA.

§ 1202.407-50 Other factors to be considered in determining price reasonableness.

If in the opinion of the contracting officer the formal advertising procedure in itself does not ensure competition sufficient for arriving at a fair and reasonable price, he will also consider valid criteria, such as, but not limited to:

(a) Prices paid by his or other Government purchasing activities on past procurements;

(b) Price trend information from the daily press, trade, or Government publications;

(c) Current market prices for comparable quantities;

(d) Extent of comparable pricing;

(e) Cost analysis of similar procurements; and

(f) Contractors' published commercial price lists.

In those instances, where this additional analysis is made, the contract file will be documented to reflect the actions taken to determine the reasonableness of bid prices.

§ 1202.408 Information to bidders.

§ 1202.408-1 Unclassified awards.

Notification to unsuccessful bidders should be given promptly after an award has been made. It should not be delayed pending preparation and distribution of contractual documents. Generally, a form postal card is adequate for notification to unsuccessful bidders. However, in cases where a bidder is apparently low based on a comparison of bid prices only, the notification should take the form of a letter including in addition to the minimum requirements set forth in ASPR 2-408, the specific reasons for rejection of the lower bid. This is especially important where rejection results from a transportation evaluation, a negative preaward survey, or for any reason not readily apparent to the bidder. The following is an example of such a letter. This letter may be modified to fit the specific circumstances of the procurement.

Gentlemen:

Receipt is acknowledged of your bid in response to our Invitation for Bid No. ——

This is to inform you that award was made to:

Contractor City State Item No. Price

Your interest in bidding on the requirements of this Center is appreciated; however, we were unable to make the required determination that your company is "responsible" within the meaning of that term as defined in paragraph 1-902 of the Armed Services Procurement Regulation. The information upon which our decision was based was contained in a preaward survey which was issued by —— (insert name of appropriate activity). Further details with respect to their findings will be furnished by that activity if you so request.

Your name will be retained on the bidders list to receive future solicitations.

A letter such as the above, if complete and issued promptly, should minimize further correspondence and result in improved contractor relations.

§ 1202.450 Requests for decision by the Comptroller General.

Where a decision by the Comptroller General is desired on procurement or disposal matters such as mistakes in bids, remission of liquidated damages, reformation of contracts or other contract issues, the request will be forwarded to the Counsel, DLA. Each case submitted for a Comptroller General decision will be accompanied by an administrative report which shall include a summary of the matter at issue, the recommendation of the procuring activity, and all documents and information deemed pertinent to the issue.

PART 1203—PROCUREMENT BY NEGOTIATION

Subpart A—Use of Negotiation

Sec.
1203.103 Records and Reports of Negotiated Contracts.

Subpart B—Circumstances Permitting Negotiation

1203.202 Public Exigency.
1203.202-2 Application.
1203.209 Perishable or Nonperishable Subsistence Supplies.
1203.209-50 Procurement of Fresh Fruits and Vegetables by Best Value Selection.
1203.215 Negotiation After Advertising.
1203.215-2 Limitation.

Subpart C—Determinations and Findings

1203.302 Determinations and Findings by the Secretary of a Department.
1203.303 Determinations and Findings Below the Secretarial Level.
1203.303-50 Determinations and Findings for Procurement Negotiated Under 10 U.S.C. 2304(a)(10).
1203.306 Procedure with Respect to Determinations and Findings.
1203.306-50 Class Determinations and Findings (CDFs).

Subpart D—Types of Contracts

1203.404 Fixed Price Contracts.
1203.404-3 Fixed Price Contracts with Economic Price Adjustment.

Subpart E—Solicitations of Proposals and Quotations

1203.501 Preparation of Request for Proposals or Request for Quotations.
1203.509 Protests Against Award.
1203.550 Distribution of Copies.

Subpart F—Small Purchase and Other Simplified Procedures

1203.604 Competition and Price Reasonableness.
1203.604-1 Purchases Not In Excess of $500.
1203.604-50 Pricing Techniques in the Absence of Adequate Pricing Competition.
1203.604-51 Minimum Billing and Service Charges.
1203.605 Blanket Purchase Agreement (BPA).
1203.605-2 Limitation on Use.
1203.605-50 Establishment of Blanket Purchase Agreements with Federal Supply Schedule (FSS) Contractors.
1203.605-51 Quantity Break Provision for Inclusion in Small Purchases.
1203.606-50 Fast Payment Procedure.

Subpart H—Price Negotiation Policies and Techniques

1203.801 Basic Policy.
1203.801-2 Responsibility of Contracting Officers.
1203.805 Written and Oral Discussions.
1203.805-1 General.
1203.807-2 Requirements for Price or Cost Analysis.
1203.807-3 Cost or Pricing Data.
1203.807-6 Refusal to Provide Cost or Pricing Data.
1203.807-50 Cost or Pricing Data for Indefinite Quantity and Requirements Type Contracts.
1203.811 Record of Price Negotiation.

Subpart L—Cost Accounting Standards

1203.1203 Prime Contractor Disclosure Statement(s).
1203.1204 Contract Clauses.
1203.1210 Cost Accounting Standards Board Report.
1203.1211 Waiver of Cost Accounting Standards, Rules and Regulations.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Use of Negotiation

§ 1203.103 Records and reports of negotiated contracts.

An information copy of each negotiation document involving the production testing of items shall be forwarded at time of issue to HQ DLA, Attn: DLA-PR.

Subpart B—Circumstances Permitting Negotiation

§ 1203.202 Public exigency.

§ 1203.202-2 Application.

A procurement of material to effect necessary and emergency repairs to a broken water main would be appropriate under ASPR 3-202 and this section, *Provided*, That the emergency conditions require immediate replacement of defective materials. This authority could also properly be cited for the emergency procurement of packing material required to effect an emergency air or rail shipment. The fact bearing on the emergency situation must clearly be shown in the determination and findings in sufficient detail to explain clearly the necessity for purchasing without formal advertising. The contracting officer's justification must be supported by the existence of specific emergency circumstances which in themselves relate to the particular purchase being effected. The facts bearing on the situation must clearly support the compelling and unusual urgency and indicate the extent to which the Government would be injured, financially or otherwise.

§ 1203.209 Perishable or nonperishable subsistence supplies.

§ 1203.209-50 Procurement of fresh fruits and vegetables by best value selection.

(a) Fresh fruits and vegetables cannot be described in the usual manner and their specifications are normally inadequate to provide a basis for advertising for bids. It is in the best interest of the Government to procure fresh fruits and vegetables in growing and storage areas and terminal markets after visual inspection by experienced and knowledgeable personnel at the time and place such items are offered.

(b) In the application of (a) of this section, procurements shall be made on a competitive basis to the maximum extent practicable and the best value, price, quality, and other factors considered, shall be procured.

§ 1203.215 Negotiation after advertising.

§ 1203.215-2 Limitation.

ASPR 3-215.2 requires two Secretarial determinations and findings (a) for the general or preliminary authority to negotiate after advertising, and (b) with regard to the particular contract being negotiated and the fact that the negotiated price is lower than the lowest rejected bid price of a responsible bidder. (See ASPR J-502(e).) When the contracting officer considers that bid prices received after formal advertising are unreasonable as to all or part of the requirements, or were not independently reached in open competition, he shall, prior to initiating negotiations submit a proposed determination and findings, approximating in format shown in ASPR J-502(e), for Secretarial signature in accordance with the procedures in ASPR/DSPR 3-306. Partial awards made at bid prices considered reasonable should be indicated in the request for authority to negotiate. If the contracting officer considers that bid prices on all or part of the requirements were not independently reached in open competition, he shall, in addition to requesting Secretarial authority to negotiate under 10 U.S.C. 2304(a)(15), submit the report thereon required by ASPR 1-111.

Subpart C—Determinations and Findings

§ 1203.302 Determinations and findings by the Secretary of a Department.

All requests for Secretarial authority to negotiate, and their attached determination and findings, shall be submitted to HQ DLA, Attn: DLA-PP in triplicate.

§ 1203.303 Determinations and findings below the secretarial level.

(b) The authority to make class determinations with respect to authority

MY 3 78 UMI

V 4 3 — 8 6

to enter into contracts by negotiation pursuant to ASPR 3-210 is delegated to the Executive Director, Procurement, Headquarters Defense Logistics Agency, and the Heads of Procuring Activities (or Deputies in their absence). Redelegation of this authority is not authorized.

§ 1203.303-50 Determinations and findings for procurement negotiated under 10 U.S.C. 2304(a)(10).

Each determination and finding prepared by contracting officers to justify the use of 10 U.S.C. 2304(a)(10) for noncompetitive procurement due to lack of or inadequacy of technical data shall be supported by a written statement obtained from the requiring agency showing:

(a) The actions being taken (1) to avoid subsequent noncompetitive procurements of the items or services and (2) to obtain the data prescribed in ASPR 3-108(d); or

(b) A complete explanation of the reasons why efforts to obtain competitive procurements would be unavailing, and, therefore actions that would permit competition are not being taken.

§ 1203.306 Procedure with respect to determinations and findings.

(a) Requests for authority to negotiate individual contracts, or a class of contracts under the authorities of 10 U.S.C. 2304(a)(11) through 10 U.S.C. 2304(a)(16), as implemented by ASPR 3-211 through ASPR 3-216 and Appendix J, require the approval of the Assistant Secretary of Defense (MRA&L). Such requests shall (1) contain in the letter of transmittal of the submitting procuring activity, a complete statement of facts and other data necessary to support the applicability of the cited negotiation authority, and (2) include, on a separate plain paper, a determination and findings prepared for the appropriate signature.

(b) Requests for the granting of Secretarial authority to negotiate under 10 U.S.C. 2304(a)(13) or 10 U.S.C. 23-4(a)(16) will be signed by the Head of the Procuring Activity or his Deputy.

§ 1203.306-50 Class determinations and findings (CDFs).

(a) CDFs may be utilized when appropriate for negotiating a number of contracts for the same or related items where the use of individual determinations and findings would result in a repetition of the same set of facts or circumstances. CDFs should be submitted for Secretarial signature only when:

(1) Several procurements are to be effected within a reasonable period of time (normally one year or less) and are for items which are so related as to constitute a logical and distinctive category;

(2) The required suppliers or services are such that they can be secured only by negotiation, such as—

(i) Items of standardized supplies meeting the criteria set forth in ASPR 3-213; or

(ii) Research and development programs which have not reached the production state and for which, consequently, adequate drawings, specifications, or other technical data are not available for formal advertising; or

(3) The nature of the required supplies is such that it is not only technical or specialized but the presence of military urgency or limited numbers of qualified supplies (as related to previous investments by the Government of the supplies, extend periods required for preparation for manufacture, or continued availability of the suppliers in the event of a national emergency) preclude the use of formal advertising during the proposed effective period of the CDF.

(b) Class determinations and findings may not be extended beyond their effective periods as approved by the Secretary. When the authority of such CDF is required for an additional period, a new request therefor, together with a new CDF shall be submitted in accordance with this Regulation. Such new requests shall set forth a summary of the procurement actions completed under the earlier CDF as well as those actions contemplated under the new request.

(c) Heads of Procuring Activities should periodically review the necessity for continued use of a CDF during its effective period to assure that circumstances supporting the granted negotiation authority continue to be present.

Subpart D—Types of Contracts

§ 1203.404 Fixed-price contracts.

§ 1203.404-3 Fixed-price contracts with economic price adjustments.

(a) When none of the ASPR economic price adjustment clauses are applicable, a special economic price adjustment clause may be developed in accordance with ASPR 2-104 or 3-404.3(c). Hereafter, however, such new clauses and revisions thereto (including revisions to clauses already in use) shall be submitted to HQ DLA (DLA-PPR) for pre-solicitation review and approval. This requirement does not apply to the one-time revision of a clause during the contract negotiation process.

(b) The Chief of the Purchasing Office shall approve any ceiling exceeding 10 percent in any local EPA clause. Such approval may cover more than one contract over a definitely stated period of time not to exceed one year. This authority (as applied to ASPR EPA clauses as well) shall not be delegated.

Subpart E—Solicitations of Proposals and Quotations

§ 1203.501 Preparation of request for proposals or request for quotations.

(b) Contract Forms and Uniform Contract Format.

(2) The SAMMS Automated Small Purchase System (SASPS) Phase II provides for the mechanical printing of solicitations (RFQs) by SAMMS for procurements with an estimated value of $10,000 or less. The system is designed to issue RFQs using DLA Form 1231, Request for Quotation.

SECTION C, INSTRUCTIONS, CONDITIONS AND NOTICES TO OFFERORS/QUOTERS

(iv) The following Products Offered provision is for use in the negotiated procurement of replacement parts and assemblies which are identified only by the manufacturer's name, part number, and a brief description. The purpose is to negate paragraph 2(d) of SF 33A which reads:

"Offers for supplies or services other than those specified will not be considered unless authorized by the solicitation." When the provision is applicable, the following will be inserted after the item description:

Offer based on:
Manufacturer's name ———— Part No. ——.

The provision will not be included in solicitations covering parts or assemblies which are being negotiated under such authorities as ASPR 3-202, 3-210.2(i) (xiii) or (xv) 3-212 when it is necessary to restrict the procurement to a particular manufacturer or the certain approved sources (see ASPR 1-313(c). The provision, when used, shall be verbatim, except that the acronym CLIN may be substituted for the word "item".

PRODUCTS OFFERED (1970)

(a) Products offered must either be identical or functionally, physically, mechanically, and electrically interchangeable with the products cited in each procurement identification description of this solicitation.

(b) For evaluation purposes offerors must indicate, by marking the appropriate block(s), which of the following situations is applicable to each item which they are offering and furnish whatever supporting information is required below. "Failure to furnish complete data and information required to support situations (2), (3) and (4) below may preclude consideration of your proposal."

□ (1) For items ——— will furnish the cited manufacturer's product bearing the number specified.

NOTE.—If more than one manufacturer's number is specified in the schedule, the offeror must insert beneath the applicable item(s) of the schedule the manufacturer's name and number which he is offering.

□ (2) For items ——— will furnish a product manufactured in accordance with the cited manufacturer's drawing or specification, and certified identical to, but bearing a different number.

NOTE.—This block must be completed only by offerors manufacturing the item described in the schedule for the company or firm whose name and number is specified. Offerors must insert beneath the applicable item of the schedule the substituted manufacturer's name and part number. In addition, the offferor must furnish a copy of the drawing or specification for the part number as originally cited in the schedule, or other information to establish that the offeror will furnish the same item as described in the schedule, but having a different number.

□ (3) For items ——— will furnish a product determined under prior military contracts, either as a prime or subcontractor to be functionally, physically, mechanically and electrically interchangeable with the product cited in this solicitation though not manufactured in accordance with the cited manufacturer's drawing or specification.

NOTE.—Offerors relying on this paragraph (3) must insert beneath the applicable item of this solicitation the substituted manufacturer's name and part number, and in addition, furnish sufficient data to suitably substantiate the item as acceptable. As a minimum, the following data must be furnished (1) copy of Contract or Purchase Order under which furnished, and (2) copy of a drawing to which made.

□ (4) For items ——— will furnish a product which is equal in all material respects to the product referenced in the item description. The following Note is applicable:

Note (a) □ Note (b) □.

NOTE.—(a) The Government does not have detailed data for the item referenced in the procurement identification description. Therefore, offerors relying on this paragraph (4) must furnish with their offers drawings and other data which will clearly describe the characteristics and features of their product. In addition, offerors must furnish drawings or other data covering design, materials, performance, etc., of the product cited in the schedule sufficient to enable the Government to determine the offeror's product is equal to the product named in the schedule.

NOTE.—(b) Offerors relying on this paragraph (4) must furnish with their offers drawings and other data which will clearly describe the characteristics and features of their product.*

NOTICE.—Offers relying on this paragraph (4) must insert beneath the applicable item of this solicitation the substituted manufacturer's name and number.

SECTION D, EVALUATION FACTORS FOR AWARD

(iii) Discount provisions (see § 1202-407.3);

§ 1203.509 Protests against award.

In any protest to the General Accounting Office of a negotiated procurement where a written Determination and Findings (D&F) is required to support negotiation, a copy of the D&F will be included with the protest report.

§ 1203.550 Distribution of copies.

In addition to the distribution of requests for proposals and requests for quotations in ASPR 1-1002, one information copy of each such solicitation document for the production testing of items will be forwarded, at time of issue, to HQ DLA, Attn; DLA-PR.

Subpart F—Small Purchase and Other Simplified Purchase Procedures

§ 1203.604 Competition and price reasonableness.

§ 1203.604-1 Purchases not in excess of $500.

Action to verify and document the reasonableness of the price of purchases not in excess of $500 need be taken only when the buyer or contracting officer suspects, or has information to indicate that the price may not be reasonable, e.g., comparison to previous price paid, personal knowledge of the item involved or appearance of the item on the SAMMS Automated Small Purchase System (ASPS) Report F-108. When action is taken to verify reasonableness of price, DD Form 1784, "Small Purchase Pricing Memorandum" shall be used.

§ 1203.604-50 Pricing techniques in the absence of adequate price competition.

(a) The techniques of comparing the items to a similar competitive or catalog item offers the best assurance of fair and reasonable pricing in small purchases. In the majority of cases over $500 involving noncompetitive and non-catalogued items, this method should be employed to determine price reasonableness. It is not necessary to locate an identical item or to compare every feature of the two items. Quantity, packaging and other factors must be considered in arriving at an independent estimate of a reasonable price for the individual procurement. Abstracts of bids maintained by the purchasing office may be useful in this regard. Commercial catalogs and price lists should also be used.

(b) Visual examination of warehouse samples, drawings and/or DD 146 descriptions can be of considerable value in determining that a price is fair and reasonable. Often the actual manufacturer is revealed by this examination. Sources solicited will include any manufacturer(s) revealed by visual examination.

(c) When other methods available to procurement personnel through use of the Decision Logic Chart (See ASPM No. 2) are unproductive, technical assistance by the Directorate of Technical Operations should be obtained for use as a factor in the buyer's pricing determination.

§ 1203.604-51 Minimum billing and service charges.

(a) Procurement personnel should avoid placing orders with vendors who have a "minimum billing" or "service charge" policy wherever possible. In sole source situations, the following alternatives should be explored before placing an order:

(1) Make a concerted effort to consolidate orders with other buys from the same vendor; or

(2) With customers' permission, increase the quantity of the buy.

(b) If the foregoing efforts are to no avail, DLA buying activities when writing orders with vendors having such policies, will identify the unit price and amount for each item ordered and the minimum billing or service charge.

(c) When a responsible, responsive offeror is low on an individual procurement, even though he includes a DD 250 charge in his price, he clearly should receive award. However, no indefinite delivery type contracts (IDTCs), blanket purchase agreements (BPAs), or basic ordering agreements (BOAs) shall be executed containing a provision for reimbursement of contractors for preparation of the DD 250.

§ 1203.605 Blanket purchase agreement (BPA).

§ 1203.605-2 Limitation on use.

The maximum aggregate amount, if any, of all requests to be issued against one BPA shall be prescribed by the HPA.

§ 1203.605-50 Establishment of blanket purchase agreements with Federal supply schedule (FSS) contractors.

(a) While BPAs may be established with FSS contractors for both non-FSS items and FSS items, a distinction between such items should be made.

(b) A BPA with a FSS contractor for non-FSS items which can be interpreted to cover FSS items because of a generic item description should contain a statement to the effect that the BPA excludes all items on FSSs.

(c) If it is desired to establish a BPA with a FSS contractor for items on a FSS, the agreement shall be consistent with the provisions of the applicable FSS, i.e., period of agreement, terms, and conditions. The agreement should be limited to a simplification of purchasing techniques such as placing of orders orally and obtaining monthly consolidated billings.

§ 1203.605-51 Quantity break provision for inclusion in small purchases.

(a) As used herein "quantity break" is a reduction in unit price for a specified larger quantity.

*If offerors desire to restrict the Government's use of data submitted with their proposals for evaluation purposes, the data must bear the legend prescribed by ASPR 3-507.1(a). In the event an award is made to an offeror submitting such data, the Government will have unlimited rights to use such data, unless the data submitted bears the legend set forth in ASPR 3-507.1(a).

M Y 3 — 7 8 UMI

V 4 3 — 8 6

(b) To obtain the lowest possible prices in small purchases, it is necessary that the Government take advantage of quantity breaks wherever practicable.

(c) For the purpose of establishing that a quantity break does or does not exist, a provision substantially as follows should be included in small purchase solicitations, except (i) where the contracting officer decides that it is impractical and would serve no useful purpose, or (ii) where the procurement will be effected by automation:

QUANTITY BREAK

The quoted price is effective for quantities from —— to ——. Price for next higher quantity break would be ——.

(d) Should it appear that it is in the best interest of the Government to procure a larger quantity, so as to take advantage of a lower unit price, the item manager should immediately be provided the details and an amendment to the purchase directive requested. If the item manager indicates that the quantity cannot be increased, then the contracting officer should document the contract file accordingly and proceed with purchase of the originally specified quantity.

§ 1203.606-50 Fast payment procedure.

All DLA purchasing activities awarding procurement authorizing "FAST PAY" shall specify inspection and acceptance at distination. If either inspection or acceptance at origin is required or authorized the use of "FAST PAY" is NOT authorized.

Subpart H—Price Negotiation Policies and Techniques

§ 1203.801 Basic policy.

§ 1203.801-2 Responsibility of contracting officers.

(c) Prior to referral to HQ DLA, the Commander, or in his absence, the Acting Commander, shall make a determination on a case-by-case basis whether or not to personally negotiate with the contractor involved and attempt to delete those elements of the contractor's offer that render his price or profit unreasonable. In those cases where it is determined that the Commander should not personally conduct negotiations, a detailed memorandum setting forth the rationale shall be forwarded with the referral to HQ DLA, Attn: DLA-PP. While it is recognized that the magnitude of the effort must be commensurate with the value of the procurement it is imperative the best effort be made at each successive level of authority prior to forwarding cases to this Headquarters because this Headquarters intends to actively enter into the negotiation at that point in time. In appropriate cases where Headquarters efforts fail the problem will be escalated to the Office of the Assistant Secretary of Defense.

(d) Occasionally, there may be instances where the price is not as close to the negotiation objective as the Contracting Officer would like to be but may not be judged unreasonable. In such cases the file should contain a positive statement that the price is considered fair and reasonable under the circumstances. The circumstances should then be fully enumerated so as to provide any reviewer with a full understanding of what transpired and why the price is indeed fair and reasonable. On any price reasonableness determination, however, the Contracting Officer shall determine the price either to be reasonable or unreasonable.

§ 1203.805 Written and oral discussions.

§ 1203.805-1 General.

(a) A prenegotiation briefing shall be conducted for all negotiated procurements over $10,000 so that each will have had a prenegotiation objective review. The briefing level and content for negotiated procurements between $10,000 and $100,000 shall be set by the Director, Procurement and Production. For all negotiated procurements except subsistence estimated to amount to $100,000 or more, the briefing shall be for the Director/Deputy Director, Procurement and Production. The threshold for subsistence procurements requiring a review by the Director/Deputy Director, Procurement and Production will be established at a level designated by the HPA. Procurements, other than those for perishable subsistence, consummated at a Defense Subsistence Region (DSR) may be reviewed by the Chief of the Purchasing Division at the DSR. As a minimum, the briefing for negotiated procurements estimated to amount to $100,000 or more shall cover:

(1) The procurement situation.

(2) Previous price history.

(3) Analytical methods utilized in establishing the price objective.

(4) For procurements requiring the submission of cost or pricing data, the major differences between the proposed negotiation objective and the contractor's proposed price, DCAS input and audit recommendation and the proposed negotiation objective with supporting rationale.

(5) For all other procurements, the major differences between the contractor's proposed price and the proposed negotiation objective, together with rationale supporting the negotiation objective.

(6) Negotiation plan, whether phone or face to face.

(7) Anticipated negotiation problems and proposed solutions.

(b) A memorandum summarizing the principal elements of the briefing, attendees and results shall be prepared for incorporation into the contract file.

(c) The following are exempt from the requirement for prenegotiation briefings:

(1) Perishable subsistence procurements.

(2) Subsistence Commodity Market items which are geared to marketing exigencies, such as coffee, flour, and salad oil.

(3) When a petroleum procurement consists entirely of unrelated line items (those which are consolidated solely for administrative purposes) the briefing may be conducted at a level lower than the Director/Deputy, Procurement and Production, when no single line item is $100,000 or more, even though the total procurement is $100,000 or more.

§ 1203.807-2 Requirements for price or cost analysis.

(a) *General.* The cost/price analysis element will prepare an evaluation of the contractor's proposal in every procurement requiring the use of cost or pricing data or a field pricing support report.

(b) *Cost/price analysis.* (1) The cost/price element shall prepare a cost/price analysis for formally advertised procurements of $100,000 or more when a sole responsive bid is received and for negotiated procurements of $100,000 or more.

(2) The requirement for cost/price analysis by the cost/price analysis element may be waived by the Contracting Officer for a negotiated procurement resulting in adequate price competition when the initial offer is to be accepted under the circumstances set forth in ASPR 3-805.1(a). Except when cost or pricing data is required, the Contracting Officer may also waive the requirement for cost/price analysis by the cost/price analysis element when a sole bid or sole offer is received if recent awards for the item or service have been made on a price competitive basis and such award prices and current market trends clearly indicate that the offered price is reasonable.

(3) If the Contracting Officer elects to waive the requirement for cost/price analysis by the cost/price analysis element under the circumstances specified above, the contract file will be documented with the facts supporting the Contracting Officer's determination.

(4) In addition to the requirements for an analysis by the cost/price analysis element, the Contracting Officer may request assistance from the cost/price analysis element in any other procurement as deemed necessary. On any procurement on which an analysis is not performed by the cost/price analysis element, a price analysis will be performed in accordance with ASPR 3-807.

§ 1203.807-3 Cost or pricing data.

(a)(1) If an option is priced at the time of award it is subject to the requirements of PL 87-653 at that time and the price of the option must be considered in determining whether the proposed contract is expected to exceed $100,000 in amount.

(b) Distribution of each exemption authorized shall be effected by HQ DLA. Six copies of each exemption shall be provided HQ DLA, ATTN: DLA-PPP.

§ 1203.807-6 Refusal to provide cost or pricing data.

Prior to referral to HQ DLA, the Commander, or in his absence, the Acting Commander, shall make a determination whether or not to personally negotiate with the contractor involved and attempt to obtain the necessary cost or pricing data. In those cases where it is determined that the Commander should not personally conduct negotiations, a detailed memorandum setting forth the rationale shall be forwarded with the referral to HQ DLA, ATTN: DLA-PC.

§ 1203.807-50 Cost or pricing data for indefinite quantity and requirements type contracts.

ASPR 3-409.2(a) and 3-409.3(a) state that estimated total quantities to be ordered under requirements and indefinite quantity contracts respectively should be as realistic as possible. Accordingly, when cost or pricing data must be obtained under these types of contracts, the quantity of the item or service for which such data is to be obtained is the total quantity as specified in the solicitation. To avoid delay in the receipt of the required cost or pricing data the solicitation should specify the quantitative requirements for which such data shall be submitted.

§ 1203.811 Record of price negotiation.

(a) The Price Negotiation Memorandum (PNM) must be written so as to permit reconstruction of all of the major considerations of the particular procurement. While excessive detail should be avoided, it is this PNM, standing alone, which must convince any and all reviewers of the procurement that the price is fair and reasonable and arrived at properly. Although the content will vary depending on the magnitude of the contract, the contract type, the cost or pricing data obtained, the extent of negotiations, etc., the format should be standard. The PNM should have the following subdivisions: Subject: "Introductory Summary, Particulars, Procurement Situation, Negotiation Summary, and Miscellaneous." The detailed content of each of these subdivisions is spelled out in ASPM No. 1 (1975 Edition), pages 7B16 through 7B24.

Subpart L—Cost Accounting Standards

§ 1203.1203 Prime contractor disclosure statement(s).

(e) *Determination of Secretary that it is Impractical to Secure Disclosure Statement(s).* Prior to referral to HQ DLA, of a proposed waiver of the requirement for a Disclosure Statement(s), the Commander, or in his absence, the Deputy or Acting Commander, shall personally negotiate with the proposed contractor and attempt to obtain the required statement(s). In those cases where it is determined that the Commander should not personally conduct negotiations, a detailed memorandum setting forth the rationale shall be forwarded with the referral to HQ DLA, ATTN: DLA-PC.

§ 1203.1204 Contract clauses.

(a)(ii) The analysis of the information furnished by the offeror in support of his claim for exemption from the requirements of the Cost Accounting Standards Clause must demonstrate that the criteria of ASPR 3-807.1(b)(2) have been met. The results of such an analysis shall be separately documented in the contract file. In addition, when a determination is made that a catalog or market price exemption applies, the contract file documentation pertaining to the pricing aspects of the procurement (i.e., the price analysis, the prenegotiation briefing memorandum and the PNM) shall indicate that pricing is based on adequate price competition. (See 21-126, Item 18.)

§ 1203.1210 Cost Accounting Standards Board Report.

(a) Comments requested in ASPR 3-1210(c) for each full calendar year shall be provided to HQ DLA, ATTN: DLA-PP, within 40 days following the end of each calendar year. RCS DD-I&L(A)1222 applies.

§ 1203.1211 Waiver of cost accounting standards, rules and regulations.

(a) Prior to referral of a waiver request to HQ DLA, the Commander, or in his absence, the Acting Commander, shall personally negotiate with the contractor involved and attempt to obtain acceptance of the Cost Accounting Standards, Rules and Regulations. The request for waiver should be forwarded by covering letter of the Commander or his Deputy with a statement concerning the above negotiation and recommendations to HQ DLA (ATTN: DLA-PP).

(b) The Cost Accounting Standards Regulation 4 CFR 331.30, subparagraph (c)(1) and (c)(2) (ASPR Appendix O) contains a listing of specific information to be furnished when requesting waivers. Waiver requests should reference these requirements and list, in order, the specific responses to each. The waiver request must cite the date by which a Board decision is needed and the reasons therefor.

(c) The request for waiver should be on plain paper. Five complete sets of the request and its supporting documentation should be furnished.

PART 1204—SPECIAL TYPES AND METHODS OF PROCUREMENT

Subpart C—Contracts with Requirements for Provisional Items

Sec.
1204.302 Procurement requirements.
1204.302-50 Waiver of provisioning technical requirements.
1204.302-51 Contracting officer's representative-provisioning.
1204.302-52 Errata sheets.

Subpart H—Paid Advertisements

1204.802 Authority and delegation to place advertisements.
1204.802-2 Requests for authority to place advertisements.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart C—Contracts With Requirements for Provisional Items

§ 1204.302 Procurement requirements.

§ 1204.302-50 Waiver of provisioning technical requirements.

The following clauses are for use in the acquisition of provisioning technical documentation. The clauses shall be used when Military Standards 1552 and 1561 are cited in solicitations.

(a) Waiver/Reduction of Provisioning Technical Documentation and Supplementary Provisioning Technical Documentation Requirements (DLA 1975 July).

Award for Provisioning Technical Documentation (PTD) Requirements and Supplementary Provisioning Technical Documentation (SPTD) Requirements will be made only to the offeror who receives an award for the applicable end item(s) of equipment.

The Government reserves the right to eliminate or reduce PTD/SPTD requirements for line items in the solicitation if such documentation has been previously furnished by the offeror and accepted by the Government and the Contracting Officer determines that such PTD/SPTD or changes thereto are acceptable for the immediate requirement.

In addition to pricing PTD/SPTD requirements, offerors are requested to provide information as to PTD/SPTD previously submitted to the Department of Defense believed to be appropriate, with or without changes, for this solicitation:

M Y 3 — 7 8 UMI

V 43 N 86 MAY 3 78 UMI

STATEMENT OF PRIOR SUBMISSION

PRIOR GOVERNMENT ACCEPTANCE OF PROVISIONING TECHNICAL DOCUMENTATION/SUPPLEMENTARY PROVISIONING TECHNICAL DOCUMENTATION

Date Previously Submitted, Contract No., Contract Item No.

Equipment Nomenclature, Name/Address of Accepting Activity, Provisioning Specification.

Changes to previously submitted PTD/SPTD (Type III Provisioning in accordance with DLA Addendum to Provisioning Requirements Statement) are those items added, deleted, changed or modified in the end item which must be recorded in the previous provisioning lists to update the list to the configuration of the end item procured as covered by paragraph 5.3.11 of Military Standard 1561.

The offeror hereby certifies that previously submitted (PTD/SPTD) ( ) does ( ) does not require changes. (Check One)

If the PTD/SPTD previously furnished requires changes, indicate a list of the changes required with a price for furnishing the changes: (See example, Note 1 at end of clause.)

PTD element	Number of line item changes	Price [1]
Total		

[1]Per type III provisioning PTD element.

If the Government determines that Type III Provisioning will fulfill its needs, eligible offers will be evaluated as to price based on Type III Provisioning and, if low, award will be made for Type III Provisioning. PTD/SPTD changes shall be furnished by the Contractor within 30 days after award, or when first article testing is required within 30 days after first article approval.

PTD/SPTD is as specified in the DD Form 1423 (Contract Data Requirements List) and DD Forms 1949-1, Provisioning Technical Documentation Data Selection Sheet and 1949-2, Provisioning Requirements Statement will be required unless award is made specifically for Type III Provisioning.

NOTE 1.—For example, if previous submission of PTD was Type I in accordance with DLA Addendums to the Provisioning Requirements Statement and several changes are needed to update the various PTD elements for the present equipment configuration, these would be recorded as follows:

PTD element	Number of line item changes	Price [1]
Provisioning parts lists.	10	$xx.xx
Long lead time item list.	2	xx.xx
Repairable items list.	1	xx.xx
Screening	50 part numbers to be screened.	xx.xx
Supplementary provisioning technical documentation.	13 dwgs, sketches, description, etc.	xx.xx
Total	13	xx.xx

[1]For type III provisioning per PTD element.

(b) DO5—Data Pricing, Evaluation and Award.

(1) If the offeror does not indicate a charge for data, the Government will consider and the offeror agrees that the data charge is included in the price of the end item.

(2) The Government reserves the right to waive one or more data CLINs in evaluating each offer and in awarding the contract, as the best interests of the Government may require. Each offer will be evaluated on the basis of only those data CLINs required of that offeror.

(3) Separate awards will not be made for data CLINs.

§ 1204.302-51 Contracting officer's representative-provisioning.

The Chief Provisioning Coordination Office, Directorate of Technical Operations, DSC and additional personnel within this office shall be designated as Contracting Officer's Representative for Provisioning for the purpose of providing technical assistance to offerors/contractors with regard to requirements for equipment support and provisioning for DSC procured end items/components. Delegation of responsibility shall include authority for actions to be taken by the Provisioning Coordination Office as set forth in DLAR 4100.8, "Surveillance of the Contractual Aspects of the Provisioning Cycle in the Defense Supply Centers." For example, the COR for Provisioning is responsible for reviewing PR/MIPR provisioning requirements to insure compliance with provisioning policy and procedures and proper presentation of provisioning requirements in solicitations and contracts, conducting Pre-Provisioning Guidance and Source Coding Conferences when required by the contract, negotiating reductions in provisioning technical documentation requirements including recommendations for equitable adjustments in the contract price or delivery terms based on technical provisioning considerations, surveillance necessary to assure receipt of provisioning technical documentation, and notifying the contractor of required corrections (rejection) or acceptance of provisioning technical documentation. The delegation will not include any authority to modify or change the terms of the contract or to make any agreement which will result in an increase in the contract amount or extend the time for delivery of the end items.

§ 1204.302-52 Errata sheets.

The authorized changes to MIL-STD 1552 and MIL—STD-1561 are listed below.

(a) MIL—STD-1552.

Paragraph 2.1 Delete the reference to the M1 series of Supply Cataloging manuals and replace with reference to DOD 4100.38-M, DOD Provisioning and Other Preprocurement Screening Manual and DOD 4100.39-M, Defense Integrated Data System (DIDS) Procedures Manual.

Paragraph 5.1.5.1.4. In the last five examples of the PLISN on page 7, the change letters (M, D, T, Q, L) should be moved one space to the right to the sixth position of the field.

Paragraph 5.1.5.4.1. Change reference to DOD 4100.38-M (paragraph 1.220.74).

Paragraph 5.1.5.6. Delete reference to M1-4 for Code 3.

Paragraph 5.1.5.6. Do not enter Codes E, F and G. If the item is altered or selected it may be so noted in the remarks block.

Paragraph 5.1.5.7. For Code 1 change to, "Number is formatted in accordance with DOD 4100.38-M, paragraphs 4.100.4 and 4.400 (i.e., DIDS in the clear)."

Paragraph 5.1.5.8. Change Maximum space allocation to read "19" positions.

Paragraph 5.1.5.11. Change the reference to "M1-7" to "Appendix 3-E-2.52 of DOD 4100.39-M."

Paragraph 5.1.5.19. Change "M1-7 Cataloging Handbook" to "Appendix 3-E-2.10 of DOD 4100.39-M DIDS Procedures Manual."

Paragraph 5.1.5.28. Change "Cataloging Manual M1-7" to "Appendix 3-E-2.22 of DOD 4100.39-M."

Paragraph 5.2.4. Delete "as described in the Cataloging Manual M1-6 shall be used" and replace with "will be formatted in accordance with Chapter 2, Section 4, Subsection 10, DOD 4100.39-M or Chapter IV, DOD 4100.38-M."

Page 25, Card ID "E" cc 52-57 Change Data Block Title to read "Replaced or Superseding PLISN."

Paragraph 5.3.4.5.1. Change the word "Superseded" in the paragraph title to read "Replaced". Change the word "superseded" in sub-paragraph (a) to read "replaced". Change the word "Replacing" in sub-paragraph (b) to read "Replaced". Change the word "superseded" in sub-paragraph (c) to read "replaced."

Paragraph 5.3.4.5.2. Change the word "Replacing" in the paragraph title to read "Superseding". Change the words "Replacing/Superseded" in sub-paragraph (b) to read "Replaced/Superseding PLISN." Change the word "replacing" in sub-paragraph (c) to read "superseding."

(b) MIL—STD-156.

Paragraph 5.2.1.1. Change the word "meeting" to "conference."

Paragraph 5.3.3.1. Change the word "screens" to "screws."

Subpart H—Paid Advertisements

§ 1204.802 Authority and delegation to place advertisements.

§ 1204.802-2 Requests for authority to place advertisement.

(b) Requests for authority to place advertisements in newspapers publicizing procurement information shall be submitted, in quadruplicate, through channels, to HQ DLA, ATTN: DLA-PP, for appropriate action.

PART 1205—INTERDEPARTMENTAL AND COORDINATED PROCUREMENT

Subpart A—Procurement under General Supply Schedule Contracts

Sec.
1205.101 Federal supply schedule contracts.

Sec.
1205.101-50 Use of Federal supply schedules.

Subpart D—Procurement From Federal Prison Industries, Inc.

1205.406 Procurement procedure.
1205.406-50 Pricing policies for awards to Federal Prison Industries, Inc.

Subpart F—Procurement of Printing and Related Supplies

1205.601 Printing and related supplies.

Subpart G—Procurement Under the Economy Act

1205.750 Procurement of items from Commodity Stabilization Service (CSS), Department of Agriculture.

Subpart K—Coordinated Procurement

1205.1106 Purchase authorization.
1205.1106-2 Use of advance MIPR's.

Subpart L—Commodity Assignments

1205.1201 Assignment authority.
1205.1201-2 Exclusions—DLA and GSA assignments.
1205.1201-50 Items in the DLA Civil Agency catalog.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Procurement Under General Supply Schedule Contracts

§ 1205.101 Federal Supply Schedule Contracts.

§ 1205.101-50 Use of Federal Supply Schedules.

Items procured by DOD activities from Federal Supply Schedules containing the following contractural provision under the provisions of ASPR Section V, Part I, should, where applicable, cite the priority rating on each delivery order placed under the Federal Supply Schedules.

Priorities, Allocations and Controlled Material:

"If any order is placed against this contract is rated and certified for National Defense, the contractor is required to follow the provisions of DPS Regulation 1 (formerly BDSA Regulation 2) and/or DMS Regulation 1 in obtaining materials needed to fulfill the requirement of this contract."

Subpart D—Procurement from Federal Prison Industries, Inc.

§ 1205.406 Procurement Procedure.

§ 1205.406-50 Pricing Policies for Awards to Federal Prison Industries, Inc. (FPI)

(a)(1) Prices in awards to FPI for the partial or entire quantity of a procurement shall not exceed current market prices.

(2) On procurements involving multiple awards to both commercial contractors and to FPI of a mandatory item, the current market price will be a price considered by the contracting officer to reflect current market levels but in no event a unit price higher than the highest award price made on the unrestricted portion adjusted for the applicable cost factors designated herein, unless it is determined that the price was the result of a distressed bid, bidder's mistake, or inflated because of Department of Defense requirements. In awards involving multiple destination, each destination, for purposes of determining the price to be paid FPI, shall be considered a separate award. The term "unrestricted" as used in this Part refers to the portion of the procurement not procured from Federal Prison Industries whether or not a small business or labor surplus area set-aside has been made thereon.

(3) When a procurement action involves allotment to FPI of the entire quantity of the required item and current market quotations are not available, prior procurement prices (adjusted to reflect changes in market prices of components since the last procurement and differences in any other cost factors, e.g., labor, operating supplies, employee fringe benefits) shall be used as the basis for determining the current market price.

(4) A quotation from FPI at or less than the determined current market price shall be accepted.

(5) Awards to FPI shall be on an f.o.b. origin basis unless otherwise specified.

(6) Prices for FPI contracts shall be rounded off to the nearest mill.

(b) The cost of transportation of Government-furnished property to both FPI and to commercial contractors shall be excluded. Differences in Government transportation costs of end items to the same destination point under FPI award and under awards to commercial contractors shall be included. Also, variation in the cost of Government-furnished property, based on stated percentages of usage of Government-furnished property allowances shall be included.

(c) Firm delivery orders shall be given to FPI promptly upon determination of the quantity to be awarded FPI. The following procedures are to be utilized in determining prices to be included on these delivery orders:

(1) When a concurrent commercial procurement is being made, the price quoted by FPI shall be cited on the delivery and the statement set forth below shall be included on the order. In the event the current market price determined by the contracting officer under the "unrestricted" procurement is lower than the quoted FPI price, adjustment shall be made to the lower price; provided, however, that in the time elapsed between the delivery order to FPI and the opening date on the "unrestricted" portion, there has been no significant change in market conditions. Should there have been a significant change in market conditions, the current market price for FPI order will be determined under the provisions of (a)(3) of this section.

(2) When the circumstances described in (a)(3) of this section exist, immediate action shall be taken to determine the current market price. Should that price be lower than the quoted price, prompt contact shall be made by the most expeditious means with the FPI and the circumstances and factors used in the determination explained. Should an agreement not be reached as to the current market price within five consecutive days from the date of contact, the order shall be promptly issued on the basis of the current market price determined by the contracting officer, and the statement provided below shall be included on the delivery order.

(3) After issuance of a delivery order containing the statement set forth below, every effort will be made by the purchasing office to reach an agreement as to the current market price applicable to the order. Agreements reached shall be confirmed by a revision to the delivery order stating the price applicable to the order and deleting the below statement.

(4) Efforts to obtain agreement, to include exchange of data on which the current market price was based, may continue up to the time of inspection and acceptance of the first delivery for payment. If agreement should not be reached by that time, the case shall be submitted to HQ DLA, ATTN: DLA-P, as unresolvable and shall contain a detailed explanation of the factors determining the current market price which was not acceptable to the FPI.

The statement to be included on the delivery order to FPI pending determination of current market price is as follows:

The price in this contract is subject to later adjustment between the Commissioner of the Federal Prison Industries, Inc., and the Executive Director, Procurement, HQ DLA, and the arbitration provisions of Section 4124 of Title 18, United States Code, shall not be invoked except in the case of a disagreement on the part of the Commissioner of the Federal Prison Industries, Inc., and the Executive Director, Procurement, HQ DLA. (1962 JUL.)

Subpart F—Procurement of Printing and Related Supplies

§ 1205.601 Printing and related supplies.

Policy and procedures for the procurement or production of printing are contained in DLAR 5330.1—Procurement or Production of Printing.

V 43 1 86

Subpart G—Procurement Under the Economy Act

§ 1205.750 Procurement of items from Commodity Stabilization Service (CSS), Department of Agriculture.

(a) The CSS shall be contacted concerning the supply of at least carlot requirements of items listed in the Commodity Credit Corporation (CCC) monthly inventories in order to obtain an f.o.b. destination offer from CCC.

Office, Deputy Administrator, Price Support, Commodity Stabilization Service, Room 350W—Administration Building, Department of Agriculture, Washington, D.C. 20025.

(b) Requests for offers shall state:
(1) Commodity and quantity desired;
(2) Applicable specification;
(3) Packaging and packing requirements;
(4) Required delivery dates;
(5) Grade and crop year; and
(6) Destination.

In all communications with CSS/CCC relative to proposed procurements, advice shall be furnished that the procurement information is not to be disclosed to unauthorized sources.

(c) If the Department of Agriculture advises that no quotation will be submitted or that they are unable to meet specifications requirements, the procurement will be placed with commercial sources in the usual manner.

(d) If a quotation is received from the Department of Agriculture, and the commodity meets the specifications and requirements, a comparative price analysis shall be made to determine whether the price quoted exceeds current market prices from commercial sources. The comparative analysis shall take into consideration applicable adjustments for crop or pack year, packing, shipping, and handling charges.

(e) If the analysis indicates that the price quoted exceeds current market price, CCC shall be advised with a view to obtaining a price not in excess of current market price.

(f) If the CCC price is equal to or lower than the current market price, the order shall be placed with CCC.

(g) If it is determined that procurement will be made commercially because of price or specification consideration, the CCC shall be so advised.

(h) If it is determined that offers from commercial sources will result in a higher cost than acceptance of the CCC offer, negotiations shall be reopened with CCC.

(i) Inspection of items procured from CSS shall be made in conformance with established inspection procedures.

(j) The following shall apply to all procurements of bagged commodities from CSS:

An official weighmaster's certificate based on origin weights shall accompany each shipment and a copy shall be attached to the CCC invoice. CCC invoice shall be for the number of pounds shown on the official weighmaster's certificate. Quantity receipted for by receiving officer at destination shall be the same quantity less damage in transit, except where a different quantity is actually received. In either event receiving officer will prepare SF 361 or SF 363, as applicable, and attach to receiving report submitted to paying office. Over or short shipment adjustment to be requested in instances where number of bags unloaded differs from number shown on documents accompanying shipment in which case receiving officer shall accompany report with bag tally, or with an official weighmaster's certificate in instances where origin and destination bag counts are identical but quantity receipted for is different from quantity shipped. Paying office upon receipt will forward Over, Shortage and Damaged Report (OS&D), accompanied with bag tally or weighmaster's certificate, if applicable to CCC office and request invoice adjustment.

Subpart K—Coordinated Procurement

§ 1205.1106 Purchase authorization.

§ 1205.1106-2 Use of advance MIPRs.

(f) Under the provisions of ASPR 5-1106.2 the following actions may be taken by a DSC upon receipt of an Advance MIPR (or similar type purchase request) provided the purchase request contains a statement reading essentially as follows: "A firm requirement exists for the item(s) contained in this MIPR; purchase of the items will be supported by the commitment of funds which are expected to be made available (within the next —— days)/(prior to the end of this fiscal year)." Any other written advice from the Requiring Activity that the requirement is firm and that there is a reasonable expectation that funds will be made available for obligation purposes against the specific advance MIPR, may be accepted in lieu of a statement embodied in the MIPR. This advice will be used as the basis to proceed with the purchase action up to and including receipt of responses to an IFB or RFP.

(1) IFB's or RFP's issued on the basis of unfunded Advance MIPRs shall clearly state that no awards will be made until such time as funds become available for obligation purposes. (See ASPR/DLPR 1-318.) The solicitation will also state that the offers shall not be opened until such time as funds have been made available for obligation purposes.

(2) In instances such as those authorized herein, the requiring activity will be notified of the scheduled opening date of the IFB (or closing date of the RFP) and that if funds are not made available by those dates that the solicitation may be cancelled. The scheduled opening or closing date may be extended at the discretion of the procuring activity.

(3) If a requiring activity indicates that funds will not be forthcoming, the solicitation will be cancelled. All offerors will be notifed immediately of such cancellation and their unopened offers will be returned to them.

Subpart L—Commodity Assignments

§ 1205.1201 Assignment authority.

§ 1205.1201-2 Exclusions—DLA and GSA assignments.

(c) *Exclusions to Defense Logistics Agency or General Services Administration Assignments by Agreement.* All proposed agreements in accordance with paragraph VII A5 of DOD Instruction 4115.1, DOD Coordinated Procurement program—Purchase Assignments to permit a Military Service to procure Military Service managed items for which the estimated obligation of a one-time authorization will exceed $100,000.00 or when the annual obligations are expected to exceed $100,000.00 for a continuing authorization shall be submitted for review and approval by HQ DLA ATTN: DLA-PP, prior to consummation of the agreement. Continuing authorizations will not be granted for periods exceeding twelve months notwithstanding the amount of estimated annual obligations. Requests will be submitted in triplicate (letter form) in sufficient detail to support the proposed agreement and will be signed at a level no lower than the Executive Director, Procurement, or his Deputy.

§ 1205.1201-50 Items in the DLA Civil Agency catalog.

After stock of a nonstandard item is exhausted and where DOD standardization action provides for a replacement item, the civilian agencies will be encouraged to use the replacement item by the applicable DLA Center. When the replacement item is not acceptable to a civil agency as evidenced by the requisition advice code, or when there is no replacement item, procurement of the DOD nonstandard item is authorized to meet the civil agency requirement.

PART 1206—FOREIGN PURCHASES

Subpart A—Buy American Act—Supply and Service Contracts

Sec.
1206.103 Exceptions.
1206.103-2 Nonavailability in the United States.
1206.103-5 Canadian Supplies.
1206.103-50 Shipping Instructions to Canadian Vendors.
1206.104 Procedures.
1206.104-50 Procedure for Submission to Executvie Director, Procurement, DLA.
1206.104-51 Contract Clause.

Subpart C—Appropriation Act Restrictions

1206.303 Exceptions.
1206.304 Procedures.

Sec.
1206.304-1 Procurement of Food, Clothing, Woven Silk and Woven Silk Blends, Spun Silk Yarn for Cartridge Cloth, Synthetic Fabric, or Coated Synthetic Fabric, or Items Containing Mohair or Cotton or Specialty Metals.

Subpart D—Purchases from Rhodesia and Certain Communist Areas

1206.403 Exceptions.

Subpart F—Duty and Customs

1206.603 Emergency Purchases of War Materials Abroad.
1206.603-4 Customs Entries and Duty-Free Certificates.
1206.603-5 Immediate Release Permits.
1206.604 Supplies for Vessels or Aircraft Operated by the United States.

Subpart G—Military Assistance Program Procurements

1206.703-50 Use of Domestic Sources for MAP Procurements.
1206.703-51 Exceptions.

Subpart H—Balance of Payments Program

1206.805 Supply and Service Contracts.
1206.805-2 Procurement Limitations.

Subpart I—International Agreements and Coordination

1206.902 International Agreements.
1206.902-50 Procurement Services for the FRG.

Subpart M—Procurements for Foreign Military Sales

1206.1303 Preparation of DoD Offer and Acceptance.
1206.1303-1 Procedures.
1206.1303-50 FMS Shipping Instructions.
1206.1310 Implementation of Offset Arrangements Included in Foreign Military Sales Agreements.
1206.1310-2 General.
1206.1310-3 Procedures.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subpart A—Buy American Act—Supply and Service Contracts

§ 1206.103 Exceptions.

§ 1206.103-2 Nonavailability in the United States.

(a) The required determination shall be prepared in substantially the following form:

DETERMINATION

DATE ——.

Pursuant to the authority contained in Section 2, Title III of the Act of March 1933, commonly called the Buy American Act (41 U.S. Code 10 a-d), and authority delegated to me by paragraph 6-103.2 of the Armed Services Procurement Regulation, I hereby find:

a. (*Description of the item or items to be procured, including unit, quantity, and estimated cost inclusive of duty and transportation costs to destination*).

b. (*Brief statement of the necessity for the procurement*).

c. (*Statement of facts establishing the nonavailability of a similar item or items of domestic origin*).

Based upon the above showing of fact, it is determined that the above described item(s) is(are) not mined, produced, or manufactured, or the articles, materials, or supplies from which it(they) is(are) manufactured, are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

Accordingly, the requirement of the Buy American Act that procurement be made from domestic sources and that it be of domestic origin is not applicable to the above described procurement, since said procurement is within the nonavailability exception stated in the Act. Authority is granted to procure the above item(s) of foreign origin (*Country of origin*) at an estimated cost of $—— including duty and transportation costs to destination.

—————— Signature

(b) A copy of the validation of the procurement requirement in accordance with DLAM 4140.3 shall be made a part of the contract file.

(c) Where approval of the determination of nonavailability is required at a level above the HPA, a copy of the validation of the procurement requirement shall be included with the request for approval.

(d) When the restrictions of the Buy American Act are determined to be inapplicable to the end products, the contractor shall be notified of that determination by such means as an appropriate notation in the body of the contract.

(e) For purposes of determining the approval level necessary in ASPR 6-103.2(b), option totals shall not be added to basic award amounts. Prior to exercising the option, however, a new determination of nonavailability (for the option total only) shall be made.

§ 1206.103-5 Canadian supplies.

The Director DLA, has determined that the following supplies are of a military character or are involved in programs of mutual interest to the United States and Canada. Notwithstanding the listing of a Federal Supply Class below, all provisions and restrictions of the Annual DoD Appropriation Act (ASPR 6-300) are applicable.

FSC group	Descriptions	FSC classes
22	Railway equipment	2230.
24	Tractors	2410, 2420.
25	Vehicular equipment components	2510, 2520, 2530, 2540, 2590.
28	Engines, turbines, and components	2805, 2815, 2895.
29	Engine accessories	2910, 2920, 2930, 2940, 2990.
30	Mechanical power transmission equipment	3010, 3020, 3030, 3040.
31	Bearings	3110, 3120, 3130.
34	Metalworking machinery	All classes.
35	Service and trade equipment	3520.
36	Special industry machinery	All classes.
38	Construction, mining, excavating, highway maintenance equipment	3805, 3810, 3815, 3820, 3825, 3830, 3835, 3895.
39	Materials handling equipment	All classes.
40	Rope, cable, chain, and fittings	4010, 4020, 4030.
41	Refrigeration and air conditioning and air circulatory equipment	4110, 4120, 4130, 4140.
42	Firefighting, rescue, and safety equipment	4210, 4220, 4240.
43	Pumps and compressors	4310, 4320, 4330.
45	Plumbing, heating, and sanitation equipment	4510, 4520, 4530, 4540.
46	Water purification and sewage treatment equipment	4610, 4620, 4630.
47	Pipe, tubing, hose, and fittings	4710, 4720, 4730.
48	Valves	4810, 4820.
49	Maintenance and repair shop equipment	4930.
52	Measuring tools	5280.
53	Hardware and abrasives	All classes except 5345 and 5350.
54	Prefabricated structures and scaffolding	5410, 5420, 5430, 5440, 5445, 5450.
55	Lumber, millwork, plywood, and veneer	5510, 5520, 5530.
56	Construction and building materials	All classes except 5630, 5640, and 5650.
58	Communication, detection, and coherent radiation equipment	All classes.
59	Electrical and electronic equipment	Do.
61	Electric wire and power distribution equipment	6105, 6110, 6115, 6125, 6130, 6120, 6145, 6140, 6150.
62	Lighting fixtures and lamps	6210, 6220, 6230, 6240, 6250, 6260.
63	Alarm and signal systems	6350.
65	Medical, dental, and veterinary equipment and supplies	6505, 6515, 6520.

FSC group	Descriptions	FSC classes
66	Instruments and laboratory equipment	6630, 6640, 6635, 6655, 6670, 6645, 6660, 6675, 6680, 6685, 6695.
67	Photographic equipment	All classes.
68	Chemicals and chemical products	6810, 6820, 6830, 6840, 6850.
70	General purpose automatic data processing equipment, software, supplies, and support equipment.	All classes.
72	Household and commercial furnishings and appliances	7240 (cans, water, military only).
75	Stationery and record forms	7530.
76	Books, maps, and other publications	7610.
81	Containers, packaging, and packing supplies	8105, 8110, 8120, 8115, 8125.
83	Textiles, leather, furs, apparel and shoe findings, tents and flags	8340 (to the extent restrictions of DOD Appropriation Act are not applicable).
84	Clothing and individual equipment and insignia	8405 (beret, man's, wool only); 8415 (steel helmets only); 8465 as indicated: (1) snowshoes, trail, metal; (2) canteen, water, plastic; (3) cup, water canteen, steel; (4) frame, field pack, without straps; and (5) shelf, cargo support; 8470.
93	Nonmetallic fabricated materials	9320, 9330, 9340, 9350, 9390, 9310 (MAP paper only).
95	Metal bars, sheets, and shapes	All classes.
96	Ores, minerals, and their primary products	9620.

Parts for the above listed supplies are considered to be included in the list, even though not separately listed, when they are produced under a contract that also calls for listed supplies.

§ 1206.103-50 Shipping instructions to Canadian vendors.

Shipping instructions provided Canadian vendors furnishing DOD supplies shall designate a CONUS destination or Canadian port marked for a CONUS destination. No Canadian vendor is to be requested to make shipments of DOD supplies addressed to an overseas destination. On urgent requirements for shipment to overseas destinations, the shipping instructions shall be forwarded to the Defense Contract Administration Office, 6th Floor, Canadian Building, 219 Laurier Avenue, West, Ottawa, Ontario, Canada (K1A055), who will make necessary arrangements.

§ 1206.104 Procedures.

§ 1206.104-50 Procedure for submission to Executive Director, Procurement, DLA.

Proposed Awards not within the approval authority of the Head of the Procuring Activity shall be submitted to HQ DLA, ATTN: DLA-PP, for approval with a recommendation supported by relevant facts, including the amount of applicable duty as verified by the U.S. Customs Service, and the information required to be furnished by § 1201-452.3. The requirement shall be carefully screened against Department of Defense excess and surplus materials before submission. The results of this screening shall be reported in the statement of facts. Appropriate provision shall be made for extending the date of acceptance of bids, offers, or proposals to permit sufficient time for orderly transmission and consideration.

§ 1206.104-51 Contract clause.

The following clause may be used in formally advertised or negotiated procurements when it is anticipated that offers on items of foreign origin will be received.

EVALUATION OF OFFERS ON ITEMS OF FOREIGN ORIGIN (DLA 1970 DEC)

a. Offerors offering other than domestic source end products, as defined in ASPR 7-104.3 Buy American Act, must include in the price offered all applicable import duty and, for evaluation purposes, furnish the following for each item:

Item No. _____
Amount of Duty per Unit _____

b. If this solicitation is formally advertised (an IFB), failure of an offeror to furnish the data required above will result in the rejection of his offer when such failure results in the Government's inability to evaluate the offer.

c. The Government reserves the right to award on a duty-free basis by reducing the unit price offered by the amount of the duty. If award on a duty free basis is made, the clause set forth in ASPR 7-104.31(a) Duty-Free Entry for Certain Specified Items, is incorporated herein by reference and made a part thereof.

Subpart C—Appropriation Act Restrictions

§ 1206.303 Exceptions.

(x) As provided for in Section 6-303(x) of the Armed Services Procurement Regulation, the Heads of DLA Procuring Activities are delegated, without the power of redelegation, authority to make determinations, where appropriate that the restrictions of Section 6-302 do not apply to purchases of specialty metals when a satisfactory quality and sufficient quantity melted in the United States or its possessions cannot be procured as and when needed at United States market prices.

§ 1206.304 Procedures.

§ 1206.304-1 Procurement of food, clothing, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric, or coated synthetic fabric, or items containing mohair or cotton or specialty metals.

Where prices for domestic supplies are considered unreasonable within the purview of ASPR 6-304.1 the contracting officer shall forward a request for determination, through channels, to HQ DLA, ATTN: DLA-PP. Each such request, in addition to complete information on all factors pertinent to the requested action, shall contain a proposed determination. The format of the determination in § 1206.103-2(a) may be used as a guide.

Subpart D—Purchases From Rhodesia and Certain Communist Areas

§ 1206.403 Exceptions.

(a) Determinations may be made by contracting officers under ASPR 6-403(a) for purchases not exceeding $2,500; and such determination shall be reduced to writing and made a part of the appropriate contract file.

(b) Requests for the approval required by ASPR 6-402(a) for purchases exceeding $2,500, shall be forwarded to HQ DLA, ATTN: DLA-PP, and shall contain full justification, with all pertinent details, for effecting the proposed procurement from a source within a communist-controlled area.

Subpart F—Duty and Customs

§ 1206.603 Emergency purchases of war materials abroad.

§ 1206.603-4 Customs entries and duty-free certificates.

The HPA is hereby delegated, with the power to redelegate, the authority to execute duty-free entry certificate in the form set forth in ASPR 6-603.4 for emergency purchases of war materials, as defined in ASPR 6-603.1.

§ 1206.603-5 Immediate Release Permits.

The HPA is hereby delegated, with the power to redelegate, the authority to issue "Immediate Release Permits" as prescribed in ASPR 6-603.5.

§ 1206.604 Supplies for Vessels or Aircraft Operated by the United States.

(b) Authority is delegated to the Commander, Defense Fuel Supply Center, with the power of redelegation to execute duty-free entry certificates in the form set forth in ASPR 6-604(b) for the classification of supplies in ASPR 6-604(a).

Subpart G—Military Assistance Program Procurements

§ 1206.703-50 Use of domestic sources for MAP procurements.

MAP requirements will be procured in accordance with ASPR Section VI, Part 7 and DOD Directive 2125.1, Military Assistance Program Offshore Procurement (MAP.OSP), dated 18 June 1970. DOD Directive 2125.1 sets forth policies and procedures for procurement of Defense articles and Defense services from suppliers delivering from sources located outside the U.S., its possessions and Puerto Rico for the Military Assistance Program. The DOD Directive requires that MAP procurements be restricted to domestic sources unless, for purchases of $10,000 or less, such action is clearly undesirable, or for MAP purchase in excess of $10,000, the cost of domestic source end products, or services of domestic concerns located in the United States, is estimated to be more than 50% in excess of the cost from foreign sources. Prior to the solicitation of MAP requirements, procuring contracting officers shall consider the ciretria of Section IV, paragraph B.4, of DOD Directive 2125.1. In all cases where the preliminary judgment is that the procurements should not be restricted to domestic end sources, the proposed procurements shall be rederred to the Executive Director, Procurement, HQ DLA, ATTN: DLA-PP.

§ 1206.703-51 Exceptions.

(a) In any case where a procurement has been restricted to domestic source end products and a foreign offer is, nonetheless, received which meets the criteria in Section IV, paragraph B.4 of DOD Directive 2125.1, the procurement will be referred to the Executive Director, Procurement, HQ DLA, ATTN: DLA-PP.

(b) Notwithstanding the above, DPSC is referred to the restriction in Section 606(c) of the Foreign Assistance Act of 1961, as amended, against the procurement of patented drugs from foreign sources when MAP funds are used.

Subpart H—Balance of Payments Program

§ 1206.805 Supply and service contracts.

§ 1206.805-2 Procurement limitations.

(b) For procurements estimated not to exceed $100,000, the authority in ASPR 6-805.2(b)(1) is redelegated to HPAs within DLA. This authority may be delegated to the principal staff officer responsible for procurement within the Procuring Activity. DGSC is authorized to redelegate this authority to purchase foreign books and publications not to exceed $10,000 to the contracting officer concerned.

(e) The documentation referred to in ASPR 6-805.2(e) shall be prepared in the form of a Determination and Findings and shall be forwarded to the Executive Director, Procurement, HQ DLA, Attn: DLA-PP. When the procurement is justified under ASPR 6-805.2(a)(v), the Determination and Findings shall include a statement of facts establishing nonavailability and an indication of the consideration given to foregoing the requirement or providing a domestic made substitute. The following specific information shall be furnished in letter transmitting the Determination and Findings:

(1) Stock number;
(2) Item nomenclature;
(3) Description (to include pertinent specification citations);
(4) Backorder situation;
(5) Average monthly demand;
(6) Due-in quantities by date;
(7) Average price paid during the previous year;
(8) Latest procured quantity and price;
(9) Quantity and delivery schedule recommended for offshore procurement (OSP);
(10) Fund availability;
(11) Offshore source, if known; and
(12) Any other pertinent data for justifying the proposed procurement.

Subpart I—International Agreements and Coordination

§ 1206.902 International agreements.

§ 1206.902-50 Procurement services for the FRG.

(a) *General.* Based on principles expressed in the Mutual Defense Agreement between the USA and the Federal Republic of Germany (FRG) of 8 October 1976 (TIAS 3660) and its subsequent amendments of 24 October 1960 (TIAS 4599) and 24 November 1961 (TIAS 4903), the U.S. Government has agreed to sell to the FRG certain military equipment, materials and services pursuant to Sec. 106 of the Mutual Security Act of 1954 as amended. The 1961 amendment broadened the Agreement to provide U.S. Government procurement for the FRG of items not previously procured. These procurement services include sale to or purchase for the FRG of certain articles and services which are not standard military items but which are directly related to or essential for the operational capability of the Armed Forces of the FRG.

(b) *Definitions.*

(1) *Nonstandard Items.* The Military Services will make the determination of whether an item is nonstandard. However, in cases where the determination has not been made and where the item has not previously been purchased as a standard item, the determination of whether the item is standard or nonstandard will be made by Plans and Operations Branch, Procurement Division, Directorate of Procurement, HQ DLA, (DLA-PPP).

(2) *Procurement Services.* The purchase, inspection, processing, financing, and delivery of nonstandard items to the FRG.

(c) *Policies.* The furnishing of procurement services for nonstandard military items will be provided the FRG by DSCs according to the following policies.

(1) Contract clauses and procedures will be in accordance with the Armed Services Procurement Regulation (ASPR). In no event will contracts be awarded at other than prices which are determined to be reasonable.

(2) Items not covered by U.S. Government specifications will be procured according to manufacturers' specifications and warranties, unless the FRG requests other specifications, qualifications, and warranties. If the specifications and warranties of the manufacturer are considered inadequate for procurement purposes, such specifications and warranties may be adequately supplemented by the U.S. Government after consultation with FRG.

(d) *Responsibilities.*

(1) The DSCs will render prompt procurement services to the FRG for

M Y 3 — 7 8
UMI

V 43 I 86

nonstandard items essential for the operational capability of the Armed Forces of the FRG.

(2) The questions or problems that cannot be resolved will be referred to HQ DLA, Attn: DLA-PPP.

Subpart M—Procurements for Foreign Military Sales

§ 1206.1303 Preparation of DOD offer and acceptance (DD Form 1513).

§ 1206.1303-1 Procedures.

(a) When new procurement over $10,000 is contemplated, requests from a Military Service International Logistics Control Office (ILCO, the activity normally responsible for submitting the DOD Offer and Acceptance, DD Form 1513, to a foreign country), for Price and Availability data, will be referred to the Directorate of Procurement and Production in each Center. The Directorate of Procurement and Production will obtain information relating to price and production leadtime; identify and review sales commissions and fees which may be involved; and identify any unusual contractual requirements or provisions which may impact on the procurement. This information shall be forwarded to the Supply Office which, in turn, will respond to the ILCO request.

(b) The Directorate of Procurement and Production in each Center will furnish whatever assistance it can reasonably give in identifying known or potential U.S. commercial suppliers for particular items being sought by foreign government authorities when the inquiry is received from an ILCO. In addition, such assistance shall be given directly to government authorities of Latin American countries.

§ 1206.1303-50 *FMS shipping instructions.*

(a) To reduce misdirected shipments of FMS materiel, no shipping addresses will be placed on FMS orders or contracts. Instead, a notice shall be placed in the order requiring the contractor to contact the transportation officer at the contract administration office for shipping instructions. A clause substantially as follows shall be used:

FMS Shipping Instructions (DLA 1977 Jul). Contractor will contact the transportation officer at the cognizant contract administration office for shipping instructions prior to shipment.

(b) A shipping address may be placed in FMS orders or contracts if complete shipment is anticipated within 120 days of award.

(c) Contracts or orders contemplating the use of the defense transportation system rather than a freight forwarder may include a firm shipping address.

(d) Additional contract provisions may be appropriate for requisitions which contain a "Z" or "Y" card column 46 to satisfy unique requirements of these requisitions. The clauses currently being used by DSCs for these requisitions may continue to be used. However, care should be taken to assure that freight forwarder or embassy addresses are not listed on the order/contract.

§ 1206.1310 Implementation of offset arrangements included in foreign military sales agreements.

§ 1206.1310-2 *General.* The U.S. Government has entered into general offset agreements with the Governments of Norway, the United Kingdom, Switzerland and Australia which in general attempt to ensure that, to the maximum extent possible, purchases by these countries of major weapons systems and associated defense equipment from U.S. sources are offset by purchases of items produced in these countries.

§ 1206.1310-3 *Procedures.*

(a) Offset procurements will be conducted in accordance with ASPR and normal procurement procedures. Eligible foreign sources will be provided the same technical information and help that is normally provided U.S. sources, insofar as this assistance is consistent with National Disclosure Policy and U.S. Industrial Security Regulations. Their names will be placed on the appropriate Bidders Mailing Lists in accordance with the procedures in ASPR 2-205.7. The normal criteria for making small business and labor surplus area set-asides are to be utilized without regard to the fact that there are potential foreign sources for the items. Procurements from foreign sources will not be made where prohibited by law (e.g., the DoD Appropriation Act).

(b) Solicitations on which a response is anticipated from a foreign source under an offset program should contain a Notice of Potential Foreign Source Competition and a Duty-Free Entry clause. The Notice of Potential Foreign Source Competition clause in ASPR 7-2003.75 may be used except that solicitations anticipating a response from a UK source should contain the clause in § 1206.1310-3(d)(2).

(c) As soon as it is determined that a bid or proposal involving a foreign product from one of the countries identified in DLPR 6-1310.2, other than the United Kingdom, would be accepted but for the Buy American or Balance of Payments Program evaluation factors prescribed by ASPR 6-104.4, the contracting officer shall prepare a statement of the facts surrounding the procurement in sufficient detail to permit judgement as to whether an exception from the Buy American or Balance of Payments restrictions should be authorized. The statement shall be referred to HQ DLA, Attn: DLA-PPR, for appropriate action. Procedures for UK bids or proposals are provided in (d) below.

(d) The Secretary of Defense has executed a Determination and Findings authorizing waiver of the Buy American Act differentials (ASPR 6-104.4) for United Kingdom items. In addition, the Secretary has stated that the Balance of Payments price differentials (ASPR 6-104.4) are inapplicable to UK items. Thus, bids or proposals from UK firms which would be accepted but for the Buy American or Balance of Payments Program will normally be awarded to the UK firm. No further approval of the exception to the Buy American Act is required.

(1) *Exceptions.* There are three exceptions to the above policy.

(i) Restrictions other than the Buy American Act, such as the DOD Appropriation Act, continue to apply to UK items.

(ii) Restricted items set forth in ASPR 1-2207 are excepted.

(iii) Items for which contracts are negotiated pursuant to the authority of ASPR 3-216 are excepted.

(2) *Solicitation provisions.* Solicitations which anticipate competition from UK sources will contain the notice below in lieu of or in addition to the clause set forth in ASPR 7-2003.75:

NOTICE OF POTENTIAL FOREIGN SOURCE COMPETITION

Bids or proposals for this procurement are being solicited from sources in the United Kingdom of Great Britain and Northern Ireland (UK). It has been determined by the Secretary of Defense that the restrictions of section 2 of title III of the Act of March 3, 1933 (47 Stat. 1520; 41 U.S.C. 10a; Buy American Act) shall not apply to items of Defense equipment described in this solicitation when produced or manufactured by UK sources.

(3) *Rejection of acceptable UK bids or proposals.* Otherwise acceptable UK bids or proposals may be rejected when the head of a Defense Agency considers it necessary for reasons of the national interest. Requests for a decision to reject UK offers on this basis should be sent to HQ DLA, Attn: DLA-PPR.

(e) To ensure that these programs are effective, each DSC will designate a contact point who shall be responsible for monitoring the programs. These contact points must be conversant with the policy of selective competitive procurement from foreign sources in the event that they are contacted by foreign officials or prospective foreign contractors. In addition, each contact point shall be prepared to advise DLA-PPP of the current status of the programs and furnish reports as required.

(f) When an Australian source is solicited, two copies of the complete bid/proposal package (including the necessary specifications and/or drawings) should be sent to:

Chief, U.S. DOD Procurement Information Office, c/o Department of Supply, Constitution Avenue, Canberra, Australia 2600.

M Y 3 7 8 UMI

PART 1207—CONTRACT CLAUSES AND SOLICITATION PROVISIONS

Subpart A—Fixed-Price Supply Contracts

Sec.
1207.103 Required clauses.
1207.103-8 Assignment of claims.
1207.103-12 Disputes.

Subpart H—Letter Contracts

1207.850 Letter Contract for DLA Industrial Readiness Planning Program.
1207.850-1 Format.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Clauses for Fixed-Price Supply Contracts

§ 1207.103 Required clauses.

§ 1207.103-8 Assignment of claims.

In cases where special circumstances make it advisable in the best interest of the Government, HPAs may authorize deletion of the last sentence of paragraph (a) of the Assignment of Claims clause set forth in ASPR 7-103.8.

§ 1207.103-12 Disputes.

(c) The Disputes clauses contained in ASPR 7-103.12 shall not be modified to provide for an intermediate appeal board.

Subpart H—Letter Contracts

§ 1207.850 Letter contract for DSA Industrial Preparedness Planning Program.

§ 1207.850-1 Format.

CONTRACT NO. ————.

Gentlemen:

This Letter Contract, upon acceptance by your firm will constitute a contract on the terms and conditions stated herein and signifies the intention of the Defense Logistics Agency to enter into a firm fixed-price contract with you for the deliveries of the supplies and performance of the services listed on DD Form 1519 which was executed on ———— in furtherance of the Industrial Preparedness Program.

Schedule of Supplies or Services

The supplies and services to be furnished and the time and place of delivery are as follows:

Contract For ————————————————

———————————————————————

———————————————————————

———————————————————————

———————————————————————

Specification Number ————————————

Appropriation and other Administrative Data

The supplies and services to be obtained under this Letter Contract are chargeable to the following allotments, the available balances of which are sufficient to cover the cost of same————.

F.O.B. ————————————————————

Execution, Commencement of Work and Priority Rating

The Contractor's acceptance of this order will be indicated by affixing its signature to three copies thereof and returning the executed copies to the Contracting Officer not later than ————. Upon acceptance by both parties, the Contractor shall proceed with performance of the work described herein, including procurement of necessary materials. An appropriate priority rating, in accordance with the Department of Defense Priority and Allocation Manual, will be assigned to this Letter Contract. (ASPR 7-802.2).

Priority Rating

DO or DX ———— (appropriate program code symbol) Certified for national defense use under Defense Materials System Regulation 1.

DEFINITIZATION

(a) A firm fixed-price type definitive contract is contemplated. To accomplish this result, the Contractor agrees to enter into negotiation promptly with the Contracting Officer over the terms of a definitive contract, which will include all clauses required by the Armed Services Procurement Regulation on the date of execution of the letter contract, all clauses required by law on the date of the execution of the definitive contract and such other clauses, terms, and conditions as may be mutually agreeable. The Contractor agrees to submit a fixed-price proposal (cost and fee proposal), and cost or pricing data supporting that quotation.

(b) The schedule for definitization of this contract is set forth below:

———————————————————————

———————————————————————

———————————————————————

———————————————————————

Target Date for Definitization: ————————

(c) If agreement on a definitive contract to supersede this letter contract is not reached by the target date set forth in (b) above or any extension thereof by the Contracting Officer, the Contracting Officer may, with the approval of the Head of the Procuring Activity, determine a reasonable price or fee in accordance with ASPR Section III, Part 8, and Section XV, subject to appeal by the Contractor as provided in the "Disputes" clause of this contract. In any event, the Contractor shall proceed with completion of the contract, subject only to the "Limitation of Government Liability" clause. After the date of the Contracting Officer's determination of price or fee, the contract shall be governed by:

(1) all clauses required by the Armed Services Procurement Regulation on the date of execution of this letter contract for either a fixed price type contract or a cost reimbursement type contract as determined by the Contracting Officer under this paragraph (c);

(2) all clauses required by law as of the date of the Contracting Officer's determination; and

(3) such other clauses, terms and conditions as may be mutually agreed upon.

To the extent consistent with the foregoing, all clauses, terms and conditions included in this letter contract except which by their nature are applicable only to a letter contract shall continue to be effective.

Limitation of Government Liability

(a) The Contractor is not authorized to make expenditures or to incur obligations, in performance of this contract, which exceed ———— *dollars* ($————).

(b) The maximum amount for which the Government shall be liable if this contract is terminated is ———— dollars ($————).

(c) Unless otherwise provided herein no progress paymnent to the Contractor will be made under this contract.

The enclosed forms, with the exception of Enclosure(s) ——— and clause(s) ——— are hereby incorporated into this letter contract which is entered into pursuant to 10 U.S.C. 2304(a)(1) and any required determination and findings have been made.

Sincerely yours.

Enclosures.

§ 1208.201 Authority of contracting officers.

(a) The Head of the Procuring Activity shall prescribe procedures under

V 43 | 86 MY 3 78 UMI

which contracting officers may terminate contracts for the convenience of the Government and in the case of cost-reimbursement type contracts for the default of the contractor. Notwithstanding a change in requirements a contract is not to be terminated for convenience (except at no cost to the Government as provided in ASPR 8-602.4(iii)) if the contractor is in unexcusable default and the Government has a legal right to terminate such contract for default.

(b) The settlement of contracts terminated for the convenience of the Government is the responsibility of the cognizant Defense Contract Administration Office (DCAS). A contract may be terminated for the convenience of the Government by the procuring contracting officer (PCO) at no cost to the Government and without referral to DCAS or the issuance of a notice of termination when the PCO is aware that (1) the contractor will accept a no-cost settlement, (2) Government property was not furnished, and (3) there are no outstanding payments, claims or other contractor obligations. In all other cases a notice of termination for the convenience of the Government shall be issued and a copy forwarded to DCAS for action as specified in ASPR 8-203(b).

Subpart F—Termination for Default

§ 1208.601 General.

The decision as to the type of termination action to be taken (i.e., for default, for convenience, or a no-cost settlement) shall be made only after a review of cognizant experienced procurement and technical personnel, and by counsel assigned or available to the particular procuring activity or purchasing office. Under no circumstances should any notice of termination be furnished to the contractor until this review has been made. Careful consideration should be given to the Government's interests whenever small business guaranteed loans (see § 1201.705-4(d)), progress payments, or advance payments are involved.

§ 1208.602 Termination of fixed-price supply contracts for default.

§ 1208.602-3 Procedure for default.

The following procedures, prescribed by the General Services Administration, shall be followed in terminating for default delivery orders placed against Federal Supply Schedule contracts.

(a) *Ordering Office.* Before declaring a contractor in default, ordering offices should ordinarily notify the contractor in writing that unless satisfactory performance occurs by a specified date, which should allow a reasonable time for performance, his right to proceed further under the delivery order will be considered terminated and he will be held liable for any excess costs resulting from purchasing the supplies or services elsewhere. This step will not be taken when the default involves an attempted fraud on the United States, or when it obviously would be futile, as for example, when the contractor has already declined to perform. Where excess costs are anticipated, the ordering office may withhold sufficient funds due to contractor as offset security. Ordering offices will endeavor to minimize excess costs to be charged against the contractor and to collect, by check or setoff, excess cost owed.

(b) *Federal Supply Service (FSS).* Where ordering offices are notified by the Federal Supply Service that it has declared the contractor in default, ordering offices will thereafter refuse to accept further performance by the contractor or place further delivery orders with it. Ordering offices will thereafter purchase against the account of the contractor from replacing contractors designated by the FSS or in such other manner as directed by the FSS.

(c) *Notification.* Ordering offices shall furnish to the Purchase Branch, FSS, Room 809, Crystal Mall, Building 4, Washington, D.C. 20406, the details concerning all material instances of unsatisfactory performance by the contractor, whether or not properly adjusted and settled. Ordering offices also shall report, as may be directed by the FSS, all purchases made against the account of a contractor placed in default by the FSS.

PART 1209—PATENTS, DATA, AND COPYRIGHTS

Sec.
1209.000 Scope of Section.
1209.000-50 Authority.
1209.000-51 Supply of Patented Components as GFP.

Subpart A—Patents

1209.103 Patent Indemnification of Government by Contractor.
1209.103-4 Waiver of Indemnity by the Government.
1209.110 Reporting of Royalties—Anticipated or Paid.
1209.112 Adjustments of Royalties.

Subpart B—Rights in Technical and Other Data and Copyrights

1209.202 Acquisition of Rights in Technical Data.
1209.202-50 Reporting of Improper Use of Data or Technical Data.

Subpart C—Foreign License and Technical Assistance Agreements

1209.304 Foreign License and Technical Assistance Agreements Between a Domestic Concern and a Foreign Government or Concern.
1209.304-2 Review of Agreements.

Subpart D—Processing Licenses, Assignments, and Infringement Claims

1209.401 Policy.
1209.401-50 Processing of Infringement Claims.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

§ 1209.000 Scope of section.

§ 1209.000-50 Authority.

The Counsel, DLA, is authorized to act for the Director, DLA, on all patent, copyright, rights in data and trademark matters arising in the DLA. Any question on such matters shall be referred to the Counsel, DLA.

§ 1209.000-51 Supply of patented components as GFP.

Where patented or proprietary components are required in end items purchased by DLA activities, particularly military type items, consideration may be given to furnishing such components as Government-furnished property.

Subpart A—Patents

§ 1209.103 Patent indemnification of government by contractor.

§ 1209.103-4 Waiver of indemnity by the government.

Specific patents may be excluded in accordance with ASPR 9-103.4 only with the prior approval of the Counsel, DLA, or the Patent Counsel, DLA.

§ 1209.110 Reporting of royalties—anticipated or paid.

Counsel for the procuring activity concerned will forward to the Counsel, DLA, a copy of each royalty report received in accordance with ASPR 9-110 which indicates that royalties in excess of $250 have been paid or are to be paid to any person or firm.

§ 1209.112 Adjustment of royalties.

The report required by ASPR 9-112 shall be made to Counsel for the procuring activity concerned who shall forward the report to the Counsel, DLA, for appropriate action.

Subpart B—Rights in Technical and Other Data and Copyrights

§ 1209.202 Acquisition of rights in technical data.

§ 1209.202-50 Reporting of improper use of data or technical data.

Any direct or indirect charge of improper use of data of technical data received by any procuring activity, shall be referred to Counsel for the activity who will notify and coordinate all actions on such cases with the Counsel, DLA.

Subpart C—Foreign License and Technical Assistance Agreements

§ 1209.304 Foreign license and technical assistance agreements between a domestic concern and a foreign government or concern.

§ 1209.304-2 Review of agreements.

Proposed foreign license and technical assistance agreements between domestic concerns and foreign governments or concerns forwarded to the DLA under the provisions of ASPR 9-304.1 shall be referred to the Counsel, DLA, for action in accordance with ASPR 9-304.2.

Subpart D—Processing Licenses, Assignments, and Infringement Claims

§ 1209.401 Policy.

§ 1209.401-50 Processing of infringement claims.

(a) Any direct or indirect charge or threat of patent, trademark or copyright infringement received by any procuring activity, shall be referred to Counsel for the activity who will notify and coordinate all actions on such cases with the Counsel, DLA.

(b) The Counsel, DLA, or the Patent Counsel, HQ DLA, are hereby authorized to make acquisitions in accordance with 10 U.S.C. 2386 and to enter into agreements in settlement of claims under the Foreign Assistance Act of 1961 (22 U.S.C. 2356) and 35 U.S.C. 181-188. Coordination with the Departments of the Army, Navy and Air Force in the processing and final disposition of each claim shall be effected by the Counsel, DLA or the Patent Counsel, HQ DLA.

PART 1210—BONDS, INSURANCE, AND INDEMNIFICATION

Subpart A—Bonds

Sec.
1210.112 Execution and Administration of Bonds and Consents of Surety.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Bonds

§ 1210.112 Execution and administration of bonds and consents of surety.

(b) *Administration.* All bonds and all consents of surety will be reviewed by counsel of the activity for legal sufficiency. The original signed bond shall subsequently be retained with the original copy of the contract where practical.

PART 1212—CONTRACTOR INDUSTRIAL LABOR RELATIONS

Subpart A—Basic Labor Policies

Sec.
1212.101 Labor Relations.
1212.101-1 General.
1212.101-3 Reporting of Labor Disputes.
1212.107 Labor Standards Enforcement Report.

Subpart F—Walsh-Healey Public Contracts Act

1212.604 Eligibility of a Bidder or Offeror.
1212.650 Exception Not Stated in the Publications Furnished Contracting Officers.

Subpart G—Fair Labor Standards Act of 1938

1212.702 Suits Against Government Contractors.

Subpart H—Equal Employment Opportunity

1212.804 Equal Opportunity Clauses.
1212.804-50 Equal Employment Opportunity Compliances Responsibilities.
1212.807 Affirmative Action Programs.
1212.808 Compliance Reviews and Clearances.
1212.808-50 Contractor Compliance.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Basic Labor Policies

§ 1212.101 Labor relations.

§ 1212.101-1 General.

Whenever labor representatives request permission to enter a DLA installation on which private contract employees are engaged in contract work to conduct union business during working hours, the commanding officer may admit such representatives, provided (a) the presence and activities of the labor representatives will not interfere with the progress of the contract work involved, and (b) the entry of such representatives to the installation shall not violate pertinent safety or security regulations. Commanding officers shall take all necessary action to enforce the above policy and facilitate ready access to worksites within military installations. One method which has met with success in appropriate situations is the maintenance by commanding officers of a list of labor representatives, who have been cleared with regard to safety and security considerations and who may be admitted into respective installation to conduct union business. The determination as to who are appropriate labor representatives should be made by the commanding officer on recommendation of the contracting officer and representatives of the DLA Industrial Labor Relations Office after consultation with local union officials. Business offices or desk space for labor organizations for solicitation of membership, collection of dues, or other business of the labor organization not directly connected with the contract work, shall not be permitted on the installation except for the routine functions of the working steward whose union duties are incidental to his assigned job. In the event that a commanding officer of an installation or the contracting officer or his representative denies entry to a labor representative for any reason such officer shall notify, through channels, the DLA Industrial Labor Relations Advisor, HQ DLA, ATTN: DLA-HR. Such notification shall include the reasons for denial, including names, addresses, of representatives denied entry, and union affiliation, if known, of such representatives. An information copy of each notification shall be forwarded to HQ DLA, ATTN: DLA-PRS.

§ 1212.101-3 Reporting of labor disputes.

The report of labor disputes on DD Form 1507, Work Stoppage Report, in accordance with ASPR 12-101.3(c), is assigned Reports Control Symbol DD I&L(AR)1153.

§ 1212.107 Labor Standards Enforcement Report.

The semiannual report of compliance with and enforcement of the labor standards provisions of the Davis-Bacon Act and Contract Work Hours and Safety Standards Act shall be prepared in accordance with ASPR 12-107 and forwarded to HQ DLA, ATTN: DLA-PRS, so as to arrive not later than 15 days after the close of the reporting period (31 December and 30 June).

Subpart F—Walsh Healey Public Contracts Act

§ 1212.604 Eligibility of a bidder or offeror.

(a) In those instances where the contracting officer makes a determination of ineligibility as a manufacturer or regular dealer, such determination, together with supporting documentation, shall be submitted to the Head of the Procuring Activity or his designee for review and approval.

(b) In the case of DDMT, DDTC, DDOU, DIPEC, DLSC and DASC, the review responsibility set forth in § 1212.604 is hereby delegated to the Commander concerned, or his designee, in accordance with § 1201.201-14.

§ 1212.650 Exception not stated in the publications furnished contracting officers.

Certain of the exceptions stated in the publications furnished contracting officers which contain no specific expiration date may have been rescinded by the Secretary of Labor since date of publication. In case of doubt, inquiry may be directed to the appropriate Regional Director, Wage and Hour and

V 43 | 86 MY 3 78 UMI

Public Contracts Divisions, Department of Labor indicated in ASPR 12-607.

Subpart G—Fair Labor Standards Act of 1938

1212.702 Suits against Government contractors.

Cost-plus-a-fixed-fee contractors and subcontractors should be advised that immediately upon receipt of process in any legal action filed against them they must furnish a copy of all papers to the contracting officer. An immediate report of the legal action shall be made direct to the Counsel, HQ DLA.

Subpart H—Equal Employment Opportunity

§ 1212.804 Equal opportunity clauses.

§ 1212.804-50 Equal employment opportunity compliances responsibilities.

(a) In all cases in which a Center or Depot retains the administration of a contract which contains the Standard Equal Opportunity clause or an approved local plan bid conditions, a letter of notification of such award shall be sent to the cognizant DCASR which includes the location in which the work is to be performed. The DCASR Contract Compliance Office (CCO) has the responsibility for insuring contractor compliance with the EEO provisions. The letter of notification will be marked to the attention of the Compliance-Office and will contain the following information.

(1) Contract number and dollar value.

(2) Contractor name and address.

(3) Nature of services to be performed.

(4) Site of work.

§ 1212.807 Affirmative action programs.

§ 1212.807-2 Construction contracts.

The DCASR CCO shall be notified of the date, time and place of any preconstruction conferences so that the Compliance Office may have an opportunity to review the EEO requirements with the contractor.

§ 1212.808 Compliance review and clearances.

§ 1212.808-50 Contractor compliance.

(a) Policy Branch, Procurement Division, Directorate of Procurement (DLA-PPR) will issue semi-monthly a list of contractors found not in compliance with current Equal Employment Opportunity (EEO) regulations. This list shall be utilized by DLA contracting elements to determine, from an EEO standpoint, the eligibility of a contractor for an award.

(b) DLA PPR will maintain a master list of contractors who, for reasons of noncompliance with EEO regulations, have been debarred. Notices of debarment/reinstatement will be issued by DLA-PPR as they are received.

(c) Any questions relating to the eligibility of a contractor for award should be directed to HQ DLA, ATTN: DLA-PPR.

PART 1213—GOVERNMENT PROPERTY

Subpart C—Providing Government Property to Contractors

Sec.

1213.301 Providing facilities.

Subpart E—Competitve Advantage

1213.501 Policy.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart C—Providing Government Property to Contractors

§ 1213.301 Providing facilities.

(a)

(1)

(i) Requests for new facilities will be forwarded to HQ DLA, Attn: DLA-P, for approval by the Executive Director or Deputy Executive Director, Procurement. Sufficient documentation will be provided with the request to show that the need for supplies or services cannot be met by any other practical means or that the furnishing of facilities will be in the public interest. Commanders of Defense Supply Centers, DIPEC, DDMT, DDOU and DDTC are authorized to provide existing facilities under the conditions set forth in ASPR 13-301.

(ii) A copy of the contractor's written statement, expressing his unwillingness or financial inability to acquire the necessary facilities with his resources, will be included as a part of requests for new facilities. A copy of the written statement obtained in connection with provision of existing facilities will be furnished to HQ DLA, Attn: DLA-PR, within 15 days after receipt from contractor.

The foregoing actions are not required when Government facilities to be utilized in the performance of a DLA contract are in the contractor's possession under a prior authorization. (ASPR Case 72-2-2).

(b) When determination is made that solicitations should include an offer to furnish existing Government facilities because adequate price competition cannot be otherwise obtained, the case will be fully documented to indicate the basis for such determination. Referral to HQ DLA, Attn: DLA-PR is not required prior to inclusion of an offer to provide existing facilities except for Approved Plant Equipment Packages. Requests for use of equipment included in such packages will be processed in accordance with procedures set forth in paragraph 10-403, DLAM 4005.1.

Subpart E—Competitve Advantage

§ 1213.501 Policy.

It is DOD policy to eliminate the competitive advantage that might otherwise arise from acquisition or use of Government production and research property. This is accomplished by charging rental or by use of rental equivalents in evaluating bids and proposals. Within the Defense Logistics Agency, the more desirable procedure is to develop an evaluation factor equal to the rent (ASPR 13-502.2), obtain the necessary approvals to authorize rent-free use of the Government property and award less the evaluation factor. A lower unit cost is thereby achieved and procurement funds are conserved. Rental monies eventually flow back into the U.S. Treasury but at the expense of the DLA budget. Accordingly, the rental procedure will be utilized only when absolutely necessary.

PART 1214—PROCUREMENT QUALITY ASSURANCE

Subpart C—Contract Provisions

Sec.

1214.305 Places of performance of Government procurement quality assurance actions.

1214.305-2 Government procurement quality assurance at source.

1214.305-3 Government procurement quality assurance at destination.

1214.306 Acceptance of supplies or services.

Subpart D—Government Procurement Quality Assurance Actions

1214.406 Nonconforming supplies and services.

1214.406-50 Nonconforming supplies and services.

1214.406-51 Definitions.

1214.406-52 Processing of requests for waiver.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart C—Contract Provisions

§ 1214.305 Places of performance of Government procurement quality assurance actions.

§ 1214.305-2 Government procurement quality assurance at source.

In addition to the provisions of ASPR 14-305.2, Government procurement quality assurance actions will be performed at source for supplies having a critical application. When a critical application item is procured from a sole source and the supplier will not permit source inspection, recommend this matter be negotiated with adequate consideration flowing to the Government, on a case-by-case basis, for the added cost of performance of the necessary technical inspection at destination at a designated Government laboratory or at the using activity.

§ 1214.305-3 Government procurement quality assurance at destination.

Prior to designating that Government procurement quality assurance actions will be performed at destination the contracting officer shall determine that the:

(a) depot or receiving activity has the technical ability to perform the inspections;

(b) necessary technical data, specifications, blue prints, etc., are available at the receiving point or will be furnished the receiving activity prior to receipt of the supplies; and

(c) equipment required to perform the inspection is available at the receiving point.

§ 1214.306 Acceptance of supplies or services.

(c) When it is desirable, based upon the criteria contained in ASPR 14-306(c), to use a contractor's certification that supplies conform to contract requirements either as additional assurance to inspection or as the sole basis for acceptance without prior Government inspection, the following will apply:

(1) A clause worded substantially as follows will be inserted in the contract:

Certificate of Conformance (DLA 1975 MAY).

(a) Unless specified otherwise in the contract award, the contractor is required to deliver the supplies to be furnished hereunder with a "Certificate of Conformance" when inspection and acceptance is at destination, and, at the option of the Government Contract Administration Office, may be required to deliver the supplies with a "Certificate of Conformance" when inspection and acceptance is at source. The contractor signed certificate shall be attached to or included on the top copy of the DD 250 or 1155 copies distributed to the payment office. Where acceptance is at destination, a copy of the signed certificate shall also be attached to or entered on copies of the DD 250, DD 1155 or other appropriate documents accompanying the shipment. This certificate shall read as follows:

"I hereby certify that on (Date) ——— the (contractor's name) ——————— shipped the supplies called for by Contract No. DLA ——— via (carrier) ——————— on (Bill of Lading or Shipping Document) ———————

in accordance with all applicable requirements for shipment. I further certify that the supplies are of the quality specified and are in all respect in conformance with the contract requirements, including specifications and/or drawings, preservation, packaging, packing and marking requirements; physical item identification (part number), and in the quantity shown on this, or the attached acceptance document."

Date of Execution: ———————

Signature ———————

Title: ———————

(2) The execution of the COC as a condition for acceptance by the Government is advantageous because of the reduction in time and cost of Government inspection without reducing the quality of supplies received. The contractor's COC is used principally (i) as an alternative to Government procurement quality assurance at source, (in this instance the contract should specify inspection and acceptance at destination); (ii) at the option of the Government Contract Administration Office when inspection and acceptance are at source and the value of supplies or the condition of purchase, delivery, or receipt or use thereof makes it desirable to have additional assurance that supplies conform to contract requirements; and (iii) at the option of the Government Contract Administration Office, when inspection and acceptance are at source and COC is used as the sole basis for acceptance for supplies shipped directly to bases in CONUS and overseas.

(3) The inclusion of post acceptance remedies in the COC clause is not appropriate. Post acceptance remedies for purchase orders (ASPR 3-608) are limited to the commercial warranty on the reverse side of DD Form 1155. For other contracts which include the inspection clause in ASPR 7-103.5, inspection rights of the Government are cut off after acceptance of supplies except as regard latent defects, fraud or such gross mistakes as amount to fraud. If post acceptance rights are desired, warranty clauses should be prepared in accordance with criteria of ASPR 1-324 for inclusion in the contract.

(4) The use of such terminology as "inspection and acceptance by COC" is improper and is not authorized. The place of acceptance, as determined under the criteria set forth in ASPR 14-305, 14-307, and 14-308, shall be clearly stated on the contract or purchase order. Except as authorized under Fast Pay procedures, acceptance by the contracting officer is required prior to payment. The COC and the Fast Pay procedure, ASPR 3-606 are separate and distinct concepts and will not be combined in any manner.

(5) When a contract or purchase order is assigned to a Contract Administration Office (CAO) for inspection and acceptance at source, the CAO's right to base its acceptance upon actual inspection of the supplies shall not be abridged. The insertion of a COC clause that requires the CAO to accept the supplies based solely upon a COC is not authorized. The CAO shall be given the options of performing inspection and/or based upon contractor's reputation or past performance, requiring the contractor to furnish a COC for use as additional assurance or as the sole basis for acceptance of supplies and services.

Subpart D—Government Procurement Quality Assurance Actions

§ 1214.406 Nonconforming supplies and services.

§ 1214.406-50 Nonconforming supplies and services.

(a) ASPR 14-406 states that it is Government policy that supplies which do not conform in all respects to the contract requirements should be rejected, but provides for exceptions when acceptance of such nonconforming supplies is in the interests of the Government (e.g., for reasons of economy or urgency). This ASPR guidance provides the basis for the contractor practice of requesting waiver of nonconformances in supplies that have been tendered to and rejected by a Government quality assurance representative.

(b) It is DLA policy that the granting of waivers shall be emphatically discouraged in all cases where the contractor is at fault in producing the nonconforming supplies.

(c) For supplies having minor nonconformances, as defined below, contractor requests for waiver shall be rejected except in those few cases where it is clearly advantageous to the Government to accept the nonconforming supplies and they are suitable "as is" for the intended use or the nonconformance results in a superior product.

(d) For supplies having major nonconformances, as defined below, the final determination as to their suitability for use is the responsibility of the activity responsible for technical requirements. The concurrence of such technical activity shall be obtained before waiver of a major nonconformance is granted.

§ 1214.406-51 Definitions.

(a) *Nonconforming Supplies.* Those supplies which contain one or more departures from contractual requirements. Nonconformances are categorized as follows:

(1) *Major Nonconformance.* The failure to conform adversely affects one or more of the following major areas: (i) performance; (ii) durability; (iii) reliability, interchangeability or maintainability of the item or its repair parts; (iv) effective use or operation;

V 43 | 86 MY 3 78 UMI

(v) weight or appearance (where a factor); or (vi) health or safety.

(2) *Minor Nonconformance.* The failure to conform does not adversely affect any of the major areas listed above. However, when several minor nonconformances exist on a single item, a determination will be made as to whether the cumulative effect is, in reality, a major nonconformance.

(b) *Request for Waiver.* A request for acceptance of nonconforming supplies or services which is prepared by a contractor on his own form or letterhead, unless a specific form is designated by contract.

(c) *Waiver.* A written authorization to accept an item which during production or upon being offered to the Government for inspection and acceptance is found to depart from specified requirements, but nevertheless is considered suitable for use "as is."

§ 1214.406-52 Processing of requests for waiver.

The procuring contracting officer (PCO) shall:

(a) Process requests for waiver expeditiously to avoid production delays and possible claims against the Government, and to assure full utilization of the technical information obtained as a result of waivers.

(b) Ascertain whether the contractor's request for waiver was forwarded through the administrative contracting officer (ACO) and includes the ACO's recommendations for approval or disapproval. The PCO must have the ACO's comments and recommendations in order to properly evaluate a request for waiver. Conversely, the ACO must be fully apprised of the request for waiver in order to assure that the contractor has taken action to correct and prevent recurrence of the conditions causing the nonconformance. Therefore, requests for waiver submitted directly to the PCO shall be returned to the contractor for resubmission through the ACO, except in those situations where time is an essential element. In such cases, the ACO's recommendations will be obtained by the most expeditious means available.

(c) Ascertain the supply position of the item and the effect that rejecting the request for waiver will have on the delivery schedule.

(d) Refer the request for wavier to the quality element of the DSC for evaluation and recommendations. The quality element shall serve as the technical support focal point for waiver actions at the DSC's.

(e) Make a determination, based on the above, as to whether the request for waiver should be accepted (if a minor nonconformance), rejected or referred to the appropriate technical activity for concurrence.

(f) Modify those contracts under which nonconforming supplies are accepted to provide for an equitable price reduction or other consideration. In the case of minor nonconformances, the contract shall not be modified except when it appears that the price reduction or other consideration accruing to the Government will exceed the administrative cost to the Government of processing a contract modification (normally $100), or the best interests of the Government otherwise require that the contract be modified.

(g) Consider repetitive requests for waiver as a factor when making determination of a contractor's responsibility.

PART 1215—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart A—Applicability

Sec.
1215.107 Advance agreements on particular cost items.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subpart A—Applicability

§ 1215.107 Advance agreements on particular cost items.

(e) The ASPR Committee will cause a master list to be published annually which will contain the names of commercial contractors, nonprofit institutions, and educational organizations operating under negotiated overhead rates (ASPR 3-700) for cost reimbursement type contracts and contractors selected for tri-service departmental negotiation of advance agreements for independent research and development and bid and proposal costs (ASPR 15-107, 15-205.35 and 15-205.3). Interim changes will be published as required and will show only the specific additions, deletions, or changes that have occured.

(f) HQ DLA receives and will retain copies of reports/amendments of negotiated overhead rates and advance agreements for independent research and development, and bid and proposal costs for the entities on this master list. HQ DLA (DLA-PPP) will provide copies to DSCs upon request.

PART 1216—PROCUREMENT FORMS

Subpart A—Forms for Supply and Services Contracts

Sec.
1216.104 Instructions for preparation of forms for advertised and negotiated supply and services contracts (standard forms 33, 26, 30 and 18).
1216.104-1 General.
1216.104-2 Solicitation, offer, and award (standard form 33).

Subpart C—Purchase and Delivery Order Forms

1216.350 Blanket purchase agreement delivery ticket (DLA Form 470).
1216.350-1 General.
1216.350-2 Procedure.
1216.350-3 General instructions for preparing the blanket purchase agreements delivery ticket.

Subpart H—Miscellaneous Forms

1216.850 Special quality assurance instructions.
1216.850-1 General.
1216.850-2 Conditions for use.
1216.850-3 Procedures.
1216.850-4 General instructions for preparing the special quality assurance instruction form.
1216.851 Request for contract review/approval (DLA Form 677).
1216.851-1 General.
1216.851-2 General instructions for preparation of DLA Form 677.
1216.852 Contract file content list (DLA Form 678).
1216.852-1 General.
1216.852-2 General instructions for preparation and use of DLA Form 678.
1216.853 Loan agreement for government property (DLA Form 491).
1216.854 Record of set-aside action (DLA Form 1360).
1216.854-1 General.
1216.854-2 General instructions for preparation and use of DLA Form 1360, May 1976.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Forms for Supply and Services Contracts

§ 1216.104 Instructions for preparation of forms for advertised and negotiated supply and services contracts (standard forms 33, 26, 30 and 18).

§ 1216.104-1 General.

(a) "Continental United States" is as defined in JCS Pub. 1; i.e., CONUS is limited to the 48 contiguous states and the District of Columbia, and excludes Alaska and Hawaii.

§ 1216.104-2 Solicitation, offer and award (standard form 33).

Instructions for block entries are as follows:

Block Number, Title and/or Instructions

9—Time for receipt of offers. The terms "Standard Time" and "Daylight Savings Time" or abbreviations thereof shall not be used in DLA Solicitations. In lieu thereof, the terms "Local time at the place of bid opening" or "local time at the place where proposals are received" shall be used. The first sentence of Block 9 on the SF 33 (For an IFB would now read as follows: "Sealed offers in original and . . . copies for furnishing the supplies or services described in the schedule will be received at the place specified in Block 8, OR IF HAND CARRIED, IN THE DEPOSITORY LOCATED IN Building 4, 4D175, until 1:00 PM, local time at the place of bid opening, 25 May 1977."

Subpart C—Purchase and Delivery Order Forms

§ 1216-350 Blanket purchase agreement delivery ticket (DLA Form 470).

This form may be used when supplies or services are procured by means of a blanket purchase agreement (BPA). (See ASPR 3-605.3(f)(vi).)

§ 1216.350-1 General.

The Blanket Purchase Agreement Delivery Ticket is a cut sheet form and is designed to be used by the vendor as an acknowledgment of a call, notice of shipment, packing list, and invoice. This form eliminates the need for preparation by the contractor of separate forms for these purposes. Also, Government personnel requiring information on these forms will receive it on a standard format.

§ 1216.350-2 Procedure.

A supply of the forms may be provided by the Center to each contractor who has entered into a blanket purchase agreement with the Center. Upon the placing of a call the contractor may be required to complete the BPA delivery ticket based on information contained in the written or oral call in accordance with detailed instructions to be provided by the Center.

§ 1216.350-3 General instructions for preparing the blanket purchase agreement delivery ticket.

After the placing of each call, complete the call, complete the form in accordance with the general instructions below and any specific instructions you may receive with the placing of the call. Entries should be typed.

(a) Block 11. This is the date the supplies are to reach destination, not the date you make shipment. Convert the number of delivery days you offered to an actual date. For example, if you offered a 30 day delivery and received the oral or written call on October 1, enter 10/31/76 as the required date.

(b) Block 12. This is the date the supplies are to be shipped, not delivered.

(c) Blocks 13 through 19. Information for these blocks will be furnished by the Center at the time of the call. Enter the name and address of the consignee in Block 15.

(d) Blocks 21 through 23. Entries in these blocks will be made at the time of shipment. Enter actual date shipped or delivered. No partial shipments to a particular destination may be made. If more than one shipment is made against a call, prepare 2 copies of this form for each shipment. Copies of the shipping documents may be attached as an alternative to completing Blocks 21 and 22.

(e) When using the form as an ACKNOWLEDGMENT OF CALL. Place a check mark on "•" copies of the form in the box "ACKNOWLEDGMENT OF CALL" (Block 9).

(f) When using this form as a NOTICE OF SHIPMENT. Place a check mark in the box "PACKING LIST" (Block 9) on "•" copies of the form in the box "NOTICE OF SHIPMENT" (Block 9).

(g) When using the form as a PACKING LIST. Place a check mark in the box "PACKING LIST" (Block 9) on "•" copies of the reproduced form for each consignee. Be sure Blocks 21 through 23 have been completed, as applicable, on the forms used. Send "•" copies to each consignee by placing copies inside the container or in an envelope attached to the exterior of the container.

(h) When using this form as an INVOICE. At the end of the billing period, fill in "•" copies of the reproduced form which includes the shipment data for all destinations of that call as follows:

(1) Place a check mark in the box marked INVOICE (Block 9) of each copy of the form.

(2) Sign and date Blocks 24 and 25 of the top copy only of the form. If the Blanket Purchase Agreement under which this call was issued does not provide for the fast payment procedure, the top copy must contain the signature and date (Blocks 27A and 27B) of the authorized Government representative receiving and/or accepting for the Government.

"•" The number required shall be in accordance with the needs of the Center.

Subpart H—Miscellaneous Forms

§ 1216.850 Special quality assurance instructions.

§ 1216.850-1 General.

The special quality assurance instruction form is designed to be used by the procurement contracting officer (PCO) and his quality assurance technical specialist to inform the Quality Assurance Representative (QAR), through the contract administration office (CAO), to whom the contract is assigned, of pertinent contract requirements and to provide him with the available quality history of the product and the contractor. The form also provides the QAR with the name, address and phone number of the cognizant technical specialist in the Center.

§ 1216.850-2 Conditions for use.

The Special Quality Assurance Instruction Form (DLA Form 970) is to be used on all procurements of critical items.

§ 1216.850-3 Procedures.

When items that have been identified as having a critical application in accordance with DLAR 3200.3, Identification, Processing and Procurement of Items with Critical Application, are to be procured, the appropriate Defense Contract Administration Services (DCAS) field activities or other agencies having inspection cognizance shall be alerted through use of DLA Form 970, regardless of the dollar value of the item or contract. Two copies of the completed form will be forwarded to the appropriate DCAS field activity as shown in DOD 4105.59-H, Directory of Contract Administration Services Components. The copies will be sent to the cognizant CAO quality assurance staff or attached to DCASR copies of the contracts at the time of contract distribution.

§ 1216.850-4 General instructions for preparing the special quality assurance instruction form.

Instructions for block entries are as follows (Entries should be typed):

Block Number, Title and/or Instructions

8—*Contract Quality/Inspection Requirements*—Identify the contract quality/inspection requirements using ASPR 14-301 as a guide.

9—*Certificate of Conformance*—Indicate "Required" when the contract states that COC may be used as the sole basis for acceptance. Indicate "Optional" when the contract states that COC may be used as an element incident to acceptance by the CAO.

10—*Item Use*—Use when applicable.

11—*Authority for Acceptance of Nonconforming Supplies and Services is Withheld in Accordance with ASPR 14-406(b)(ii)*—In accordance with ASPR 14-406(b)(ii) use only when PCO retains authority.

12—*Special Contractor Examinations and Tests*—Identify any special contractor examinations and tests the QAR should witness or monitor closely. Also, identify any special contractor examinations and tests for which the DSC quality assurance element desires to be present.

13 and 13a—To inform the QAR when and for what purpose DSC technical representatives will participate in the contractor test program.

14 and •14a—To provide verification test requirements and laboratory address.

15—*Product Quality History*—To provide QAR with pertinent details of product that would alert him to possible trouble areas.

V 43 | 86

16—*Contractor Quality History*—To provide QAR with a pertinent, general summary of the contractor's past performance, where the performance may affect the quality of the supplies or services being procured. Statements which because of their sensitive nature, would have to be classified as "For Official Government Use Only" will be avoided. If sensitive data must be provided the QAR, a statement to the following effect will be included: "The QAR should contact the individual shown in Block 18 for specific details relating to the quality history of the contractor".

17—*Remarks*—Identify any additional information or clarifying remarks which may be useful to the QAR that are not provided elsewhere on the form".

18—*DSC Contract for Quality Assurance*—Enter name, address and phone number of DSC specialist in Technical Operations assigned to the commodity.

§ 1216.851 Request for contract review/approval (DLA Form 677).

§ 1216.851-1 General.

DLA Form 677, shall be used as prescribed in § 1201.542-3. Requests for contract review/approval shall be addressed to the attention of DLA-PC.

§ 1216.851-2 General instructions for preparation of DLA form 677.

Instructions for block entries are as follows:

1/1a—Insert the subparagraph number of § 1201.452-2(a) that is applicable to the type of action for which approval is being requested. Place an "X" in the appropriate block to signify that the proposed action is either a new contract or a modification of an existing contract and, if the latter, the basis for the modification.

2/2a—Insert the date of expiration of the bid or proposal, or the date by which existing contract terms require exercise of the option. If the date entered allows less than thirteen calendar days from date of dispatch of the request (as entered in Block 16a), the request is to be considered a request for expedited review, and the block provided (2a) is to be checked. The reason for requiring expedited review is to be given in Block 14; e.g., explain why an extension of the bid or proposal cannot be obtained or should not be requested. If the date entered allows thirteen calendar days or more, but an expedited review is desired, the same procedure should be followed.

3—Describe the type of contract briefly to identify the terms governing quantity, price and delivery, e.g., Firm Fixed Price (FFP), Requirements—Fixed Price, with EPA (Rqmts—FP w/EPA).

4/4a/4b/4c—If more than one CLIN is applicable because of different destinations (FOB destination), cite total quantity and give the unit price range. If both fob origin and fob destination prices are applicable, give the total quantity applicable to each, with the applicable prices/price ranges. When services are described, include the location of performance and the period during which services will be performed.

5/5a/5b—Check the applicable block to indicate whether the authority for purchase is a Center generated purchase request (PR) or a service generated military interdepartmental purchase request (MIPR). IOM's requesting establishment of requirement contracts are to be considered as PRs. Requests for procurement action by a military service on other than the prescribed MIPR form are to be considered as MIPRs. The receipt dates desired in 5a and 5b are: (a) for PRs the date of receipt in Procurement; (b) for MIPRs the date of receipt in the Center.

6a/6b/6c—Solicitation number(s) and amendment number(s) are to be listed, with issue and opening/closing dates applicable.

7/7a/8—Self-explanatory.

9/9a/9b—If the action proposed is on a definite quantity, firm fixed price basis, check "actual". For all other types, check "estimate". The total dollar value to be entered is that shown on the face of the proposed contract as the total amount, or total estimated amount of the action. If the action is a modification, only the amount, actual or estimated, of the modification is to be entered. Under 9b give the fixed dollar amount to be obligated by the contract execution for which funds have been committed.

9c/9d—If Government facilities are to be provided under the contract, check the GFP block. If facilities are being furnished rent free, insert "Rent Free" in lieu of dollar value. If facilities are being furnished on a rental basis, give the anticipated dollar amount of rental based on the proposed contract delivery schedule. If material is to be furnished, check the GFM block. If the material is being furnished by the bailment method, give the total estimated value of the material included in the total contract price. If GFM is not being provided by the bailment method, insert "N/A" in block 9d.

10—For Small Business Restricted Advertising, check negotiated, insert the applicable authority and add "SBRA". For options, enter the information applicable to the basic contract.

11—If option is to a service contract to be extended without change in quantity of work covered, insert N/A after maximum %.

12a/12b—In block 12a, include the number of concerns to whom solicitations were sent as the result of individual requests, after issuance of the initial solicitation. Note that 12b requires the number of responsive bids/proposals.

13a/13b—Self-explanatory.

13c/13d—The price analysis, whether prepared by the cost and pricing element or by the contracting element, will be inserted under TAB 22 of the contract file and will include (i) the quantities, unit prices, fob points of preceding procurements (at least two); (ii) the basis for determining price reasonableness on the preceding procurements listed; and (iii) the increase/decrease in prices of the proposed contract as compared to the preceding procurements. The percentage relationship of the proposed price to the immediately preceding procurement will be shown in Block 13d. If the procurement is the first by DLA and information on prior procurements is not obtainable, a brief description of the efforts made to obtain prior procurement information will be included in Remarks (Block 14) and any back-up documentation included under TAB 22.

14-16—Self-explanatory.

17—Enclosure blocks to the DLA 677 have been prechecked. The contract file forwarded will contain all documents/papers which comprise the official contract file up to the date of the request, HQ DLA will review on the basis that there are no other applicable documents to be added to the official contract folder, unless the DLA Form 677 (Remarks Block 14) indicates that additional documentation is being obtained. The HQ DLA file copy to be provided is to contain the following: (A complete duplicate file *will not be provided.*).

(a) A copy of the DLA Form 677 request to include the names of signatures to the request, and the dates of the signatures.

(b) A copy of the DLA Form 678 which is *identical* to that in the contract file.

(c) A COMPLETE copy of the proposed contract, modification. When the request covers a proposed contract modification to a contract (or modification) which has been previously reviewed and approved by HQ DLA, the basic contract, or previously approved modification need not be provided; however, any modifications made subsequent to the last HQ DLA review will be included.

(d) When applicable, a copy of the determination and findings authorizing negotiation.

(e) A copy of the price analysis/contracting officer's determination of price reasonableness and, where applicable, a copy of the record of prenegotiation review and the price negotiation memorandum. Should any of these documents refer to other documents in the official contract file for detail information, or depend on such documentation as the source of information a copy of those documents will also be included (this includes DCAS/DCAA reports, and preaward survey reports if applicable).

General

1. Should the space allotted on the DLA Form 677 be insufficient, the additional information is to be included on a plain sheet of paper identified as Sheet Nr.2, etc., to DLA 677, Contract Nr. (as shown under Block Nr. 8). The total number of pages will be shown in the space provided at the bottom of DLA Form 677.

2. The reverse of DLA Form 677 will be used both for replies to requests for preaward approvals (Section I) and to return contract files submitted as requested for post award review (Section II). When a post award review has been made, remarks previously furnished by separate letter will be included in the "Remarks" space on the DLA Form 677 reverse.

§ 1216.852 Contract file content list (DLA Form 678).

§ 1216.852-1 General.

DLA Form 678 shall be used as prescribed in § 1201.452-3.

§ 1216.852-2 General instructions for preparation and use of DLA Form 678.

(a) *Filing Instructions.*

(1) Contract file sections will be identified by inclusion of a divider annotated with the Section Identification and Title, e.g., "Section A—Planning and Solicitation." Sections A and B will be filed on the *left* side of the file folder with Section A on the *bottom*. Sections C and D will be filed on the *right* side of the file folder with Section C on the *bottom*.

(2) The lowest numbered TAB within each Section will be placed at the *bottom* of that Section. When multiple documents are present under a number TAB, i.e., correspondence, memoranda, etc., they will be filed chronologically with the *most recent* document on top.

(3) It is impossible to enumerate all of the factors or conditions which may require specific documentation over and above that normally required. Therefore, as circumstances dictate, contracting officers will describe, under the appropriate "blank" TAB Nos., e.g., Nos. 14-17; 29-32, etc., such documentation as may be peculiar to the procurement involved and file same in the analagous contract file section.

(b) *Contract Documentation*—

(1) The documents identified on DLA Form 678 are those which are normally required to support an advertised/negotiated procurement action, other than a small purchase. The file sections provided establish the logical procurement cycle sequence of documentation. The completed file will constitute a complete chronological history of the transaction and permit ready reconstruction of the actions taken in processing the procurement.

(2) The following Sections discuss those elements of contract documentation which merit special attention and indicate documentation requirements which are most frequently "overlooked":

(i) Section A—*Planning and Solicitation:*

(A) *Tab No. 1 PR/MIPR.* The contract file must reflect the manner and extent to which the needs of the requiring activity have been met. It is essential, therefore, that in addition to the basic purchase authority, any changes and justification therefor be included under this Tab. In the case of amendments, the basis for change must be evidenced, e.g., in those instances where items on the purchase request have been completely lined out or quantities changed, indication *must* be made of the identity or authority of the individual or activity which requested/authorized the change. In other instances where contracts have been issued calling for something other than that specified on the PR/MIPR explanation must be included as to the authority/approval for the change and from whom received. Memoranda must adequately identify individuals referred to in memoranda, e.g., statements such as "this was discussed with and concurred in by Mr. Smith in Supply" are inadequate. An individual's full name, title or position and his relationship to the subject matter of the memorandum must be clearly established; this is of particular importance should post award questions arise. Requirements should be revalidated in those instances where excessive time has elapsed between the issuance of the Purchase Directive and consummation of the contract.

(B) *Tab No. 2 Specification/Drawing.* These documents in many instances either dictate source selection or indicate to the contracting officer the extent of possible competition. Any change either prior or subsequent to solicitation may affect final source selection. When such changes are effected, explanatory memorandum (or actual documentation supporting the change) must be included in the file indicating as a minimum (*1*) the basis and authority for initiating specification/drawing change (*2*) coordination received from appropriate technical personnel and (*3*) approval/concurrence of the requiring activity. When specification/drawing changes are initiated/confirmed by the requiring agency on a PR/MIPR amendment, the documentation should be included in Tab No. 1 with an annotation in Tab No. 2 identifying the amendment number.

(C) *Tab No. 3 Procurement Plan (1201.2102-1).* The Procurement Plan will include, as a minimum, the information included in § 1201.2102. The use of preprinted forms for this purpose is acceptable.

(D) *Tab No. 4 Determination and Findings (Authority to Negotiate).* The determination to negotiate is governed by specific facts inherent in a proposed procurement; the D&F must include those facts which will clearly and convincingly establish that the use of formal advertising would not be practical. The information provided must be *explicit, current* (revised in those instances where requirements have changed subsequent to issuance of the initial D&F) and *accurate* as to (i) format (ASPR, Appendix J, Part 503, (ii) citation of appropriate negotiation authority ASPR 3-201 through 3-217), (iii) estimated dollar amount, including where applicable, the value of proposed option quantities and (iv) appropriate signatory authority and date. Each D&F must reflect the circumstances peculiar to the instant procurement. The use of previous D&Fs as a "model" often results in inaccuracies and the necessity to reaccomplish the D&F.

(E) *Tab No. 5 Nonpersonal Services Determination.* A statement by the contracting officer that the services proposed for procurement have been determined to be nonpersonal in nature is *not* sufficient to meet the requirements of ASPR 22-102.4. Such determination must include the reasons and *all* of the facts which were deemed to substantiate the nonpersonal aspect of the services; examples of criteria for characterizing services as nonpersonal rather than personal are set forth in ASPR 22-102.3.

(F) *Tab No. 6 DOL Wage Determination.* Department of Labor Wage Determinations are normally effective for a period of 120 days after issuance and *must* be in effect at the time of solicitation and at the time of award. When it is necessary to obtain extensions on determinations in order to carry them through the period until award is to be made, the documentation authorizing such extension by the

MY 3 78 UMI

V 43 | 86

Department of Labor must be included under this Tab.

(G) *Tab No. 7 Small Business/Labor Area Determination.* The determinations required under ASPR 1-706 and 1-804.1 must be accurate and complete insofar as the reason given for not having a small business or labor surplus area set aside. Statements such as "a set-aside was not considered because of insufficent quantity" must be supported. Statements such as "no known source located in labor surplus area" must be based on historical and current facts. The information included in this determination must accurately reflect the consideration given to compliance with ASPR 1-706.1 and 1-804.1; the information included therein imposes, in turn, a responsibility to make a realistic evaluation of requirements and a current review of possible sources to substantiate the information used in determining the proposed procurement method.

(H) *Tab No. 10 Source List.* The list of sources initially solicited *and* those to whom solicitations were subsequently issued as a result of requests are to be included; in the latter case, the date requested solicitation was issued will be indicated. Where it is *clear* that a single source of supply exists, the reason for soliciting any additional firms will be included under this Tab.

(I) *Tab No. 13 IFB/RFP & Amendment.* The contract file must include the solicitation document and, as applicable, any amendments thereto. With respect to the latter, it is of utmost importance that amendments accurately reflect their issuance date. Inclusion of this date in Block 2, "Effective Date" of Standard Form 30 is extremely important if for no other reason than to preclude any controversies which might arise as to whether offerors were provided sufficient time to respond to the amendment. In case of oral solicitations, the requirements of ASPR 3-501(d)(ii) must be satisfied, i.e., with documentation supporting the fact that use of oral solicitation had been approved at a level higher than the contracting officer. As the use of oral solicitation requires careful monitoring, such documentation is extremely important.

(ii) *Section B—Preaward Support Data:*

(A) *Tab No. 18 Abstract of Bid Proposal.* Generally, abstracts on formally advertised solicitation are found to be complete and accurate. The same care must be taken in the preparation of an abstract on negotiated procurements, i.e., any conditions of the offers which are related to their evaluation must be included on the abstract; if lengthy, the "Remarks" column should be annotated with information indicating the location in the offer of the condition, e.g., "See page ——— of the proposal for exception to specification."

(B) *Tab No. 19 Packaging/Transportation/Freight Rate Data.* Inclusion of Transportation/Freight Rate Data, normally provided the contracting officer by the Center transportation activity, is essential as it enables a ready means of determining the manner in which transportation costs were applied in arriving at the evaluated prices. Files must also include sufficient information to substantiate the equitability of packaging costs. Statements in the price analysis or PNM indicating that a price increase is not unreasonable because the contracting officer has found it to be "attributable to the requirement for Government specification pack in lieu of normal commercial pack" must be supported, i.e., must indicate what the differential is and that technical personnel have, in fact, reviewed the costs associated with Government packaging requirements versus commercial packaging to arrive at figures which support the price reasonableness conclusion.

(C) *Tab No. 20 Cost/Pricing Data.* All cost or pricing data received from the offeror in support of his proposal is to be included under this Tab. If any *data* should be included in correspondence dealing with other matters which are pertinent to the final contract, e.g., delivery schedule, contract clauses, etc., the original correspondence will be filed under this Tab and a cross reference (or copy of such correspondence) placed in Tab No. 44. Submission/acceptance of inadequate or incomplete cost or pricing data is a recurring problem. To establish completeness, each data element must be identified as to (1) what it is, (2) where it is, (3) what it represents and (4) how it was used. A *fully completed "Reference"* column on the DD Form 633 is the key to these four points. If the data are not complete, that required must be obtained from the offeror; it is neither the responsibility of DCAS or the auditor to obtain the data. The review of data for adequacy and any requirement placed on the contractor to submit additional data required must be made *prior* to forwarding request to DCAS for audit. In those instances where time is of the essence, it is permissible to request the contractor to submit copies of any additional data direct to the cognizant DCAS/DCAA activity; the original of such documents to be provided the purchasing activity. Immediately upon receipt of such additional required data, it must be reviewed to assure it is adequate. The cost/price analysis element is charged with responsibility for determining the adequacy of data received; however, the final responsibility rests with the contracting officer.

(D) *Tab No. 21 Field Pricing Report/Waiver.* When field pricing support is requested from the cognizant contract administration services activity pursuant to ASPR 3-801.5, the report obtained, together with any attached assist reports will be included under this Tab. If the authority contained in ASPR 3-801.5 to waive field pricing support is exercised by the contracting officer, his determination and the supporting available information on which the determination is based will be included, e.g., should part of the available information include a recent, prior field pricing support report, a copy of the prior field pricing support report will be included.

(E) *Tab No. 25 Certificate of Current Cost/Pricing Data.* Often a contractor will provide a Certificate of Current Cost or Pricing Data at the close of the negotiation session and will subsequently confirm, by letter, details of the agreements reached. In some instances, the confirming letter will include data which although previously discussed and accepted, have not previously been presented in writing. In such cases, the Certificate of Current Cost of Pricing Data presented at the close of negotiations becomes invalid; a new Certificate must be obtained to reflect the contractor's last data submission upon which the final price agreement was concluded.

(F) *Tab No. 26 Government Facilities Use Approval.* ASPR 13-402 requires a determination that the Government will receive adequate compensation for the contractor's use of Government property through reduced costs or otherwise. This determination is mandatory to support a proposal to provide a contractor with Government facilities.

(G) *Tab No. 29.* This tab will be used to incorporate, when applicable, information received from a cognizant ACO relative to the acceptability of the contractor's Disclosure Statement when the firm has indicated submission of same under ASPR clause 7-2003.67 of the contract schedule.

(iii) *Section C—Other Support Data:*

(A) *Tab No. 34 Unsuccessful Bid/Proposal.* Required under this Tab along with the unsuccessful bid/proposal itself, is the notification to the offerors (either that already issued or that proposed to be issued) that bids/offers were unacceptable and the reasons therefor.

(B) *Tab No. 36 Determination of Late/Bid Proposal.* All actions taken in accordance with the procedures prescribed under ASPR 2-303 and 3-506 will be included under this Tab.

§ 1216.853 Loan agreement for Government property (DLA Form 491).

DLA Form 491 is authorized for use in lending Government-owned property to prospective bidders or offerors in accordance with § 1250.101.

§ 1216.854 Record of set-aside action (DLA Form 1360).

§ 1216.854-1 General.

DLA Form 1360 shall be used as prescribed in § 1201.706-1.

§ 1216.854-2 General instructions for preparation of DLA Form 1360.

The header portion of this form includes check-off boxes within the block, "Type of Action." The appropriate box should be checked off to indicate whether action contemplates an initial set-aside determination; modification of an existing determination; or withdrawal of an existing determination. The remaining blocks within the header portion of the form are self-explanatory. Instructions for section/item/block entries are as follows:

§ 1216.854-2 General instructions for preparation and use of DLA Form 1360, May 1976.

Section, Item/Block Number, and Instructions

Section I, Item 1—Enter date bids/offers were opened on last procurement.

Section I, Item 1a—Enter total numbers of bids received on most recent procurement, broken out by bidder preference status or other status in the blocks provided; i.e., small business concerns which are also LSA concerns; small business concerns which are not LSA concerns; or large business concerns which are either LSA qualified or are not LSA qualified.

Section I, Item 1b—Enter numbers of bids/offers received on the most recent procurement which were determined to have fallen within a competitive price range. Breakout by bidder preference status or other status, as appropriate.

Section I, Item 2—Enter numbers of firms to be solicited on current procurement (through review of bidders lists and/or personal contracts). Breakout by bidder preference status or other status.

Section II—Self-explanatory.

Section III—Use in conjunction with remarks block to support unrestricted procurement or the use of a lower priority set-aside in accordance with the order of preference set forth in ASPR 1-706.1. Individual check-off items are self-explanatory.

Sections IV and V—Self-explanatory.

PART 1217—EXTRAORDINARY CONTRACTUAL ACTIONS TO FACILITATE THE NATIONAL DEFENSE

Subpart B—Requests for Contractual Adjustment

Sec.
1217.201 Authority of the Director.
1217.203 Authority of other officers and officials.
1217.207 Submission of requests by contractors.
1217.207-3 Records.
1217.208 Processing cases.
1217.208-2 Disposition below secretarial level.
1217.208-3 Submission of cases to the Contract Adjustment Board.
1217.208-5 Maintenance of records.
1217.208-6 Interdepartmental coordination.

Subpart C—Residual Powers

1217.301 Delegation of authority.
1217.304 Maintenance of records.

Subpart D—Records of Requests and Dispositions

1217.403 Sample format for preliminary and final records.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart B—Requests for Contractual Adjustment

§ 1217.201 Authority of the Director, DLA.

Authority vested in the Director under ASPR 17-201(b) has been delegated to Counsel and Assistant Counsel, DLA.

§ 1217.203 Authority of other officers and officials.

The authority in ASPR 17-203(a) (i) and (ii) has been delegated to HPAs. This authority may be redelegated only to a staff official reporting directly to the HPA. Two copies of any redelegation shall be furnished the Counsel, DLA, one copy of which will be transmitted to the Office, Secretary of Defense (ODDR&E).

§ 1217.207 Submission of requests by contractors.

§ 1217.207-3 Records.

Records required by ASPR 17-207.3 shall be forwarded to the Counsel, DLA.

§ 1217.208 Processing cases.

§ 1217.208-2 Disposition below secretarial level.

The documents required by ASPR 17-208.2(b) shall be forwarded to the Counsel, DLA. When a procuring activity denies a request, a copy of the letter of explanation to the contractor shall be included.

§ 1217.208-3 Submission of cases to the Contract Adjustment Board.

Cases not within the approval authority of HPAs and any doubtful or unusual cases shall be forwarded to Counsel, DLA, for further processing. The forwarding letter shall contain the information and evidentiary materials outlined in ASPR 17-208.3.

§ 1217.208-5 Maintenance of records.

The records required by ASPR 17-207.3, 17-208.2(b) and 17-208.4(a) and (b) shall be maintained by the Counsel, DLA.

§ 1217.208-6 Interdepartmental coordination.

The procuring activity responsible for processing a contractor's request for contractual adjustment shall be responsible for establishing liaison and joint action with other Military Departments and other departments and agencies of the Government, except that the Counsel, DLA, shall have such responsibility after any case is forwarded for further processing.

Subpart C—Residual Powers

§ 1217.301 Delegation of authority.

Authority vested in the Director under ASPR 17-201 has been delegated to Counsel and Assistant Counsel, DLA.

§ 1217.304 Maintenance of records.

Counsel, DLA, shall be responsible for maintaining the records required by ASPR 17-303(b) (RCS DD-I&L(A)597).

Subpart D—Records of Requests and Dispositions

§ 1217.403 Sample format for preliminary and final records.

Record of the field activity responsible for the case when submitting preliminary and final records described in ASPR 17-401 and 402.

PART 1219—TRANSPORTATION

Subpart A—Introduction

Sec.
1219.104 F.O.B. Point.
1219.104-2 Determination of F.O.B. Terms of Procurement of Items Originating in the Continental United States.

Subpart B—Planning and Solicitation

1219.213 Shipments to Ports.
1219.213-50 Designation of Ports for Bid Evaluation.

Subpart C—Evaluation of Bids and Proposals

1219.301 Transportation Rates and Related Costs to be Use.
1219.301-1 General.
1219.301-50 Port Handling and Ocean Costs in Bid Evaluation.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301—2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Introduction

§ 1219.104 f.o.b. point.

§ 1219.104-2 Determination of f.o.b. terms of procurement of items originating in the Continental United States.

Each requirement considered for purchase of an f.o.b. destination only

MY 3 78
UMI

V 43 | 86 MY 3 78 UMI

basis under the authority of ASPR 19-104.2(d)(1)(VI) shall be considered on its own merits. If it is decided to effect purchases on an f.o.b. destination only basis, the contract file shall be documented to reflect the basis on which the decision was reached.

Subpart B—Planning and Solicitation

§ 1219.213 Shipments to ports.

§ 1219.213-50 Designation of ports for bid evaluation.

When a contract will not generate any shipments destined overseas for which an Export Release is required (less than 10,000 lb., etc., Military Traffic Management Regulation paragraph 20205), offers shall be solicited only f.o.b. appropriate ports published in Appendix G of DOD Regulation 4500.32-R (MILSTAMP). The supporting provision in ASPR 7-2003.20 shall be included in the solicitation and be modified to:

(a) Delete paragraph B pertaining to f.o.b. origin basis;

(b) Delete the following from paragraph C(2) "Unless bids (or offers) are applicable only to f.o.b. origin delivery under Government bills of lading (see B above)";

(c) Include the applicable port handling and ocean charges adjacent to the port(s) listed in paragraph D; and

(d) Delete paragraph E pertaining to ports nominated by bidder (offeror).

Subpart C—Evaluation of Bids and Proposals

§ 1219.301 Transportation rates and related costs to be used.

§ 1219.301-1 General.

§ 1219.301-50 Port handling and ocean costs in bid evaluation.

Those port handling and ocean charges available at time of issuance of a solicitation shall be published in those solicitations for the procurement of supplies for overseas shipment. The provision set forth below, advising that these charges are tentative and not necessarily those that will be used in the evaluation, shall also be included in the solicitation, just below any charges published. This provision will preclude the need for extension of opening dates or cancellation of solicitations and will still permit award to that bidder who is, in fact, low at time of bid opening as a result of any change in charges after issuance of the solicitation.

Port Handling and Ocean Costs in Bid Evaluation (DLA APR 1975)

The above tentative port handling and ocean freight charges are set forth for the information of offerors. In evaluating offers received in response to this solicitation, the Government will utilize those charges which are on file as of the date of bid opening (or closing time specified for receipt of proposals) and effective for the date of expected initial shipment. A list of port handling and ocean freight charges actually used in evaluation, if substituted for any listed above, will be furnished interested offerors upon request.

PART 1220—ADMINISTRATIVE MATTERS

Subpart B—Uniform Procurement Instrument Identification Numbers

Sec.
1220.203 Uniform procurement instrument identification numbers.
1220.203-1 Elements of number.
1220.204 Supplementary procurement instrument identification numbers.
1220.204-50 First delivery orders against indefinite delivery type contracts.

Subpart G—Assignment of Contract Administration

1220.703 Retention of contract administration by the purchasing office.
1220.703-50 Support administration.
1220.706 Designation of the disbursing office.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart B—Uniform Procurement Instrument Identification Numbers

§ 1220.203 Uniform procurement instrument identification numbers.

§ 1220.203-1 Elements of number.

(a) The letter Y in the ninth position of the basic PII number is reserved to identify imprest fund orders posted to the Standard Automated Materiel Management System (SAMMS) or other DLA automated systems.

§ 1220.204 Supplementary procurement instrument identification numbers.

§ 1220.204-50 First delivery orders against indefinite delivery type contracts.

A delivery order number shall be established for the first order quantity by issuing a separate DD Form 1155. Where it is necessary to order an initial quantity at the time of establishing an indefinite delivery type contract such as when using the incremental purchasing system, the DD Form 1155 should be issued concurrently and be cross-referenced with the indefinite delivery type contract.

Subpart G—Assignment of Contract Administration

§ 1220.703 Retention of contract administration by the purchasing office.

§ 1220.703-50 Support administration.

If the PCO retains administration of a contractor order and a need subsequently arises to delegate supporting contract administration to a CAO, the contract or order shall be assigned for performance of all contract administration functions.

§ 1220.706 Designation of the disbursing office.

(b) All contracts assigned to a Service Plant Cognizance Representative for administration shall designate the disbursing office supporting the purchasing office as disbursing office for the contract except for contracts resulting from MIPRs, which will cite the disbursing office in accordance with DLAR 4115.3, paragraph VI A 13.

PART 1221—PROCUREMENT MANAGEMENT REPORTING SYSTEM

Subpart A—Individual Procurement Action Report (DD Form 350)

Sec
1221.102 Applicability and coverage.
1221.103 Due date and distribution.
1221.106 Item 1B, (No title).
1221.108 Item 2, contract number.
1221.117 Item 10B, system or equipment code.
1221.119 Item 11, description of commodity or service.
1221.120 Item 12, coordinated procurement.
1221.123 Item 15, contract placement.
1221.125 Item 17, negotiated under 10 U.S.C. 2304(a) exception.
1221.126 Item 18, extent of competition in negotiation.
1221.130 Item 22, date of this action.
1221.131 Item 23, estimated completion date.

Subpart B—Monthly Procurement Summary (DD Farm 1057)

1221.201 Applicability and coverage.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DoD Directive 5105.22, January 5, 1977.

Subpart A—Individual procurement action report (DD Form 350)

§ 1221.102 Applicability and coverage.

(a) To assure that the procurement statistics prepared at HQ DLA, and furnished to the Office of the Secretary of Defense, correspond with the data of the reporting activities, each purchasing office shall furnish HQ DLA, ATTN: DLA-PA, within one day following the close of each month, with the first and last report number of the DD Forms 350 that were issued in the preceding month's report period, listing any exceptions to the consecutive numbering pattern. In addition, furnish the total dollar value involved in these DD Forms 350.

(b) Each item on the DD Form 350 shall contain only one entry.

§ 1221.103 Due date and distribution.

The DLA Form 556 must be submitted so as to reach HQ DLA within 3 workdays following the end of each month. To meet this due date, the cutoff for the DLA Form 556 shall be the 25th calendar day of the month being reported on. RCS DD-I&L (M) 1014 applies to this report.

§ 1221.106 Item 1B, (No title). leave blank

§ 1221.108 Item 2, contract number.

(a) *Sub-Item A. Dept.* Enter the alphabetic characters in the contract number which denote the Department or Agency executing the contract as follows:

(1) For departments within DOD, enter—DLA(S) for Defense Logistics Agency, DA(A) for Army, (N) for Navy, (F) for Air Force, and (D) for all other Defense Agencies.

(2) For orders under contracts awarded by General Services Administration (Federal Supply Schedule contracts) enter GS(G), and for orders under contracts awarded by the Government Printing Office enter GP(P). Enter five zeros in Sub-Item B.

(3) For orders covering purchases from other Federal agencies (see ASPR 21-108(a)(iii)), enter X in parentheses. Enter five zeros in Sub-Item B.

§ 1221.117 Item 10B, system or equipment Code.

Not applicable to DLA. Leave blank.

§ 1221.119 Item 11, description of commodity or service.

In addition to or as a part of the regular item description, place in parentheses an abbreviated description which must not exceed 10 typewritten characters, including spaces but omitting punctuation marks, e.g., Pallet Aircraft, Cargo HCU-6/S (Pallet), Coal, Bituminous (Coal Bitum), Yellow Fever Vaccine (Y1 Fev Vac), Tetanus and Diphtheria Toxoids (Toxoid TD), Handbag, Women's, Brown, Calfskin (Handbag Wmn), (Fuel Oil).

If action involves more than one item, enter in Item 11 the one having the greatest dollar value. Additional items may be entered on the reverse side of the form; abbreviated descriptions are not required for these additional items.

§ 1221.120 Item 12, coordinated procurement.

Codes 3 and 6 are the only codes applicable to DLA.

§ 1221.123 Item 15, contract placement.

(f) *Code J. Military Assistance Sales.* The ASPR instruction for separate reporting where a single action is partly for Military Assistance Sales applies only when each of the individual parts exceeds $10,000. If one or both of the parts are less than $10,000 but the sum of both parts is more than $10,000, the total shall be reported as one action on a single DD Form 350, and reporting based on the part of the action that involves the greatest dollar value.

§ 1221.125 Item 17, negotiated under 10 U.S.C. 2304(a) exception.

Enter code as follows: For codes 1A through 1E, enter as 01A0 through 01E0; For codes 2 through 9, enter as 0200 through 0900; For codes 10-1 through 10-9, enter as 1001 through 1009; For codes 11 through 16 and 17A and 17B, enter as 1100 through 1600; 17A0 and 17B0.

§ 1221.126 Item 18, extent of competition in negotiation.

When the exemption of ASPR 3-1204(a)(ii) applies, the contract award shall be reported as having been made on the basis of adequate price competition.

§ 1221.130 Item 22, date of this action.

Enter this following alphabetical code for the month: A-Jan; B-Feb; C-Mar; D-Apr; E-May; F-Jun; G-Jul; H-Aug; I-Sept; J-Oct; K-Nov; and L-Dec.

For example: Date of this Action: 77/G/5 for 5 July 1977.

§ 1221.131 Item 23, estimated completion date.

Same as 21-130 above. For example: Estimated Completion Date: 77B for February 1977.

Subpart B—Monthly Procurement Summary (DD Form 1057)

§ 1221.201 Applicability and coverage.

Defense Personnel Support Center Defense Subsistence Regions shall submit separate DD Forms 1057 for perishable and nonperishable subsistence activity.

PART 1225—PRODUCTION SURVEILLANCE AND REPORTING

Subpart A—Production Surveillance

Sec.
1225.103 Assignment of Criticality Designator by Purchasing Office.
1225.103-50 Criticality Designator "A".

Subpart B—Production Reporting

1225.202 Production Progress Reporting by Contractors.
1225.204 Special Production Progress Reports.
1225.204-50 Contract Acceleration/Status Requests.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Production Surveillance

§ 1225.103 Assignment of criticality designator by purchasing office.

General criteria for designator assignments are included in ASPR 25-103. The lowest Surveillance Criticality Designator consistent with Government requirements shall be assigned. The increased flexibility provided to the Defense Supply Centers (DSCs) in the assignment of Surveillance Criticality Designators is not to be misused. Misuse will create an overall degradation of the production support provided, rather than an improvement.

§ 1225.103-50 Criticality designator "A".

Criteria for Contracts/Purchase Orders in support of a Department of Defense (DOD) or Military Service Directed Critical Program.

(a) Items in direct support of the DOD Master Urgency List (MUL), DX rated contracts (BRICK-BAT 01).

(b) Items or programs designated critical by Departmental Headquarters or HQ DLA.

(c) Items in support of programs designated in writing as critical by DSC Commander.

Subpart B—Production Reporting

§ 1225.202 Production progress reporting by contractors.

The requirement for Production Progress Reports (DD Form 375) will be limited to the following and then only when circumstances make such reporting appropriate:

(a) Items required to satisfy requisitions bearing UMMIPS priority 01 through 06.

(b) Items that have been designated by the DSC Commanders as being in a critical supply position.

(c) Items on the DOD, Military Service, or DLA critical list.

(d) Items in direct support of the DOD MUL categories.

(e) Items which require Material Readiness Studies under DLAR 4140.3.

(f) Contractors on"the Military Services Contractor Experience Lists.

(g) When requested by the DOD Project Manager.

§ 1225.204 Special production progress reports.

§ 1225.204-50 Contract acceleration/status requests.

As a general policy, the Directorates of Procurement and Production (D/PP) will initate contract acceleration/status requests to contractors and DCAS activities as appropriate. However, to facilitate the handling of special emphasis and high priority items,

V 43 | 86
MY 3 78
UMI

Centers may, at their option, establish local procedures which will permit the Directorate of Supply Operations (D/SO) to initiate contract acceleration/status requests to DCAS activities. Those Centers using this option must assure that local procedures are jointly developed by the D/PPs and D/SOs and contain the following controls and provisions:

(a) Strong prohibitions against Center D/SO personnel contacting contractors directly.

(b) Strict controls to preclude identical requests for the same item being sent by D/O and D/PP to DCAS activities.

(c) A procedure whereby information obtained by the D/SO from DCAS is fed to the D/PP for updating the active contract file.

(d) In accordance with the intent of ASPR 20-801(a), direct communications between D/SO personnel and DCAS offices shall normally be by letter or message. Under the most urgent of circumstances (UMMIPS priorities 01s thru 03s), telephone requests for acceleration/status are permitted after the D/SO determines that the D/PP is not working the same items. D/SO telephone requests for contract acceleration will be immediately followed by confirming documentation to DCAS activities.

(e) In accordance with the intent of ASPR 25-204, requests for contract status/acceleration will be kept to a minimum and specify, at a minimum, contract number, contractor, and location. In addition, such requests shall contain sufficient information to convey the urgency of the circumstances and minimum quantities needed to satisfy high priority requisitions and/or backorders. Requests for contract status/acceleration will not be initiated for convenience or for non-critical items.

PART 1250—SUPPLEMENTAL PROCEDURES

Subpart A—Sale, Loan, Gift of Property

Sec.

1250.101 Sale, loan or gift of certain property (10 U.S.C. 4506).

Subpart B—Reserved

Subpart C—Training

1250.301 Training of procurement personnel.
1250.301-1 General.
1250.301-2 Policy.
1250.301-3 Small purchase orientation course for "new" buying personnel (44 hours).
1250.302 Attendance of civilian contractor personnel at defense management courses.
1250.302-1 General.
1250.302-2 Policy.
1250.302-3 Administration.

Subpart D—Selection of Contracts to be Terminated for Convenience in Event of Unexpected Deceleration in Military Requirements

1250.401 General.
1250.402 Policy.
1250.403 Priority of termination type.
1250.404 Responsibilities.
1250.405 Complete and partial terminations.
1250.406 Procedures.
1250.406-1 Operational procedures.

Subpart E—Recovery and Utilization of Precious Metals (Silver, Gold, Platinum, Palladium) from Scrap Materials

1250.501 General.
1250.502 Policy.
1250.503 Responsibilities.
1250.504 Procedures.

Subpart F—Contract Review Checklist

1250.601 General.
1250.602 Contract review checklist.

Subpart G—The DLA Master Solicitation Program

1250.701 General.
1250.702 Scope.
1250.703 Definitions.
1250.704 Format.
1250.705 Policy.
1250.705-1 The master solicitation.
1250.705-2 The individually numbered solicitations.
1250.706 Incorporation by reference.
1250.706-1 Incorporation of ASPR provisions.
1250.706-2 Incorporation of standard Forms 32 and 33A.
1250.707 Termination for convenience clause.
1250.708 Distribution.
1250.708-1 Copies to DCAS.
1250.708-2 Copies to suppliers.
1250.708-3 Copies to GAO.

AUTHORITY: The provisions of this Subchapter A are issued under 5 U.S.C. 301; 10 U.S.C. 125, 133, 2202, 2301-2314; DOD Directive 5105.22, January 5, 1977.

Subpart A—Sale, Loan, Gift of Property

§ 1250.101 Sale, loan, or gift of certain property (10 U.S.C. 4506).

(a) The HPAs and their authorized designees are authorized to sell, give, or lend drawings, manufacturing and other information, and samples of supplies and equipment to be manufactured or furnished, to contractors and private firms which are or may likely be manufacturers or furnishers of supplies and equipment for use under approved production plans, whenever they determine that such action is necessary in the interest of national defense.

(b) Such drawings, manufacturing and other information, and samples of supplies and equipment to be manufactured or furnished shall be sold, given or loaned by appropriate written agreement, reciting the above determination (10 U.S.C. 4506).

(c) The foregoing determination and requirement for a written agreement will not be mandatory in the case of invitations for bids and requests for proposals. Drawings, specifications and data furnished need not be returned unless otherwise directed by the contracting officer.

(1) The determination to request the return of such specifications, drawings, or any other data furnished the contracting officer should take into consideration the following factors:

(i) The current or probable future need of the Government for the items.

(ii) The residual value of such items.

(iii) Administrative and other expenses incident to handling and storage of such items.

(iv) The probable cost of reproduction of such items in event of future procurement.

(2) Classified material as a general rule will be required to be returned regardless of the criteria established above.

Subpart B—Reserved

Subpart C—Training

§ 1250.301 Training of procurement personnel.

§ 1250.301-1 General.

DOD Manual 1430.10-M-1 is very specific as to the training required for people working in the procurement career field. Every effort must be made to follow the concepts outlined in this manual. This will help assure the availability of a trained work force and will allow for normal job progression in this important function.

§ 1250.301-2 Policy.

In addition to providing adequate training at Service sponsored schools, all newly employed professional personnel in the procurement and production area (i.e., buyers) will be given a minimum of about forty-four hours of orientation in Small Purchases. All new buyers shall be required to read the ASPR Small Purchase Manual (ASPM No. 2) prior to beginning Phase I of the orientation course. See 50-301.3 for proposed course outline. This instruction should include clear guidance on the necessity for making buys at reasonable prices. This orientation course will be conducted in two phases. Phase I will be completed before any work assignments are made. Phase II will be given four to six weeks later. This will permit new employees to have a better grasp of the actual duties to be performed. In addition to the new buying personnel, any persons currently assigned to buying tasks, who have not had formal procurement training, will also be given this orientation. For these people, only Phase II may be required.

§ 1250.301-3 Small Purchase Orientation Course for "New" Buying Personnel (44 Hours).

PHASE I

Agenda	Time
1. Organization (hour)	1
(a) DOD

6. Local procurement forms (hour)	1
7. Review overall orientation (as required) (hours)	4
Phase II, Total (hours)	20

§ 1250.302 Attendance of civilian contractor personnel at defense management courses.

§ 1250.302-1 General.

Employees of private organizations performing on contracts with the Defense Logistics Agency are authorized to attend Defense Management Courses when it is certified that a valid requirement exists for the training. Such courses are contained in the Defense Management Education and Training Catalog (DOD 5010.16-C).

§ 1250.302-2 Policy.

Attendance of civilian contractor personnel at Defense Management Courses will be considered only when the HPA finds in writing that such attendance is in the best interest of the Government. The finding must demonstrate the relationship between the requested training and the successful performance of the DLA contract(s) reviewed. Also, a determination as to whether the cost of the training should be borne by the employer or the Government shall be made by the HPA. This determination will be based upon whether the course is primarily advantageous to the Government or to the contractor. Requests for quota will be processed as prescribed in DLAR 1430.10.

§ 1250.302-3 Administration.

Details related to administration of the Defense Management Education and Training Program are contained in DOD 5010.16-C.

Subpart D—Selection of Contracts to be Terminated for Convenience In Event of Unexpected Deceleration in Military Requirements

§ 1250.401 General.

(a) References

(1) ASPR, Section 1, Part 4.
(2) ASPR, Section VIII.
(3) ASPR, Section XXIV.
(4) DLAM 8110.1, Termination Manual for Contract Administration Services.
(5) DLAM 8130.1, Contractor Inventory Management Manual for Contract Administration Services.

§ 1250.402 Policy.

Terminations for convenience will be based on individual decisions resulting from a comparison of costs for termination and excess position of items versus the need for release of obligated funds for higher priority use.

§ 1250.403 Priority of Termination Type.

A termination for default gives the Government certain rights that should be surrendered only when this is to the Government's best interest. Whenever unsatisfactory performance occurs, the possibility of terminating for default should be examined; this should be done before considering other means of ending the contract.

§ 1250.404 Responsibilities.

The decision to terminate a contract for the convenience of the Government is the joint responsibility of the commodity manager and the PCO at the cognizant DSC. In those cases where the contract resulted from a MIPR, the decision to terminate for convenience is the responsibility of the MIPR initiator; however, the PCO upon request must inform the initiator of all elements which have any bearing on the status of the contract.

§ 1250.405 Complete and Partial Terminations.

Terminations may be complete or partial. A complete termination requires the contractor to stop all work under the contract upon receipt of the Notice of Termination or on the date specified in the Notice. A partial termination discontinues only a portion of the uncompleted work under a contract. (The part of the work that the contractor must continue to perform is called the continued portion. The part of the contract that has been completed and accepted before the effective date of the termination is called the completed portion. The terminated portion of the contract is any part that does not relate to either the completed or the continued work.)

§ 1250.406 Procedures.

Upon receipt of a request for a cutback in contract quantities from the cognizant commodity manager, the following information will be utilized in selecting the contracts for termination:

(a) Ascertain all current contracts for items involved.

(1) Determine the undelivered portion of each contract.

(2) Consider suppliers in transit (F.O.B. destination contract) as deliveries, unless contract is delinquent and a notice to terminate for default has been sent to the contractor.

(3) Determine what deliveries, if any, are delinquent.

(4) Determine whether the delinquency is excusable or inexcusable.

(5) Contractual quantities scheduled for direct delivery to users are not subject to termination action unless specifically so designated.

(b) If delinquency is considered inexcusable, terminate for default where appropriate.

(c) Where Termination for Default is not appropriate or where additional quantities remain to be cut back after Termination for Default, proceed in the selection of contracts to be terminated for convenience.

(1) First Choice should be where contractors are agreeable to total or partial termination (voluntary or no cost settlement).

(2) Consider the following factors:

(i) Contracts involving contractors' commercial item.

(ii) Contracts awarded as rated orders [ASPR 1-307.3].

V 43 | 86 MY 3 78 UMI

(iii) Contracts for mandatory procurement. [ASPR Section V].

(iv) Contracts most recently awarded and those providing for longest production lead time where production has not progressed to an appreciable degree.

(v) Contracts awarded at the highest price and work down pricewise.

(vi) Partial termination of all contracts where two or more contractors are involved in lieu of total termination of a few.

(d) The dollar amount of potential settlement claims should be estimated with the assistance of DCAS. Consider:

(1) Unit price of undelivered items.

(2) Raw material on hand and/or on order.

(3) Components on hand or on order.

(4) Work in process.

(5) Unamortized start up costs.

(6) Percentage of completion.

(7) Current commercial value and saleability of the item involved.

(8) Disposal actions required taking into consideration recoupment through sales of items to be disposed.

§ 1250.406-1 Operational Procedures.

(a) The Directorate of Supply Operations or the MIPR initiator will advise Procurement and Production to cancel an item by quantities and consignee. The Directorate of Supply Operations or the MIPR initiator will be required to indicate all open purchase requests and/or contracts when requesting information upon which to base a termination decision or when requesting cancellation by item and consignee.

(b) Procurement and Production, using procedures in § 1250.406 will determine what portion of each open contract (or contracts) should be terminated.

(c) If Procurement and Production decision indicates that Supply Operations original request should be revised, decision will be coordinated with Supply Operations. The final authority for deciding whether or not to terminate, when substantial claims are involved, is the Center Commander.

(d) Upon completion of above actions, Procurement and Production will issue the Termination Notice with a copy to DCAS for termination settlement action.

Subpart E—Recovery and Utilization of Precious Metals (Silver, Gold, Platinum, Palladium) from Scrap Materials

§ 1250.501 General.

The critical shortage of precious metals from United States sources, the large amount of precious metals required in the manufacture of items for defense, and the need to reduce procurement costs of material with precious metal content dictated the need for DOD to establish and monitor a program to (a) reclaim precious metals from precious metal bearing scrap and waste materials, and (b) to utilize reclaimed precious metals as Government Furnished Material (GFM) in procurement of items containing precious metals. This Section implements DOD Directive 4160.22 (as revised) and establishes DOD policy governing the management of the recovery and the use of precious metals derived from precious metals bearing scrap and waste materials generated by all elements of DOD world-wide. The DLA is assigned the responsibility for managing the overall program and has designated the Defense Property Disposal Service (DPDS), Battle Creek, Michigan, as the activity charged with the responsibility for managing the retrieval and refining of precious metals. DISC has been assigned the supply management function for precious metals.

§ 1250.502 Policy.

(a) All DLA elements generating precious metal bearing scrap and waste materials will establish and monitor an internal program to assure the economical reclamation of precious metals, consistent with the overall DOD policy of effecting maximum use of excess property to meet DOD needs.

(b) Recovered precious metals, after refinement, will be made available to DOD elements for their use as GFM to reduce new procurement costs.

§ 1250.503 Responsibilities.

Commanders of each DLA field activity are responsible for the following:

(a) Reporting precious metal bearing scrap and waste materials to the DPDS Manager for disposition and shipment to destination upon notification by the DPDS Manager.

(b) Using the refined precious metals maintained in storage by the DISC Precious Metals Inventory Manager, as GFM, whenever feasible, for contracts requiring precious metals bearing materials.

§ 1250.504 Procedures.

(a) Prior to soliciting bids for award of contracts requiring precious metals contact the DISC Precious Metals Inventory Manager, DISC-ODCA/TD, indicating the item, quantity and grade of precious metal required for the procurement. The precious metals are identified as follows:

NSN	Nomenclature	Unit of issue
9660-00-042-7768	Platinum	Troy ounce
9660-00-042-7733	Gold	do
9660-00-042-7765	Palladium	do
9660-00-106-9432	Silver	do
9660-01-010-2625	Rhodium	do
9660-01-011-1937	Iridium	do

If the required amount is available, forward a letter or TWX to DISC-ODCA/TD, requesting that the required quantity be reserved to cover the procurement including the estimated delivery schedule.

(b) When a contract is awarded, a MILSTRIP requisition is to be submitted to DISC-ODCA/TD. The requisition must cite full Troy ounces (partial ounces shall be rounded off to the nearest whole ounce). Exception data are to be cited. The exception data are (1) the exact "ship to" address, the DoDAAC sometimes cites post office boxes or is not always accurate; (2) the contract number on which the precious metals are committed for use, this is necessary for control and audit purposes; (3) the end item application, the NSN, part number or any other identifying data which is necessary in order that the precious metal may be recovered from the item when it reaches the end of its life cycle, and (4) a contact point with phone number at the requisitioning activity, this is required in case it is necessary to resolve any problems.

(c) Transportation charges are included in the unit price. Transportation is usually accomplished by premium method (armored van); therefore, multiple requisitions to the same destination should be consolidated whenever possible. Delivery normally will be accomplished within three weeks after receipt of the requisition by the DISC Inventory Manager.

Subpart F—Contract Review Checklist

§ 1250.601 General.

The following contract review checklist has been developed for use as a guide by DLA contracting officers and buyers in their individual contract reviews. The checklist may be modified to suit the needs of the procurement activity. A standard DLA-wide form is not prescribed in order to permit development of a local checklist.

§ 1250.602 Contract Review Checklist.

Contractor:

Contract No.: Dollar value: $

Brief description of supplies or services

Quantity Unit Price ($) Extension ($)

☐ PR ☐ MIPR

YES ☐ NO ☐ N/A

1. In file?

2. Are amendments approved by appropriate authority and are they attached?

3. Adequately funded?

4. Is sole source justification adequate?

5. Option quantity included?

Procurement plan

6. Is information sufficient to support proposed method of procurement? (Advertised-Negotiated)

7. Was the procurement plan approved at a level above the buyer in accordance with DLPR 1-2100?

8. Is procurement administrative leadtime realistic?

9. If option proposed, is its use authorized/appropriate?

10. If nonpersonal services involved, was determination issued per ASPR 22-102.4?

11. If provision for progress payments contemplated, is it appropriate? (ASPR Appendix E)

Determination and findings (negotiation)

12. Proper format? (ASPR Appendix J)

13. Option quantity included/value noted?

14. Proper negotiating authority cited?

15. Any changes requiring determination and findings amendment?

16. If so, properly executed?

17. Signed and dated?

Small business/labor surplus area set-aside determination

18. Does information provided support the determination?

19. Is withdrawal/modification of the initial set-aside determination explained?

Source list

20. Is the list excessively long?

21. Should preinvitation notice have been used?

22. Is list annotated as to "no bids" received?

23. If history of sole source, are reasons given for soliciting additional firms?

Synopsis

24. Evidence in file?

25. No synopsis; justification adequate? (ASPR 1-1003.1(c))

Solicitation—IFB/RFP

26. Was solicitation issued in a timely manner?

27. Do solicitation provisions reflect PR/MIPR requirements?

28. If oral solicitation, does file contain justification for its use? (ASPR 3-501(d))

29. Bidding time/RFP response time adequate?

30. Format in accordance with ASPR 2-201 (IFB) or 3-501 (RFP)?

31. Were amendments sent to all originally solicited?

32. Were amendments properly dated?

33. Are contract clauses and provisions current/complete?

34. Was cost or pricing data (DD Form 633) requested in the initial solicitation?

35. Was DD Form 633-7 requested in initial solicitation?

36. If cost or pricing data was or was not requested, does the file include an explanation? (ASPR 3-811(a))

37. Is a disclosure statement on cost accounting practices and certification required? (ASPR 3-1203)

38. If required, did the contractor:

(1) Submit same?

(2) Execute a certificate of monetary exemption?

(3) Execute a certificate of previously submitted disclosure statement?

Evaluation

39. Abstract of bids/proposals: (ASPR 1-308, 2-403, 3-109)

(1) Signed and dated?

(2) All bids/offers entered properly?

(3) Exceptions noted?

40. Nonresponsive determinations checked with counsel; file documented as to causes?

41. Disposition of late bids/proposals adequately documented?

42. Unsuccessful bids/proposals included in the file?

43. Were unsuccessful offerors notified promptly?

44. If sole bid/offer received, file documented as to why previous suppliers failed to offer?

45. If small business determined to be nonresponsive, was certificate of competency obtained? If not, why not?

46. Packaging/transportation/freight rate data obtained and determined to be adequate?

47. If DD Form 633-7 submitted, is it complete and does it support commerciality? (Quantities comparable?)

48. If cost of pricing data (DD Form 633) submitted, was it reviewed by the cost/price analysis element?

49. Was it found to be acceptable?

50. Was field pricing support obtained (DCAA audit; DCAS pricing/technical report)?

51. If not, was waiver executed?

52. Was independent price analysis performed by the cost/price analysis element?

53. If not, was waiver executed? (PROCLTR 75-10)

54. Were auditor's recommendations accepted?

55. Was weighted guideline analysis prepared?

56. Were realistic negotiation objectives established?

57. Was prenegotiation briefing presented to appropriate authority before commencement of negotiations?

58. Does prenegotiation briefing memorandum clearly establish basis for negotiating position?

59. Does it include all of the required elements? (§ 1203.805)

60. Was basis for decision to negotiate, or decision to accept the initial offer without discussion, documented?

61. Is prenegotiation briefing memorandum signed and dated?

Negotiations

62. Were negotiations conducted with all responsible offerors within a competitive range?

63. If changes occurred in requirements, were prospective contractors notified in accordance with ASPR 3-805.4?

64. Was an amendment to the solicitation issued?

65. Were acknowledgements of changed requirements confirmed in writing by offerors?

66. If negotiation objectives were changed or exceeded, was prenegotiation briefing authority notified?

67. Were negotiations conducted on an individual cost element basis?

68. Was option quantity considered in negotiations?

69. Was rent-free use of Government property considered in the negotiations?

70. Was authority obtained for rent-free use from cognizant administrative contracting officer?

71. Was common cut-off date for negotiations established with all offerors?

72. Was certificate of current cost or pricing data obtained?

73. If so, does it reflect date of contractor's last data submission/final agreement as to price?

74. Does price negotiation memorandum format conform with § 1203.811?

75. Does the price negotiation memorandum clearly and conclusively support price reasonableness determination?

76. Is statement of same included in the price negotiation memorandum?

77. Is the price negotiation memorandum signed and dated?

Pre-award and other support data

78. Was pre-award survey conducted?

79. If no pre-award survey, was waiver executed by appropriate authority? (§ 1201.905-4)

80. Were requirements revalidated per § 1201.452-11?

81. If $1,000,000 or more, was equal employment opportunity clearance report obtained?

82. Is Individual Procurement Action Report (DD Form 350) in file?

83. Is it in accordance with ASPR and DLPR Sections XXI?

84. If royalty payments involved, did DLA-G concur?

Contract

85. Was proper award document utilized (SF26-SF33)?

86. Does contract agree in all respects with contractor's bid/proposal?

87. If single signature document, does it reflect contractor's letter/message amendments?

88. Is contract being awarded within bid/proposal acceptance period?

V 43 | 86 MY 3 78 UMI

89. Is arithmetic correct? (Extensions and totals)

Remarks

Subpart G—The DLA Master Solicitation Program

§ 1250.701 General.

In most purchasing offices, solicitations have been constructed to show all the requirements, terms, and conditions involved in one package, which was then sent to potential suppliers. When many thousands of purchases were made, the repetitive preparation and issuance of the millions of sheets of paper which made up the solicitations became significant not only to purchasing offices, but also to contractors who had to receive, consider, and respond to these solicitations. The Master Solicitation Program was developed in an effort to reduce the paperwork flowing between DLA buying offices and potential suppliers, to simplify solicitation and award documents, and to achieve time and dollar savings for DLA and industry. Authority for the Program is ASPR Deviation No. 73-1, granted on 16 June 1972 by the ASPR Committee. It pertains to ASPR 2-200, 3-501, and 16-101.2 and extends through 30 June 1978.

§ 1250.702 Scope.

Master solicitations may be tailored in scope according to the needs and judgments of each purchasing activity. If it is advantageous to utilize separate Master Solicitations for large and small purchases, geographic regions or major commodities, a purchasing activity may wish to use several Master Solicitation documents rather than one. The Program may be applied to any appropriate solicitation process as determined by the purchasing activity. It is applicable to both large and small purchases.

§ 1250.703 Definitions.

(a) *Master Solicitation (MS)* is a document containing provisions repetitively used in any type of solicitation. It is prepositioned with all potential sources.

(b) *Individually Numbered Solicitation (INS)* covers specific requirements of a particular solicitation. It includes only those required provisions which are not in the MS and incorporates applicable provisions of the MS by reference.

(c) Change to the MS is an alteration of, addition to, or deletion from the clauses of the MS for one particular solicitation only.

(d) *Incorporation by Reference (IBR)* is the inclusion of the clauses of one document in another by stating the proper reference numbers of those clauses in the second document.

§ 1250.704 Format.

(a) The preferred format (print size, numbering system and two column display) for MS documents is that of the SF 33A. If in-house capability does not exist and time or monetary considerations dictate a departure, this format is optional as determined by the purchasing activity.

(b) Clauses shall be segregated to conform with the Uniform Contract Format Sections. However, the most frequently used clauses shall be placed at the beginning of each section.

§ 1250.705 Policy.

§ 1250.705-1 The master solicitation.

(a) The MS shall include essential and frequently used material as determined by individual Centers on the basis of the cost effectiveness of inclusion in the MS rather than the INS. Convenience to industry and to DLA shall also be a consideration. There shall be no interim changes, revisions or amendments to the master solicitation itself. The only approved method of revising the master solicitation is by reissuing the entire master solicitation or by interim changes contained in the individually numbered solicitations. All interim changes must be entitled: "FOR THIS SOLICITATION ONLY; the following changes are hereby made to D( )SC Master Solicitation, (Date)." Large numbers of interim changes will indicate a need for reissuance of the master.

(b) All new and/or revisions to Master Solicitations and copies of local implementing amplifying instructions, including revisions thereto, shall be submitted to this Headquarters, ATTN: DLA-PPR, for review and approval prior to implementation. The Headquarters review will concentrate primarily on solicitation format and the appropriateness/legality of local clauses. The correct usage of ASPR clauses is a responsibility of the field activity. In the event the new or revised MS contains a new or revised clause requiring separate review and approval pursuant to ASPR/DLPR, such clause shall be identified in the letter transmitting the MS to DLA.

(c) The master solicitation should be kept as brief as possible (typically not exceeding 25 or 30 pages). Local clauses should be combined, condensed, or eliminated wherever possible. Locally developed manuals, packing/consignment instruction, etc., should be included in the master solicitation when such documents are used repetitively.

§ 1250.705-2. The individually numbered solicitations.

The INS shall contain all information pertinent to a specific solicitation. It shall incorporate the appropriate provisions of the MS by reference and shall be prepared in a manner which provides for award to be made without physically attaching the MS.

§ 1250.706 Incorporation by reference (IBR)

§ 1250.706-1 Incorporation of ASPR provisions.

(a) Mandatory UCF Section L, ASPR Section VII clauses shall be incorporated by reference in either the MS or the INS, as decided by each buying activity.

(b) Clauses other than mandatory UCF Section L, ASPR Section VII clauses which are not fill-in clauses shall be incorporated by reference by title, number, and date, or in full text in either the MS or the INS, according to the judgments of each Center.

(c) Fill-in clauses shall be placed in full text in either the MS or the INS at the discretion of each Center.

§ 1250.706-2 Incorporation of standard forms 32 and 33A.

Standard Forms 32 and 33A shall be incorporated by reference.

The SF 33A shall be incorporated by reference by including in Section B Uniform Contract Format a notification substantially as follows:

"Paragraph 1 of Block 9 to the SF 33 is deleted and the following is substituted therefor: Solicitation instructions and conditions, SF 33A is incorporated herein by reference".

§ 1250.707 Termination for convenience clause.

ASPR Deviation No. 74-14 with respect to ASPR 3-608.2(b)(1)(ix) permits the Termination for Convenience Clause to be included in the schedule of the purchase order at the time of issuance so that additional paperwork involved in obtaining the contractor's signature may be avoided. The clause may either be set forth verbatim or incorporated by reference.

§ 1250.708 Distribution.

§ 1250.708-1 Copies to DCAS.

An initial distribution of the appropriate MS to each DCAS component shall be made as follows:

DCASR—30 copies
DCASMA—15 copies
DCASPRO—6 copies

Additional copies shall be furnished upon request.

§ 1250.708-2 Copies to suppliers.

All potential suppliers shall be provided with copies of the appropriate MS.

§ 1250.708-3 Copies to GAO.

Copies of contracts sent to the GAO shall include a copy of the Master Solicitation.

Appendix E—DLA Contract Financing Regulations

Sec.
E-001 Purpose.
E-003 Implementation.

Subpart B—Basic Policies

E-200 Scope of Part.
E-200.50 Submission of Contractual Instruments for Audit by the U.S. General Accounting Office.

E-218.50 Submission of Request for Deviations.
E-219 Interpretations.
E-220 Foreign Procurement.
E-220.50 Use of Foreign Currencies.

Subpart C—Guaranteed Loans

E-303 Procedure on Application of a Private Financing Institution.
E-303.50 Submission of applications and Supporting Documents.
E-306 Guaranteeing Agency.
E-306.50 Account, Accounting Office, Disbursing Office.

Subpart D—Advance Payments

E-412 Action by Contracting Officer—Approval.
E-412.50 Transmittal of Documents.
E-412.51 Accounting and Disbursing Procedures.

Subpart E—Progress Payments Based on Costs

E-505 Unusual Progress Payments—Standards—Procedures.
E-505.50 Submission of Requests.
E-506 Accounting System and Controls.
E-506.50 Accounting and Disbursing Procedures.

Subpart F—Contract Debts—Interest—Deferred Payments

E-001 Purpose.

This appendix outlines the methods by which the provisions of ASPR Appendix E will be applied in DLA (other than DCASRs).

E-003 Implementation.

Changes and additions to, as well as interpretations of, this appendix will be developed within the Accounting and Finance Division, Office of the Comptroller, HQ DLA.

Subpart B—Basic Policies

E-200 Scope of Part.

E-200.50 Submission of contractual instruments for audit by the U.S. General Accounting Office.

DLA contractual instruments required by the U.S. General Accounting Office for audit purposes must be submitted to one of the Military Service finance centers. The appropriate center for a specific DLA contractual instrument can be determined by reference to the accounting and finance (disbursing) office designated to make payment under the basic contractual instrument, e.g., if the disbursing office operates under an Army disbursing station number, the contractual instruments should be transmitted to Indianapolis. The addresses of these centers are as follows:

Army

Processing and Disposal Branch, Retained Accounts Division, Settlement Operations, Finance Center, U.S. Army, Indianapolis, Ind. 46249.

Air Force

Air Force Accounting and Finance Center, Attn: SAA, 3800 York Street, Denver, Colo. 80205.

Navy

Navy Finance Center, Administrative Services Department, Code SSP, Federal Office Building, 1240 East QM Street, Cleveland, Ohio 44199.

Marine Corps

Commandant, Marine Corps, Headquarters, Washington, D.C. 20380.

E-218 Deviations—amendments.

E-218.50 Submission of request for deviations.

Request for authority to deviate from the provisions of ASPR Appendix E will be submitted (in an original and four copies) to HQ DLA, Attn: DLA-CF.

E-219 Interpretations.

Problems of interpretations and applications of the type indicated in ASPR E-219 should be transmitted to HQ DLA, Attn: DLA-PP. This office will effect any necessary coordination with the DLA Contract Financing Officer and determine whether dissemination to the other procuring activities is appropriate.

E-220 Foreign procurement.

E-220.50 Use of foreign currencies.

Foreign currencies owned by the United States Government shall be used, when feasible, to make payments under contracts in foreign countries. The provisions of DLAR 7000.2, Use of United States-owned Foreign Currencies for Payment of Contracts in Foreign Countries, will govern.

Subpart C—Guaranteed Loans

E-303 Procedure on application of a private financing institution.

E-303.50 Submission of applications and supporting documents.

Any application based on a contract which cites or will cite DLA funds will be transmitted to HQ DLA, Attn: DLA-CF. This address will be used regardless of the office responsible for administration of or payment under the contract.

E-306 Guaranteeing agency.

E-306.50 Account, accounting office, disbursing office.

(a) The following revolving fund account has been established on the books of the Treasury for receipts and expenditures under the DLA guaranteed loan program:

Symbol—97X4080.

Title—Defense Production Guarantees, DLA.

To assure proper processing through accounting and finance reporting channels of the Military Departments, the subhead .5149 will be added to the symbol.

(b) The single central accounting office responsible for maintaining the accounting records of the DLA's guaranteed loan program is the Office of the Comptroller (Contract Financing Office), HQ DLA.

(c) The single disbursing office which shall be responsible for taking up all collections and making all disbursements incident to DLA's guaranteed loan program is the Accounting and Finance Office, Disbursing Symbol 5016, DASC, Cameron Station, Alexandria, Va. 22314.

Subpart D—Advance Payments

E-412 Action by contracting officer—approval.
E-412.50 Transmittal of documents.

The contracting officer's report should be forwarded in original and two copies in the format and outline indicated by ASPR E-412. Unless otherwise requested, the contracting officer should furnish the items indicated by ASPR E-412(v) and (vi); this action will normally obviate the need for the separate comments required by ASPR E-412(vii). If the contracting officer recommends disapproval (ASPR E-412.1) he should include suggestions as to alternate financing methods. The documents should be transmitted to HQ DLA, Attn: DLA-CF, if the contracts cites DLA funds; the office administering or making payments under the contracts or maintaining the allotment records to which the payment will finally be charged are not pertinent.

E-412.51 *Accounting and Disbursing Procedures.*

Each of the three Military Departments employs different accounting and disbursing procedures for making and recouping advance payments. The prescribed procedures of each Department meet the requirements for advance payments and recoupments made under contracts citing DLA funds; therefore, the paying office designated in the contract and/or the allottee or suballottee, depending upon the local arrangement, should utilize the procedures outlined by the Military Department under which paying office operates.

Subpart E—Progress Payments Based on Costs

E-505 Unusual Progress Payments—Standards—Procedures.
E-505.50 *Submission of Requests.*

The documents indicated in the third subparagraph ASPR E-505, if the request concerns a contract which cites DLA funds, will be submitted for coordination and approval to HQ DLA, ATTN: DLA-CF. The command jurisdiction of the office administering the contract, making payments on the contract or maintaining accounting records of the allotment or suballotment which will be charged for the payment is not pertinent.

E-506 Accounting System and Controls.
E-506.50 *Accounting and Disbursing Procedures.*

Each of the three Military Departments employs different accounting and disbursing procedures for making progress payments. The prescribed procedures of each Department meet the requirements for progress payments made under contracts citing DLA funds; therefore the paying office cited in the contract and/or the allottee or suballottee should utilize the procedures outlined by the Military Department under which the paying office operates. Allottees and suballottees of DLA funds, whose allotments or suballotments are charged with progress payments, will render the same type of report to the allottor or suballottor as are required by the Military Department procedures under which the disbursing

V 43 | 86 MY 3 78 UMI

office, which services the allottee or suballottee, operates. The "same type report" means the same format, form, content and due dates prescribed by the appropriate Military Department directive. Allottees may consolidate the reports of suballottees or transmit them as received. Reports on progress payments should be submitted in accordance with paragraph 51, Section VII, Chapter 5, DLAM 700.1.

Subpart F—Contract Debts—Interest—Deferred Payments

Follow directions contained in DLAM 7000.1, Chapter 12, Sections I and II and Figures 12-1, 12-2, 12-4, and 12-11.

SUPPLEMENT NO. 2—CONTRACT FILE MAINTENANCE, CLOSEOUT AND DISPOSITION

Subpart A—Documentation of Contract Actions

S-2101.2 Contractor General File.

Subpart A—Documentation of Contract Actions

S-2101.2 *Contractor General File.*

The basic purpose of the contractor general file is to provide complete and current information on a contractor's capability or responsibility within a single reference. The file on each contractor should include financial statements and reports, scope of work he performs, personnel data, quality of his operations, and any other correspondence and reports relating to the contractor generally and considered worthy of management's attention. These files shall be maintained at one central point within the purchasing activity.

Title 39—Postal Service

CHAPTER I—UNITED STATES POSTAL SERVICE

PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Disposition of Books and Sound Recordings Found Loose in the Mails

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This rule amends postal regulations to permit the release, after a 30-day retention period, of undeliverable books and sound recordings bearing a particular trade name, company name, or other organizational identification to a publisher or distributor of such books or sound recordings who formally requests such release. Books and sound recordings found loose in the mail that cannot be traced to a particular firm or mailing or that can be traced to a firm which does not request their release will, as before, be sold at public auction. The Postal Service has made this change in the regulations because it has reason to believe that over 90 percent of all books and sound recordings found loose in the mailstream are mailed by commercial mailers. In the opinion of the Postal Service, this change in the regulations will have the expected effects of returning books and sound recordings to their rightful owners and avoiding the present expense to the Postal Service of processing and selling this material. The rights of individual mailers to recover lost books or sound recordings will continue to be protected by the 30-day holding period, during which time the Postal Service can respond to inquiries on lost items. It should be noted that the revised rule will not apply to articles other than books and sound recordings found loose in the mails, because there is an insufficient statistical basis for making it generally applicable to other mailed merchandise at this time.

EFFECTIVE DATE: June 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Ed McClure, 202-245-4530.

SUPPLEMENTARY INFORMATION: On February 14, 1978, the Postal Service published for comment in the FEDERAL REGISTER proposed changes to Part 159 of the Postal Service Manual as described above (43 FR 6263). The proposed changes were intended to establish more practicable criteria for the release of books and sound recordings from custody of the Postal Service without adversely affecting the rights of individual mailers.

Interested persons were invited to submit written comments concerning the proposed regulations by March 16, 1978. Seventeen letters of comment were received, of which fourteen were in support and three were opposed. Eleven commenters made no specific recommendations; the remaining six commented on specific features of the proposed rules as follows:

One commenter seemed to be concerned that the Postal Service would have to exert an excessive amount of effort to determine the proper party to whom books and sound recordings should be released. Under existing rules, which are not being changed, books and sound recordings will continue to be released during a 30-day holding period to customers who identify missing material by specific quantities and titles. Books and sound recordings still on hand at the end of the holding period will, under the new rule, be released on request to publishers or distributors who are identified by means of the trade names, company names, or other organizational identification appearing on the material. Rather than an excessive effort, the Postal Service believes less effort will be required to identify the party to whom material should be released.

Another commenter generally favored the rule change but offered four separate objections to the following specific provisions:

(1) The commenter believes that books and sound recordings found loose in the mail at a BMC should continue to be held at the BMC for the 30-day retention period instead of being sent to the dead parcel branch post office for such retention. Limited space at some BMCs is the reason the change in the rule was deemed necessary. However, we believe the solution is to allow the 30-day retention of all loose articles, not merely books and sound recordings, either at the BMC or the dead parcel branch post office, with the decision to be made by the regional postmaster general of the region in which the BMC is located. The final rule so provides.

(2) The commenter requested that the Postal Service define the meaning of "certify" in proposed 159.814a(3), which states in part that "requesters must certify that they have a legal right to books and sound recordings bearing a particular trade name, company name, or other organizational identification." Another commenter, who objected to the use of the term "legal right" on the ground that it is a new, unnecessarily vague concept, suggested that the rule be changed to require requesters to certify that they are the "senders" of books and sound recordings. We have amended the rule to accommodate both these concerns. As revised, the provision will read: "Requesters must include a statement that they are a publisher or distributor of books or sound recordings bearing a particular trade name, company name, or other organizational identification." We used the terms "publisher or distributor" instead of "senders", because those terms specifically designate the kinds of commercial mailers dealt with by the regulation.

(3) The commenter stated that the concluding sentence in proposed section 159.814d, which states that "dead parcel branches will attempt to adhere to these special separation requests to the maximum extent practicable", leaves a great deal to the subjective evaluation of unit managers. We disagree. The language of the concluding sentence requires maximum effort, and would excuse nonperformance only if not practicable.

(4) The commenter took exception to the six-month waiting period in proposed 159.814j before a cancelled request may be renewed, and interpreted this as a provision to allow for "administrative inertia". The rule has nothing to do with inertia. It is intended to ensure that requesters pick up books and sound recordings at dead parcel branches as they have agreed to do, or accept shipments of such materials at the locations they have designated. Failure to do either would impose undesirable costs on the Postal Service and justify cancellation of requests and resumption of auction sales of

such material. The rule would thus protect the Postal Service from the occasional requester who is not seriously interested in participating in this program to release books and sound recordings.

A distributor of books and audio visual materials, who was otherwise in favor of the proposed rule, said that books which he mails as a distributor would not usually bear his name or trademark and would be returned to the publisher. He suggested that a provision be included in the new rule to permit customer requests for return of specific missing titles. There is no need to add a provision to this rule, since existing rules already permit customers who are able to identify missing items by specific quantities and titles to request return of such items during the 30-day holding period. To the extent that the distributor includes its name or trademark, the new procedure would authorize an additional option leading to the return after the 30-day holding period of materials bearing its trade name.

Another commenter took exception to the provision in section 159.814b, that books which did not appear to be new would not be released. He was fearful that shopworn books, which had not been sold but were being returned for credit by retail dealers, would be excluded from return under this provision. The rule, as proposed, is a practical compromise aimed at excluding books which show obvious evidence of private ownership. The presence of scuffed or badly worn covers, dogeared pages, broken spines, bookplates, names of individuals, etc. would justify exclusion from release under this rule, but a lesser, shopworn appearance would not. Since any rule adopted is still subject to subsequent revision, the Postal Service has adopted section 159.814b as written. Revision will subsequently be considered if circumstances warrant.

This same commenter requested that the practice be continued of stamping books to indicate purchase at a USPS auction. This procedure will be discontinued when the new rules are adopted. The procedure of stamping books was originally instituted as a temporary measure to serve only while alternatives to disposal through auction sales were explored. Stamping books is a costly, time-consuming procedure which should be unnecessary when those customers who are concerned with it, will, through the new procedure, be able to obtain release of books in which they have an interest.

One commenter, an industry representative of a retail bookstore trade association, who was opposed to the new rule, took specific exception to the following two features of the proposed regulation:

(1) The commenter expressed his exception to the Postal Service "claim that 90 percent of all such (loose) books are rightfully owned by the publishing firm." We made no such claim. What we said was that "evidence shows that more than 90 percent of all books and sound recordings in the mailstream are mailed by commercial mailers * * *." Retail book stores would seem to fall in the category of commercial mailers. Accordingly, they have the same right as publishers or distributors to request that books and sound recordings bearing their particular trade name, company name, or other organizational identification be held for or sent to them.

(2) This commenter also took exception to the 30-day holding period and felt a much longer time was desirable. The 30-day period is contained in pre-existing 159.721g(1) of the Postal Service Manual and is not part of this proposed rule change. However, the 30-day holding period rule was published for comment in the FEDERAL REGISTER when it was originally proposed in December 1976 (41 FR 53677), as amended and corrected (41 FR 55524). A special management study recommended the 30-day holding period after finding that approximately 95 percent of loose mail inquiries are received and processed within the first 30 days. Accordingly, the 30-day rule was adopted on March 23, 1977 (42 FR 15681); we see no reason to change that determination.

As a result of comments received, we have made a number of revisions in the rules as discussed above. We also have made certain editorial changes aimed primarily at increased clarity. In view of these considerations, the Postal Service hereby adopts, as amended, the following revision of the Postal Service Manual:

PART 159—UNDELIVERABLE MAIL

1. In 159.4 revise .441 to read as follows:

159.4 Disposal of Undeliverable Mail and Unclaimed Articles

* * * * *

.44 Articles Found Loose in the Mail

.441 Process articles found loose in the mail in accordance with this section (159.44) at the facility designated in 159.721g(1). Before transferring loose articles to another location:

a. Make every reasonable effort to match such articles with the envelope or wrapper from which lost.

b. Loose articles which are transferred to another facility must be treated in accordance with 159.443 to remove items of no value before the transfer.

2. In 159.7 revise .721g and .724c(3) to read as follows:

159.7 Dead Mail

* * * * *

.721 Disposition

* * * * *

g. *Articles Found Loose in the Mail.* Articles found loose in the mail, which cannot be delivered or returned after the initial handling prescribed in 159.44, are treated as dead mail and processed as follows:

(1) *Location.* (a) Process loose articles found in any post office at the office where found.

(b) Process loose articles found in any BMC (bulk mail center) either at the BMC where found or at the dead parcel branch post office which serves that BMC service area (see 159.724c). The Regional Postmaster General of the region in which the BMC is located will decide whether the BMC or the dead parcel branch post office will process such articles. Loose articles which are transferred from the BMC where found to a dead parcel branch post office for processing, must be treated at the processing office as loose mail in accordance with 159.724c(3).

(2) *Holding Period.* Hold loose articles at the location where processed for 30 days after the initial handling prescribed in 159.44 and then send to the appropriate dead parcel branch designated in 159.724c at weekly intervals.

(3) *Sorting.* If the volume at any location during the 30-day holding period requires a plan of sorting to facilitate search and disposal on schedule, proceed as follows:

(a) Separate the articles into general groups, such as books, clothing, hardware, etc. Store by weeks to facilitate location and disposal.

(b) Only if the volume makes it necessary, assign a serial number to each category referred to in (a); assign a serial number to each parcel within each category; make a card or book list of the parcels, by category and parcel numbers, with a brief description of the articles.

(4) *Wrapping.* Do not wrap or box loose articles during the holding period except when necessary to keep together several articles known to be from the same parcel.

* * * * *

.724 Dead Letter and Dead Parcel Branches

* * * * *

c. Dead Parcel Branches

* * * * *

(3) *Separate Activities.* Each post office with a dead parcel branch must provide a separate activity for processing undeliverable and loose matter found within its own operation or loose matter designated by the regional postmaster general under 159.721g(1)(b) to be sent from a BMC for processing at the dead parcel branch post office. A physical separation must be provided between the work areas devoted to loose and undeliverable processing and to dead mail activities. Mail subject to a holding period may cross the separation into the dead parcel area only after the applicable holding period has expired.

(3) *Separate Activities.* Each post office with a dead parcel branch must provide a separate activity for processing undeliverable and loose matter found within its own operation or loose matter designated by the regional postmaster general under 159.721g(1)(b) to be sent from a BMC for processing at the dead parcel branch post office. A physical separation must be provided between the work areas devoted to loose and undeliverable processing and to

V 4 3 — 1 8 6

dead mail activities. Mail subject to a holding period may cross the separation into the dead parcel area only after the applicable holding period has expired. Dead matter which has been held for the appropriate holding period at other facilities must be taken directly into the dead parcel unit and immediately prepared for auction or other appropriate disposal. Activities for each of these operations must be reported separately. Form 3731, *Quarterly Report of Dead Parcel Post Branch*, must not include any volume or work hour statistics for mail matter which has not been held for the prescribed holding period.

3. In 159.8 revise .813b and add new .814 reading as follows:

159.8 Treatment in Dead Parcel Branches

. . . . . .

.813 Other Parcels.

. . . . . .

b. Except for books and sound recordings (see 159.814), prepare other parcels, including ordinary, insured, and COD, for disposal as soon as received if sender or addressee cannot be identified. Do not list contents.

. . . . . .

.814 *Books and Sound Recordings.* Prepare books and sound recordings for disposal in accordance with 159.85, except for those that may be withheld from sale for release to a publisher or distributor under the following conditions:

a. A publisher or distributor may request, in the manner set forth below, that books and sound recordings bearing a particular trade name, company name, or other organizational identification, be released to the requester, or to the requester's authorized representative.

(1) The requester must apply in writing to the postmaster at each dead parcel branch where release of material is desired.

(2) The request must be in quadruplicate.

(3) Requesters must include a statement that they are a publisher or distributor of books or sound recordings bearing a particular trade name, company name, or other organizational identification.

(4) More than one trade name, company name, or other organizational identification may be listed in the same request.

(5) The request must specify whether the books and sound recordings are to be picked up at the dead parcel branch or whether delivery to another location is desired. If delivery to another location is desired, the address must be specified and must be one used by the requester as a return address. A requester may select only one such address for each dead parcel branch. The specified address may be changed at any time by submitting a written request to the postmaster at the dead parcel branch office.

(6) After approval, the postmaster will retain the original request and send one copy each to the requester, the Inspector in charge of the Division in which the installation is located, and the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, D.C. 20260.

(7) An approved request will remain in effect until cancelled in writing by either the requester or the Postal Service (see 159.814j).

b. A book or sound recording will be sold at auction and will not be released to the requester if, although it bears an applicable trade name, company name, or other organizational identification, it does not appear to be new, or was involved in the settlement of a postal indemnity claim, or if it is known that the requester was not the mailer or addressee.

c. A request for release of books or sound recordings will be granted except where a written protest, or a conflicting request from another party, is presented to the postmaster at the dead parcel branch post office. Merchandise involved in such a dispute will be sold at auction in the normal course of business, unless written notice from both parties advising of settlement of the dispute is received prior to the prescribed sale deadline (see 159.814g). The postmaster at the dead parcel branch post office will notify both parties in writing when such disputes arise or are settled and of the consequences to the merchandise in such disputes.

d. Upon approval of a request under 159.814a, dead parcel branches will establish special separations or bins, for segregation of books and sound recordings which bear the specified trade name, company name, or other organizational identification. Such identification must consist of a readily identifiable name and be easily read. Dead parcel branches will attempt to adhere to these special separation requests to the maximum extent practicable.

e. Except where delivery to another location is desired (see 159.814a(5) and .814h), dead parcel branches will release books and sound recordings to requesters or their authorized representatives at the dead parcel branch at a time and in a manner mutually agreeable between the requester and the postmaster, consistent with the instructions in this section (159.814). Such merchandise must be picked up at least once before each auction, but may be picked up more often by mutual agreement between the postmaster and the requester.

f. When books and sound recordings are to be released at the dead parcel branch, the following procedures apply:

(1) Ten days before each dead parcel auction, or more often, if warranted by volume, the dead parcel branch will send a written notice to each requester who has specified release of such merchandise at the dead parcel branch, advising of the quantity of books and sound recordings on hand. Merchandise which is to be released at the dead parcel branch will not be listed in the sale catalog.

(2) Requesters or their representatives may pick up books and sound recordings at the dead parcel branch upon presentation of a letter from the requester authorizing the Postal Service to release such merchandise to the bearer. This letter of authorization must be executed in triplicate. Upon release of the merchandise, all copies of the letter of authorization will be receipted in bulk by the person accepting delivery. One copy will be given out with the merchandise, one copy will be mailed directly to the requester, and the original will be retained by the dead parcel branch.

g. Books and sound recordings must be picked up at the dead parcel branch before the close of the business day immediately preceding the public display of auction sale merchandise. Failure to do so will result in cancellation of a request (see 159.814j).

h. As to books and sound recordings, which are to be released at another location under 159.814a(5), dead parcel branches will make up individual packages for shipment to the other location desired by the requester, unless hampers or other types of containers would be more advantageous.

(1) *Individual Packages.* Individual packages will be as large as possible subject to the weight and size limitations for fourth-class mail in 135.3. Each package will be prepared to comply with the requirements of 135.24, sent under a penalty label, and delivered at the destination as ordinary mail.

(2) *Containers.* Books and sound recordings from dead mail branches may be delivered in hampers, or other containers, where this means is more advantageous than making up individual packages, and adequate security against pilferage can be maintained. Postmasters at dead parcel branches and postmasters at delivery offices may coordinate suitable arrangements for containment, labeling, movement, and security of such merchandise through their respective transportation management officers.

i. Failure to accept delivery of any shipment under 159.814h will result in cancellation of a request (see 159.814j).

j. When a request is cancelled (see 159.814a(7), .814g, and .814i), the requester must be notified by the postmaster in writing. A cancelled request may not be renewed for six months after the date of cancellation. At that time, an application must be re-submitted in writing, as if it were a new request. Copies of any cancellation notice must be sent to the General Manager, Special Services Division, Office of Mail Classification, U.S. Postal Service, Washington, D.C. 20260. Merchandise on hand at the time of a cancellation will be included in the next auction.

A Post Office Services (Domestic) transmittal letter making these changes in the pages of the Postal Service Manual will be published and will be transmitted to subscribers automatically. These changes will be published in the FEDERAL REGISTER as provided in 39 CFR 111.3.

(39 U.S.C. 401(2).)

ROGER P. CRAIG,
Deputy General Counsel.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT; DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[A-7950; Public Land Order 5637]

ARIZONA

Prior Amendment of Executive order No. 8039; Prior Revocation of Public Land Order No. 5492; Clarification of Administration and Management Under National Wildlife Refuge System Administration Act; Change of Name to Kofa National Wildlife Refuge

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This public land order changes the name of the Kofa Game Range to the Kofa National Wildlife Refuge. Also, it affords notice of prior statutory action taken to revoke or revise public land orders or Executive orders, as necessary, to change the administration and management of the refuge area in accordance with Pub. L. 94-223.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731.

By virtue of the authority that is vested in the Secretary of the Interior by law, including the authority that is vested in him by section 204 of the Act of October 21, 1976 (Pub. L. 94-579, 90 Stat. 2751), and in accordance with the Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), it is ordered as follows:

1. The Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended Section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), provides that units of the National Wildlife Refuge System, including the Kofa Game Range, shall be administered by the Secretary of the Interior exclusively through the United States Fish and Wildlife Service. Accordingly, notice is hereby given that effective as of February 27, 1976 and by virtue of Pub. L. 94-223, supra:

(a) Public Land Order No. 5492 of March 21, 1975 (40 FR 14054), which provided for the transfer of all of the Secretary's delegable authority for the operation and administration of the Kofa Game Range, as described in the aforesaid orders, to the Bureau of Land Management, was revoked; and such authority was, and is now, vested solely in the United States Fish and Wildlife Service;

(b) The operation and administration of the Kofa Game Range, including grazing, was to be administered, and is now being administered, in accordance with the National Wildlife Refuge System Administration Act, as amended, except that those holding grazing privileges, validly issued by the Bureau of Land Management and in effect on Feburary 27, 1976, are permitted to continue such privileges under terms and conditions imposed by the Taylor Grazing Act, and implementing regulations, until those privileges expire. The renewal or initiation of grazing privileges subsequent to February 27, 1976, is in accordance with the National Wildlife Refuge System Administration Act, as amended, and implementing regulations.

(c) Executive Order No. 8039 of January 25, 1935 (4 FR 438), which established the Kofa Game Range, was modified to the extent necessary for it to conform to the provisions of (a) and (b), above.

2. The name of the Kofa Game Range, as so designated by Executive Order No. 8039 of January 25, 1939 (4 FR 438), is hereby changed to the Kofa National Wildlife Refuge.

3. This order does not affect or alter in any respect the Notice of Proposed Withdrawal, A-7950 of February 26, 1974, relating to the Kofa Game Range, as published at 39 FR 8640.

Dated: April 25, 1978.

GUY R. MARTIN,
Assistant Secretary of the Interior.

ARIZONA

Prior Amendment of Executive Order No. 8038; Cabeza Prieta National Wildlife Refuge; Clarification of Administration and Management Under National Wildlife Refuge System Administration Act

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This public land order affords notice of prior statutory action taken to revise Executive Order No. 8038, as necessary, to change the administration and management of the Cabeza Prieta National Wildlife Refuge in accordance with Pub. L. 94-223.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731.

By virtue of the authority that is vested in the Secretary of the Interior by law, including the authority that is vested in him by section 204 of the Act of October 21, 1976 (Pub. L. 94-579, 90 Stat. 2751), and in accordance with the Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), it is ordered as follows:

1. The Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), provides that units of the National Wildlife Refuge System, including the Cabeza Prieta Game Range, the name of which was changed to the Cabeza Prieta National Wildlife Refuge by Public Land Order No. 5493 of March 21, 1975 (40 FR 14315), as amended by Public Land Order No. 5502 of June 10, 1975 (40 FR 25593), shall be administered by the Secretary of the Interior exclusively through the United States Fish and Wildlife Service. Accordingly, notice is hereby given that effective as of February 27, 1976 and by virtue of Pub. L. 94-223, supra:

(a) The operation and administration of the Cabeza Prieta National Wildlife Refuge, including grazing, was to be administered, and is now being administered, in accordance with the National Wildlife Refuge System Administration Act, as amended, except that those holding grazing privileges, validly issued by the Bureau of Land Management and in effect on February 27, 1976, are permitted to continue such privileges under terms and conditions imposed by the Taylor Grazing Act, and implementing regulations, until those privileges expire. The renewal or initiation of grazing privileges subsequent to February 27, 1976, is in accordance with the National Wildlife Refuge System Administration Act, as amended, and implementing regulations.

(b) Executive Order No. 8038 of January 25, 1939 (4 FR 437), which established the Cabeza Prieta National Wildlife Refuge as the Cabeza Prieta Game Range, was modified to the extent necessary for it to conform to the provisions of (a), above.

2. This order does not affect or alter in any respect the Notice of Proposed Withdrawal, A-7951 of February 26, 1974, relating to the Cabeza Prieta National Wildlife Refuge, as published at 39 FR 8640.

Dated: April 25, 1978.

GUY R. MARTIN,
Assistant Secretary of the Interior.

Eldon G. Hayes, 202-343-8731.

By virtue of the authority that is vested in the Secretary of the Interior by law, including the authority vested in him by section 204 of the Act of October 21, 1976 (Pub. L. 94-579, 90 Stat. 2751), and in accordance with the Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), it is ordered as follows:

1. The Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), provides that units of the National Wildlife Refuge System, including the Fort Peck Game Range, the name of which was changed to the Charles M. Russell National Wildlife Range by Public Land Order No. 2951 of February 25, 1963 (28 FR 1871), shall be administered by the Secretary of the Interior exclusively through the United States Fish and Wildlife Service. Accordingly, notice is hereby given that effective as of February 27, 1976 and by virtue of Pub. L. 94-223, supra:

(a) Public Land Order No. 5498 of April 25, 1975 (40 FR 18996), as amended by Public Land Order No. 5500 of May 23, 1975 (40 FR 23472), which provided for the transfer of all of the Secretary's delegable authority for the operation and administration of Charles M. Russell National Wildlife Range, as described in the aforesaid orders, to the Bureau of Land Management, was revoked; and such authority was, and is now, vested solely in the United States Fish and Wildlife Service;

(b) The operation and administration of the Charles M. Russell National Wildlife Range, including grazing, was to be administered, and is now being administered, in accordance with the National Wildlife Refuge System Administration Act, as amended, except that those holding grazing privileges, validly issued by the Bureau of Land Management and in effect on February 27, 1976, are permitted to continue such privileges under terms and conditions imposed by the Taylor Grazing Act, and implementing regulations, until those privileges expire. The renewal or initiation of grazing privileges subsequent to February 27, 1976, is in accordance with the National Wildlife Refuge System Administration Act, as amended, and implementing regulations.

(c) Executive Order No. 7509 of December 11, 1936 (1 FR 2149), which established the Charles M. Russell National Wildlife Range as the Fort Peck Game Range, was modified to the extent necessary for it to conform to the provisions of (a) and (b), above.

2. The name of the Charles M. Russell National Wildlife Range, as so designated by Public Land Order No. 2951 of February 25, 1963 (28 FR 1871), is hereby changed to the Charles M. Russell National Wildlife Refuge.

3. This order does not affect or alter in any respect the Notice of Proposed Withdrawal, M-39021 of March 4, 1975, relating to the Charles M. Russell National Wildlife Range, as published at 40 FR 11365.

Dated: April 25, 1978.

[4310-84]

[Nev. 051742; Public Land Order 5634]

NEVADA

Prior Amendment of Executive Order No. 7522; Prior Revocation of Public Land Order No. 5497; Consolidation of Charles Sheldon Antelope Range and Charles Sheldon Wildlife Refuge; Change of Name to Sheldon National Wildlife Refuge; Clarification of Administration and Management Under National Wildlife Refuge System Administration Act

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This public land order changes the names of the Charles Sheldon Antelope Range and the Charles Sheldon Wildlife Refuge and combines them as the Sheldon National Wildlife Refuge. Also, it affords notice of prior statutory action taken to revoke or revise public land orders or Executive orders, as necessary, to change the administration and management of the area in accordance with Pub. L. 94-223.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-7831.

By virtue of the authority that is vested in the Secretary of the Interior by law, including the authority that is vested in him by section 204 of the Act of October 21, 1976 (Pub. L. 94-579, 90 Stat. 2751), and in accordance with the Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge Administration Act of 1966 (16 U.S.C. 668dd(a)), it is ordered as follows:

1. The Act of February 27, 1976 (Pub. L. 94-223, 90 Stat. 199), which amended section 4(a) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd(a)), provides that units of the National Wildlife Refuge System, including the Charles Sheldon Antelope Range, shall be administered by the Secretary of the Interior exclusively through the United States Fish and Wildlife Service. Accordingly, notice is hereby given that effective as of February 27, 1976 and by virtue of Pub. L. 94-223, supra:

(a) Public Land Order No. 5497 of April 25, 1975 (40 FR 18997), as amended by Public Land Order 5508 of June 23, 1975 (40 FR 27659), which provided for the transfer of all the Secretary's delegated authority for the operation and administration of the Charles Sheldon Antelope Range, as described in the aforesaid orders, to the Bureau of Land Management, was revoked; and such authority was, and is now, vested solely in the United States Fish and Wildlife Service;

(b) The operation and administration of the Charles Sheldon Antelope Range, including grazing, was to be administered, and is now being administered, in accordance with the National Wildlife Refuge System Administration Act, as amended, except that, those holding grazing privileges validly issued by the Bureau of Land Management and in effect on February 27, 1976, are permitted to continue such privileges under terms and conditions imposed by the Taylor Grazing Act, and implementing regulations, until those privileges expire. The renewal or initiation of grazing privileges subsequent to February 27, 1976, is in accordance with the National Wildlife Refuge System Administration Act, as amended, and implementing regulations.

(c) Executive Order No. 7522 of December 21, 1936 (1 FR 2184), which established the Charles Sheldon Antelope Range, was modified to the extent necessary for it to conform to the provisions of (a) and (b), above.

2. For increased administrative efficiency, the lands and interests in land comprising the Charles Sheldon Wildlife Refuge, as established by Executive Order No. 5540, of January 26, 1931, and the adjoining Charles Sheldon Antelope Range, as established by Executive Order No. 7522 of December 21, 1936, are hereby consolidated into one administrative unit. Insofar as it combines these two units of the National Wildlife Refuge System, this order is not intended to alter or modify in any respect either of the aforementioned Executive Orders. As consolidted, the Charles Sheldon Wildlife Refuge, the name of which was so designated by Executive Order No. 5540, and the Charles Sheldon Antelope Range, the name of which was so designated by Executive Order No. 7522, shall hereafter be designated and known as the Sheldon National Wildlife Refuge.

3. This order does not affect or alter in any respect the Notice of Proposed Withdrawal, Nev-051742, relating to the Charles Sheldon Antelope Range, as published at 40 FR 8368.

APRIL 25, 1978.

GUY R. MARTIN,
Assistant Secretary of the Interior.

Title 49—Transportation

CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER B—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

[Amendment No. 77-4]

PART 386—RULES OF PRACTICE FOR MOTOR CARRIER SAFETY PROCEEDINGS

Service of Responses to Claims; Amendment

AGENCY: Federal Highway Administration, DOT.

ACTION: Amendment to final rule.

SUMMARY: On October 4, 1977, the Federal Highway Administration issued certain amendments to the rules of practice. Among the changes was a requirement that replies in civil forfeiture cases be served on certain named persons. The service specified should only be required in proceedings under the Hazardous Materials Transportation Act because these are the only civil forfeiture cases that are assigned docket numbers and go to hearing. This amendment corrects the rules of practice by eliminating the service requirements for civil forfeiture claims not processed under the Hazardous Materials Transportation Act.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald M. Tierney, Office of the Chief Counsel (HCC-20), 202-426-0346, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are 7:45 a.m. to 4:15 p.m. e.t., Monday-Friday.

Therefore, 49 CFR 386.13(b) is amended to read as follows:

§ 386.13 Petitions to review, replies.

* * * * *

(b) * * *

(iii) In proceedings under the Hazardous Materials Transportation Act, certification that the reply has been served in accordance with § 386.38.

* * * * *

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Amendment No. 3 to Service Order No. 1262]

PART 1033—CAR SERVICE

North Stratford Railroad Corp. Authorized To Operate Over Certain Tracks Owned by the State of New Hampshire

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 3 to Service Order No. 1262).

SUMMARY: Service Order No. 1262 authorizes the North Stratford Railroad Corp. to operate a line of railroad between North Stratford, N.H., and Beecher Falls, Vt., owned by the State of New Hampshire. Resumption of Operation over this line restores rail service to shippers affected by its abandonment by the Maine Central, its former owner. Amendment No. 3 to Service Order No. 1262 extends for six months the emergency authority granted to the North Stratford Railroad for operation to this line.

DATES: Effective 11:59 p.m., April 30, 1978. Expires 11:59 p.m., October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: This amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April, 1978.

Upon further consideration of Service Order No. 1262 (42 FR 16780, 43637, and 57317), and good cause appearing therefor:

It is ordered, That:

Service Order No. 1262 be, and it is hereby, amended by substituting the following paragraph (f) for paragraph (f) thereof:

§ 1033.1262 Service Order No. 1262.

(a) *North Stratford Railroad Corp., authorized to operate over certain tracks owned by the State of New Hampshire* * * *

* * * * *

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., October 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Wash-

[7035-01]

[Amendment No. 1 to Service Order No. 1296]

PART 1033—CAR SERVICE

Substitution of Refrigerator Cars for Boxcars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 1 to Service Order No. 1296).

SUMMARY: There is a substantial shortage of boxcars on the Atchison, Topeka and Santa Fe Railway for shipments of cotton. The ATSF has an available supply of certain refrigerator cars that may be subsitituted for this traffic at the ratio of two refrigerator cars for each boxcar. Service Order No. 1296 authorizes ATSF, with consent of the shipper, to substitute two refrigerator cars for each boxcar ordered for shipments of cotton from any station on ATSF in Texas or New Mexico and destined to any other station on ATSF. Amendment No. 1 extends to the order an additional three months.

DATES: Effective 11:59 p.m., April 30, 1978. Expires 11:59 p.m., July 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C.C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April, 1978.

Upon further consideration of Service Order No. 1296 (43 F.R. 3125), and good cause appearing therefor:

It is ordered, That:

Service Order No. 1296 is hereby amended by subsituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1296 Service Order No. 1296

(a) *Substitution of refrigerator cars for boxcars* • • •

• • • • •

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Amendment No. 2 to Revised Service Order No. 1301]

PART 1033—CAR SERVICE

Distribution of Grain Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 Revised Service Order No. 1301).

SUMMARY: There are serious shortages of 40-foot, narrow-door plain boxcars and of covered hoppers on the lines of the Burlington Northern and of the Chicago & North Western. Revised Service Order No. 1301 requires return of narrow-door, 40-foot, plain boxcars and of covered hoppers owned by these two railroads. Loading to stations on the lines of the Car owners is permitted. Amendment No. 2 extends Revised Order No. 1301 for an additional month.

DATES: Effective 11:59 p.m., April 30, 1978. Expires 11:59 p.m., June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April 1978.

Upon further consideration of Revised Service Order No. 1301 (43 FR 12326 and 14475), and good cause appearing therefor:

It is ordered, That:

Revised Service Order No. 1301 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.130 Service Order No. 130.

(a) *Distribution of grain cars* • • •

• • • • •

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the Amercian Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Amendment No. 1 to Corrected Service Order No. 1304]

PART 1033—CAR SERVICE

Distribution of Covered Hopper Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 1 to Corrected Service Order No. 1304).

SUMMARY: There is a shortage of jumbo covered hopper cars for transporting shipments of grain. A large number of these cars have been placed in unit-train service. Corrected Service Order No. 1304 provides that no common carrier by railroad shall permit the use in unit-grain train service of more than twenty percent of its ownership of jumbo covered hopper cars. Amendment No. 1 extends Corrected Service Order No. 1304 for two months.

DATES: Effective 11:59 p.m., April 30, 1978. Expires 11:59 p.m., June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April 1978.

Upon further consideration of Corrected Service Order No. 1304 (43 F.R. 9281), and good cause appearing therefor:

It is ordered, That:

Corrected Service Order No. 1304 be, and it is hereby, amended by substituting the following paragraph (f) for paragraph (f) thereof:

§ 1033.1304 Service Order No. 1304.

(a) *Distribution of covered hopper cars* • • •

• • • • •

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Amendment No. 1 to Revised Service Order No. 1308]

PART 1033—CAR SERVICE

Distribution of Covered Hopper Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 1 to Revised Service Order No. 1308).

SUMMARY: The Union Pacific is unable to furnish individual shippers with lots of 25 or 50 jumbo covered hoppers cars for three consecutive shipments of grain from Kansas and Nebraska origins to destinations on the West Coast. Revised Service Order No. 1308 waives the three-consecutive-trip provision of the applicable tariff, enabling the Union Pacific to make a more equitable distribution of its supply of covered hopper cars among all potential users of these cars. Amendment No. 1 extends the order an additional two months.

DATES: Effective 11:59 p.m., April 30, 1978. Expires 11:59 p.m., June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The Amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April 1978.

Upon further consideration of Revised Service Order No. 1308 (43 FR 12693), and good cause appearing therefor:

It is ordered, That:

Revised Service Order No. 1308 is hereby amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1308 Service Order No. 1308.

(a) *Distribution of covered hopper cars.*

• • • • •

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

[Amendment No. 1 to Service Order No. 1314]

PART 1033—CAR SERVICE

St. Louis-San Francisco Railway Co. Authorized to Transport Shipments of Soybean Meal of Less Than 2,000 Tons

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (amendment No. 1 to service order No. 1314).

SUMMARY: Because of severe shortages of freight cars the St. Louis-San Francisco Railway is unable to furnish sufficient cars at one time to transport minimum weights of 2,000 tons of soybean meal between origins and destinations named in item 7420 series of Southern Ports Foreign Freight Committee Freight Tariff 1016-P, ICC No. 237. Service Order No. 1314 authorizes the SLSF to transport partial shipments of 2,000 tons of soybean meal between origins on its line and Gulf ports listed in item 7420 of that tariff. Amendment No. 1 to service order No. 1314 extends this service order for 2 months.

DATES: Effective 11:59 p.m. April 30, 1978. Expires 11:59 p.m., June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The amendment is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April 1978.

V 43 | 86

Upon further consideration of service order No. 1314 (43 FR 14474), and good cause appearing therefor:

It is ordered, That: Service order No. 1314 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

§ 1033.1314 Service order No. 1314.

(a) *St. Louis-San Francisco Railway Co. authorized to transport shipments of soybean meal of less than 2000 tons.* • • •

• • • • • •

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., June 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Revised Service Order No. 1315]

PART 1033—CAR SERVICE

Demurrage and Free Time on Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (revised service order No. 1315).

SUMMARY: Because of a severe shortage of freight cars it is necessary to reduce the time used by shippers and receivers to load and unload freight cars. Revised service order No. 1315 increases the penalties for detention of freight cars by shippers and receivers beyond the free time periods published in the applicable tariffs. The order applies to boxcars, hopper cars, gondola cars, flat cars, and covered hopper cars.

DATES: Effective 7 a.m., May 1, 1978. Expires 6:59 a.m., June 1, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of April 1978.

An acute shortage of certain types of freight cars exists throughout the country. Certain carriers are unable to furnish adequate supplies of such freight cars to shippers located on their lines. These shortages of freight cars are impeding the movement of many commodities. Many freight cars are held by shippers for excessive periods awaiting loading, unloading, or disposition instructions immobilizing large numbers of freight cars needed by shippers for the transportation of other freight. Existing demurrage and detention rules, regulations, and practices of the railroads are ineffective to control such use of freight cars. It is, therefore, the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, we find that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1315 Service Order No. 1315.

(a) *Demurrage and free time on freight cars* • • • Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) *Application.* (i) The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(ii) This order shall apply to all freight cars which are listed in the official railway equipment register, ICC R.E.R. No. 407, issued by W. J. Trezise, or successive issues thereof, as having one of the mechanical designations shown on pages 1167-1169 inclusive, under the following headings:

"Class 'X'—Box Car Type," except ••• mechanical designation 'XLI' and 'XT'
"Class 'G'—Gondola Car Type."
•"Class 'H'—Hopper Car Type."
"Class 'L'—Special Car Type" mechanical designation 'LO,' covered hopper, only.

••• Mechanical designation 'XLI' and 'XT' eliminated.

•"Class 'H'—Hopper Car Type" added.

(iii) This order shall apply to all detention of freight cars subject to freight car demurrage or detention rules which occurs on or after the effective date of this order and which may have been shipped, placed or constructively placed prior to that date.

(iv) *Exception.* #This order shall not apply to cars while such cars are subject to section 1900, items 1900-1950, inclusive, or to section 2000, items 2000-2005, inclusive, of general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof.

(v) *Exception.* This order shall not apply to cars held at or outside of ocean, Great Lakes, or river ports, for loading or unloading with freight requiring transfer between rail and water carriers.

(vi) *Exception.* This order shall not apply to freight cars of Mexican ownership while held by or for shippers at Mexican border crossings, viz:

Brownsville, Tex.
Laredo, Tex.
Eagle Pass, Tex.
Presidio, Tex.
El Paso, Tex.
Douglas, Ariz.
Naco, Ariz.
Nogales, Ariz.
Calexico, Calif.

(vii) *Exception.* # This order shall not apply to cars subject to items 710, 720, 725, 730, 740, 750, 755, 760, or 765 of general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissue thereof.

(viii) *Exception.* The provisions of section 1400, items 1400-1440, inclusive, of general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, or similar provisions of other applicable demurrage, detention, or storage tariffs shall govern the adjustment, cancellation, or refund of demurrage assessed as a result of the causes described in such rules.

(ix) *Exception.* Exceptions to this order may be authorized to carriers by the Railroad Service Board. Requests for exceptions must be submitted in writing to Chairman, Railroad Service Board, Interstate Commerce Commission, Washington, D.C. 20423. Each such request must specifically identify the type of cars for which an exception is desired and must clearly state the reasons why such cars cannot be utilized in other services.

(x) The terms "loading," "unloading," "constructive placement," and "forwarding directions" as defined in general car demurrage reissues thereof, shall apply to cars subject to this order.

(xi) The term "holidays" means holidays as listed in item 525 of general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof.

(2) *Free time.* (i) Not more than a total of 48 hours' free time, computed in accordance with the provisions of the applicable tariffs naming demurrage or detention rules and charges, shall be allowed for the complete unloading of each car.

(ii) Not more than a total of 24 hours' free time, computed in accordance with the applicable tariffs naming demurrage or detention rules and charges, shall be allowed for loading or for any purpose other than complete unloading.

(iii) If the maximum free time authorized in applicable tariffs is less than the periods described in paragraphs (i) or (ii) of this section, the free-time periods, if any, provided in such tariffs shall apply.

(3) *Demurrage, detention, or storage charges—Cars not subject to average demurrage basis.* (i) After the expiration of the free-time period described in Part (2) of this order, or without free-time allowance when none is provided, demurrage charges shall be assessed at the following rates, until car is released:

$10 per car per day, or fraction of a day, for each of the first 2 days.
$20 per car per day, or fraction of a day, for each of the next 2 days.
$30 per car per day, or fraction of a day, for each of the next 2 days.
$50 per car per day, or fraction of a day, for each subsequent day.

(ii) Except as provided in item 1225, general car demurrage tariff 4-K, ICC H-74, the applicable demurrage charges provided herein will accrue on all Saturdays, Sundays, and holidays subsequent to the free time, or without free time when none is provided, including a Saturday, Sunday, or holiday immediately following the day on which the last day of free time begins, provided such last day of free time begins to run at or before 7 a.m., or expires at or before 11:59 p.m., of the day immediately prior to the Saturday, Sunday, or holiday.

(iii) If the demurrage rates published in applicable tariffs is greater than the demurrage rates named in paragraph (i) of this section, the rates provided in such tariffs shall apply.

(4) *Cars subject to average demurrage basis.* (i) One credit will be allowed for each car released before the expiration of the first twenty-four (24) hours of free time. After the expiration of the free time (or the adjusted free time if provided in applicable tariffs), one debit per car per day, or fraction of a day, will be charged for each of the first 2 days. In no case shall more than one credit be allowed on any one car, and in no case shall more than four credits be applied in cancellation of debits accruing on any one car. When a car has accrued two debits, a charge of $20 per car per day, or fraction of a day, will be made for each of the next 2 days; $30 per car per day, or fraction of a day for each of the next 2 days; and $50 per car per day, or fraction of a day, will be made for all subsequent detention. In computing time under this rule, all Saturdays, Sundays, and holidays will be counted after the free time, including a Saturday, Sunday, or holiday immediately following the day on which the last day of free time begins.

(ii) Credits earned on cars held for loading shall not be used in offsetting debits accruing on cars held for unloading, nor shall credits earned on cars held for unloading be used in offsetting debits accruing on cars held for loading.

(iii) An average agreement may not include cars held for:

(a) Purposes other than loading and unloading.

(b) Loading or unloading in intraplant switching service.

(iv) Credits cannot be earned by private cars subject to section 700, item 765, of general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, or subject to similar rules in other tariffs, but debits charged on such cars while under constructive placement may be offset by credits earned on other cars.

(v) At end of the calendar month the total number of applicable credits will be deducted from the total number of debits at the ratio of two credits for one debit, and $10 per debit will be charged for the remainder (see note). If the total number of debits are offset by credits through deduction at the above ratio of two credits for one debit, no charge will be made for the detention of the cars except as otherwise provided herein for detention beyond the second debit day, and no payment will be made by the railroad on account of such excess of credits; nor shall the credits in excess of the debits of any 1 month be considered in computing the average detention for another month.

NOTE.—For the purpose of applying part (v) of this paragraph, when an odd number of credits is earned, one of such credits will be disregarded in the computation.

(vi) Credits earned on cars subject to this order shall not be used in offsetting debits accruing on cars not subject to this order; nor shall debits accruing on cars subject to this order be offset by credits earned on cars not subject to this order.

(5) Existing tariff rules requiring the placement or release, as a unit, of all cars in a multiple-car shipment shall remain in effect.

(6) The demurrage, detention, or storage rates provided herein shall supersede all published storage charges expressed in cents per hundredweight, per bushel, or other unit of measure, for all freight held in cars in excess of the free-time periods provided in paragraph (2) herein.

(7) If the demurrage, detention, or storage rates authorized in the applicable tariffs are greater than those described herein, such higher rates shall apply.

(8) *Notices of arrival, constructive placement, etc.* (i) Existing tariff provisions defining constructive placement and establishing the requirements for the placement, the giving of arrival or constructive placement notice of freight destined for unloading or transshipment, shall apply.

(ii) If no such rules with respect to arrival, or regarding constructive placement are published in the applicable tariffs, the rules published in general car demurrage tariff 4-K, ICC H-74, issued by D. M. Rogers, supplements thereto or reissues thereof, shall apply.

(b) *Rules and regulations suspended.* The operation of all rules and regulations, including rates, rules and free-time periods granted by authority of Part 1, section 22 of the Interstate Commerce Act, insofar as they conflict with the provisions of this order, is hereby suspended.

(c) *Notification of shipper required.* (1) Carriers shall send or deliver a written notice to shippers or consignees of the requirements of this order at or prior to the time of actual or constructive placement of cars for loading or unloading or at the time notice of arrival or of constructive placement is given. On cars held for instructions from the shipper or qualified owner of the freight, such notices must accompany or precede the arrival notice.

(2) If a notice described in paragraph (1) of this section has been given to a shipper or receiver at origin, destination, or hold point, no further notices of the requirements of this order need be given.

(3) Carriers are required to maintain a copy of all notices of the requirements of this order sent to shippers, receivers, or qualified owners of freight, at the station or point from which sent.

(4) Failure of a carrier to send and preserve copies of the notices required by paragraph (1) of this section shall not be deemed as nullifying the requirements of sections (a) and (b) of this order.

(d) *Effective date.* This order shall become effective at 7 a.m., May 1, 1978.

(e) *Expiration date.* This order shall expire at 6:59 a.m., June 1, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this order and direction shall be

[Amendment No. 1 to Revised Service Order No. 1322]

PART 1033—CAR SERVICE

Distribution of Grain Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 1 to Service Order No. 1322).

SUMMARY: Because of a shortage of covered hopper cars for loading grain emergency action to increase the supply of covered hopper cars used for transporting grain is required. Revised Service Order No. 1322 requires eleven selected railroads operating in the grain producing areas west of the Mississippi River to place a stated percentage of their ownership of jumbo covered hopper cars in grain service. Of these cars at least half must be furnished to country elevators. By a series of exceptions the following percentages have been established.

ATSF, 55 percent; BN, 55 percent; CNW, 55 percent; Milw, 70 percent; RI, 60 percent; ICG, 40 percent; MKT, 55 percent; MP, 55 percent; SLSF, 70 percent; SooLine, 40 percent; UP, 55 percent.

Amendment No. 1 extends this order one additional week.

DATES: Effective 11:59 p.m., April 30, 1978; expires 11:59 p.m., May 7, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: The amendment is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of April 1978.

Upon further consideration of Revised Service Order No. 1322 (43 FR 16342 and 16979), and good cause appearing therefor:

It is ordered, That: Revised Service Order No. 1322 be, and it is hereby, amended by substituting the following paragraph (j) for paragraph (j) thereof:

§ 1033.1322 **Service Order No. 1322.**

(a) *Distribution of grain cars* • • •

• • • • • •

(j) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 7, 1978, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., April 30, 1978.

(49 U.S.C. 1(10-17).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[7590-01]

NUCLEAR REGULATORY COMMISSION

[10 CFR Parts 30, 40, 50 and 70]

DECOMMISSIONING CRITERIA FOR NUCLEAR FACILITIES

Extension of Comment Period

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Extension of comment period on advance notice of proposed rulemaking.

SUMMARY: On March 13, 1978, the U.S. Nuclear Regulatory Commission published an advance notice of proposed rulemaking relating the the development of decommissioning criteria for nuclear facilities. The Commission has been requested to extend the comment period of the advance notice in order to provide more time to submit public comments. This notice extends the comment period of the March 13, 1978 notice.

DATES: Comment period expires July 15, 1978.

ADDRESSES: Interested persons are invited to submit written comments and suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received by the Commission may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert M. Bernero, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington D.C. 20555, phone 301-443-3573.

SUPPLEMENTARY INFORMATION: On March 13, 1978, the Nuclear Regulatory Commission published in the FEDERAL REGISTER (43 FR 10370) an advance notice of proposed rulemaking to invite advice and recommendations on several questions concerning decommissioning nuclear facilities.

In the notice, the Commission explained present requirements and practices relating to the decommissioning of nuclear facilities. The Commission further described ongoing studies at the Battelle Pacific Northwest laboratory to provide bases for the reevaluation and development of decommissioning criteria and guidelines for light water reactors and their supporting fuel cycle facilities. Comments were requested on several specific issues and questions in order to invite advice and recommendations on the matter of overall decommissioning policy development. Interested persons were invited to submit comments on the notice by May 15, 1978.

In view of a request for additional comment time from Debevoise & Liberman on behalf of Arkansas Power & Light Co., Dallas Power & Light Co., Jersey Central Power & Light Co., Metropolitan Edison Co., Pacific Gas & Electric Co., Pennsylvania Electric Co., Southern California Edison Co., Texas Electric Service Co., Texas Power & Light Co., Texas Utilities Generating Co., Virginia Electric & Power Co., and Yankee Atomic Electric Co., the Commission is hereby extending the time for submitting written comments or suggestions concerning the notice to July 15, 1978. Any written submissions should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Dated at Washington, D.C. this 27th day of April 1978.

For the Nuclear Regulatory Commission,

SAMUEL J. CHILK,
Secretary of the Commission.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 772-3032]

PUBLIC SERVICE CO. OF COLORADO

Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Denver, Colo., utility company to cease, in connection with the advertising and sale of non-utility products and services, failing to properly provide consumers with credit disclosures required by Federal Reserve System regulations.

DATE: Comments must be received on or before June 30, 1978.

ADDRESS: Comments should be directed to Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Paul C. Daw, Director, Denver Regional Office, Federal Trade Commission, Suite 2900, 1405 Curtis Street, Denver, Colo. 80202, 303-837-2271.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the FTC Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with the provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

UNITED STATES OF AMERICA BEFORE FEDERAL TRADE COMMISSION

In the matter of Public Service Co. of Colorado, a corporation. File No. 772 3032 Agreement Containing Consent Order to Cease and Desist.

The Federal Trade Commission having initiated an investigation acts and practices of Public Service Co. of Colorado, a corporation, and it now appearing that Public Service Co. of Colorado, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

V 4 3 — 8 6

It is hereby agreed by and between Public Service Co. of Colorado, by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

(1) Proposed respondent Public Service Co. of Colorado is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Colorado, with its offices and principal place of business located at 550 15th Street, in the city of Denver, State of Colorado.

(2) Proposed respondent admits all the proposed findings of fact attached hereto as appendix A.

(3) Proposed respondent waives: (a) Any further procedural steps; (b) the requirement that the Commission's decision contain a statement of conclusions of law; and (c) all rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

(4) This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. Thereafter, the Commission may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such other action as it may consider appropriate, or proceed as specified in paragraph 5 hereof.

(5) This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondent: (1) Issue its complaint corresponding in form and substance with the draft complaint here attached and its decision containing the following order to cease and desist, incorporating the findings of fact attached hereto as appendix A, in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision, containing the agreed-to order, to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

(6) Proposed respondent has read the proposed complaint and order contemplated hereby, and understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

(7) The signing of this agreement is for settlement purposes only and does not constitute an admission by any party that the law has been violated as alleged in the proposed complaint.

ORDER

It is ordered, That respondent Public Service Co. of Colorado, a corporation, its successors and assigns and respondent's officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with any extension or arrangement for the extension of consumer credit, or in connection with any advertisement to aid, promote, or assist, directly or indirectly, any extension of consumer credit, as "consumer credit" and "advertisement" are defined in regulation Z (12 CFR 226) of the Truth-in-Lending Act (15 U.S.C. §1601, et seq., as amended) do forthwith cease and desist from:

(1) Entering into any credit transaction, including, but not limited to, transactions for the installation of insulation, in which a security interest, as "credit" and "security interest" are defined in section 226.2 of regulation Z, is or will be retained or acquired in real property with is used or is expected to be used as the principal residence of a consumer customer, without giving the customer notice of his or her right to rescind said transaction, without penalty, until midnight of the third business day following the date of consummation of the transaction or delivery of all material disclosures, whichever is later, as required by section 226.9 of regulation Z and in the manner and form set forth therein.

(2) Stating in any credit advertisement the rate of finance charge unless said rate is expressed as an annual percentage rate (using the term "annual percentage rate"), as "finance charge" and "annual percentage rate" are defined in section 226.2 of regulation Z, as required by section 226.10(d)(1) of regulation Z.

(3) Stating in any credit advertisement that no downpayment is required, or stating the amount of the downpayment or of any installment payment required (either in dollars or as a percentage), the dollar amount of any finance charge, the number of installments or the period of repayment, or stating that there is no charge for credit, unless all of the following items are also clearly and conspicuously set forth in terminology prescribed by § 226.8 of regulation Z, as required by § 226.10(d)(2) of regulation Z: (a) The cash price; (b) the amount of the downpayment required or that no downpayment is required, as applicable; (c) the number, the amount, and due dates or period of payments scheduled to repay the indebtedness if the credit is extended; (d) the amount of the finance charge expressed as an annual percentage rate; and (e) the deferred payment price.

(4) Failing in any consumer credit transaction or advertisement, to make all disclosures that are required by §§ 226.6, 226.7, 226.8, 226.9, and 226.10 of regulation Z in the manner, form, and amount specified therein.

It is further ordered, That respondent notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent shall forthwith distribute a copy of this order to each of its operating divisions, to each person responsible for or connected with preparation of its advertisements, and to each person responsible for or connected with solicitation and sale of residential insulation for respondent, and that respondent secure from each such person a signed statement acknowledging receipt of said order.

It is further ordered, That respondent Public Service Co. of Colorado shall, within sixty (60) days after this order becomes final, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

APPENDIX A—FINDINGS OF FACT

FINDINGS

1. Proposed respondent is now and for many years has been, engaged in the generation, purchase, transmission, distribution, and sale of electricity, and in the purchase, transmission, distribution, and sale of natural gas. Respondent also advertises for sale and/or sells to consumers products and services not provided through pipe, wire, or other connected facilities. In order to promote the conservation of energy, proposed respondent has initiated an insulation program in connection with which it advertises for sale and sells to consumers insulation for, and the installation of insulation in, residential premises.

2. In the ordinary course and conduct of its business as aforesaid, proposed respondent regularly extends or arranges for the extension of consumer credit, and is a creditor, as "consumer credit" and "creditor" are defined in § 226.2 of regulation Z (12 CFR 226, the implementing regulation of the Truth-in-Lending Act (15 U.S.C. § 1601, et seq., as amended), duly promulgated by the Board of Governors of the Federal Reserve System.

3. Subsequent to September 1, 1975, proposed respondent has entered into credit transactions with consumer customers for the installation of insulation in residential premises, in which transactions, under the provisions of Colo. Rev. Stat. §§ 38-22-101, et seq., a security interest, as "security interest" is defined in §226.2 of regulation Z, is or will be used as the principal residence of the customer.

4. There have not been waivers of lien rights by all potential security interest claimants in connection with the credit transactions referred to in paragraph 3; however, proposed respondent has never attempted to enforce such lien rights.

5. Proposed respondent's entry into the transactions described in paragraph 3, in which a security interest is or will be retained by proposed respondent or other potential lien claimants, entities proposed respondent's consumer customers to proper notification of their right to rescind such transactions, without penalty, through midnight of the third business day following consummation of the transaction or delivery of all material disclosures, whichever is later, pursuant to § 226.9 of regulation Z.

6. In connection with the credit transactions referred to in paragrah 3, proposed respondent notified its customers of their right to rescind the transactions within 3 days; however, such notice did not completely comply with the requirements of § 226.9 of regulation Z in that it failed to include substantive information and follow the form set forth therein. Once the matter was brought to proposed respondent's attention, its forms were revised to comply with § 226.9 of regulation Z.

7. Subsequent to September 1, 1975, in the ordinary course and conduct of its business as aforesaid, proposed respondent has caused to be published advertisements for goods and services, which advertisements aid, promote, or assist, directly or indirectly, credit sales and other extensions of other than open end credit, as "advertisement" and "credit sale" are defined in § 226.2 of regulation Z.

8. In one of the advertisements referred to in paragraph 7, proposed respondent stated the rate of the finance charge as "annual interest rate," rather than as an "annual percentage," as required by the provisions of § 226.10(d)(1) of regulation Z.

9. In the same advertisement referred to in paragraph 7, proposed respondent stated the amount of the downpayment (as a percentage of the sales price) without also stating, as required by § 226.10(d)(2) of regulation Z, the deferred payment price.

10. Proposed respondent has cooperated fully in the Commission's investigation and has made available all records and documents requested by the Commission during the course of such investigation.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from Public Service Co. of Colorado.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Public Service Co. of Colorado is an investor owned public utility company providing electric and gas service to over 2 million customers in and around Denver, Colo. The complaint alleges that the company also provides non-utility products and services, including the installation of insulation in residential premises. It is alleged that the contracts for insulating residential premises, entered into between the company and its consumer customers, gave rise to mechanic's and materialmen's liens on such premises in favor of the company and its subcontractors. It is further alleged that the creation of such liens imposed upon the company the obligation to give each customer proper notice of a right to cancel the insulation contract within 3 days after the contract was signed. The complaint alleges that the company failed to give such notice in the required manner and form. It is also alleged that the company published credit advertisements for its home insulation program which used improper credit terminology and failed to disclose required credit terms. The complaint alleges that such conduct is a violation of the Truth-in-Lending Act and of section 5 of the Federal Trade Commission Act.

Through this agreement Public Service Co. of Colorado admits the facts substantially as alleged in the complaint but does not admit any violation of law. The agreed-to order prohibits the company from entering into any credit transaction in which a lien or security interest is retained in a customer's principal residence without giving proper notice of the customer's right to cancel the transaction. The order also prohibits the company from publishing any credit advertisements which do not contain proper terminology or which fail to include all required credit terms and disclosures. The company is also required to distribute the order to personnel responsible for advertising and for solicitation of insulation contracts, and to file reports with the Commission setting forth the manner and form in which they have complied with the order.

The purpose of this analysis is to facilitate public comment on the proposed order; it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

JAMES A. TOBIN,
Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 141]

[FRL 889-2]

INTERIM PRIMARY DRINKING WATER REGULATIONS

Proposed Regulations for Control of Organic Chemical Contaminants in Drinking Water

AGENCY: Environmental Protection Agency.

ACTION: Extension of comment period and change of public hearing date.

SUMMARY: On February 9, 1978, the Environmental Protection Agency published proposed regulation (43 FR 5756 et seq.) for the control of organic chemical contaminants in drinking water. At that time, the Agency stated that comments on the proposed regulations should be submitted by May 31, 1978. It also established a schedule of dates on which public hearings would be held. The final hearing of the series of seven was set for May 5, 1978, in Washington, D.C. Today, the Agency extends the period for submission of comments on these proposed regulations for an additional 60 days and reschedules the public hearing of May 5, 1978.

DATES: The comment period for the proposed regulations to control organic chemical contaminants in drinking water is extended until July 31, 1978. The public hearing originally scheduled in Washington, D.C., has been canceled and is rescheduled at the same location on July 11-12, 1978.

ADDRESS: Submit comments to: Victor J. Kimm, Deputy Assistant Administrator for Water Supply, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Joseph A. Cotruvo, Director, Criteria and Standards Division, Office of Drinking Water (WH-550), Room 1111, WSME, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-5643 or 202-472-5016.

SUPPLEMENTARY INFORMATION: This notice extends until July 31, 1978, the period for public comment with respect to the notice, published February 9, 1978 (43 FR 5756 et seq.), proposing regulations for the control of organic chemical contaminants in drinking water. This notice also announces a change in the date of the hearing to be held in Washington, D.C., with respect to these proposals. It is now to be held July 11-12 instead of May 5.

M Y 3 — 7 8 UMI

V 43 | 86 MY 3 78 UMI

A petition for an extension of time was submitted in behalf of a group of water utilities including Indianapolis Water Co., Louisville Water Co., and others. They asked that the original deadline of May 31, 1978, be extended until October 31, 1978. The petitioners argued that for them to make informed comment additional time was needed due to the unavailability of supporting documents and other references and for the retention of and consultation with experts knowledgable with regard to the proposed regulations. Other commenters such as the National League of Cities, have also indicated the desirability of more time.

I have determined that a reasonable extension of the comment period for sixty (60) days, is in the public interest. This will result in a total comment time of 180 days. The comment period is therefore hereby extended to July 31, 1978. I believe that this provides for ample opportunity for obtaining any remaining unlocated documents and for review of the material, including consultation with experts, if necessary. Anyone having difficulty in obtaining copies of supporting documentation should contact Dr. Joseph Cotruvo, Director, Criteria and Standards Division, Office of Drinking Water (WH-550), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-472-5016.

In addition, the petitioners requested that additional public hearings be scheduled. I believe that seven nationwide as well as a regional hearing in Dallas and other public forums attended by Agency officials knoledgable with respect to the proposed regulations have provided sufficient opportunity for the public to be heard. In conjunction with this extension of the comment period for 60 days, however, I have decided to delay the final hearing in Washington, D.C., originally scheduled for May 5, 1978, to a time to the end of the comment period. The final hearing in Washington, D.C., is therefore hereby rescheduled for July 11 and 12, 1978, at 9 a.m. The precise location of the hearing will be published in the FEDERAL REGISTER as soon as that information is finalized.

A substantial number of comments has already been received on the proposed regulation. Based on our initial review of those comments, we have found that several issues raised in the notice for proposed rulemaking warrent particular attention. Therefore, we wish to solicit again the public's views on the following issues:

1. The soundness and reasonableness of the three criteria specified for determining the design parameters for the GAC treatment technique. These three criteria relate to breakthrough of volatile organohalogen compounds and total organic carbon as indicators of the efficient performance of granular activated carbon for removal of synthetic organic chemicals generally. The selection and magnitude of these or other parameters will significantly impact the operating and cost characteristics of the carbon treatment system.

2. The criteria which the Agency or State will consider in evaluating a request for a variance from the treatment technique requirement. Is the demonstration now required to be made by a system seeking a variance too strigent or too lenient? These criteria will be used to judge the contamination potential of specific drinking water sources. Their application will determine which public water systems will ultimately be required to install granular activated carbon treatment for removal of synthetic organic chemicals. Should these criteria be more specific or quantitive, and if so, how?

3. The reasonableness of the estimated costs of compliance by affected public water systems with respect to either or both the MCL for total trihalomethanes and/or the GAC treatment technique. A wide range of cost estimates for installation and operation of granular activated carbon for removal of synthetic organic chemicals has already been presented to the Agency. Commenters are urged to submit more detailed information in support of their cost estimates during this extended comment period so that the Agency can properly evaluate such information.

The Agency expects that if substantial new information in support of the proposed regulation is developed during the comment period, such documentation will be made available to the public by further notice in the FEDERAL REGISTER and appropriate comment time provided.

Dated: April 25, 1978.

THOMAS C. JORLING,
Assistant Administrator for Water and Hazardous Materials.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

WOOLSEY MEMORIAL AIRPORT LAND DRAINAGE, R.C. & D. MEASURE, MICHIGAN

Intent Not To Prepare an Evironmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Woolsey Memorial Airport Land Drainage R.C. & D. Measure, Leelanau County, Mich.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Arthur H. Cratty, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for land drainage. The planned works of improvement include a grassed waterway and underground tile drainage system to remove water from 2,100 feet of sod runway. Total construction costs are approximately $36,038; $18,019 R.C. & D. funds and $18,019 local funds.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Arthur H. Cratty, State Conservationist, Soil Conservation Service, 1405 South Harrison Road, East Lansing, Mich. 48823, 517-372-1910, extension 242. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 2, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703, 16 U.S.C. 590a-f, q.)

Dated: April 25, 1978.

EDWARD E. THOMAS,
Assistant Administrator for Land Resources, Soil Conservation Service.

CIVIL AERONAUTICS BOARD

COMPANIA MEXICANA DE AVIACION, S.A.

[Docket No. 32296; Order 78-4-165]

Statement of Tentative Findings and Conclusions and Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 28th day of April, 1978.

Compania Mexicana de Aviacion, S.A. (Mexicana) is the holder of a foreign air carrier permit[1] authorizing: (a) foreign air transportation of persons, property, and mail over ten separate routes between a point or points in Mexico and a total of twelve different U.S. terminal point cities[2]; and (b) the performance of charter trips in foreign air transportation pursuant to Part 212 of the Board's Economic Regulations.

Mexicana currently operates scheduled combination services to all the twelve U.S. points authorized in its foreign air carrier permit except Corpus Christi and Laredo, utilizing B-727 and 727S equipment.

By application filed on March 24, 1978,[3] Mexicana requests amendment of its foreign air carrier permit so as to authorize foreign air transportation of persons, property, and mail over a total of thirteen separate routes between a point or points in Mexico and several new U.S. points.

The operations for which Mexicana seeks authority are provided for in the United States-Mexico Air Transport Services Agreement of August 15, 1960, as recently amended,[4] and Mexicana has been designated by the Government of Mexico.[5]

No answers to the application have been filed.

Mexicana's application requests amendment of the carrier's permit by making additions, deletions, and realignments of its authority pursuant to the carrier's designation under the United States-Mexico Air Transport Services Agreement, as amended. The principal additions, include new authority to thirteen additional U.S. cities: Atlanta, Baltimore, Cleveland, Detroit, Harlingen, Memphis, Minneapolis/St. Paul, Oakland, Philadelphia, San Francisco, Seattle, Tampa, and Washington. The deletions are Corpus Christi and Laredo. Moreover, Mexicana would obtain authority to serve Montreal and Toronto, Canada beyond the United States.

In granting Mexicana its existing routes to the United States, the Board found that the carrier was substantially owned and effectively controlled by the citizens of Mexico, that it was financially and operationally fit, and that it was in the public interest to grant the carrier authority to the United States.[6] Mexicana's application indicates that no changes in its corporate structure or operations have occurred which would cast doubt upon the continued accuracy of the Board's previous findings.

In view of the foregoing and all the facts of record, the Board tentatively finds and concludes:

1. That Compania Mexicana de Aviacion, S.A. is substantially owned and effectively controlled by citizens of Mexico;

2. That it is in the public interest to amend the foreign air carrier permit held by Compania Mexicana de Aviacion, S.A., to authorize the carrier, subject to conditions, (a) to engage in foreign air transportation of persons, property, and mail:

(1) Between the coterminal points Mexico City, Acapulco, Guadalajara, Puerto Vallarta, Mazatlan, Mexicali,

[1] Order 77-12-52, approved December 8, 1977.

[2] Chicago, Corpus Christi, Dallas, Denver, Fort Worth, Kansas City, Laredo, Los Angeles, Miami, St. Louis, San Antonio, and San Juan.

[3] A copy of the application has been transmitted to the President pursuant to section 801 of the Act.

[4] Memorandum of Consultations and amendments of December 19, 1977, implemented on January 20, 1978.

[5] By diplomatic note dated January 30, 1978.

[6] Order 77-12-52, approved December 8, 1977.

V 4 3 — 8 6

and Hermosillo, Mexico, and the coterminal points Los Angeles, San Francisco, and Oakland, Calif., and Seattle, Wash.;

(2) Between the coterminal points Mexico City, Gauadalajara, Ciudad Juarez, Acapulco, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Denver, Colo.

(3) Between the coterminal points Mexico City, Acapulco, Gradalajara, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, Loreto, Oaxaca, Monterrey, and Tampico, Mexico, and the coterminal Points Harlingen, San Antonio, and Dallas/Fort Worth, Tex., and Memphis, Tenn.;

(4) Between the coterminal points Gradalajara, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Chicago, Ill.

(5) Between the coterminal points Mexico City, Acapulco, Oaxaca, Zihuatanejo, and Monterrey, Mexico, and the coterminal points Kansas City and St. Louis, Mo., Chicago, Ill., and Minneapolis/St. Paul, Minn., and beyond any of the U.S. coterminals to Toronto and Montreal, Canada;

(6) Between the coterminal points Mexico City, Acapulco, Gradalajara, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Atlanta, Ga.;

(7) Between the coterminal points Mexico City, Acapulco, Guadalajara, and Monterrey, Mexico, and the coterminal points Detroit, Mich., Cleveland, Ohio, Washington, D.C./Baltimore, Md., and Philadelphia, Pa., and beyond any of the U.S. coterminals to Toronto and Montreal, Canada;

(8) Between the coterminal points Mexico City, Merida, Cozumel, and Punta Canucun, Mexico, and the terminal point San Juan, Puerto Rico;

(9) Between the coterminal points Cozumel, and Punta Cancun, Mexico, and the terminal point Miami, Fla.;

(10) Between the coterminal points Mexico City, Merida, Cozumel, and Punta Cancun, Mexico, and the terminal point Tampa, Fla.;

(11) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the terminal point Dallas/Fort Worth, Tex.;

(12) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the coterminal points Chicago, Ill., and Minneapolis/St. Paul, Minn.; and

(13) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the coterminal points Detroit, Mich., Cleveland, Ohio, and Philadelphia, Pa.; and

(b) to engage in charter trips in foreign air transportation subject to the terms, conditions, and limitations prescribed in Part 212 of the Board's Economic Regulations;

3. That the public interest requires that the exercise of the privileges granted by such amended permit shall be subject to the terms, conditions, and limitations contained in the specimen form of permit attached to this order, and to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board;

4. That Compania Mexicana de Aviacion, S.A. is fit, willing, and able properly to perform the air transportation proposed in its application, and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board;

5. That an oral hearing is not required in the public interest;

6. That except to the extent granted, the application of Compania Mexicana de Aviacion, S.A. in Docket 32296 should be denied; and

7. That the amendment of Compania Mexicana de aviacion, S.A.'s foreign air carrier permit is not a "Major federal action significantly affecting the quality of the human environment" within the meaning of section 102 (2)(C) of the National Environmental Policy Act of 1969, and will not constitute a "major regulatory action" under the Energy Policy and Conservation Act of 1975 (EPACA), as defined in section 313.4 (a)(1) of the Board's Regulations.[1]

IT IS THEREFORE ORDERED THAT:

1. All interested persons are directed to show cause why the Board should not, subject to the approval of the President under section 801 of the Act, make final its tentative findings and conclusions and issue a foreign air carrier permit in the form attached to Compania Mexicana de Aviacion S.A.;

2. Any interested person having objection to the issuance of an order making final the Board's tentative findings and conclusions and issuing the permit shall, within 15 days after the adoption of this order, file with the Board and serve upon the persons named in paragraph 5, a statement of objections specifying the part or parts of the tentative findings and conclusions objected to, together with a summary of testimony, statistical data and such evidence expected to be relied upon in support of the statement of objections. If an oral hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such hearing which cannot be established in written pleadings;

3. If timely and properly supported objections are filed, further consideration will be given the matters and issues raised by the objector before further action is taken by the Board; *Provided*, That the Board may proceed to enter an order in accordance with its tentative findings and conclusions set forth in the order if it determines that there are no factual issues present that warrant the holding of an oral hearing;[2]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Secretary shall enter an order which, subject ot the approval of the President, (1) shall make final the Board's tentative findings and conclusions set forth in this order, and (2) shall issue an amended foreigh air carrier permit to the applicant in the specimen form attached; and

5. This order shall be served upon Compania Mexicana de Aviacion, S.A.; the Ambassador of Mexico in Washington, D.C.; the United States Departments of State and Transportation; American Airlines, Inc.; Braniff Airways, Inc.; Eastern Air Lines.; Frontier Airlines; Hughes Airwest; Pan American World Airways, Inc.; Texas International Airlines, Inc.; and Western Air Lines, Inc.

This order will by published in the FEDERAL REGISTER and will be transmitted to the President.

All Members concurred except Chairman Kahn who did not participate.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

PERMIT TO FOREIGN AIR CARRIER (AS AMENDED)

Compania Mexicana De Aviacion, S.A. is authorized, subject to the following provision, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued under it, to engage in foreign air transportation of persons, property, and mail, as follows:

(1) Between the coterminal points Mexico City, Acapulco, Guadalajara, Puerto Vallarta, Mazatlan, Mexicali, and Hermosillo, Mexico, and the coterminal points Los Angeles, San Francisco, and Oakland Calif., and Seattle, Wash.;

(2) Between the coterminal points Mexico City, Guadalajara, Ciudad Juarez, Acapulco, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Dever, Colo.;

(3) Between the coterminal points Mexico City, Acapulco, Guadalajara, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, Loreto, Oaxaca, Monterrey, and Tampico, Mexico, and the coterminal points Harlingen, San Antonio, and Dallas/Fort Worth, Tex., and Memphis, Tenn.;

(4) Between the coterminal points Guadalajara, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Chicago, Ill.;

(5) Between the coterminal points Mexico City, Acapulco, Oaxaca, Zihuatanejo, and Monterrey, Mexico, and the coterminal points Kansas City and St. Louis, Mo., Chicago, Ill., and Minneapolis/St. Paul, Minn., and beyond any of the U.S. coterminals to Toronto and Montreal, Canada;

(6) Between the coterminal points Mexico City, Acapulco, Guadualajara, Zihuatanejo, Manzanillo, Puerto Vallarta, Mazatlan, San Jose del Cabo, La Paz, and Loreto, Mexico, and the terminal point Atlanta, Ga.;

(7) Between the coterminal points Mexico City, Acapulco, Guadalajara, and Monterrey, Mexico, and the coterminal points Detroit, Mich., Cleveland, Ohio, Washington, D.C./Baltimore, Md., and Philadelphia, Pa., and beyond any of the U.S. coterminals to Toronto and Montreal, Canada;

(8) Between the coterminal points Mexico City, Merida, Cozumel, and Punta Cancun, Mexico, and the terminal point San Juan, P.R.;

(9) Between the coterminal points Cozumel, and Punta Cancun, Mexico, and the terminal point Miami, Fla.;

(10) Between the coterminal points Mexico City, Merida, Cozumel, and Punta Cancun, Mexico, and the terminal point Tampa, Fla.;

(11) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the terminal point Dallas/Fort Worth, Tex.;

(12) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the coterminal points Chicago, Ill., and Minneapolis/St. Paul, Minn.; and

(13) Between the coterminal points Merida, Cozumel, and Punta Cancun, Mexico, and the coterminal points Detroit, Mich., Cleveland, Ohio, Philadelphia, Pa.

The holder shall be authorizeed to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by Part 212 of the Board's Economic Regulations.

This permits shall be subject to the condition that on routes 5 and 7 any flight which serves a point beyond the United States shall originate or terminate at a point in Mexico.

The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of Mexico for Mexican international air service.

This permit shall be subject to applicable provisions of any treaty, convention, or agreements affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and Mexico shall be parties.

The holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation of persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and addresses of the member insurers.

The initial tariff filed by the holder shall not set forth rates, fares and charges lower than those that may be in effect for any U.S. air carrier in the same foreign air transportation; *However*, This limitation shall not apply to a tariff filed after the initial tariff regardless of whether this subsequent tariff is effective before or after the introduction of the authorized service.

By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

The exercise of the privileges granted here shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall be effective on ———. Unless otherwise terminated at an earlier date pursuant to the terms of any applicable treaty, convention, or agreement, this permit shall terminate (1) upon the effective date of any treaty, convention, or agreement, or amendment thereto, which shall have the effect of eliminating the routes here authorized from the routes which may be operated by airlines designated by the Government of Mexico (or in the event of the elimination of any part of a route or routes here authorized, the authority granted shall terminate to the extent of such elimination), or (2) upon the effective date of any permit granted by the Board to any other carrier designated by the Government of Mexico in lieu of the holder hereof, or (3) upon the termination or expiration of the Air Transport Services Agreement between the Government of the United States and the Government of Mexico, effective August 15, 1960, as amended and extended: *Provided, however*, That if prior to the occurrence of the event specified in clause (3) of this paragraph, the operation of the foreign air transporation here authorized becomes the subject of any treaty, convention, or agreement to which the United States and Mexico are or shall become parties, then this permit is continued in effect during the period provided in such treaty, convention, or agreement.

The Civil Aeronautics Board, through its Secretary, has executed this permit and affixed the seal of the Board on ———.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-12053 Filed 5-2-78; 8:45 am]

---

[1] Our tentative finding is based upon the fact that the proposed amendment will not result in any significant change in the level of service at any United States point. Thus, our action will not constitute a major Federal action within the meaning of the National Environmental Policy Act of 1969. Moreover, Mexicana's projected near-term implementation of the authority sought would not result in a net annual increase in fuel consumption over 10 million gallons.

[2] Since provision is made for the filing of objections to this order, petitions for reconsideration will not be entertained.

DEPARTMENT OF COMMERCE

Economic Development Administration

CREWCO, INC., BRAVCO PRODUCTS, INC., AND CONAWAY-WINTER, INC.

Petitions for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from three firms: (1) Crewco, Inc., Highway 115, Cornelius, N.C. 28031, a producer of men's and boys' shirts (accepted April 26, 1978); (2) Bravco Products, Inc., 601 Washington Street, Lynn, Mass. 01901, a producer of soles for footwear (accepted April 27, 1978); and (3) Conaway-Winter, Inc., Park Street, P.O. Box 280, Willow Springs, Mo. 65793, a producer of infants' shoes (accepted April 27, 1978). The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the U.S. Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no latter than the close of business of the tenth calendar day following the publication of this notice.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

Maritime Administration

[Docket No. S-604]

DELTA STEAMSHIP LINES, INC.

Application

Notice is hereby given that Delta Steamship Lines, Inc. (Delta), by letter dated April 7, 1978, as supplemented on April 12, 1978, in connection with its application to acquire certain vessels and services from Prudential Lines, Inc. (Prudential), has requested interchange and transfer rights of vessels between services as they presently exist in the respective operating-differential subsidy contracts and between Delta's existing and prospective services as follows:

Four M-Class combination passenger-cargo vessels between services on Trade Routes Nos. TR 20, 2, and 4, and the service on TR 23, 24, and 25.

Eight C3 type and eight C4 type freight vessels (breakbulk) and three C9 and one C8 LASH type freight vessels between services on TR 14-2, 20, 2, and 4, and the service on TR 23, 24, and 25.

The specific services to which Delta's request would be applicable are as follows:

Trade Route No. 20—U.S. Gulf Coast/East Coast of South America—service provided by LASH and C3 type freight ships on minimum sailings of 26 and overall maximum of 77 for this service and Trade Route No. 14-2.

Trade Route No. 14-2—U.S. Gulf Coast/West Coast of Africa—service provided by C3 type freight ships with minimum of 24 sailings.

Trade Route No. 4—U.S. Atlantic/Venezuela—Netherlands West Indies—North Coast of Colombia range, Jamaica, Dominican Republic, Haiti, and Cuba (excluding Guantanamo Bay)—service provided by one LASH ship and C4 freight ships as required with minimum of 22 and maximum of 33 sailings.

Trade Route No. 2—U.S. Atlantic/West Coast of South America—service provided by C4 type freight ships with a minimum of 48 and maximum of 62 sailings.

Trade Routes Nos. 23, 24, and 25—U.S. Pacific/Pacific, Atlantic, and Caribbean areas of South America—service provided by C4 type freight ships and C4 type combination passenger-cargo ships with a minimum of 25 and a maximum of 42 sailings.

Existing vessel assignments and interchange and transfer privileges are as follows:

Delta: Three C9 LASH vessels assigned to TR 20 service Eight C3 type freight ships unassigned to specific service but may be interchanged or transferred between services on TR 14-2 and 20.

Prudential: One C8 LASH vessel assigned to TR 4 service Eight C4 type freight ships unassigned to specific service but may be interchanged or transferred between services on TR 2 and 4 and the service on TR 23, 24, 25. Four C4 combination passenger/cargo vessels (M-Class) assigned to the service on TR 23, 24, 25.

As used in this Notice the term "interchange" means the approximately simultaneous substitution of vessels. The term "transfer" means removal of a vessel from one service and placement into another. Delta proposes to exercise the interchange and transfer privileges in such a manner as to comply with the minimum and maximum sailing requirements specified for each subsidized service.

Any person, firm, or corporation having an interest in such application who desires to offer views and comments thereon for consideration by the Maritime Subsidy Board should submit them in writing, in triplicate, to the Secretary, Maritime Subsidy Board, Washington, D.C. 20230, by the close of business on May 11, 1978.

The Maritime Subsidy Board will consider views and comments and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

By Order of the Maritime Subsidy Board.

Dated: April 26, 1978.

JAMES S. DAWSON, Jr.,
Secretary.

[3510-22]

National Oceanic and Atmospheric Administration

ATLANTIC GROUNDFISH

Revision of Quarterly Quotas

This is to announce that the Assistant Administrator for Fisheries has determined from statistics maintained by the National Marine Fisheries Service that the quarterly quotas for cod, haddock, and yellowtail flounder (west of 69° W. longitude) were exceeded during the first quarter (January 1-March 31) of 1978. The amounts by which the quotas were exceeded were: Haddock, 1,705 metric tons; cod, Gulf of Maine, 392 metric tons; cod, other than the Gulf of Maine, 1,602 metric tons; and yellowtail flounder west of 69° W. longitude, 92 metric tons. Therefore, to ensure that the catch quotas for 1978 are not exceeded, the amount of the overage is deducted equally from the remaining three quarters of 1978. This action is effective immediately on May 3, 1978.

The revisions to the quarterly quotas made pursuant to 50 CFR 651.3(b)(2) (see FEDERAL REGISTER, March 31, 1978, page 13579) are as follows:

CATCH QUOTA

[In metric tons]

1. Haddock—	
Quarter:	
Apr. 1 to June 30	2,591
July 1 to Sept. 30	1,092
Oct. 1 to Dec. 31	1,362
2. Cod—	
GULF OF MAINE	
Quarter:	
Apr. 1 to June 30	1,629
July 1 to Sept. 30	1,289
Oct. 1 to Dec. 31	1,290
GEORGES BANK AND SOUTHERN NEW ENGLAND	
Quarter:	
Apr. 1 to June 30	5,596
July 1 to Sept. 30	5,096
Oct. 1 to Dec. 31	5,106
3. Yellowtail flounder (west of 69° West Longitude)—	
Quarter:	
Apr. 1 to June 30	800
July 1 to Sept. 30	730
Oct. 1 to Dec. 31	928

Dated: April 27, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

EMERGENCY ENERGY ASSISTANCE PROGRAM

Funding Declarations

The Director of the Community Sevices Administration (CSA) has found, based on criteria indicated in Column[1] (5) of Appendix A that Energy Related Emergencies have existed since the dates indicated in Column (3).

Therefore, eligible grantees who cover those areas indicated in Column (2) will proceed as follows:

[1]All references to "column" refer to Appendix A to this Notice.

Grantees who receive funds by Letter of Credit may withdraw and expend funds in the amount approved in Column (4) or that portion of that amount which have been granted to them under Program Account 80, Emergency Energy Assistance Program.

OR

Grantees who normally receive checks are being informed that their checks are being forwarded by the Treasury Department for the total amount of the EEAP grant. However, these grantees immediately may begin obligating funds against this grant in the amount appropriated in Column (4) and from the date indicated in Column (3).

Column (3) contains the earliest date to our knowledge which provided the basis for a finding by the Director of CSA that an Energy Related Emergency existed. However, any eligible grantee within those areas covered in Column (2) may submit evidence to support the existence of Energy Related Emergencise which existed between December 31,1977, and the date given in Column (3) for a finding by the Director of CSA. (See CSA Notice 6143-7, Section 4 or § 1061. 51-3 in the FEDERAL REGISTER (43 FR 9476).)

Request for supplemental (additional) funds shall be made in accordance with the provisions of Section 11.c. of CSA Notice 6143-7.

WILLIAM W. ALLISON,
Acting Director.

DEPARTMENT OF DEFENSE

OFFICE OF THE SECRETARY

DEFENSE SCIENCE BOARD TASK FORCE ON CRUISE MISSILES

Advisory Committee Meeting

The Defense Science Board Task Force on Cruise Missiles will meet in closed session on June 8 and 9, 1978, at the Pentagon, Arlington, Va.

The Mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on overall research and engineering policy and to provide long-range guidance to the Department of Defense in these areas.

The Task Force will provide an analysis of the major issues concerning strategic cruise missile employment, and potential defenses to the U.S. deployment of cruise missile systems.

In accordance with section 10(d) of Appendix I, Title 5, U.S. Code, it has been determined that this Task Force meeting concerns matters listed in section 552b(c) of Title 5 of the U.S. Code, specifically subparagraph (1) thereof, and that accordingly, this meeting will be closed to the public.

Dated: April 28, 1978.

MAURICE W. ROCHE,
Director, Correspondence and Directives, DOD/WHS.

[FR Doc. 78-12003 Filed 5-2-78; 8:45 am]

[3128-01]

DEPARTMENT OF ENERGY

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Intention To Issue Prohibition Orders to Certain Major Fuel Burning Installations

The Department of Energy (DOE) hereby gives notice of its intention to issue Prohibition Orders, pursuant to the authorities granted it by section 2 (a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended, and title 10, Code of Federal Regulations (10 CFR), parts 303 and 305 to the following installations:

Docket No.	Owner	Installation	Unit No.	Location
OCU-1112-1	Ash Grove Cement Co.,	Chanute Plant	1	Chanute, Kans.
OCU-1112-2	do	do	2	Do.

DOE hereby also gives notice of the opportunity for oral and written presentation of data, views, and arguments by interested persons regarding the proposed Prohibition Orders.

The proposed orders would prohibit the above-named installations from burning natural gas or petroleum products as their primary energy source.

Prior to issuance of a Prohibition Order to an installation, section 2(a) of ESECA and 10 CFR 303.36(b) and 305.4(b) require that DOE find that the installation had the capability and necessary plant equipment to burn coal as of June 22, 1974, or thereafter acquired or was designed with the capability and necessary plant equipment to burn coal. A Prohibition Order may not be issued unless DOE can find that the prohibition of the utilization of natural gas or petroleum products as a primary energy source is practicable and consistent with the purposes of ESECA and that coal and coal transportation facilities will be available during the period the Prohibition Order will be in effect. DOE's proposed findings, as well as its proposed conclusions and rationale with respect to these findings, for the above-named the installations are set out in the Appendix to this notice. These findings, conclusions and rationale may be amended as a result of comments received by DOE pursuant to this notice and other information available to DOE. The findings, conclusions and rationale will be included, with any amendments, in any Prohibition Order that is issued.

Upon completion of the proceedings described in this notice, DOE may determine to issue Prohibition Orders to both or either one of the above-named installations. The Prohibition Orders will not become effective, however, until (1) either (a) the Administrator of the Environmental Protection Agency (EPA) notifies DOE, in accordance with section 2 of the Energy Supply and Environmental Coordination Act of 1974 and section 112(b) of the Clean Air Act (CAA) Amendments of 1977, that the installations are able to burn coal and to comply with all applicable air pollution control requirements without a delayed compliance order under section 113(d)(5) of the Clean Air Act, as amended, or (b) if such notification is not given by EPA, the date that the Administrator of EPA certifies, pursuant to section 2 of the Energy Supply and Environmental Coordination Act of 1974 and section 112(b) of the Clean Air Act (CAA) Amendments of 1977, is the earliest date that the installations will be able to comply with all applicable requirements of the Clean Air Act, as amended, and (2) DOE has considered the environmental impact of making the orders effective, pursuant to 10 CFR 208.3(a)(4) and 305.9, and has served the affected installations with Notices of Effectiveness, as provided in 10 CFR 303.10(b), 303.37(b), and 305.7. The date the Prohibition Order will be effective will be stated in the Notice of Electiveness.

10 CFR 305.9 requires that, prior to issuance of a Notice of Effectiveness to an installation, DOE shall perform an analysis of the environmental impact of the issuance of such Notice of Effectiveness. That analysis shall result in either (1) issuance of a declaration that the Prohibition Order will not, if made effective by issuance of a Notice of Effectiveness, be likely to have a significant impact on the quality of the human environment, or (2) the preparation by DOE of an environmental impact statement covering significant site-specific impacts that are likely to result from the Prohibition Order and that have not been adequately addressed in the Final Programmatic Environmental Impact Statement or in other official documents made publicly available. If DOE prepares an environmental impact statement covering significant site-specific impacts resulting from making a Prohibition Order effective, the statement shall be prepared and published for comment in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.) prior to issuance of a Notice of Effectiveness. Interested persons may request a public hearing pursuant to 10 CFR 303.173 to comment on the contents of a draft environmental impact statement. With respect to comments regarding any impact on air quality that might result from a proposed Prohibition Order, however, it should be recognized that ESECA has assigned to EPA the primary responsibility for analyzing the effect of any such order on the Nation's air quality and for determining the applicable air pollution control requirements that apply to the installation that has been issued an order. It is expected that an installation to which a Prohibition Order is issued may be eligible to apply for a delayed compliance order pursuant to section 113(d) of the CAA, 42 U.S.C. 7413(d). If EPA decides to issue a delayed compliance order, it must also provide an opportunity for a public hearing. Enclosed with the Notice of Effectiveness may be a compliance reporting schedule to insure that the installation will be able to comply with the prohibition

M Y 3 — 7 8 UMI

of the burning of natural gas or petroleum products as a primary energy source on the effective date specified in the Notice of Effectiveness.

Public comment on the proposal to issue Prohibition Orders to the installations listed above is invited in the form of written and oral presentation of data, views, and arguments. Comments should relate to individual docket numbers and should make clear to which docket number the individual comment is addressed.

Comments should address (1) the adequacy and validity of each of the proposed findings and the conclusions and rationale in support of these findings, (2) the environmental impact of making effective a Prohibition Order, including any site-specific environmental impacts, and (3) any other aspects or impacts of the proposed Prohibition Order believed to be relevant.

Pursuant to 10 CFR 303.173 (a) and (d) and 305.5, DOE hereby announces that a public hearing to receive oral presentation of data, views, and arguments of interested persons will be held beginning at 10 a.m., on May 18, 1978, at the Federal Building, Room 140, 601 East 12th Street, Kansas City, Mo. 64106. Any person who has an interest in the subject of the hearing or who is a representative of a group or class of persons which has an interest in the subject of the hearing may make a written request, or a verbal request if confirmed in writing, for an opportunity to make an oral presentation. That request should be directed to Jane E. Miller, DOE Region VII, 324 East 11th Street, Kansas City, Mo. 64106, 816-374-3116. The request should be received before 4:30 p.m., May 11, 1978. The request should describe the person's interest in the issue(s) involved; if appropriate, it should state why the person is an appropriate representative of the group or class of persons which has such an interest; it should give a concise summary of the proposed oral presentation and a phone number where the person may be contacted through May 17, 1978. Speakers should submit ten (10) copies of their oral presentation if possible, unless such presentation is less than five (5) pages, in which case only one copy is required, to Jane E. Miller, Department of Energy, Region VII, 324 East 11th Street, Kansas City, Mo. 64106, before 4:30 p.m., May 16, 1978. Speakers will be contacted by a DOE representative before 4:30 p.m., May 15, 1978, to confirm receipt of the written request.

Detailed technical data, views, and arguments should be contained in a written submission in support of the oral presentation. The oral presentation itself should be a summary of those written comments.

While DOE will endeavor to provide adequate opportunity to all who desire to speak, DOE reserves the right to limit the number of persons to be heard at the hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of time allocated to each presentation may be limited on the basis of the number of persons requesting to be heard. DOE will prepare an agenda that shall provide, to the extent possible, for the presentation of all relevant data, views, and arguments.

A DOE official will be designated to preside at the hearing which will not be a judicial or evidentiary hearing. During oral presentations only those conducting the hearing may ask questions. There will be no cross-examination. At the conclusion of all intitial oral presentations, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the intitial statements were made and will be subject to time limitations.

Any interested person may submit written questions to the presiding officer to be asked of any person making an oral presentation. The presiding officer will determine whether to ask the question, having first determined whether the question is relevant, and whether adequate time may be afforded for an answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and it, together with any written comments submitted in the course of the hearing, will be retained by DOE and made available for inspection and copying at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, and the DOE Regional Office, 324 East 11th Street, Kansas City, MO. 64106, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit written comments consisting of data, views, and arguments with respect to these proposed prohibition orders to Public Hearing Management, Box TC, Department of Energy, Room 2313, 2000 M Street NW., Washington D.C. 20461.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Orders for the Chanute Plant Installations." Fifteen copies should be submitted.

All written comments received by 4:30 p.m., June 5, 1978, all oral presentations, and all other relevant information submitted to or available to DOE will be considered by DOE prior to issuance of a prohibition Order.

Any information or data considered to be confidential by the preson furnishing it must be so identified and submitted in writing in accordance with 10 CFR 303.9(f). DOE reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

Copies of the regulations implementing section 2 (a) and (b) of ESECA (10 CFR Parts 303 and 305) are available from the following DOE Regional Offices:

Region, Address, and Phone

I—Robert W. Mitchell, Acting Regional Representative, 150 Causeway Street, Room 700, Boston, Mass. 02114, 617-223-3701.

MFBI PROHIBITION ORDER CANDIDATE IDENTIFICATION AND SELECTION METHODOLOGY

Major fuel burning installation (MFBI) prohibition order candidates are selected in a two-part process which commenced in 1975 with an identification of the potential universe of MFBI's in order to determine which MFBI's might be subject to such orders. Analysis of individual potential MFBI prohibition order candidates selected from this universe proceeds on a continuous basis.

I. DETERMINATION OF CANDIDATE UNIVERSE

By FEDERAL REGISTER notice of March 20, 1975 (40 FR 12706) MFBI's with design firing rates in excess of 100 MMBTU's per hour were required

V 4 3 — 8 6

to provide basic identifying information so that the universe of potential prohibition order candidates could be determined. (Regulations published on May 9, 1975 (40 FR 20463) adopted the 100 MMBTU's per hour design firing rate as the minimum size MFBI that would be eligible for a prohibition order.)

On April 18, 1975 (40 FR 17328), notice was published in the FEDERAL REGISTER indicating that a questionnaire entitled "Major Fuel Burning Installation Coal Conversion Report" (Form FEA C-602-S-O), would be addressed to each then known MFBI for the purpose of obtaining additional information needed to help determine whether the MFBI's would be candidates for prohibition orders. Questionnaires were mailed to those MFBI's who responded to the March 20, 1975, FEDERAL REGISTER notice and to other MFBI's identified through data provided by the regional personnel of the Federal Energy Administration, the Environmental Protection Agency (EPA), by other Federal agencies, and through contact with trade associations. A total of 822 parent companies responded to the survey, identifying 3,482 installations and 6,289 individual units.

The initial survey provided historical information on quantity and characteristics of fuel use and preliminary pollution control data relative to the facilities in question.

Compilation and evaluation of this information led to development of a supplemental questionnaire (Form FEA C-602-S-1) to obtain data on the financial condition of owners of MFBI's, including information from which the effects of a prohibition order on an individual company basis could be ascertained. Form FEA C-602-S-1 was also designed to provide a basis for subsequent analysis of the MFBI in terms of financial capability, additional capital investment costs resulting from a prohibition order, operating cost differentials, and coal transportation availability.

An initial mailing of this supplemental questionnaire was sent in June 1976 to owners of 161 installations encompassing 281 individual units. Most of the supplemental questionnaires (involving 138 installations and covering 246 individual units) were sent to owners of MFBI's identified in the first questionnaires (Form FEA C-602-S-O) as having coal burning capability, and which in 1974 burned at least 150,000 barrels of oil or 921,000,000 cubic feet of natural gas, or a Btu equivalent combination. Those MFBI's identified on the first questionnaires (Form FEA C-602-S-O) as having coal burning capability but which reported fuel consumption of less than 150,000 barrels of oil, or 921,000,000 cubic feet of natural gas, or a Btu equivalent combination in 1974, were not required to complete the supplemental questionnaires at that time, but were deferred in view of the limited resources available to the program office to review the anticipated responses. These MFBI's may be required to submit supplemental information in the future. The 246 individual MFBI's were considered first because of their potential for large fuel savings.

Additional supplemental questionnaires were sent to owners of 23 installations consisting of 35 individual units were the initial questionnaires (Form FEA C-602-S-O) had indicated the MFBI's intention to discontinue use of coal.

In September 1976, following receipt of responses to the supplemental questionnaire, the program office consulted with EPA to obtain their best estimate as to the means by which each reporting MFBI could burn coal while complying with all applicable air pollution control requirements. At that time, EPA indicated whether particular MFBI's would require upgrading or installation of electrostatic precipitators, installation of flue-gas desulfurization devices, or whether the MFBI could burn coal that would conform to air pollution control requirements without pollution control equipment.

II. SITE SPECIFIC ANALYSIS.

DOE has continued to collect supplemental data relating to the 161 subject sites and is conducting, on a continuing basis, technical analyses to determine whether individual MFBI's can be considered as potential candidates for issuance of a notice of intention (NOI) to issue a prohibition order. As part of its individual analyses, DOE considers the following data regarding an MFBI's potential amenability to receipt of an NOI:

(a) The expected remaining useful life of the combustor, including both DOE's and the potential candidate's estimates;

(b) The combustor unit's capacity;

(c) Fuel consumption for 1975 and for other years, where available;

The last year coal was burned by the combustor;

(e) Costs of converting to coal, including pollution control equipment costs, of any, that would be required (potential candidate's and DOE's estimates);

(f) Type of pollution control equipment, if any, required (potential candidate's and EPA's estimates); and

(g) Other relevant factors, such as the percent of sulfur content in coal that would be required to insure compliance with environmental standards.

In June 1977, proir to the issuance of several prohibition orders to MFBI's the program office published in the FEDERAL REGISTER notices setting forth the methodology employed in selection the initial list of MFBI candidate facilities. The number of potential candidate facilities at the time was a function of two factors: First, the number of potential candidates was limited so as to be commensurate with the resources available to the program office, and second, the largest consumers of oil and natural gas which were potentially convertible to coal as their primary energy source were to be analyzed first, while consideration of the remainder of the original coal-capable universe was deferred.

In June 1977 certain MFBI's were specifically deferred from consideration as potential candidates because (a) their remaining useful life on January 1, 1978, was less than 1 year; (b) their utilization factor was less than 20 percent; (c) space required for coal use at the installation was inadequate or unavailable; (d) since filing the FEA C-602-S-O, the MFBI had been converted to coal as its primary energy source or the owner had certified that it would be so converted in the near future; (e) the MFBI had used significantly less than 2×10^{12} BTU's of oil or natural gas in the latest year for which fuel data was available, and which if converted to coal, would use less than 100, 000 tons of coal annually.

Certain other MFBI's were deferred for other reasons, e.g. the proposed findings required by 10 CFR 305.4 could not be established with the information available at that time. Those MFBI's which were not deferred for any of the foregoing reasons were considered as potential candidates for prohibition orders. NOI's were issued where proposed findings were made and prohibition orders were issued to those MFBI's for which the proposed findings were perfected.

Since June 1977 the program office has continued to analyze individual MFBI's which were deferred at that time. All MFBI's which have previously received NOI's have been eliminated from further consideration, whether or not a prohibition order was subsequently issued. Those MFBI's which are now being reviewed as potential candidates include:

(a) All units which have not previously received NOI's and which were explicitly deferred from consideration in the June 1977 methodology;

(h) All units deferred from consideration as potential candidates for various technical or other reasons not specifically mentioned in the June 1977 methodology.

DOE has determined that MFBI's to which the following criteria are applicable are appropriately deferred from consideration as prohibition order candidates at this time:

(a) The remaining useful life of the MFBI on January 1, 1979, will be less than 1 year;

(b) The utilization factor of the unit is less than 20 percent;

(c) The space required for coal use at the installation is inadequate or unavailable;

(d) Since filing the original questionnaire (FEA C-602-S-O), the MFBI has been converted to coal as its primary energy source, or the owner has certified that the unit will be so converted in the near future;

(e) Compliance with a prohibition order by the MFBI would result in the use of less than 60,000 tons of coal per year.

Items (a) or (b) above would prevent DOE from finding that the burning of coal by the MFBI would be practicable. With respect to criteria (a) specifically, DOE assumes a 40-year useful life for a combustor, based on general industry averages, unless the owner reports a longer useful life. DOE has decided not to analyze MFBI's that have already converted to coal since the basic purposes of ESECA have already been accomplished by such conversions and DOE has concluded that its resources would be better spent by concentrating on those MFBI's which are not now burning coal as their primary energy source and which do not plan to convert within the near future. DOE has deferred MFBI's which do not have the potential for large savings of natural gas or petroleum.

If, upon consideration, DOE determines through analysis of the summary information submitted, that issues have been raised which will require further investigation, DOE has in the past conducted, and will continue in the future to conduct site specific visits. Site visits are employed in circumstances in which large discrepancies are observed to exist between DOE's and the MFBI's cost estimate, where unusual technical problems have been presented by the MFBI with respect to using coal and when other disparities exist between the information submitted to DOE by the MFBI and that developed independently by DOE. Information developed during a site visit may serve either as evidence that the combustor should be eliminated or deferred or that the situation warrants DOE's continuation of its analysis.

For MFBI's not eliminated through any of the above criteria, DOE calculates the net operating cost differential between using coal as the MFBI's primary energy source and using either natural gas or petroleum products.

A. *Calculation of net operating cost differential.* The net operating cost differential consists of the sum of: (1) Annualized increased capital investment costs required for conversion to coal, (2) differences in operating and maintenance costs (including the fuel cost differential), and (3) the potential tax consequences attendant to conversion. Initially, DOE performs calculations in determining the net operating cost differential, using cost figures supplied by the MFBI and using DOE's own estimates. When the MFBI's figures are within a reasonable range of DOE's estimates, DOE generally accepts the MFBI's figures. Gross discrepancies are examined in more detail by DOE to determine the reasonableness of the differing estimates and to reconcile differences.

The elements of the three parts of the net operating cost differential are explained below:

1. *Capital investment costs.* The primary element in this part of the cost of equipment acquisition and refurbishment required for conversion to coal, including refurbishment or acquisition of pollution control equipment. In determining the estimated annual increase in fixed costs to the owner resulting from such capital investment, DOE calculates the annual depreciation of equipment costs over the expected remaining useful service life of the MFBI (including consideration of the investment tax credit) and adds the estimated annual cost of capital.

Annual depreciation is calculated as follows:

a. Determine cost of new equipment (including pollution control equipment) minus investment tax credit of 10 percent.

b. Divide the figure in a, above, by the expected remaining useful life of the MFBI after conversion is completed.

DOE presumes that the MFBI's determination of remaining useful life is correct if it results in a total useful life of at least 40 years. Otherwise, DOE will conduct a more detailed examination of the MFBI.

Calculation of the approximate annual cost of capital is as follows:

a. New and refurbished equipment costs minus the investment tax credit, plus

b. Twice the cost of land acquisitions required for conversions to coal burning.

c. The total of a. and b. is divided by 2 and then multiplied by a 10 percent interest rate.

2. *Operating and maintenance costs.* The primary factor considered in this calculation is the annual fuel cost differential which represents the difference between operating the MFBI with coal as its primary energy source in lieu of petroleum products or natural gas. (If the current supply of natural gas to the MFBI is curtailed, then the calculation of the fuel cost differential does not include natural gas as part of the MFBI's current fuel use to the extent of that curtailment. In such cases the NOCD is calculated on the basis of actual fuel usage.) DOE has generally accepted the coal price reported by the MFBI's. If DOE considered the stated price to be unreasonable, it further examined coal prices based upon an analysis of likely coal sources. Projected coal use after conversion was calculated by converting latest annual fuel use data to its BTU equivalent for coal.

Determination of the differential relating to labor costs and the differential relating to other operating and maintenance costs was based upon estimates supplied by the MFBI's.

3. *Potential tax effects.* Federal and State tax rates have been applied to the net operating cost differential to determine maximum potential tax effects resulting from a Prohibition Order.

If the NOCD for an MFBI is positive, i.e., projects an increase in annual costs, then a calculation of the cost per barrel of oil saved is performed by dividing the NOCD by the number of barrels of oil actually used on an annual basis (or, if the MFBI was a natural gas user, the number of barrels of oil which would be required to replace the gas use on an equivalent BTU basis). This figure (cost per barrel of oil saved) is then considered in terms of the number of barrels of oil and/or MCF of natural gas that would be saved by issuance of a Prohibition Order, the effect of the NOCD on the MFBI owner's operating expenses, as well as various environmental and other factors in reaching the final determination as to which candidates should receive an NOI.

It is to be noted that much of the information used by DOE to make its practicability findings is arguably confidential under 18 U.S.C. 1905. Therefore, such information has not appeared in the Appendix to the NOI. The calculations have been explained in each case and the data are available to the representatives of the owner of the MFBI.

The decision whether to issue an NOI is made as the calculations and analyses described above are completed. Following the issuance of an NOI are hearings and a comment period designed to elicit data, views and arguments pertinent to the findings ESECA requires DOE to make prior to the issuance of a Prohibition Order. If no reason not to issue an order is presented to or discovered by DOE, a Prohibition Order is issued to the candidate.

Any questions regarding this Notice should be directed to DOE National Headquarters as follows: Mr. Walter Romanek, Director, Division of Coal Utilization, Department of Energy, Code OCU (Prohibition Orders: Ash Grove Cement Co., Chanute Plant, Chanute, Kansas Installations, Docket Numbers OCU-1112-1 and 1112-2), Washington, D.C. 20461, telephone 202-254-3910.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 et seq.), as amended by Pub. L. 95-70; Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.), as amended by Pub. L. 95-70; Department of Energy Organization Act (Pub. L. 95-91); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267).)

Issued in Washington, D.C. April 27, 1978.

BARTON R. HOUSE,

Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE PROHIBITION ORDERS

ESECA and DOE regulations implementing the statute (10 CFR 303 and 305) require DOE to make certain findings before issuing a Prohibition Order to a major fuel burning installation (MFBI).[1] DOE's proposed findings are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

[1]Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 pursuant to the Department of Energy Organization Act, from the Federal Energy Administration (FEA) to the Department of Energy (DOE).

Docket No.	Owner	Installation	Unit No.	Location
OCU-1112-1	Ash Grove Cement Co.	Chanute Plant	1	Chanute, Kans.
OCU-1112-2	do	do	2	Do.

These findings, which are now proposed by DOE, are based on the information that has been provided to and developed by DOE prior to the issuance of this Notice of Intention (NOI) to issue Prohibition Orders.

Ash Grove Cement Co. shall be referred to as the "owner" and as "Ash Grove." The Chanute Plant Units 1 and 2 shall be referred to as the "MFBI's" and as "Chanute 1 and 2."

I. CAPABILITY AND NECESSARY PLANT EQUIPMENT TO BURN COAL.

DOE proposes to find that on June 22, 1974, Chanute 1 and 2 had, or thereafter acquired or were designed with, the capability and necessary plant equipment to burn coal. This proposed finding is based on the facts and interpretations stated below:

A. Ash Grove, in a Major Fuel Burning Installation Coal Conversion Report, Section II, Questions 6, and 12-14, (Form FEA C-602-S-0) dated May 20, 1975, indicated that the MFBI's had in place on June 22, 1974, kilns that were capable of burning coal. The kilns had been designed and constructed or modified to burn coal as their primary energy source, notwithstanding the fact that on June 22, 1974, and thereafter, these MFBI's may not have burned coal as their primary energy source.

B. Based on information Ash Grove filed with DOE dated July 28, 1976, and other information available to DOE, the following plant equipment and facilities at Chanute 1 and 2 would have to be acquired or refurbished in order for these MFBI's to burn coal as their primary energy source:

1. Front-end Loader.
2. Additional Storage.
3. Upgraded Precipitator.

C. DOE proposes to find that on June 22, 1974, Chanute 1 and 2 had or thereafter acquired all other significant plant equipment and facilities associated with the burning of coal.

D. Within the meaning of ESECA and the regulations promulgated pursuant thereto, the absence of any one or a combination of the equimpent or facilities listed in paragraph B, above, is not grounds for concluding that Chanute 1 and 2 lacked the capability and necessary plant equipment to burn coal on June 22, 1974, or were not designed with, or did not thereafter acquire, such capability.

II. THE BURNING OF COAL IN LIEU OF NATURAL GAS OR PETROLEUM PRODUCTS IS PRACTICABLE AND CONSISTENT WITH THE PURPOSES OF ESECA.

DOE proposes to find that the burning of coal in lieu of petroleum products or natural gas at Chanute 1 and 2 is practicable and consistent with the purposes of ESECA. This proposed finding is based upon an analysis by DOE of the fuel consumption of these kilns for the period 1973-1975, the remaining useful service life of the kilns after conversion, the net operating cost differential that would result from compliance with Prohibition Orders, as well as the facts and interpretations referenced below:

A. *The burning of coal is practicable*—1. *Anticipated fuel supplies, curtailment of natural gas supply.* Based on information obtained from the Federal Energy Regulatory Commission, the natural gas supplier, and in certain cases, the owner, DOE believes that the MFBI's will experience a substantial curtailment of their present supply of natural gas. This curtailment will result in their increased reliance on alternate fuels.

2. *Costs associated with burning coal*—a. *Capital investment costs.* The total estimated initial capital investment costs, including financing costs, that would result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal at Chanute 1 and 2 have been determined.

This determination was based on existing DOE information and analysis as well as information filed with DOE by the owner. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

b. *Annual operating and maintenance costs.* The expected increase in operating and maintenance costs, exclusive of fuel costs, that would result from the burning of coal has been calculated based on information supplied by the owner or otherwise acquired by DOE.

c. *Fuel costs.* Based on an analysis of annual fuel consumption and fuel cost information supplied by the owner and/or, in appropriate circumstances, upon DOE's fuel cost estimates, DOE has determined that the burning of coal in lieu of natural gas at Chanute 1 and 2 will result in an increase in annual fuel costs.

d. *Net operating cost differential.* Based on the factors stated in paragraphs A.2.a.–c., above, as well as the expected remaining useful life of the kilns after conversion, DOE has determined that the net annual operating cost differential ("NOCD") (which represents the difference between operating the kilns with coal and alternate fuel(s) as their primary energy source), resulting from the conversion of Chanute 1 and 2 will represent an annual cost increase of $233,140.

3. *Reasonableness of costs of conversion.* The following analysis of the costs of conversion provides the basis for deciding that compliance with the proposed orders is not unreasonable.

In calculating the NOCD, DOE considered the present annual feul usage. The net annual operating cost increase for these MFBI's resulting from operating on coal as the primary energy source, instead of natural gas, will be approximately $233,140.

Although conversion to the burning of coal would be expected to increase the costs incurred by Chanute 1 and 2 by $233,140 per year, DOE proposes to find that such increased cost, per MCF of natural gas saved, is not unreasonable, given the purposes of ESECA. This determination is based on consideration of the substantial potential natural gas savings that would result from conversion to coal. The determination that the costs of burning coal instead of natural gas would not be unreasonable is further supported by consideration of such costs in relation to the expected remaining useful life of the MFBI's, the size and resources of the owner as examined in the following discussion of financial capacity, and the nature of the expected operations of the MFBI's.

The additional costs that would be incurred if DOE were to prohibit the burning of natural gas or petroleum products as the primary energy source at Chanute 1 and 2 would only be incurred for a limited period of time in view of the anticipated availability of natural reserves of and productive capacity for natural gas. These factors point up the likelihood that Chanute 1 and 2 will experience a significant curtailment of its present natural gas supply in the future, so that DOE has concluded that the cost of burning coal in lieu of natural gas is not unreasonable. (*Final Report Oil and Gas Resources, Reserves, and Productive Capacities Volumes I and II*, Federal Energy Administration, October 1975.)

4. *Finanical capability of the owner.*—a. *Recovery of capital investment.* DOE proposes to find that compliance with Prohibition Orders by Chanute 1 and 2 would be economically feasible. DOE's analysis took into consideration the financial capability of the owner and is based upon the owner's finanical position as reported in Dun and Bradstreet. Where necessary, DOE performed an independent analysis of the owner's financial capability, considering such factors as the owner's current financial statement and the additional capital investment required for the owner to comply with this NOI and all other NOI's which are currently under consideration, as well as additional capital investment costs related to all other outstanding Notices of Intention, to date, if any, to issue Prohibition or Construction Orders, and from all Prohibition or Construction Orders, if any, issued to date under authority of Section 2 (a) and (c) of ESECA to MFBI's owned by Ash Grove. DOE related these additional capital investment costs to the total capitalization of Ash Grove and the remaining useful life after conversion of Chanute 1 and 2.

DOE does not consider the effect of the added capital investment costs to represent an unreasonable burden given the financial capabilities of Ash Grove to assume such costs.

b. *Total annual costs associated with conversion.* The total estimated annual increase in costs (amortized increased capital investment costs and other costs, exclusive of fuel costs) associated with the burning of coal as opposed to natural gas attributable to compliance with this NOI and all other NOI's which are currently under consideration has been determined. DOE has also taken into consideration total annual costs resultintg from compliance with all other outstanding Notices of Intention, to date, if any, to issue Prohibition or Construction Orders, and from all Prohibition or Construction Orders, if any, issued to date under authority of Section 2 (a) and (c) of ESECA to Ash Grove MFBI's.

Ash Grove's total annual costs after conversion will increase by $233,140.

B. *Consistency with the purposes of ESECA.* Because the issuance of Prohibition Orders to Chanute 1 and 2 will discourage the use of natural gas or petroleum products and encourage the increased use of coal, DOE proposes to conclude that this action would be consistent with the purpose of ESECA to provide a means to assist in meeting the essential needs of the United States for fuels.

On the basis of the environmental analysis which DOE is required to conduct prior to issuance of a Notice of Effectiveness of a Prohibition Order, as well as the necessity for these MFBI's to comply with the Clean Air Act and other applicable invironmental protection requirements, DOE proposes to conclude that Prohibition Orders to Chanute 1 and 2 would be consistent with the purposes of ESECA to provide for a means to assist in meeting the essential needs of the Unites States for fuels in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment.

III. *Coal and coal transportation facilities will be available to these MFBI's during the period until December 31, 1984.*

A. *Coal availability.* 1. *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the foreseeable future. U.S. Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 Billion tons, over half of which is currently technically and economically recoverable (Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 100 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, DOE has examined several studies referenced herein, which together provide the best current evidence as to coal availability for the period ending December 31, 1984.

2. *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned national coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient prodiction of coal to meet the total national demand through 1980. Beyond 1980, DOE does not have data fully developed for new production plans because few coal producers have firm expansion plans that extend that far into the future. The statistics supporting more recent mine developments and enumerating updated data are currently in the process of revision.

a. *National coal production.* It is conservatively estimated that it will be possible to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1978	791.8
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.8

The figures shown above are derived from FEA's Coal Mine Expansion Study (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential. Another FEA study, "Availability of Potential Coal Supply Through 1985 by Quality Characteristics," August 1976 (hereafter "Coal Market Survey") and a DOE study, "Coal Availability by Characteristics for Fuel Conversion Orders," April 17, 1978, indicate current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

b. *National coal demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from DOE action under the authority of Section 2(a) of ESECA, is as follows (FEA 1976 National Energy Outlook):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

c. *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding Notices of Intention to issue Prohibition Orders to date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA is approximately the following (Coal and Transportation Availability for Major Fuel Burning Installations Coal Conversion Orders: Methods and Approach, May 20, 1977, as amended April 10, 1978) (hereafter "Methods Report"):

Year:	*Demand (million tons)*
1978	10.050
1979	14.492
1980	21.064
1981	23.607
1982	30.043
1983	30.043
1983	30.043

3. *Characteristic coal production and demand.* FEA's "Coal Market Survey" identifies coal of specific quality characteristics available for use at these MFBI's. The survey is based on data from 31 mining companies that supplies useful information on 96 mining units. Responses from these companies identified planned production of coal which was not committed to a specific buyer. For those companies which did not respond to the survey, FEA estimated their uncommitted planned production based on their 1974 production.

a. *Characteristic coal requirements for these MFBI's.* DOE has determined that kilns of the type used at Chanute 1 and 2 will be able to burn coal of the following characteristics and comply with all applicable air pollution control requirements.

Btu's/lb.—12,500 min.
Ash—12% max.
Volatile—33% min.
Ash softening temp.—2,200 (°F) min.
Sulfur—2-3% max. (approx.)

b. *Characteristic coal demand from these MFBI's.* The potential demand for coal, of the type described above, which would be used by these MFBI's is estimated to be as follows:

Year:	*Demand (1,000 tons/yr)*
1980 (and after)	72.74

c. *National planned production, characteristic coal.* DOE's "Method Report" has determined that coal of the type described in paragraph A.3.a., above, is uncommitted to a specific buyer and will be potentially available to these MFBI's in a nationwide market as follows:

Year:	*Production (1,000 tons)*
1978	124,300
1979	243,100
1980	293,300
1981	350,000
1982	369,900
1983	396,200
1984	475,500

d. *National ESECA prohibition order demand for coal, regardless of characteristics.* The national planned production of characteristic coal, as stated in paragraph A.3.c., above, exceeds potential demand for coal regardless of characteristic expected from this NOI, from all other currently projected industrial candidates for NOI's from all other outstanding notices of intention to issue prohibition orders to date, and from all prohibition orders issued to date under authority of section 2(a) of ESECA. Nation-

MY 3 7 8 UMI

V 4 3 1 8 6 M Y 3 7 8 UMI

al ESECA prohibition order demand as previously stated in paragraph A.2.c., above, is not more than the following ("Methods Report"):

Year:	Demand (thousand tons)
1978	10,050
1979	14,492
1980	21,064
1981	23,807
1982	30,043
1983	30,043
1984	30,043

e. Regional planned production, characteristic coal. Coal with the characteristics described in paragraph A.3.a., above, is uncommitted and will be potentially available to these MFBI's (in a probable regional supply/demand relationship related to the location of these MFBI's) from BOM Districts 9, 10, 11, 12, 14, and 15 as follows ("Methods Report"):

Year:	Production (thousand tons)
1978	37,948
1979	77,249
1980	88,805
1981	106,335
1982	112,249
1983	119,974
1984	146,886

f. Regional ESECA prohibition order demand for coal, regardless of characteristic. The expected regional production of characteristic coal, as stated in paragraph A.3.e., above, exceeds the potential demand for coal regardless of characteristic from BOM Districts 9, 10, 11, 12, 14, and 15 expected to result from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding notices of intention to issue prohibition orders to date, and from all prohibition orders issued to date under authority of section 2(a) of ESECA. This potential regional demand is estimated in DOE's "Methods Report" to be no more than the following:

Year:	Demand (thousand tons)
1978	807
1979	1,218
1980	1,654
1981	2,306
1982	2,306
1983	2,306
1984	2,306

g. Regional ESECA prohibition order demand for coal by sulfur characteristic. The potential regional demand for coal from BOM Districts 9, 10, 11, 12, 14, and 15 with a >2.21 percent sulfur content (which includes the 3.0 percent maximum sulfur content described in paragraph A.3.a., above) resulting from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding notices of intention to issue prohibition orders to date, and from all prohibition orders issued to date under authority of section 2(a) of ESECA is estimated in DOE's "Methods Report" to be no more than the following:

Year:	Demand (thousand tons) percent sulfur>2.21
1978	807
1979	1,218
1980	1,558
1981	1,728
1982	1,728
1983	1,728
1984	1,728

The regional planned production of coal stated in paragraph A.3.e., above, with the characteristics described in paragraph A.3.a., above, far exceeds this potential ESECA regional demand for coal by sulfur characteristic.

4. *State or local laws.*

DOE has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to DOE's attention.

5. *Conclusion.*

DOE's "Methods Report" has identified nationally and in BOM Districts 9, 10,11, 12, 14, and 15 uncommitted coal production that meets the requirements of Chanute 1 and 2 as described in paragraph A.3.a., above, DOE, therefore, proposes to find that this uncommitted coal exists in amounts sufficient in any year to meet the estimated additional demand for coal, both nationally and from these Districts, resulting from this NOI, from all other currently projected industrial candidates for NOI's from all other outstanding notices of intention to issue prohibition orders to date, and from all prohibition orders issued to date under authority of section 2(a) of ESECA.

Coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location from BOM Districts 9, 10, 11, 12, 14, and 15. DOE observes, however, that these MFBI's could purchase coal in other markets as such production becomes available. "The Feasibility of Considering Espanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond," School of Engineering, University of Pennsylvania, November 7, 1975.)

B. *Coal transportation.*

1. *Location of MFBI's and coal supply.*

Based on a DOE study, "Coal Transportation Availability Report," January 1978 (hereafter "Transportation Availability Report)", coal for Chanute 1 and 2 would probably come from Bureau of Mines (BOM) District 15 as a primary source and from BOM District 10 as an alternate source. Other sources of complying coal are available within the United States. However, the following analysis of transportation availability is based on the most likely, or primary, route from the BOM supply areas stated above, as well as on two alternate routes.

2. *Route of coal shipment.*

The primary route for coal delivery to Chanute 1 and 2 is to originate coal in the Pittsburg area, Cherokee County, Kans., in BOM District 15. The Atchison, Topeka and Santa Fe (AT&SF) would deliver to Chanute 1 and 2. The total rail distance is approximately 54 miles.

The alternate route for coal delivery from the primary supply area would originate coal in the Moberly area in Randolph County, Mo., in BOM District 15. Norfolk and Western Railroad (N&W) would move the coal to Kansas City, MO., where the AT&SF would pick up the coal and deliver it to Chanute 1 and 2 via Ottawa, Kans. The total rail mileage is approximately 245 miles.

The alternate route for coal delivery from the alternate supply area would originate coal in Carlinville, Ill., in BOM District 10 from mines served by the Illinois Central Gulf (ICG). ICG would move the coal to St. Louis, Mo., where the St. Louis-San Francisco (SLSF) would pick it up and move it west across Missouri via Springfield, Mo. to Fort Scott, Kans. The SLFS would then move the coal south to Girard, Kans., where AT&SF would pick it up and deliver it to Chanute 1 and 2. The total rail mileage is approximately 467 miles.

3. *Originating trunk carrier.*

The AT&SF, which would originate coal from the primary source, has approximately 5,214 hopper cars with an average capacity of 83 tons. Using an average number of 20 deliveries per year per 83-ton car, the AT&SF might require 44 additional cars by 1980 to handle the increased demand expected from Chanute 1 and 2. The company has indicated that it foresees no difficulty in handling the additional demand.

The N&W, originator on the alternate route of coal delivery from the primary supply area for Chanute 1 and 2, has approximately 54,000 hopper cars with an estimated average capacity of 83 tons. Using an average number of 20 deliveries per year per 83-ton car, the N&W would need 44 additional cars by 1980 to handle the increased demand from Chanute 1 and 2. N&W indicated that the retirements from their hopper fleet are not expected to exceed 1,200 per year and that they have shop capacity to build 1,500 to 5,000 new cars per year, depending on the demand for coal from their supply areas. Shipments would probably be by general train.

The originator of coal for the alternate route from the alternate supply area, ICG, has approximately 12,000 cars with an average capacity of 82 tons. Using an average number of 20 trips per year, the ICG would need 45 additional cars by 1980 to meet the coal demand from Chanute 1 and 2. ICG has indicated there would be no problems in handling the additional business.

DOE had not found nor has it been informed of any apparent constraints to carrying coal for any originating, alternate, or intermediate carriers should they be used.

4. *Destination carrier and plant facilities.* Freight service in the past, including coal deliveries, have been made to Chanute 1 and 2 by AT&SF. It is expected that this mode of transportation would be used in the future and that coal receiving, storage, and handling equipment are now in place or can and will be installed prior to the effective date for coal burning.

5. *Conclusion.* Based on the foregoing analysis, DOE proposes to find that coal transportation facilities will be available for the period a Prohibition Order is expected to be in effect since no major constraints to coal delivery over the primary route to Chanute 1 and 2 presently exist, and alternate routes are available.

[FR Doc. 78-12074 Filed 5-2-78; 8:45]

[3128-01]

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Intention To Issue Prohibition Orders to Certain Major Fuel Burning Installations

The Department of Energy (DOE) hereby gives notice of its intention to issue Prohibition Orders, pursuant to the authorities granted it by section 2 (a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended, and title 10, Code of Federal Regulations (10 CFR), parts 303 and 305 to the following installations:

Docket No.	Owner	Installation	Unit No.	Location
OCU-0514-1	Martin Marietta Corp.	Martin Marietta Cement.	1	Atlanta, Ga.
OCU-0514-2	....do	....do	2	Do.

DOE hereby also gives notice of the opportunity for oral and written presentation of data, views, and arguments by interested persons regarding the proposed Prohibition Orders.

The proposed orders would prohibit the above-named installations from burning natural gas or petroleum products as their primary energy source.

Prior to issuance of a Prohibition Order to an installation, Section 2(a) of ESECA and 10 CFR 303.36(b) and 305.4(b) require that DOE find that the installation had the capability and necessary plant equipment to burn coal as of June 22, 1974, or thereafter acquired or was designed with the capability and necessary plant equipment to burn coal. A Prohibition Order may not be issued unless DOE can find that the prohibition of the utilization of natural gas or petroleum products as a primary energy source is practicable and consistent with the purposes of ESECA and that coal and coal transportation facilities will be available during the period the Prohibition Order will be in effect. DOE's proposed findings, as well as its proposed conclusions and rationale with respect to these findings, for the above-named installations are set out in the Appendix to this notice. These findings, conclusions, and rationale may be amended as a result of comments received by DOE pursuant to this notice and other information available to DOE. The findings, conclusions and rationale will be included, with any amendments, in any Prohibition Order that is issued.

Upon completion of the proceedings described in this notice, DOE may determine to issue Prohibition Orders to both or either one of the above-named installations. The Prohibition Orders will not become effective, however, until (1) either (a) the Administrator of the Environmental Protection Agency (EPA) notifies DOE, in accordance with Section 2 of the Energy Supply and Environmental Coordination Act of 1974 and Section 112(b) of the Clean Air Act (CAA) Amendments of 1977, that the installations are able to burn coal and to comply with all applicable air pollution control requirements without a delayed compliance order under Section 113(d)(5) of the Clean Air Act, as amended, or (b) if such notification is not given by EPA, the date that the Administrator of EPA certifies, pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974 and Section 112(b) of the Clean Air Act Amendments of 1977, is the earliest date that the installations will be able to comply with all applicable requirements of the Clean Air Act, as amended, and (2) DOE has considered the environmental impact of making the orders effective, pursuant to 10 CFR 208.3(a)(4) and 305.9, and has served the affected installations with Notices of Effectiveness, as provided in 10 CFR 303.10(b), 303.37(b) and 305.7. The date the Prohibition Order will be effective will be stated in the Notice of Effectiveness.

10 CFR 305.9 requires that, prior to issuance of a Notice of Effectiveness to an installation, DOE shall perform an analysis of the environmental impact of the issuance of such Notice of Effectiveness. That analysis shall result in either (1) issuance of a declaration that the Prohibition Order will not, if made effective by issuance of a Notice of Effectiveness, be likely to have a significant impact on the quality of the human environment, or (2) the preparation by DOE of an environmental impact statement covering significant site-specific impacts that are likely to result from the Prohibition Order and that have not been adequately addressed in the Final Programmatic Environmental Impact Statement or in other official documents made publicly available. If DOE prepares an environmental impact statement covering significant site-specific impacts resulting from making a Prohibition Order effective, the statement shall be prepared and published for comment in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.) prior to issuance of a Notice of Effectiveness. Interested persons may request a public hearing pursuant to 10 CFR 303.173 to comment on the contents of a draft environmental impact statement. With respect to comments regarding any impact on air quality that might result from a proposed Prohibition Order, however, it should be recognized that ESECA has assigned to EPA the primary responsibility for analyzing the effect of any such order on the Nation's air quality and for determining the applicable air pollution control requirements that apply to the installation that has been issued an order. It is expected that an installation to which a Prohibition Order is issued may be eligible for a delayed compliance order pursuant to Section 113(d) of the CAA, 42 U.S.C. 7413(d). If EPA decides to issue a delayed compliance order, it must also provide an opportunity for a Public Hearing. Enclosed with the Notice of Effectiveness may be a compliance reporting schedule to insure that the installation will be able to comply with the prohibition of the burning of natural gas or petroleum products as a primary energy source on the effective date specified in the Notice of Effectiveness.

Public comment on the proposal to issue Prohibition Orders to the installations listed above is invited in the form of written and oral presentation of data, views and arguments. comments should relate to individual docket numbers and should make clear to which docket number the individual comment is addressed.

Comments should address (1) the adequacy and validity of each of the proposed findings and the conclusions and rationale in support of these findings, (2) the environmental impact of making effective a Prohibition Order, including any site-specific environmental impacts, and (3) any other aspects or impacts of the proposed Prohibition Order believed to be relevant.

Pursuant to 10 CFR 303.173 (a) and (d) and 305.5, DOE hereby announces that a public hearing to receive oral presentation of data, views, and arguments of interested persons will be held beginning at 9:30 a.m., on May 16, 1978, at the Atlanta Civic Center, Room 104, 395 Piedmont Avenue NE., Atlanta, Ga. 30308. Any person who has an interest in the subject of the hearing or who is a representative of a group or class of persons which has an interest in the subject of the hearing may make a written request, or a verbal request if confirmed in writing, for an opportunity to make an oral presentation. That request should be directed to Warren Zurn, DOE Region IV, 1655 Peachtree Street NE., Atlanta, Ga. 30309, 404-881-4463. The request should be received before 4:30 p.m., May 9, 1978. The request should describe the person's interest in the issue(s) involved; if appropriate, it should state why the person is an appropriate representative of the group or class of persons which has such an interest; it should give a concise summary of the proposed oral presentation and a phone number where the person may be contacted through May 15, 1978. Speakers should submit ten (10) copies of their oral presentation if possible, unless such presentation is less than five (5) pages, in which case

V 43 — 86 MY 3 78 UMI

only one copy is required, to Warren Zurn, Department of Energy, Region IV, 1655 Peachtree Street NE., Atlanta, Ga. 30309, before 4:30 p.m., May 12, 1978. Speakers will be contacted by a DOE representative before 4:30 p.m., May 11, 1978, to confirm receipt of the written request.

Detailed technical data, views, and arguments should be contained in a written submission in support of the oral presentation. The oral presentation itself should be a summary of those written comments.

While DOE will endeavor to provide adequate opportunity to all who desire to speak, DOE reserves the right to limit the number of persons to be heard at the hearing, to schedule their respective presentations and to establish the procedures governing the conduct of the hearing. The length of time allocated to each presentation may be limited on the basis of the number or persons requesting to be heard. DOE will prepare an agenda that shall provide, to the extent possible, for the presentation of all relevant data, views, and arguments.

A DOE official will be designated to preside at the hearing which will not be a judicial or evidentiary hearing. During oral presentations only those conducting the hearing may ask questions. There will be no cross-examination. At the conclusion of all initial oral presentations, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit written questions to the presiding officer to be asked of any person making an oral presentation. The presiding officer will determine whether to ask the question, having first determined whether the question is relevant, and whether adequate time may be afforded for an answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and it, together with any written comments submitted in the course of the hearing, will be retained by DOE and made available for inspection and copying at the Freedom of Information Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, and the DOE Regional Office, 1655 Peachtree Street NE., 8th Floor, Atlanta, Ga. 30309, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript from the reporter.

Interested persons are invited to submit written comments consisting of data, views, and arguments with respect to these proposed Prohibition Orders to Public Hearing Management, Box TD, Department of Energy, Room 2313, 2000 M Street NW., Washington, D.C. 20461.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Orders for the Martin Marietta Installations." Fifteen copies should be submitted.

All written comments received by 4:30 p.m., June 5, 1978, all oral presentations, and all other relevant information submitted to or available to DOE will be considered by DOE prior to issuance of a Prohibition Order.

Any information or data considered to be confidential by the person furnishing it must be so identified and submitted in writing in accordance with 10 CFR 303.9(f).

DOE reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

Copies of the regulations implementing section 2 (a) and (b) of ESECA (10 CFR Parts 303 and 305) are available from the following DOE Regional Offices:

REGION I

Robert W. Mitchell, Acting Regional Representative, 150 Causeway Street, Room 700, Boston, Mass. 02114, 617-223-3701.

REGION II

William W. Wood, Acting Regional Representative, 26 Federal Plaza, Room 3206, New York, N.Y. 10007, 212-264-1021.

REGION III

Bernard Snyder, Acting Regional Representative, 1421 Cherry Street, Room 1001, Philadelphia, Pa. 19102, 215-597-3390.

REGION IV

Donald Allen, Acting Regional Representative, 1655 Peachtree Street NE., Eighth Floor, Atlanta, Ga. 30309, 404-526-2837.

REGION V

William Peterson, Acting Regional Representative, Federal Office Building, 175 West Jackson Boulevard, Room A-333, Chicago, Ill. 60604, 312-353-0540.

REGION VI

Curtis E. Carlson, Acting Regional Representative, P.O. Box 35228, 2626 West Mockingbird Lane, Dallas, Tex. 75235, 214-749-7345.

REGION VII

James R. Newman, Acting Regional Representative, 324 East 11th Street, Kansas City, Mo. 64106, 816-374-2061.

REGION VIII

C. Dale Eriksen, Acting Regional Representative, P.O. Box 26247, Belmar Branch, 1075 South Yukon Street, Lakewood, Colo. 80226, 303-234-2420.

REGION IX

William C. Arntz, Acting Regional Representative, 111 Pine Street, San Francisco, Calif. 94111, 415-556-7216.

REGION X

MFBI PROHIBITION ORDER CANDIDATE IDENTIFICATION AND SELECTION METHODOLOGY

Major fuel burning installation (MFBI) Prohibition Order candidates are selected in a two-part process which commenced in 1975 with an identification of the potential universe of MFBI's in order to determine which MFBI's might be subject to such Orders. Analysis of individual potential MFBI Prohibition Order candidates selected from this universe proceeds on a continuous basis.

I. DETERMINATION OF CANDIDATE UNIVERSE

By FEDERAL REGISTER notice of March 20, 1975 (40 FR 12706) MFBI's with design firing rates in excess of 100 MMBTU's per hour were required to provide basic identifying information so that the universe of potential Prohibition Order candidates could be determined. (Regulations published on May 9, 1975 (40 FR 20463) adopted the 100 MMBTU's per hour design firing rate as the minimum size MFBI that would be eligible for a Prohibition Order.)

On April 18, 1975 (40 FR 17328), notice was published in the FEDERAL REGISTER indicating that a questionnaire intitled "Major Fuel Burning Installation Coal Conversion Report" (Form FEA C-602-S-O), would be addressed to each than known MFBI for the purpose of obaining additional information needed to help determine whether the MFBI's would be candidates for Prohibition Orders. Questionnaires were mailed to those MFBI's who responded to the March 20, 1975, FEDERAL REGISTER notice and to other MFBI's identified through data provided by the regional personnel of the Federal Energy Administration, the Environmental Protection Agency (EPA), by other Federal agencies, and through contact with trade associations. A total of 822 parent companies responded to the survey, identifying 3,482 installations and 6,289 individual units.

The initial survey provided historical information on quantity and characteristics of fuel use and preliminary pollution control data relative to the facilities in question.

Compilation and evaluation of this information led to development of a supplemental questionnaire (Form FEA C-602-S-1) to obtain data on the financial condition of owners of MFBI's, including information from which the effects of a Prohibition Order on an individual company basis could be ascertained. Form FEA C-602—S-1 was also designed to provide a basis for subsequent analysis of the MFBI in terms of financial capability, additional capital investment costs resulting from a Prohibition Order, operating cost differentials, and coal transportation availability.

An initial mailing of this supplemental questionnaire was sent in June 1976 to owners of 161 installations encompassing 281 individual units. Most of the supplemental questionnaires (involving 138 installations and covering 246 individual units) were sent to owners of MFBI's identified in the first questionnaires (Form FEA C-602-S-O) as having coal burning capability, and which in 1974 burned at least 150,000 barrels of oil or 921,000,000 cubic feet of natural gas, or a BTU equivalent combination. Those MFBI's identified on the first questionnaires (Form FEA C-602-S-O) as having coal burning capability but which reported fuel consumption of less than 150,000 barrels of oil, or 921,000,000 cubic feet of natural gas, or a BTU equivalent combination in 1974, were not required to complete the supplemental questionnaires at that time, but were deferred in view of the limited resources available to the program office to review the anticipated responses. These MFBI's may be required to submit supplemental information in the future. The 246 individual MFBI's were considered first because of their potential for large fuel savings.

Additional supplemental questionnaires were sent to owners of 23 installations consisting of 35 individual units where the initial questionnaires (Form FEA C-602-S-O) had indicated the MFBI's intention to discontinue use of coal.

In September 1976, following receipt of responses to the supplemental questionnaire, the program office consulted with EPA to obtain their best estimate as to the means by which each reporting MFBI could burn coal while complying with all applicable air pollution control requirements. At that time, EPA indicated whether particular MFBI's would require upgrading or installation of electrostatic precipitators, installation of flue-gas desulfurization devices, or whether the MFBI could burn coal that would conform to air pollution control requirements without pollution control equipment.

II. SITE SPECIFIC ANALYSIS

DOE has continued to collect supplemental data relating to the 161 subject sites and is conducting, on a continuing basis, technical analyses to determine whether individual MFBI's can be considered as potential candidates for issuance of a Notice of Intention (NOI) to issue a Prohibition Order. As part of its individual analyses, DOE considers the following data regarding an MFBI's potential amenability to receipt of an NOI:

(a) The expected remaining useful life of the combustor, including both DOE's and the potential candidate's estimates;

(b) The combustor unit's capacity;

(c) Fuel consumption for 1975 and for other years, where available;

(d) The last year coal was burned by the combustor;

(e) Costs of converting to coal, including pollution control equipment costs, if any, that would be required (potential candidate's and DOE's estimates);

(f) Type of pollution control equipment, if any, required (potential candidate's and EPA's estimates); and

(g) Other relevant factors, such as the percent of sulfur content in coal that would be required to insure compliance with environmental standards.

In June 1977, prior to the issuance of several Prohibition Orders to MFBI's, the program office published in the FEDERAL REGISTER notices setting forth the methodology employed in selecting the initial list of MFBI candidate facilities. The number of potential candidate facilities at that time was a function of two factors: first, the number of potential candidates was limited so as to be commensurate with the resources available to the program office, and second, the largest consumers of oil and natural gas which were potentially convertible to coal as their primary energy source were to be analyzed first, while consideration of the remainder of the original coal-capable universe was deferred.

In June 1977, certain MFBI's were specifically deferred from consideration as potential candidates because (a) their remaining useful life on January 1, 1978, was less than one year; (b) their utilization factor was less than 20 percent; (c) space required for coal use at the installation was inadequate or unavailable; (d) since filing the FEA C-602-S-O, the MFBI had been converted to coal as its primary energy source or the owner had certified that it would be so converted in the near future; (e) the MFBI had used significantly less than 2×10^{12} Btu's of oil or natural gas in the latest year for which fuel data was available, and which if converted to coal, would use less than 100,000 tons of coal annually.

Certain other MFBI's were deferred for other reasons, e.g. the proposed findings required by 10 CFR 305.4 could not be established with the information available at that time. Those MFBI's which were not deferred for any of the foregoing reasons were considered as potential candidates for Prohibition Orders. NOI's were issued where proposed findings were made and Prohibition Orders were issued to those MFBI's for which the proposed findings were perfected.

Since June 1977 the program office was continued to analyze individual MFBI's which were deferred at that time. All MFBI's which have previously received NOI's have been eliminated from further consideration, whether or not a Prohibition Order was subsequently issued. Those MFBI's which are now being reviewed as potential candidates include:

(a) All units which have not previously received NOI's and which were explicitly deferred from consideration in the June 1977 methodology;

(b) All units deferred from consideration as potential candidates for various techinical or other reasons not specifically mentioned in the June 1977 methodology.

DOE has determined that MFBI's to which the following criteria are applicable are appropriately deferred from consideration as Prohibition Order candidates at this time:

(a) The remaining useful life of the MFBI on January 1, 1979, will be less than 1 year;

(b) The utilization factor of the unit is less than 20 percent;

(c) The space required for coal use at the installation is inadequate or unavailable;

(d) Since filing the original questionnaire (FEA C-602-S-O), the MFBI has been converted to coal as its primary energy source, or the owner has certified that the unit will be so converted in the near future;

(e) Compliance with a prohibition order by the MFBI would result in the use of less than 60,000 tons of coal per year.

Items (a) or (b) above would prevent DOE from finding that the burning of coal by the MFBI would be practicable. With respect to criteria (a) specifically, DOE assumes a 40-year useful life for a combustor, based on general industry averages, unless the owner reports a longer useful life. DOE has decided not to analyze MFBI's that have already converted to coal since the basic purposes of ESECA have already been accomplished by such conversions and DOE has concluded that its resources would be better spent by concentrating on those MFBI's which are not now burning coal as their primary energy source and which do not plan to convert within the near future. DOE has deferred MFBI's which do not have the potential for large savings of natural gas or petroleum.

If, upon consideration, DOE determines through analysis of the summary information submitted, that issues have been raised which will require further investigation, DOE has in the past conducted, and will contin-

V 43 | 86 MY 3 78 UMI

ue in the future to conduct site specific visits. Site visits are employed in circumstances in which large discrepancies are observed to exist between DOE's and the MFBI's cost estimate, where unusual technical problems have been presented by the MFBI with respect to using coal and when other disparities exist between the information submitted to DOE by the MFBI and that developed independently by DOE. Information developed during a site visit may serve either as evidence that the combustor should be eliminated or deferred or that the situation warrants DOE's continuation of its analysis.

For MFBI's not eliminated through any of the above criteria, DOE calculates the net operating cost differential between using coal as the MFBI's primary energy source and using either natural gas or petroleum products.

A. *Calculation of net operating cost differential.* The net operating cost differential consists of the sum of: (1) Annualized increased capital investment costs required for conversion to coal, (2) differences in operating and maintenance costs (including the fuel cost differential), and (3) the potential tax consequences attendant to conversion. Initially, DOE performs calculations in determining the net operating cost differential, using cost figures supplied by the MFBI and using DOE's own estimates. When the MFBI's figures are within a reasonable range of DOE's estimates, DOE generally accepts the MFBI's figures. Gross discrepancies are examined in more detail by DOE to determine the reasonableness of the differing estimates and to reconcile differences.

The elements of the three parts of the net operating cost differential are explained below:

1. *Capital investment costs.* The primary element in this part of the cost of equipment acquisition and refurbishment required for conversion to coal, including refurbishment or acquisition of pollution control equipment. In determining the estimated annual increase in fixed costs to the owner resulting from such capital investment, DOE calculates the annual depreciation of equipment costs over the expected remaining useful sevice life of the MFBI (including consideration of the investment tax credit) and adds the estimated annual cost of capital.

Annual depreciation is calculated as follows:

a. Determine cost of new equipment (including pollution control equipment) minus investment tax credit of 10 percent.

b. Divide the figure in a., above, by the expected remaining useful life of the MFBI after conversion is completed.

DOE presumes that the MFBI's determination of remaining useful life is correct if it results in a total useful life of at least 40 years. Otherwise, DOE will conduct a more detailed examination of the MFBI.

Calculation of the approximate annual cost of capital is as follows:

a. New and refurbished equipment costs minus the investment tax credit, plus

b. Twice the cost of land acquisitions required for conversions to coal burning.

c. The total of a. and b. is divided by 2 and then multiplied by a 10-percent interest rate.

2. *Operating and maintenance costs.* The primary factor considered in this calculation is the annual fuel cost differential which represents the difference between operating the MFBI with coal as its primary energy source in lieu of petroleum products or natural gas. (If the current supply of natural gas to the MFBI is curtailed, then the calculation of the fuel cost differential does not include natural gas as part of the MFBI's current fuel use to the extent of that curtailment. In such cases the NOCD is calculated on the basis of actual fuel usage.) DOE has generally accepted the coal price reported by the MFBI's. If DOE considered the stated price to be unreasonable, it further examined coal prices based upon an analysis of likely coal sources. Projected coal use after conversion was calculated by converting latest annual fuel use data to its BTU equivalent for coal.

Determination of the differential relating to labor costs and the differential relating to other operating and maintenance costs was based upon estimates supplied by the MFBI's.

3. *Potential tax effects.* Federal and State tax rates have been applied to the net operating cost differential to determine maximum potential tax effects resulting from a prohibition order.

If the NOCD for an MFBI is positive, i.e., projects an increase in annual costs, then a calculation of the cost per barrel of oil saved is performed by dividing the NOCD by the number of barrels of oil actually used on an annual basis (or, if the MFBI was a natural gas user, the number of barrels of oil which would be required to replace the gas use on an equivalent BTU basis). This figure (cost per barrel of oil saved) is then considered in terms of the number of barrels of oil and/or MCF of natural gas that would be saved by issuance of a prohibition order, the effect of the NOCD on the MFBI owner's operating expenses, as well as various environmental and other factors in reaching the final determination as to which candidates should receive an NOI.

It is to be noted that much of the information used by DOE to make its practicability findings is arguably confidential under 18 U.S.C. 1905. Therefore, such information has not appeared in the appendix to the NOI. The calculations have been explained in each case and the data are available to the representatives of the owner of the MFBI.

The decision whether to issue an NOI is made as the calculations and analyses described above are completed. Following the issuance of an NOI, are hearings and a comment period designed to elicit data, views, and arguments pertinent to the findings ESECA requires DOE to make prior to the issuance of a prohibition order. If no reason not to issue an order is presented to or discovered by DOE, a prohibition order is issued to the candidate.

Any questions regarding this Notice should be directed to DOE National Headquarters as follows: Mr. Walter Romanek, Director, Division of Coal Utilization, Department of Energy, Code OCU (Prohibition Orders: Martin Marietta Corp., Martin Marietta Cement, Atlanta, Ga., Installations, Docket Nos. OCU-0514-1 and 0514-2), Washington, D.C. 20461, telephone 202-254-3910.

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 et seq.), as amended by Pub. L. 95-70; Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.), as amended by Pub. L. 95-70; Department of Energy Organization Act (Pub. L. 95-91); E.O. 11790 (39 FR 23185); EO 12009 (42 FR 46267).)

Issued in Washington, D.C., April 27, 1978.

BARTON R. HOUSE,
Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

APPENDIX

PROPOSED FINDINGS AND RATIONALE FOR NOTICE OF INTENTION TO ISSUE PROHIBITION ORDERS

ESECA and DOE regulations implementing the statute (10 CFR 303 and 305) require DOE to make certain findings before issuing a Prohibition Order to a major fuel burning installation (MFBI).[1] DOE's proposed findings are set out below with respect to the MFBI's named below. Supporting rationale and conclusions are also set forth.

Docket No.	Owner	Installation	Unit No.	Location
OCU-0514-1	Martin Marietta Corp.	Martin Marietta Cement.	1	Atlanta, Ga.
OCU-0514-2	do	do	2	Do.

[1]Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 pursuant to the Department of Energy Organization Act, from the Federal Energy Administration to the Department of Energy.

These findings, which are now proposed by DOE, are based on the information that has been provided to and developed by DOE prior to the issuance of this Notice of Intention (NOI) to issue Prohibition Orders.

Martin Marietta Corp. shall be referred to as the "owner" and as "Martin Marietta." Martin Marietta Cement Units 1 and 2 shall be referred to as the "MFBI's" and as "Martin Marietta 1 and 2."

I. *Capability and necessary plant equipment to burn coal.* DOE proposes to find that on June 22, 1974, Martin Marietta 1 and 2 had, or thereafter acquired or were designed with, the capability and necessary plant equipment to burn coal. This proposed finding is based on the facts and interpretations stated below:

A. Martin Marietta, in a major fuel burning installation coal conversion report, section II, questions 6, and 12-14 (Form FEA C-602-S-0), dated may 19, 1975, indicated that the MFBI's had in place on June 22, 1974, kilns that were capable of burning coal. The kilns had been designed and constructed or modified to burn coal as their primary energy source, notwithstanding the fact that on June 22, 1974, and thereafter, these MFBI's may not have burned coal as their primary energy source.

B. Based on information Martin Marietta filed with DOE dated July 22, 1976, and other information available to DOE, the following plant equipment and facilities at Martin Marietta 1 and 2 would have to be acquired or refurbished in order for these MFBI's to burn coal as their primary energy source: 1. Unloaders. 2. Conveyors. 3. Railroad track system.

C. DOE proposes to find that on June 22, 1974, Martin Marietta 1 and 2 had or thereafter acquired all other significant plant equipment and facilities associated with the burning of coal.

D. Within the meaning of ESECA and regulations promulgated pursuant thereto, the absence of any one or a combination of the equipment or facilities listed in paragraph B, above, is not grounds for concluding that Martin Marietta 1 and 2 lacked the capability and necessary plant equipment to burn coal on June 22, 1974, or were not designed with, or did not thereafter acquire, such capability.

II. *The burning of coal in lieu of natural gas or petroleum products is practicable and consistent with the purposes of ESECA.* DOE proposes to find that the burning of coal in lieu of petroleum products or natural gas at Martin Marietta 1 and 2 is practicable and consistent with the purposes of ESECA. This proposed finding is based upon an analysis by DOE of the fuel consumption of these kilns for the period 1973-1975, the remaining useful service life of the kilns after conversion, the net operating cost differential that would result from compliance with prohibition orders, as well as the facts and interpretations referenced below:

A. *The burning of coal is practicable.*—1. *Anticipated fuel supplies, curtailment of natural gas supply.* Based on information obtained from the Federal Energy Regulatory Commission, the natural gas supplier, and in certain cases the owner, DOE believes that the MFBI's will experience a substantial curtailment of their present supply of natural gas. This curtailment will result in their increased reliance on alternate fuels.

2. *Costs associated with burning coal.*—a. *Capital investment costs.* The total estimated initial capital investment costs, including financing costs, that would result from the acquisition and refurbishment of equipment and facilities associated with the burning of coal at Martin Marietta 1 and 2 have been determined.

This determination was based on existing DOE information and analysis as well as information filed with DOE by the owner. Approximate costs to comply with applicable environmental protection requirements have also been considered, including the cost of compliance with the air pollution control requirements of the Clean Air Act.

b. *Annual operating and maintenance costs.* The expected increase in operating and maintenance costs, exclusive of fuel costs, that would result from the burning of coal has been calculated based on information supplied by the owner or otherwise acquired by DOE.

c. *Fuel costs.* Based on an analysis of annual fuel consumption and fuel cost information supplied by the owner and/or, in appropriate circumstances, upon DOE's fuel cost estimates, DOE has determined that the burning of coal in lieu of natural gas at Martin Marietta 1 and 2 will result in an increase in annual fuel costs.

d. *Net operating cost differential.* Based on the factors stated in paragraphs A.2.a.–c., above, as well as the expected remaining useful life of the kilns after conversion, DOE has determined that the net annual operating cost differential ("NOCD") (which represents the difference between operating the kilns with coal and alternate fuel(s) as their primary energy source), resulting from the conversion of Martin Marietta 1 and 2 will represent an annual cost increase of $433,338.

3. *Reasonableness of costs of conversion.* The following analysis of the costs of conversion provides the basis for deciding that compliance with the proposed orders is not unreasonable.

In calculating the NOCD, DOE considered the present annual fuel usage. The net annual operating cost increase for these MFBI's resulting from operating on coal as the primary energy source, instead of natural gas, will be approximately $433,338.

Although conversion to the burning of coal would be expected to increase the costs incurred by Martin Marietta 1 and 2 by $433,338 per year, DOE proposes to find that such increased cost, per MCF of natural gas saved is not unreasonable, given the purposes of ESECA. This determination is based on consideration of the substantial potential natural gas savings that would result from conversion to coal. The determination that the costs of burning coal instead of natural gas would not be unreasonable is further supported by consideration of such costs in relation to the expected remaining useful life of the MFBI's, the size and resources of the owner as examined in the following discussion of financial capability, and the nature of the expected operations of the MFBI's.

The additional costs that would be incurred if DOE were to prohibit the burning of natural gas or petroleum products as the primary energy source at Martin Marietta 1 and 2 would only be incurred for a limited period of time in view of the anticipated availability of national reserves of and productive capacity for natural gas. These factors point up the likelihood that Martin Marietta 1 and 2 will experience a significant curtailment of its present natural gas supply in the future, so that DOE has concluded that the cost of burning coal in lieu of natural gas is not unreasonable. (*Final Report Oil and Gas Resources, Reserves, and Productive Capacities Volumes I and II*, Federal Energy Administration, October 1975.)

4. *Financial capability of the owner.*—a. *Recovery of capital investment.* DOE proposes to find that compliance with Prohibition Orders by Martin Marietta 1 and 2 would be economically feasible. DOE's analysis took into consideration the financial capability of the owner and is based upon the owner's financial position as reported in Moody's Industrial Manual. Where necessary, DOE performed an independent analysis of the owner's financial capability, considering such factors as the owner's current financial statement and the additional capital investment required for the owner to comply with this NOI and all other NOI's which are currently under consideration, as well as additional capital investment costs related to all other outstanding Notice of Intention, to date, if any, to issue Prohibition or Construction Orders, and from all Prohibition or Construction Orders, if any, issued to date under authority of Section 2 (a) and (c) of ESEDA to MFBI's owned by Martin Marietta. DOE related these additional capital investment costs to the total capitalization of Martin Marietta and the remaining useful life after conversion of Martin Marietta 1 and 2.

DOE does not consider the effect of the added capital investment costs to represent an unreasonable burden given the financial capabilities of Martin Marietta to assume such costs.

b. *Total annual costs associated with conversion.* The total estimated annual increase in costs (amortized increased capital investment costs and other costs, exclusive of fuel costs) associated with the burning of coal as opposed to natural gas attributable to compliance with this NOI and all other NOI's which are currently under consideration has been determined. DOE has also taken into consideration total annual costs resulting from compliance with all other outstanding Notices of Intention, to date, if any, to issue Prohibition or Construction Orders, and from all Prohibition or Construction Orders, if any, issued to date under authority of Section 2 (a) and (c) of ESECA to Martin Marietta MFBI's.

Martin Marietta's total annual costs after conversion will increase by $433,338.

B. *Consistency with the purposes of ESECA.* Because the issuance of Prohibition Orders to Martin Marietta 1 and 2 will discourage the use of natural gas or petroleum products and encourage the increased use of coal, DOE proposes to conclude that this action would be consistent with the purposes of ESECA to provide a means to assist in meeting the essential needs of the United States for fuels.

On the basis of the environmental analysis which DOE is required to conduct prior to issuance of a Notice of Effectiveness of a

V 4 3 1 8 6

Prohibition Order, as well as the necessity for these MFBI's to comply with the Clean Air Act and other applicable environmental protection requirements, DOE proposes to conclude that Prohibition Orders to Martin Marietta 1 and 2 would be consistent with the purposes of ESECA to provide for a means to assist in meeting the essential needs of the United States for fuels in a manner which is consistent, to the fullest extent practicable, with existing national commitments to protect and improve the environment.

III. COAL AND COAL TRANSPORTATION FACILITIES WILL BE AVAILABLE TO THESE MFBI'S DURING THE PERIOD UNTIL DECEMBER 31, 1984.

A. *Coal availability*—1. *National coal reserves.* United States coal reserves are more than sufficient to supply national needs for the foreseeable future. U.S. Department of the Interior, Bureau of Mines (BOM) data show a demonstrated coal reserve base of over 400 billion tons, over half of which is currently technically and economically recoverable (*Demonstrated Coal Reserve Base of the United States, by Sulfur Category, on January 1, 1974*, Bureau of Mines (May 1975) (hereafter "BOM Survey")). Within these recoverable reserves approximately 100 billion tons contain 1 percent or less sulfur by weight. To determine when certain quantities of these reserves are expected to be available, DOE has examined several studies referenced herein, which together provide the best current evidence as to coal availability for the period ending December 31, 1984.

2. *National coal production and demand.* The comparison, stated below, of estimated national coal production, national coal demand, and the total tonnage of uncommitted planned national coal production (derived from responses to a survey of coal producing companies) shows that there should be sufficient production of coal to meet the total national demand through 1980. Beyond 1980 DOE does not have data fully developed for new production plans because few coal producers have firm expansion plans that extend that far into the future. The statistics supporting more recent mine developments and enumerating updated data are currently in the process of revision.

a. *National coal production.* It is conservatively estimated that it will be possible to produce coal nationally in at least the following quantities:

Year:	*Production potential (million tons)*
1978	791.6
1979	851.4
1980	911.7
1981	960.0
1982	994.3
1983	1,017.4
1984	1,028.7
1985	1,029.6

The figures shown above are derived from FEA's *Coal Mine Expansion Study* (May 1976). This study demonstrates that most coal producers did not have firm or accurate plans for new capacity additions beyond 1980. The 1985 projection, therefore, tends to underestimate actual production potential. Another FEA study, "Availability of Potential Coal Supply Through 1985 by Quality Characteristics," August 1976 (hereafter "Coal Market Survey") and a DOE Study, "Coal Availability by Characteristics for Fuel Conversion Orders," April 17, 1978, indicate current plans for nationwide production of uncommitted coal as follows:

Year:	*Production (million tons)*
1978	124.3
1979	243.1
1980	293.3
1981	350.0
1982	369.9
1983	396.2
1984	475.5
1985	544.9

b. *National coal demand exclusive of ESECA prohibition order demand.* The estimated national demand, excluding any increased demand resulting from DOE action under the authority of Section 2(a) of ESECA, is as follows (*FEA 1976 National Energy Outlook*):

Year:	*Demand (million tons)*
1978	730
1979	764
1980	799
1981	842
1982	887
1983	935
1984	985
1985	1,040

c. *National ESECA prohibition order demand.* The estimated potential demand for coal resulting from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding Notices of Intention to issue Prohibition Orders to date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA is approximately the following (*Coal and Transportation Availability for Major Fuel Burning Installations Coal Conversion Orders: Methods and Approach*, May 20, 1977, as amended April 10, 1978) (hereafter "Methods Report"):

Year:	*Demand (million tons)*
1978	10.050
1979	14.492
1980	21.064
1981	23.607
1982	30.043
1983	30.043
1984	30.043

3. *Characteristic coal production and demand.* FEA's "Coal Market Survey" identifies coal of specific quality characteristics available for use at these MFBI's. The survey is based on data from 31 mining companies that supplied useful information on 96 mining units. Responses from these companies identified planned production of coal which was not committed to a specific buyer. For those companies which did not respond to the survey, FEA estimated their uncommitted planned production based on their 1974 production.

a. *Characteristic coal requirements for these MFBI's.* DOE has determined that kilns of the type used at Martin Marietta 1 and 2 will be able to burn coal of the following characteristics and comply with all applicable air pollution control requirements.

Btu's per pound (minimum)	12,500
Ash (percent, maximum)	8
Volatile (minimum percent)	30
Ash softening temperature (°F) (minimum)	2,200
Sulfur (percent, maximum) (approximate)	2.5

b. *Characteristic coal demand from these MFBI's.* The potential demand for coal, of the type described above, which would be used by these MFBI's is estimated to be as follows:

Year:	*Demand (thousand tons per year)*
Year: 1979 (and after)	84.27

c. *National planned production, characteristic coal.* DOE's "Methods Report" has determined that coal of the type described in paragraph A.3.a., above, is uncommitted to a specific buyer and will be potentially available to these MFBI's in a nationwide market as follows:

Year:	*Production (thousand tons)*
1978	124,300
1979	243,100
1980	293,300
1981	350,000
1982	369,900
1983	396,200
1984	475,500

d. *National ESECA prohibition order demand for coal, regardless of characteristics.* The national planned production of characteristic coal, as stated in paragraph A.3.c., above, exceeds potential demand for coal regardless of characteristic expected from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding Notices of Intention to issue Prohibition Orders to date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA. National ESECA Prohibition Order demand as previously stated in paragraph A.2.c., above, is not more than the following ("Methods Report"):

Year:	*Demand (thousand tons)*
1978	10,050
1979	14,492
1980	21,064
1981	23,607
1982	30,043
1983	30,043
1984	30,043

e. *Regional planned production, characteristic coal.* Coal with the characteristics described in paragraph A.3.a., above, is uncommitted and will be potentially available to these MFBI's (in a probable regional supply/demand relationship related to the location of these MFBI's) from BOM Districts 7, 8, and 13 as follows ("Methods Report"):

Year:	*Production (thousand tons)*
1978	26,934
1979	52,077
1980	58,396
1981	67,882
1982	71,985
1983	77,668
1984	89,345

f. *Regional ESECA prohibition order demand for coal, regardless of characteristic.* The expected regional production of characteristic coal, as stated in paragraph A.3.e., above, exceeds the potential demand for coal regardless of characteristic from BOM Districts 7, 8, and 13 expected to result from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding Notices of Intention to issue Prohibition Orders to

date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA. This potential regional demand is estimated in DOE's "Methods Report" to be no more than the following:

Year:	*Demand (thousand tons)*
1978	2,767
1979	5,374
1980	9,733
1981	10,994
1982	14,979
1983	14,979
1984	14,979

g. *Regional ESECA prohibition order demand for coal by sulfur characteristic.* The potential regional demand for coal from BOM Districts 7, 8, and 13 with a >2.21 percent sulfur content (which includes the 2.5 percent maximum sulfur content described in paragraph A.3.a., above) resulting from this NOI, from all other currently projected industrial candidates for NOI's from all other outstanding Notices of Intention to issue Prohibition Orders to date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA is estimated in DOE's "Methods Report" to be no more than the following:

Year:	*Demand (thousand tons) percent sulfur, >2.21*
1978	0
1979	199
1980	345
1981	421
1982	421
1983	421
1984	421

The regional planned production of coal stated in paragraph A.3.e., above, with the characteristics described in paragraph A.3.a., above, far exceed this potential ESECA regional demand for coal by sulfur characteristec.

4. *State or local laws.* DOE has found no state or local laws or policies limiting the extraction or utilization of coal that would adversely affect these production figures, and none have been brought to DOE's attention.

5. *Conclusion.* DOE's "Methods Report" has identified nationally and in BOM Districts 7, 8, and 13 uncommitted coal production that meets the requirements of Martin Marietta 1 and 2 as described in paragraph A.3.a., above. DOE, therefore, proposes to find that this uncommitted coal exists in amounts sufficient in any year to meet the estimated additional demand for coal, both nationally and from these Districts, resulting from this NOI, from all other currently projected industrial candidates for NOI's, from all other outstanding Notices of Intention to issue Prohibition Orders to date, and from all Prohibition Orders issued to date under authority of Section 2(a) of ESECA. Coal for these MFBI's will probably be bought from producers according to regional supply/demand relationships related to the MFBI's location from BOM Districts 7, 8, and 13. DOE observes, however, that these MFBI's could purchase coal in other markets as such production becomes available. (*The Feasibility of Considering Expanded Use of Western Coal by Midwestern and Eastern Utilities in the Period 1978 and Beyond*, School of Engineering, University of Pennsylvania November 7, 1975.)

B. *Coal transportation.*—1. *Location of MFBI's and coal supply.* Based on a DOE study, *Coal Transportation Availability Report*, January 1978, (hereafter *Transportation Availability Report*) coal for Martin Marietta 1 and 2 would probably come from Bureau of Mines (BOM) District 8 both as a primary source of supply and as the alternate supply area. Other sources of complying coal are available within the United States. However, the following analysis of transportation availability is based on the most likely, or primary, route from the BOM suply area stated above, as well as on two alternate routes.

2. *Route of coal shipment.* The primary route for coal delivery to Martin Marietta 1 and 2 is to originate in the Corbin, Kentucky area, BOM District 8, on the Louisville and Nashville Railroad (L&N) which would move it via Knoxville, Tenn. to Atlanta, Ga. Total rail mileage is approximately 300 miles.

The alternate route for coal delivery from the primary supply area would originate coal in the Madisonville, Kentucky area on the L&N which would carry it via Nashville, Tenn. to Chattanooga, Tenn. Central of Georgia Railroad Co. (CGA, a part of Southern Railway Co., SOU) would pick it up there and move it via Rome, Ga. to Atlanta, Ga. Total distance is 406 miles by rail.

The alternate route for coal delivery from the alternate supply area would originate coal in the Devon, W. Va. area in BOM District 8 on the Norfolk and Western Railroad (N&W) line. N&W would move the coal east to Martinsville, Va. and south to Winston-Salem, N.C. where Southern Railway would pick it up and move it via Charlotte, N.C. to Greeville, S.C. and west to Atlanta, Ga. Total mileage is approximately 648 miles by rail.

3. *Originating trunk carrier.* The L&N, originator of coal on the primary route and one alternate route for Martin Marietta 1 and 2, has about 34,000 hopper cars with an estimated average capacity of 75 tons. Using an average number of 20 deliveries per year per 75-ton car, the L&N would need 56 additional cars by 1979 to handle the increased demand of Martin Marietta 1 and 2. Between January 1975 and January 1976, L&N has increased total coal carrying capacity by about 10 percent and intends to expand its capacity to the level needed to handle new business. The shipment would probably be done by general train.

The N&W, originator of coal on the alternate route from the alternate supply area, has approximately 54,000 hopper cars with an estimated average capacity of 83 tons. Using an average number of 20 deliveries per year per 83-ton car, the N&W would need 51 additional cars by 1979 to handle the increased demand from Martin Marietta 1 and 2. The N&W indicated that the retirements from their hopper fleet are not expected to exceed 1,200 per year and that they have shop capacity to build between 1,500 and 5,000 new cars per year, depending on the demand for coal from their supply areas. Shipments would probably be by general train.

DOE has not found nor has been informed of any apparent constraints to carrying coal for any originating, alternate, or intermediate carriers should they be used.

4. *Destination carrier and plant facilities.* The company has indicated coal has been delivered to Martin Marietta 1 and 2 in the past L&N and the Southern Railway and it is expected that this mode of transportation would be used in the future. The owner reported that storage capacity for coal was acquired in 1975. The anticipated effective date of the proposed Prohibition Orders allow sufficient time to add coal handling and receiving equipment and a railroad track system.

5. *Conclusion.* Based on the foregoing analysis, DOE proposes to find that coal transportation facilities will be available for the period a Prohibition Order is expected to be in effect since no major constraints to coal delivery over the primary route to Martin Marietta 1 and 2 presently exist, and alternate routes are available.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 890-4; PF-99]

PESTICIDE AND FOOD/FEED ADDITIVE PETITIONS

Filing

Pursuant to the provisions of sections 408(d)(1) and 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration

PP 8F2070. Monsanto Agricultural Products Co., 800 North Lindbergh Boulevard, St. Louis, Mo. 63166. Proposes that 40 CFR 180.364 be amended by the establishment of a tolerance for the combined residues of the herbicide glyphosate [N-(phosphomomethyl)glycine] and its metabolite aminomethylphosphonic acid in or on the raw agricultural commodity asparagus at 0.2 part per million (ppm). Proposed analytical method for determining residues is by gas liquid chromatography using a phosphorous specific flame photometric detector. PM 25. (202-426-2632)

FAP 8H5182. Mobay Chemical Corp., Chemagro Agricultural Division, P.O. Box 4913, Hawthorn Road, Kansas City, Mo. 64120. Proposes that 21 CFR 193 be amended by the establishment of a regulation permitting the use of the insecticide *O*-ethyl *O*-[4-(methylthio)-phenyl] *S*-propyl phosphorodithioate and its cholinesterase-inhibiting metabolites on the commodity cottonseed oil with a tolerance limitation of 1.0 ppm resulting in food. PM12. (202-426-9425)

FAP 8H5182. Mobay Chemical Corp. Proposes that 21 CFR 561 be amended by the

M Y 3 7 8 UMI

V 4 3 — 8 6

establishment of a regulation permitting the use of the insecticide *O*-ethyl *O*-[4-(methylthio)phenyl] *S*-prophyl phosphorodithioate and its cholinesterase-inhibiting metabolites on the commodity cottonseed hulls with a tolerance limitation of 1.0 00m resulting in feed. PM12.

Interested persons are invited to submit written comments on these petitions to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street SW., Washington D.C. 20460. Inquiries concerning these petitions may be directed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at the numbers cited. Written comments should bear a notation indicating the petition number to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8.30 a.m. to 4 p.m. Monday through Friday.

Dated: April 25, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FR Doc. 78-11977 Filed 5-2-78; 8:45 am]

[6730-01]

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before May 15, 1978. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No.: T-3640.

Filing party: Frederick M. Lowther, Counsel, Dickstein, Shapiro & Morin, 2101 L Street NW., Washington, D.C. 20037.

Summary: Agreement No. T-3640, between Mitsui & Co. (U.S.A.), Inc., (Mitsui), and Cook Industries, Inc., Bayside Warehouse Co. and St. John Shipping Co., Inc., (Sellers), is an Asset Purchase Agreement whereby, subject to the terms and conditions set forth in the agreement, Mitsui agrees to purchase the grain storage and handling facility and related assets from Sellers located in Reserve, La.

Dated: April 27, 1978.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-12045 Filed 5-2-78; 8:45 am]

[6730-01]

[Independent Ocean Freight Forwarder License No. 466]

B. H. SOBELMAN & CO., INC.

Reinstatement of License

By Federal Maritime Commission Order served and published in the FEDERAL REGISTER, B. H. Sobelman & Co., Inc.'s Independent Ocean Freight Forwarder License No. 466 was revoked, effective January 11, 1978, for failure to maintain a valid surety bond on file with the Commission. The Order of Revocation was served on January 23, 1978.

An appropriate surety bond has been received in favor of B. H. Sobelman & Co., Inc. and compliance pursuant to Section 44, Shipping Act, 1916, and Section 510.9 of the Commission's General Order 4 has been achieved.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01(a), dated August 8, 1977, Independent Ocean Freight Forwarder License No. 466R shall be reissued to B. H. Sobelman & Co., Inc. effective January 16, 1978. A copy of this Notice of Reinstatement shall be published in the FEDERAL REGISTER and served upon B. H. Sobelman & Co., Inc.

ROBERT M. SKALL,
Deputy Director, Bureau of
Certification and Licensing.

[FR Doc. 78-12043 Filed 5-2-78; 8:45]

[6730-01]

[Independent Ocean Freight Forwarder License No. 1325]

C. & J. FORWARDING INC.

Order of Revocation

On April 20, 1978, C. & J. Forwarding Inc., 8697 21st Avenue, Brooklyn, N.Y. 11214, voluntarily surrendered its Independent Ocean Freight Forwarder License No. 1325 for revocation.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 1325, issued to C. & J. Forwarding Inc., be and is hereby revoked effective May 13, 1978 without prejudice to reapply for a license in the future.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon C. & J. Forwarding Inc.

ROBERT M. SKALL,
Deputy Director, Bureau of
Certification and Licensing.

[FR Doc. 78-12041 Filed 5-2-78; 8:45 am]

[6730-01]

[Independent Freight Forwarder License No. 648]

GATEWAY SHIPPING CO., INC.

Reinstatement of License

By Federal Maritime Commission Order served and Published in the FEDERAL REGISTER, Gateway Shipping Co., Inc.'s Independent Ocean Freight Forwarder License No. 648 was revoked effective March 22, 1978, for failure to maintain a valid surety bond on file with the Commission. The Order of Revocation was served on April 5, 1978.

An appropriate surety bond has been received in favor of Gateway Shipping Co., Inc., effective March 22, 1978, and compliance pursuant to Section 44, Shipping Act, 1916, and Section 510.9 of the Commission's General Order 4 has been achieved.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission Order No.201.1 (Revised) Section 5.01(a) dated August 8, 1977, Independent Ocean Freight Forwarder License No. 648 shall be reissued to Gateway Shipping Co., Inc., effective March 22, 1978. A copy of this notice of reinstatement shall be published in the FEDERAL REGISTER and served upon Gateways Shipping Co., Inc.

For the Commission.

ROBERT M. SKALL,
Deputy Director, Bureau of
Certification and Licensing.

[Docket No. 78-13]

OLD BEN COAL CO. v. SEA-LAND SERVICE, INC.

Filing of Complaint

Notice is hereby given that a complaint filed by Old Ben Coal Co. against Sea-Land Service, Inc. was served April 25, 1978. Complainant alleges that it has been subjected to the payment of charges for services which are unjustly discriminatory or prejudicial in violation of Section 17 of the Shipping Act, 1916. The charges were assessed for reworking of overloaded containers and for demurrage which accrued while they were being reworked.

Hearing in this matter, if any is held, shall commence on or before October 25, 1978. The hearing shall include oral testimony and cross-examination in the descretion of the presiding officer only upon a showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statement, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

PRIVACY ACT OF 1974

Deletion of Systems of Records

AGENCY: Department of Health, Education, and Welfare.

ACTION: Notification of termination or deletion of systems of records which were last published in the FEDERAL REGISTER, vol. 41, No. 183, September 20, 1976, on the pages indicated below.

SUMMARY: 1. The following system notice has been deleted because it duplicates a system being reported by the Coast Guard under system notice DOT/CG 572:

HSA/BMS 0032.01, PHS Beneficiary (Coast Guard) Contract Medical Care Records (page 40924).

2. The following system notices have been deleted because they were consolidated into a single notice, 09-35-0034, Health Manpower.

Inventories and Surveys (National Center for Health Statistics): HRA/BHM 0004.01, National Register of Dentists (page 40889); HRA/BHM 0036.01, National Register of Licensed Dental Hygienists (page 40899).

3. The following system notices have been deleted because the systems are no longer in use:

HRA/BHM 0008.01, Dental Patient Records (page 40891); CDC/NIOSH 0037.01, Toll Booth Operators Exposed to Auto Exhausts (page 40831); CDC/NIOSH 0072.02, Biodynamics of Lifting in the Sagittal Plane (page 40849); CDC/NIOSH 0081.01, Metabolic Costs and Physiological Response to Heat in Lab Studies (page 40853); CDC/NIOSH 0124.01, Mortality of Dairymen (page 40873); CDC/NIOSH 0128.01, Development of Biologic Standards by Breath Analysis (page 40875).

4. The following system notices have been deleted because records are no longer retrieved by personal identifier:

HRA/BHM 0010.01, Survey of Non-Licensed Dental Personnel (page 40891); HRA/BHM 0029.01, Operation MEDIHC (page 40897); NIH/NCL 0167.01, Administration: Visitor Location (page 40945); NIH/NCI 0293.02, Clinical Research: Urinary Steroid Levels in Breast Cancer Patients (page 40959); NIH/NICHD 0006.02, Contract Administration (page 40926).

5. The following system notice has been deleted because management of the system has been transferred from the Health Resources Administration to the National Institutes of Health, where it has been subsumed under system notice 09-25-132, Research Studies Dealing with Prevention of Dental Carries, Plaque, and Gingivitus:

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[Dockets 350- C and D]

THREE AFFILIATED TRIBES OF FORT BERTHOLD RESERVATION

Plan for the Use and Distribution of Judgment Funds Awarded Before the Indian Claims Commission

APRIL 21, 1978.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary for Indian Affairs by 210 DM 1.2.

The Act of October 19, 1973 (Pub. L. 93-134, 87 Stat. 466), requires that a plan be prepared and submitted to Congress for the use and distribution of funds appropriated to pay a judgment of any Indian tribe. Funds were appropriated by the Act of June 1, 1976, 90 Stat. 629, in satisfaction of the awards granted to the Three Affiliated Tribes of the Fort Berthold Reservation in Indian Claims Commission Dockets 350- C and D. The plan for the use and distribution of the funds was submitted to the Congress with a letter dated November 9, 1977, and was received (as recorded in the Congressional Record) by the House of Representatives on November 15, 1977, and by the Senate on November 29, 1977. Neither House of Congress having adopted a resolution disapprov-

V 43 | 86 MY 3 78 UMI

ing it, the plan became effective on March 13, 1978, as provided by section 5 of the 1973 Act, supra.

The plan reads as follows:

The funds appropriated by the Act of June 1, 1976, 90 Stat. 629, in satisfaction of awards granted to the Three Affiliated Tribes in Dockets 350- C and D before the Indian Claims Commission, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be utilized as herein provided.

Per Capita Payment Aspect

The Three Affiliated Tribes' latest approved membership roll shall be brought current to include all eligible members born on or prior to and living on the effective date of this plan. Subsequent to the preparation and approval of the membership roll, the Secretary of the Interior (hereinafter 'Secretary') shall make a per capita distribution of eighty (80) percent of the funds, in a sum as equal as possible, to each tribal enrollee.

The per capita shares of living competent adults shall be paid directly to them. The per capita shares of legal incompetents shall be handled pursuant to 25 CFR 104.5. The per capita shares of minors shall be handled pursuant to 25 CFR 60.10 (a) and (b)(1) and 104.4, as amended November 5, 1976 (41 FR 48735, 48736). The per capita shares of deceased individual beneficiaries shall be determined and distributed in accordance with 43 CFR, part 4, subpart D.

The per capita shares of adults who are determined by the tribal governing body and the Agency Superintendent to be in arrears in debts to the tribe shall be placed in individual Indian money (IIM) accounts. Subsequent to the placement of such shares in IIM accounts, the Agency Superintendent shall have authority to collect all or part of such shares and apply the collections to the payment of the delinquent debts pursuant to 25 CFR 104.9.

Programing Aspect

Twenty (20) percent of the funds, and any amounts remaining after the per capita payment provided above, shall be invested by the Secretary and the interest and investment income accrued shall be utilized on an annual budgetary basis, subject to the approval of the Secretary, for the following purposes:

1. *Scholarship Fund.*—Three (3) percent of the annual income shall be utilized to fund graduate and post-graduate studies in the fields of medicine, law, and the physical sciences, including engineering.

2. *Farmers Home Administration Loan.*—Fourteen (14) percent of the annual income shall be applied to the principal of the tribal loan for a land purchase program under the Farmers Home Administration. Subsequent to the payment of the loan in full, this portion of the annual income shall continue to be utilized in the Tribal Land Purchase Program.

3. *Community Development.*—Thirty-five (35) percent of the annual income shall be divided on a local resident tribal member basis among the five reservation communities or segments for community development projects as approved by the tribal governing body.

4. *Tribal Administration.*—Forty-eight (48) percent of the annual income shall be utilized for tribal attorneys' fees and expenses and for the payment of insurance premiums on tribal property.

Should any funds in any of the above-cited program categories not be needed or be found in excess of programing goals in any given annual budget, such funds may be transferred by the tribal governing body, with the approval of the Secretary, to another of the above-cited program categories.

RICK LAVIS,
Deputy Assistant Secretary, Indian Affairs.

Bureau of Land Management

[Colorado 26349]

MOUNTAIN FUEL SUPPLY CO.

R/W Application for Pipeline

Effective Date: April 26, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449), as amended (30 U.S.C. 185), Mountain Fuel Supply Co., 180 East First South, Salt Lake City, Utah 84139, has applied for a right-of-way for a 3½" o.d. surface lateral natural gas pipeline approximately 0.41 of a mile long for the Sugar Loaf State Land Well No. 1, across the following Public Lands:

SIXTH PRINCIPAL MERIDIAN, MOFFAT COUNTY, COLO.

T. 11 N., R. 101 W.,
Section 4: Lot 5
T. 12 N., R. 101 W.
Section 33:SE¼SE¼

The facilities will enable the applicant to convey natural gas from Sugar Loaf State Land Well No. 1 to meet customer demand for increased natural gas supply in the applicant's service area. The purposes for this notice are: (1) To inform the public that the Bureau of Land Management is proceeding with the preparation of environmental and other analytic reports necessary for determining whether or not the application should be approved and if approved, under what terms and conditions; (2) to give all interested parties the opportunity to comment on the application; (3) to allow any party asserting a claim to the lands involved or having bona fide objections to the proposed natural gas gathering system to file its claim or objections in the Colorado State Office. Any party so filing must include evidence that a copy thereof has been served on Mountain Fuel Supply Co.

Any comment, claim, or objections must be filed with the Chief, Branch of Adjudication, Bureau of Land Management, Colorado State Office, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, as promptly as possible after publication of this notice.

ANDREW W. HEARD, JR.,
Leader, Craig Team, Branch of Adjudication.

NATIONAL COMMISSION ON NEW TECHNOLOGICAL USES OF COPYRIGHTED WORKS

MEETING

The National Commission on New Technological Uses of Copyrighted Works (CONTU) will hold its 22d meeting in Minneapolis, Minn., on Thursday, May 18, and Friday, May 19, 1978.

The meetings will be held in the Dean's Conference Room at the University of Minnesota Law School, 229 19th Avenue South, Minneapolis and will convene at 2 p.m. on Thursday and 9:30 a.m. Friday. The Commission will be considering the reports of the Photocopy and New Works Subcommittees on Thursday and will discuss the Final Report on Friday.

Both sessions will be open to the public.

ARTHUR J. LEVINE,
Executive Director, National Commission on New Technological Uses of Copyrighted Works.

[FR Doc. 78-12021 Filed 5-2-78; 8:45 am]

[7555-01]

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE FOR SCIENCE EDUCATION

Amendment to Notice of Meeting

The notice of meeting for the Thirty-Eighth Meeting of the Advisory Committee for Science Education, which was published in the FEDERAL REGISTER on April 14, 1978, 43 FR 15809, has been amended to read:

Agenda: Thursday, May 4: Update on FY 1979 Budget Hearings; Status of NSF/NIE Collaborative Research Program; Oversight Activities—General Discussion and Meetings of Subcommittees.

Friday, May 5: Reports of Oversight Subcommittees; General Discussion of Subcommittee Reports; Meetings of Oversight Subcommittees to Plan Further Work.

M. REBECCA WINKLER,
Committee Management Coordinator.

APRIL 28, 1978.

[FR Doc. 78-12025 Filed 5-2-78; 8:45am]

[7590-01]

NUCLEAR REGULATORY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE DAVIS BESSE NUCLEAR POWER STATION, UNITS 2 AND 3

Meeting

The ACRS Subcommittee on the Davis Besse Nuclear Power Station will hold a meeting on May 18, 1978, in Room 1046, 1717 H Street NW., Washington, D.C. 20555 to review the application of the Toledo Edison Co. for a permit to construct Units 2 and 3 of this Station.

In accordance with the procedures outlined in the FEDERAL REGISTER on October 31, 1977, page 56972, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

THURSDAY, MAY 18, 1978

8:30 a.m. until the conclusion of business

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, the Toledo Edison Co., and their consultants, pertinent to this review.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with subsection 10(d) of Pub. L. 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Ragnwald Muller, telephone 202-634-1413, between 8:15 a.m. and 5 p.m., e.s.t.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street NW., Washington, D.C. 20555 and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

Dated: April 27, 1978.

JOHN C. HOYLE,
Advisory Committee, Management Officer.

[FR Doc. 78-11884 Filed 5-2-78; 8:45 am]

[7590-01]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

Revised Notice of Meeting

The meeting notice for the meeting previously scheduled on May 4-6, 1978 (published on April 19, 1978—FEDERAL REGISTER, Volume 43, p. 16575) is revised as detailed below. This revision incorporates schedule changes due to the cancellation of the sessions for the Maine Yankee Atomic Power Station and Indian Point Nuclear Generating Station, Unit 3. The changes include cancellation of the session on Saturday, May 6, 1978.

The agenda for the subject meeting will be as follows:

THURSDAY, MAY 4, 1978

8:30 a.m.—9 a.m.: Executive Session (Open)—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

9 a.m.—10:30 a.m.: Report on DOE Task Force Report on Review of Nuclear Waste Management (DOE/ER-0004/D) (Open)—The Committee will hear and discuss a report by representatives of the Department of Energy regarding plans for interim storage and long-term disposal of radioactive wastes.

10:45 a.m.—12 Noon: Executive Session (Open)—The Committee will hear and discuss reports of Subcommittees, Working Groups, and members on a number of generic matters related to reactor safety including procedures for review of proposed operations at increased power levels, ACRS comments regarding the establishment of a quasi-judicial board to investigate reactor accidents, and calculation of off-site consequences from large atmospheric releases of radioactivity. Qualifications of candidates proposed for appointmnet to the Committee will also be discussed. The Committee will discuss a proposed report to the Nuclear Regulatory Commission regarding the Liquid Pathway Generic Study.

This session will be open to the public except for those portions which must be closed to protect information the release of which would represent an unwarranted invasion of personal privacy.

1 p.m.—2:30 p.m.: Executive Session (Open)—The Committee will discuss matters for the meeting with the NRC Commissioners including the following matters:

Review of proposed nuclear plant operations at "stretch" power.

ACRS consideration of the establishment of a statutory quasi-judicial board for investigation of reactor accidents.

ACRS Fellowship Program.

Evaluation of the effects of low-level radiation on nuclear plant workers and the general public in the vicinity of reactors.

Proposed use of nuclear plantsite comparisons based on calculations of the consequences of large releases of radioactive materials.

Candidates for appointment to the ACRS.

Portions of this session will be closed as required to protect information the release of which would represent an unwarranted invasion of personal privacy.

2:30 p.m.—3:30 p.m.: Meeting with NRC Commissioners (Open)—The Committee will meet with the NRC Commissioners to discuss the items noted above. Portions of this session will be closed as required to protect information the release of which would represent an unwarranted invasion of personal privacy.

3:30 p.m.—5 p.m.: Executive Session (Open)—The Committee will hear and discuss reports of ACRS Subcommittee activity regarding Anticipated Transients Without Scram, reevaluation of NRC siting policies and practices, and Regulatory Activities.

The Committee will also discuss a proposed ACRS report to the Nuclear Regulatory Commission regarding the Liquid Pathway Generic Study.

FRIDAY, MAY 5, 1978

8:30 a.m.—12:30 p.m.: Meeting with NRC Staff (Open)—The Committee will hear presentations from and hold discussions with members of the Nuclear Regulatory Commission Staff regarding recent licensing actions and operating experience including environmental evaluation of the Floating Nuclear Plant, review of proposed safe shutdown system for the Oconee Nuclear Plant, and review of LNG storage facilities at a site near the Calvert Cliffs Nuclear Plant. The NRC Staff will also report to the ACRS on generic matters related to nuclear powerplant safety including criteria for combination of seismic and other dynamic loads, proposed reliability data collection system for nuclear powerplants, proposed revision of 10 CFR Part 100, Appendix A; Seismic Considerations, and regulatory/safety practices and policies in the Union of Soviet Socialist Republics. The future schedule for ACRS activities and topics proposed for consideration by the Committee will also be discussed.

1:30 p.m.—4 p.m.: Executive Session (Open)—The Committee will complete preparation of its reports to the NRC regarding the Liquid Pathway Generic Study.

The Committee will discuss reports of its members regarding miscellaneous ACRS ac-

V 43 | 86

tivities such as proposed reorganization of ACRS Subcommittees and Working Groups and proposed meetings of the ACRS with members of the FRG Reactor Safety Committee and the Groupe Permanent of the Republic of France.

The Committee will complete its consideration of items discussed during this meeting.

Procedures for the conduct of and participation in ACRS meetings were outlined in the FEDERAL REGISTER on October 31, 1977, page 56972. In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

I have determined in accordance with Subsection 10(d) of Pub. L. 92-463 that it is necessary to close portions of the meeting to protect information the release of which would represent an unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)). Separation of factual information from information considered exempt from disclosure during closed portions of the meeting is not considered practical.

Background information concerning items to be considered during this meeting can be found in documents on file and available for public inspection in the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statments and the time allotted therefor can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, 202-634-1371, between 8:15 a.m. and 5 p.m. e.s.t.

Dated: May 1, 1978.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc. 78-12172 Filed 5-2-78; 8:45 am]

[7590-01]

[Dockets Nos. 50-269, 50-270, and 50-287]

DUKE POWER CO., OCONEE NUCLEAR STATION, UNITS NOS. 1, 2, and 3

Order for Modification of License

I. The Duke Power Co. (the licensee), is the holder of Facility Operating Licenses Nos. DPR-38, 47, and 55, which authorize the operation of the nuclear power reactors known as Oconee Nuclear Station, Units Nos. 1, 2, and 3 (the facility), at steady reactor power levels not in excess of 2,568 megawatts thermal (rated power) for each unit. The facility consists of Babcock & Wilcox Co. designed pressurized water reactors (PWR) located at the licensee's site in Oconee County, S.C.

II. In accordance with the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR 50.46, the licensee submitted on July 9, 1975, an ECCS evaluation for the facility. The ECCS performance submitted by the licensee was based upon an ECCS Evaluation Model developed by the Babcock & Wilcox Co. (B&W), the designer of the Nuclear Steam Supply System for this facility. The B&W ECCS Evaluation Model had been previously found to comform to the requirements of the Commission's ECCS Acceptance Criteria, 10 CFR part 50.46 and appendix K. The evaluation indicated that with the limits set forth in the facility's technical specifications, the ECCS cooling performance for the facility would conform with the criteria contained in 10 CFR 50.46(b) which govern calculated peak clad temperature, maximum cladding oxidation, maximum hydrogen generation, coolable geometry and long-term cooling.

On April 12, 1978, B&W informed the NRC that it had determined that in the event of a small break LOCA on the discharge side of a reactor coolant pump, high pressure injection (HPI) flow to the core could be reduced somewhat. Subsequent calculations indicated that in such a case the calculated peak clad temperature might exceed 2200F.

Previous small break analyses for B&W 177 fuel assembly (FA) lowered loop plants had identified the limiting small break to be in the suction line of the reactor coolant pump. Recent analyses have shown that the discharge line break is more limiting than the suction line break.

Each Oconee Nuclear Station unit has an ECCS configuration which consists of two high pressure injection (HPI) trains which are supplied by three HPI pumps. Each train injects into two of the four reactor coolant system (RCS) cold legs on the discharge side of the RCS pump.

The two parallel HPI trains are connected but are kept isolated by manual valves (known as the cross-over valves) that are normally closed.

Duke Power has proposed to maintain all three pumps in an operable status. The Oconee emergency power system is designed with sufficient capacity for this mode of operation. Upon receiving a safety injection signal the HPI pumps are started and valves in the injection lines are opened. Assuming loss of offsite power and the worst single failure (the HPI pump C or the HPI valve HP26), two HPI pumps would still be available and only one of the two injection valves would fail to open.

If a small break is postulated to occur in the RCS piping between the RCS pump discharge and the reactor vessel, the high pressure injection flow injected into this line (about 50 percent of the output of two high pressure pumps) could flow out the break. Therefore, for the worst combination of break location and single failure, 50 percent of the flow rate of two high pressure ECCS pumps would contribute to maintaining the coolant inventory in the reactor vessel. This situation had not been previously analyzed and B&W had indicated that the limits specified in 10 CFR 50.46 may be exceeded.

B&W has stated that they have analyzed a spectrum of small breaks in the pump discharge line and have determined that to meet the limits of 10 CFR 50.46 operator action is required to open the two manual operated crossover valves and to manually align the motor driven isolation value which had failed to open. This would allow the flow from the two HPI pumps to feed all four reactor coolant legs. B&W has assumed that 30 percent of the flow would be lost through the break and 70 percent would refill the core. The licensee has committed to provide for the necessary operator actions within the required time frame. That is, in the event of a small break and a limiting single failure, manual action will be taken to begin opening these valves within 5 minutes and have them fully opened and an adequate flow split obtained within the following 10 minutes. The analyses performed by B&W assumed that the flow split was established at 650 seconds by operator action. We conclude that the analyses are a reasonable approximation of the operator action that actually will be taken, provided specific procedures are prepared and followed to assure such action.

B&W has stated that a .15 ft.^{2} discharge line break, with the aforementioned operator actions, is the most limiting case. To arrive at this conclusion, B&W has performed analyses at break sizes of .3, .2, .15, .1, and .04 ft.^{2}, using an approved appendix K model for blowdown. Additional analyses for the Oconee plants at 2,568 Mwt indicate no core uncovery for the 0.15 ft.^{2} limiting break. For this break size B&W has conservatively estimated the peak clad temperature to be well below the limits of 10 CFR 50.46(b).

B&W has indicated the manner in which the calculational methods have been revised and has indicated that their revised calculations are wholly in conformance with the requirements of 10 CFR 50.46. However, B&W has not yet had the opportunity to fully present the result of its calculations to the licensee for submittal to the NRC staff, and the staff has accordingly not had the opportunity to fully assess the new calculations.

Therefore, until the staff has had the opportunity to fully assess the B&W revised calculations operation in accordance with the operating procedures specified in this order, will assure that the ECCS will conform to the performance requirements of 10 CFR 50.46(b). Accordingly, such procedures provide reasonable assurance that the public health and safety will not be endangered. Upon notification by the NRC staff, the licensee committed to provide the staff with B&W's reevaluation of ECCS performance applicable to the licensee's facility as promptly as possible, and to submit a technical specification requiring appropriate operating procedures to assure required operator action as discussed herein. Such procedures were described and the commitments confirmed by the licensee's letter of April 21, 1978. The staff believes that the licensee's action, under the circumstances, is appropriate and that this action should be confirmed by NRC order. Upon satisfactory completion of our assessment of the revised evaluation, we will accordingly modify the authorization to operate the facility.

Copies of the following document are available for inspection at the Commission's Public Document Room at 1717 H Street, Washington, D.C. 20555, and are being placed in the Commission's local public document room at the Oconee County Library, 201 South Spring, Walhalla, S.C. 29691.

(1) Letter from Mr. William O. Parker, Jr. to Mr. Edson G. Case, Acting Director, Office of Nuclear Reactor Regulation, dated April 21, 1978.

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR parts 2 and 50, *It is ordered* That Facility Operating Licenses Nos. DPR-38, 47, and 55, are hereby amended by adding the following new provisions:

(1) As soon as possible, the licensee shall submit a reevaluation wholly in conformance with 10 CFR 50.46 of ECCS cooling performance calculated in accordance with the B&W Evaluation Model for operation with operating procedures described in its letter of April 21, 1978, and

(2) Until further authorization by the Commission, the licensee shall operate in accordance with the procedures described in its letter of April 21, 1978.

Dated at Bethesda, Md., this 26th day of April 1978.

For the Nuclear Regulatory Commission.

VICTOR STELLO, Jr.,
Director, Division of Operating Reactors, Office of Nuclear Reactor Regulation.

[NUREG-0450]

MATERIAL CONTROL AND MATERIAL ACCOUNTING TASK FORCE REPORT

Availability

This is to announce that an NRC staff Task Force Report on Material Control and Material Accounting is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, Washington, D.C., and at the Commission's Local Public Document Rooms.

The Task Force was chartered to do the following:

1. Define the roles and objectives of material control and material accounting in the NRC safeguards program;

2. Recommend goals for licensee material control and material accounting systems;

3. Assess the extent to which the current regulatory base meets the proposed goals; and

4. Provide direction for material control and material accounting development, including both near and long-term upgrades.

The scope of the report is limited to licensees possessing significant amounts of strategic special nuclear material (SSNM) in unsealed form.

The Task Force found that the primary role of material control should be to provide continual cognizance of status of nuclear material and that the primary role of material accounting should be to provide long-term assurance that material is present in assigned locations and in correct amounts.

The material control goals developed by the Task Force emphasize timely detection of the loss of five formula kilograms of SSNM through shift item checks, tight custodial control, and the use of process information for safeguards. The material accounting goals emphasize trend analysis of cumulative inventory differences and shipper-receiver differences, and improved measurement and record systems.

The Task Force recommends promulgation of a two-phased Material Control and Material Accounting Upgrade Rule based upon subsequent value-impact analysis of the proposed goals. The Task Force also recommends that action criteria (investigation, reinventory, shutdown) or inventory differences be based upon detecting with high probability the loss of a fixed quantity (5 formula kilograms) of material, rather than upon a percentage of throughput.

As part of its consideration process, the Commission invites the views of the public. All interested persons who desire to submit written comments on the report and its recommendations should send them by July 15, 1978 to the Director, Division of Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the comments received in response to this notice will be placed in the Commission's Public Document Room in Washington, as received.

The report consists of an Executive Summary (7 pages), a Summary (34 pages) and three other volumes (totaling 434 pages). Single copies of the Executive Summary and the Summary, or of the entire report, may be obtained without charge, to the extent of supply, by writing to the Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

After the existing stock is exhausted, copies are available from the National Technical Information Service, Springfield, Va. 22161, at current rates.

Dated at Silver Spring, Md., this 24th day of April 1978.

For the Nuclear Regulatory Commission.

ROBERT F. BURNETT,
Director, Division of Safeguards

[7590-01]

RISK ASSESSMENT REVIEW GROUP

Meeting

Pursuant to the Federal Advisory Committee Act (Pub L. 92-463), notice is hereby given of a 2-day open meeting of the Risk Assessment Review Group of the U.S. Nuclear Regulatory Commission (NRC), to be held at 8:30 a.m., on May 23 and 24, 1978, in Room 1167 of 1717 H Street NW., Washington, D.C. The purposes of this meeting are to continue the review of the final report of the Reactor Safety Study (WASH-1400) and the peer comments thereon and to discuss subjects that might be included in the report of the Review Group. This meeting may be extended a day or so if deemed necessary by the Chairman.

The Risk Assessment Review Group is an independent group established by the NRC (42 FR 34955) for the purpose of providing advice and information to the Commission regarding the final report of the Reactor Safety Study, WASH-1400 (NUREG-75/014), and the peer comments on the study, advice, and recommendations on developments in the field of risk assessment methodology and courses of action
